PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

SENATE—*Wednesday, August 16, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. HARRY F. BYRD, JR., a Senator from the State of Virginia.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

And above all put on love, which binds everything together in perfect harmony.—Colossians 3: 14.

Eternal Father, the strength of our lives from generation to generation, our morning prayer ascends from grateful hearts and wistful spirits. Enter Thou our hearts and in this one fleeting moment make us deeply aware of Thy presence. Assure us that with Thy help we are ready for every responsibility this day brings.

Make our hearts Thy dwelling place. Cast out everything which obstructs Thy presence. Fill our hearts with love that there may be no room for hate or jealousy or resentment. Fill our minds with truth that there may be no room for falsehood. May Thy grace so abide in our souls that the time of prayer and the time of work may be indistinguishable.

When the shadows of evening fall upon us, give us a consciousness of work well done for our fellow man.

We pray in His name who went about doing good. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 16, 1978.

To the Senate:

Under the provisions of rule I, section 3 of the Standing Rules of the Senate, I hereby appoint the Honorable HARRY F. BYRD, JR., a Senator from the State of Virginia, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. HARRY F. BYRD, JR., thereupon assumed the chair as Acting President pro tempore.

THE JOURNAL

Mr. MORGAN. Mr. President, I ask unanimous consent that the Journal of yesterday be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from North Carolina (Mr. MORGAN) is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MORGAN. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may proceed for 1 minute, the time not to be charged against the time of the Senator from North Carolina.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER TO CONVENE AT 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes tomorrow, it convene at 9:30 a.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CIVIL SERVICE COMPLIANCE WITH COURT ACTION IN CONNECTION WITH FEDERAL EMPLOYEES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1006.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 8771) to amend title 5, United States Code, to authorize the Civil Service Commission to comply with the terms of a court decree, order, or property settlement in connection with the divorce, annulment, or legal separation of a Federal employee who is under the civil service retirement system, and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, marriage is a partnership in which each spouse makes a unique and vital contribution. Each spouse has a right in the earnings of the other, in the property acquired with those earnings and in the management of such property. This right should be recognized as surviving the marriage in event of its termination by divorce, annulment, or legal separation. Under existing law, payments under the civil service retirement system are not assignable or subject to execution, attachment, or garnishment, except as may be provided by Federal laws. Due to this provision, court orders, decrees or property settlements are not honored by the Civil Service Commission.

I thus support H.R. 8771. This bill will give the Civil Service Commission the authority to comply with the terms of a valid State court decree, order, or property settlement in connection with the divorce, annulment, or legal separation of a Federal employee who is entitled to payments under the civil service retirement system. This bill will not only eliminate the obstacles presented by existing law to the enforcement of State court decrees, but it will reinforce what is already the law in many jurisdictions of this country.

As a future note, I hope that in an upcoming session we will be able to expand on this initiative so that survivor benefits may also be made available to a spouse after a marriage has been dissolved.

H.R. 8771 is a definite beginning step in bringing justice and attention to a group that is often ignored. I commend the chairman of the Subcommittee on Civil Service and General Services, Senator SASSER, for his diligence in pursuing a solution to this problem.

The bill (H.R. 8771) was ordered to a third reading, read a third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1084), explaining the purposes of the measure.

There being no objection, the excerpt

was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 8771 is to authorize the Civil Service Commission to comply with the terms of a court decree or property settlement in connection with the divorce, annulment, or legal separation of an employee who is entitled to payments under the civil service retirement system.

BACKGROUND

H.R. 8771, authorizes the Civil Service Commission to comply with the terms of a valid State court decree, order, or property settlement in connection with the divorce, annulment, legal separation of a Federal employee who is entitled to payments under the civil service retirement system.

Under existing law (5 U.S.C. 8346(a)), payments under the civil service retirement system are not assignable or subject to execution, levy, attachment, garnishment, or other legal process, except as may be expressly provided by Federal laws. Public Law 93-647 permits the garnishment of civil service annuity payments but only when necessary to enforce court-ordered child-support or alimony payments.

Approximately 4 million individuals rely on the civil service retirement system for retirement benefits. However, the retirement system fails to provide economic protection to the former spouse of a Federal employee. Such a failure, in many cases, leaves the dependent spouse with no direct retirement benefits despite many years of working without compensation, managing a home, raising children, and contributing time and effort to the joint marital enterprise.

In 1965, Congress amended the Social Security Act to provide that a former spouse who had been married for a least 20 years is entitled to a pro rata share of the social security recipient's annuity. The 95th Congress Public Law 95-216 which amended this provision by lowering the 20 years to 10 years of marriage.

In recent years, many State courts have ruled that future retirement benefits earned during a marriage should be considered an asset of the marriage to be apportioned in the event of a legal separation, divorce, or annulment. H.R. 8771 will authorize the Civil Service Commission to recognize such court rulings and comply with court determinations.

In the committees' view, the enactment of legislation which permits Federal cooperation with State law and court orders is clearly needed. The committee shares the opinion of the Civil Service Commission that H.R. 8771 is the proper approach to the problem of benefits for former spouses.

FREEDOM AND SCIENTIFIC RESEARCH

Mr. MORGAN. Mr. President, freedom is the cornerstone on which this Nation is built. Anything that threatens that freedom challenges the welfare of us all.

The issue regarding the research undertaken by the Director of the smoking and health program at the National Cancer Institute is one of freedom—freedom to investigate, freedom to publish, and freedom to discuss the results.

Freedom should prevail regardless of the popularity or unpopularity of the scientific findings.

Freedom should not be denied because of the consequences of research may deviate from the official party line.

Freedom should not be suspended because the ego of a Secretary of Health, Education, and Welfare is wounded.

In the end, freedom must prevail or we all suffer.

In the present case, a director of a program at the National Cancer Institute has been suspended from his role of heading the Institute's smoking and health program. The timing of this decision strikes me as being rather unusual. I simply cannot believe that it is coincidental that the individual who headed the smoking and health program, Dr. Gio Batta Gori, is about to publish an article in the Journal of the American Medical Association that demonstrates that the American tobacco industry has made great strides in reducing the alleged risk of cigarette smoking. Also, I cannot believe that it is coincidental that the Secretary of Health, Education, and Welfare, Joe Califano, has launched a vigorous campaign directed at eliminating tobacco from American life.

Mr. President, it is important that we examine exactly who Dr. Gori is before we evaluate this particular situation. I believe that it is fair to say that Dr. Gori is a distinguished scientist, an assessment supported by the fact that he was honored with the Institute's Superior Service Award just 2 short years ago.

Dr. Gori's research is based on the assumption that individuals will smoke tobacco regardless of governmentally designed disincentives or prohibitions. What Dr. Gori's decade of research confirms is that the cigarettes that are on the market today are not the same as those cigarettes that existed just a few years ago.

Many representatives of tobacco producing States, including this Senator, have been assured by industry that there is a concerted effort to reduce tar and nicotine levels in smoking, an effort that has been confirmed by Dr. Gori's research.

It is my understanding that Dr. Gori has been replaced in his responsibilities because of a reorganization that is designed to give prominence to basic research over applied research.

Reorganization, we know too well, is a convenient device for getting rid of those we do not like. In thinking of this situation, I am reminded of the words of Adlai Stevenson:

A free society is one where it is safe to be unpopular.

I suppose this so-called reorganization would have merit if it could be demonstrated to me beyond a doubt that Dr. Gori would, in his new role, undertake equally important and time-consuming responsibilities. Unfortunately, such does not seem to be the case. On the contrary, Dr. Gori has been relieved of responsibilities that have over the years come to consume one-third of his time without any compensating new assignments.

When President Carter visited North Carolina recently, he called for research "to make the smoking of tobacco even more safe than it is today." His critics immediately jumped on this statement as scientifically unsubstantiated and simply "politically clever." But, for the past decade, such research has been underway, under the direction of Dr. Gori. Now it seems that the President's own Secretary of Health, Education, and Welfare is participating in undercutting the scientific basis of the President's statement in order to defend his own personal war against tobacco.

Mr. President, the removal of Dr. Gori from the smoking and health program threatens us all. It is a challenge to the scientific community, a community that can only thrive in an atmosphere free from tyranny. I would like to assure my colleagues that I will do everything in my power as a representative of the people of North Carolina and the Nation to assure that this important program continue under the leadership of Dr. Gori.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. MORGAN. I am happy to yield.

Mr. HELMS. Mr. President, I commend my distinguished colleague from North Carolina, and I want him to know that this Senator from his State will join him in protecting Dr. Gori from what obviously is an arrogance of power.

We have had quite enough, Mr. President, of assaults on clear scientific evidence about tobacco and the total ignoring of facts on the other side. As the Senator knows, we have a splendid research facility at Oxford, N.C., which has made great strides in the exploration of the potential of tobacco as a source of protein to feed a hungry world, and yet in all of the assaults on tobacco one seldom sees, if ever, any reference to what is being done by the industry in terms of not only making tobacco safe but also making of it a potential source of food.

The attack on Dr. Gori is reprehensible and I say again to my colleague from North Carolina that I will join him in protecting this man's right to speak the truth, the scientific truth as he finds it.

I commend him on his comments.

Mr. MORGAN. I thank my distinguished colleague.

Mr. President, I should say that four of the five research programs at the Oxford Research Center that the Senator alluded to are primarily related to health research.

Mr. HELMS. That is correct.

Mr. MORGAN. Mr. President, I yield the floor and yield back the remaining portion of my time.

Mr. HELMS. Mr. President, I wonder if the Senator will yield me 2 minutes of his time?

Mr. MORGAN. I am happy to yield 2 minutes of my time to my colleague from North Carolina.

The ACTING PRESIDENT pro tempore. The Senator from North Carolina (Mr. HELMS).

Mr. HELMS. I thank my able colleague from North Carolina.

NATIONAL KNITWEAR MANUFACTURERS ASSOCIATION

Mr. HELMS. Mr. President, a good friend of mine. Mr. W. David Stedman, recently delivered a speech to a convention held by the National Knitwear Manufacturers Association of which he serves as vice chairman. Mr. Stedman is president of Stedman Corporation of Asheboro, N.C.

I am very proud of David Stedman for the work he has done and continues to do in behalf of the free enterprise system and the American businessman. David knows that competition and the freedom of the individual to achieve made America the greatest Nation on Earth, and he wants it to stay that way.

David Stedman understands the need for less Government control of private business and realizes that free enterprise is capable of solving problems that the Federal Government cannot solve.

Mr. Stedman, in his speech, charges that American businessmen have been sleeping while labor unions have gradually taken control of industry. He then makes suggestions to his colleagues for remedying this unfortunate situation, suggestions, Mr. President, that I hope everyone will take to heart so that the United States will not steer itself along England's sad course.

Mr. President, I commend Mr. Stedman's speech to my colleagues. It is the kind of message that America desperately needs to hear—and heed.

Mr. President, I ask unanimous consent that Mr. Stedman's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY W. DAVID STEDMAN

Several months ago, I received a letter from a friend of many years standing in Bolton, England. He and his brother were formerly in the knitwear manufacturing business . . . the same as we are. Our friendship grew through the years and there has been mutual visitation in our respective homes. He said in this letter to be sure and come to see them while they could still make us comfortable in their home and before they had to move into a wigwam or wherever it is that natives live. Later on, he repeated his invitation by saying, "Please come and bring Sarah before England sinks beneath the waves."

This was spoken by a man who has spent 13 years as a member of Parliament and who only a year or so before had finished a term as president of the Liberal Party of England, a party which holds the balance of power between the Conservatives and Labor, neither one of which has a majority of its own. Here is a message of utter despondency from a man who has lived through the rigors of a declining textile industry and who has been a vital political servant to his vanishing country. Can you imagine what state of mind you must be in to write a letter like that? It is really so very sad when you think of it. And England over whose empire the sun never set now reduced to a small island off the coast of the European continent. It has all happened in the space of perhaps 100 years.

Now let's look at America. In just 400 years we have built the greatest nation, the greatest technological society the world has ever known. We have done something in only 400 years that the Chinese have been unable to do in 10,000 years, the Egyptians in 7,000 years, and the Greeks in 5,000 years. We have built a far superior society in only 1/20 of the time. Now what has made this possible? Unquestionably, it is the free enterprise system which has made it possible for the free spirits of individuals to operate on their own and essentially without limits. But now this great system that made all this possible is being closed down. Not all of a sudden, but gradually. We are in the process of killing the goose that has been laying all those golden eggs.

How long will it take to change what once was the private free enterprise system in this country to a system of state control or national socialism? Well, that's a little difficult to answer. It is quite clear, however, that the direction in which we are traveling will eventually result in the death of the free enterprise system.

Let's take a look at a few developments:

(1) Our total government debt in this country at all levels already is 1½ times our total assets.

(2) Our federal debt now stands at $700 billion and is growing at the rate of $1 billion a week.

(3) Interest on the federal debt is now the third largest item in the budget.

(4) According to the Commission on Federal Paperwork, government agencies print about 10 billion sheets of forms per year to be filled out by business.

(5) In one year there were issued over 57,000 pages of new regulations on business.

(6) We think of America as the great innovator, the great producer, but since 1960, of 8 major industrialized nations, the U.S. has ranked last in growth of productivity measured in terms of output per man hour.

(7) Over 40% of the income of the American people is now spent by civil servants at all government levels. In that sense, we're already 40% socialized.

I could go on and on with such facts, but I hope these are enough to make my point. You may remember a few years ago when Mr. Khrushchev took off his shoe in the United Nations and pounded it on the table and said, "We will bury you." If the Russians will just leave us alone, we will bury ourselves. Based on current trends, it will require our country another 20 to 25 years to get in the condition of England. But who wants to be like England?

Now who is to blame for all of this? Many of us blame the Liberals who, no doubt, have instituted many of the governmental controls while working toward the equality, of shall I say, the mediocrity of everybody. They certainly are skilled in dividing up the pie; the only trouble is that they have no idea how to bake it. But don't blame the Liberals. They are doing their thing, and they're doing it exceptionally well. They believe in what they are doing, and they back up their beliefs with a lot of very aggressive action.

Other people blame Labor. But we can't really blame Labor, because Labor is doing its thing, and it, too, is doing it exceptionally well.

Still others blame the bureaucrats. But, don't blame the bureaucrats because, again, the bureaucrats are doing their thing exceptionally well.

Guess who's been asleep? You and I and our counterparts by the tens of thousands, all across this country—the business people—are the ones who have been asleep. We have sat by and allowed this thing to happen and as a group, we have been indifferent; we have been apathetic; yes, we have been asleep! Now, there are many notable exceptions to this—perhaps some of you here, certainly Heath Larry, head of NAM, which is doing a beautiful job—but what I have said is still true for the great mass of business people across this country.

To put it another way, we have been so busy tending to our own little business that we have not realized the void we have left on the other side. As a result of this vacuum we have created, others of different faith have rushed in to fill it. Our problem is that we don't want to get involved. We don't like politics. We don't want to take on extracurricular responsibility. We don't really want to carry the inherent responsibility of being a first-class citizen, if I may put it that way. No, we just want to tend to our own knitting and hope that everybody else will leave us alone.

But the shocking truth is that they are not going to let us alone! They have not let us alone for the past 45 years in this matter and that is why we find ourselves in this position today. It's the case of the tortoise and the hare all over again. We have been over in the bushes asleep while the tortoise went right on down the road, and if we're not careful, he's going to hit the finish line before we can.

We have been so involved in other things that we have allowed people who know nothing about our business create the environment in which we have to operate. Isn't it ridiculous, when you really think about it, to leave this creation of our business environment to the liberals, to the labor people, to the bureaucrats, and to the politicians?!! It is not only ridiculous, my friends, it is insanity. It is the case of the thermometer vs. the thermostat. The thermometer merely reacts to the environment; the thermostat controls it. We have got to stop reacting to the environment and begin to create it! It may not be so important this day or maybe even this year—business is good. But ultimately the control of the business climate in which we operate is as important to our bottom line as anything else we can possibly do, and yet as a group throughout this country we do not understand this. We seemingly do not agree with it and obviously we do not actively support that concept. Failure to recognize and support it may well be our ultimate undoing.

Now, what can you and I do about all of this? The list of things that we can do is very long, but let me name just a few:

(1) Become supportive and active in organizations which believe in and expound the basic principles and policies of a free enterprise system.

(a) Let's start with our own national industry organization. Here we have most of the leadership of the entire industry in this nation. We should, as a group, take a stand on basic policy issues. I am not talking about Democrat vs. Republican. I am talking about basic, fundamental free enterprise principles. We should take our stand and let it be known to the press and to key people in Congress and others just how our industry stands. Our Board and Executive Committee can formulate these positions in some appropriate manner and they can be communicated to the proper people by our professional staff.

(b) We have sitting right here on our platform this morning the distinguished President of the National Association of Manufacturers, Heath Larry. They are doing an outstanding job of fighting for the very thing I am talking about. If you do not now belong to that organization, I urge you to join. Support them not only with your financial resources but with your own personal time. I am not plugging NAM, I am plugging free enterprise and the saving of the system that has made us what we are today.

(c) The same goes for the U.S. Chamber—they're doing a great job. The National Right To Work Committee—I could name

many other fine organizations, but you can search out the ones that fit your requirements best.

(2) Your Chief Executive Officers must get personally involved. Now I know it's easy to say, "I don't have the time." My answer is, "We must get involved personally." Lobbyists are fine, vice presidents for public affairs or public relations are indispensable, but there comes the time when nobody, but nobody, can take the place of the chief executive officer talking to the Congressman, to the Senator, to the bureaucrat or to his peers about these matters. I challenge you to set aside a certain amount of your personal executive time for this purpose. Just think what would happen in this country if all business chief executives would give as much as 10 percent of their time on a regular basis to fighting for our cause. You would see absolutely unbelievable changes take place in our country.

(3) Consider setting up a Political Action Committee in your company. This is a nonpartisan group in your company who contributes to political figures who are fighting for the basic principles and laws that express the business point of view. This option was made into law in 1976. Since then, some 550–600 corporate PAC's have been set up. These are currently raising hundreds of thousands of dollars per year to be poured into electing politicians sympathetic to the business community. This is a development that worries the unions. For many years now the labor movement has been pouring millions of dollars into the political process. It is now clear that they have been imminently successful. Doesn't it strike you as real irony that while it was the business community which developed the modern, complex organization structures which in turn made possible the great American technological society of today, it is now Big Labor which has adopted these organizing techniques and has run rings around business in organizing their forces to fight on a national basis for the causes they believe in. The day comes when this has to stop. The day has come when this same kind of force must be generated in the business community with an impact that is just as great.

(4) We must educate our employees in the truths of basic economics and the free enterprise system. They simply don't understand it and it's very difficult to be aggressive in your support for something you really don't understand. For instance, polls tell us that the American public believes that companies make 33% profit after taxes. Can you imagine the kind of damage that can do you in a critical vote? There are programs already developed, for example, by the Free Enterprise Institute of Stanford University, that outline a whole procedure and a program of education for your employees. They are not getting the education in the schools that they need along these lines, and the least we can do is to make a sincere effort to correct this deficiency of the employees in our own organizations. Can you imagine the impact on this country if every company that employed as many as 250 people would undertake such a program? Millions of people could be educated through this process alone. Again, this program alone could go a long way to turn our country around.

(5) It is very important to get to know your Congressman and Senators personally and let them hear from you on all legislation important to you and your company. A little money at campaign time might help his hearing, also.

There are so many things that can be done. There is no way to discuss them all here. You can't do everything, but you can do something.

Can we turn it around? I'm not at all sure, but I can certainly say this much. The hour is late. We must ask some very penetrating questions. How much does it mean to you to preserve the system that made us great? Do you care enough to do what has to be done in terms of commitment of your corporate and personal funds and time? If you and I do not rise to the challenge of the day, if we don't speak out for the things we believe in, and if we don't stand up and fight for the basic principles of the free enterprise system that made us what we are today and are the only real hope for our children tomorrow—if we don't do these things, then you and I will deserve what will surely happen to us. But, will our children deserve it?—because we didn't have the interest and the courage to do what needed to be done? Think about it. It's terribly important.

Mr. HELMS. Mr. President, I assume the Senator wishes to yield back the remainder of his time.

Mr. MORGAN. Yes.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Oklahoma (Mr. BELLMON) is recognized for not to exceed 15 minutes.

Mr. BELLMON. Mr. President, I ask unanimous consent to yield my time to the Senator from Missouri and then I will follow his comments.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Missouri (Mr. DANFORTH) is recognized.

S. 3416—EXCESS GOVERNMENT SPENDING SURTAX ACT OF 1978

Mr. DANFORTH. Mr. President, since coming to the Senate, I have consistently advocated a substantial tax reduction for the American people. More than a year ago, I offered, together with many of my colleagues, a permanent tax cut as an alternative to the President's proposal for $50 tax rebates. Before the present session ends, the Senate will again consider proposals to provide tax relief for individuals and business. I hope to take an active role in that debate.

However, I think that it is equally important to recognize that tax reduction must be accompanied by meaningful restraints on governmental spending. If Federal revenues are reduced and Federal spending is not restrained, the result will simply be a larger deficit and a higher rate of inflation.

It has been said that a substantial tax reduction in itself would act as a restraint on Federal spending. I do not accept that proposition. We in Congress have become accustomed to high deficits. We have tolerated the notion that Federal revenues need not match Federal spending. Therefore, in connection with a substantial tax reduction, which I believe to be essential for a prosperous economy, I am introducing today a proposal to put some order into our existing economic chaos.

The proposal is entitled the Excessive Federal Spending Control Act of 1978. Its sole purpose is to provide a tool which will help us to control the growth in Federal spending.

The bill would, for the next 5 years, limit to 2 percent the annual rate at which Federal spending from one year to the next would only be permitted to grow at the rate of inflation plus 2 percent.

If enacted into law, this provision would assure that by 1983, the percent of GNP that is spent annually by the Federal Government would be no higher than 20 percent.

To make this provision work, the bill would require that any excess spending above the 2 percent limit must be paid for through a surcharge on the income tax. The message is: if those of us in Washington cannot hold Federal spending below a specified target level, then we must find a way to pay for it.

Now, if there is one thing that all politicians hate to do, it is to increase people's taxes. The purpose of the surcharge provision is to make higher spending politically unacceptable by tying it to a tax increase.

Currently, Congress can increase Federal spending with relative impunity. The discipline of a balanced budget has all but disappeared.

Our current budget deficits are staggering. They are so large—$40 to $50 billion annually—that the historical political pressure against adding a billion dollars to the deficit is almost nonexistent. A billion dollars is only 2 percent of this year's estimated $50 billion deficit.

This turn of events is absolutely frightening and portends nothing short of disastrous future consequences for our economy.

Politicians in Washington seem incapable of saying "No." It is always easier to say "Yes" to those in need—no matter what that need is. It is always easier to keep a program alive and growing, even if the program has been a failure. We follow the path of least resistance, but down that path lie higher budget deficits and the hidden tax of inflation.

I do not know how to get out of this trap, but I believe that this bill would be a step in the right direction.

It is not a draconian measure. It does not say, "There will be no new growth in Federal spending." It does say, however, that if Government grows faster than 2 percent per year, then taxes must be increased.

The bill would permit at least $10 billion in real growth in Federal spending per year without requiring higher taxes. Hopefully, we can keep spending growth below that "permissible" level. But if we cannot, we must face the political reaction which is certain to accompany a tax increase.

The long run goal of this proposal is to help the Federal Government achieve a balanced budget in a step-by-step fashion. The intermediate target of the plan is to reduce to below 20 percent the share of GNP that is consumed by Government.

Government this year is expected to spend money at a rate that is the highest in history—an estimated 22.6 percent of GNP. If "off-budget" Federal outlays are added, this figure rises to 25.2 percent.

Mr. President, I ask unanimous con-

sent that a table be printed in the RECORD, which illustrates the pattern of Federal spending growth over the past 22 years. The table is reprinted from the President's "Budget in Brief" for fiscal year 1979.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL FINANCES AND THE GROSS NATIONAL PRODUCT, 1956–79

[Dollar amounts in billions]

Year	Gross national product	Budget receipts [1]		Outlays [1 2]					
				Unified budget		Off-budget Federal entities		Total	
		Amount	Percent of GNP	Amount	Percent of GNP	Amount	Percent of GNP	Amount	Percent of GNP
1956	411.0	74.5	18.1	70.5	17.1			70.5	17.7
1957	432.7	80.0	18.5	76.7	17.7			76.7	17.7
1958	442.1	79.6	18.0	82.6	18.7			82.6	18.7
1959	473.3	79.2	16.7	92.1	19.5			92.1	19.5

[1] The amounts of earned income credit in excess of tax liabilities are shown as negative budget receipts rather than as budget outlays. Accordingly, the budget totals have been adjusted retroactively.

[2] The 1975–77 data have been revised retroactively to include the housing for the elderly or handicapped fund in the unified budget instead of with the off-budget Federal entities.

[3] 0.05 percent or less.

Note: Exchange stabilization fund included from 1976.

Mr. DANFORTH. Historically, the Federal Government has consumed about 18.6 percent of GNP. During the decade ending in 1966, the rate was 18.7 percent. However, during the next 10 years ending in 1975, the rate had climbed to 20.5 percent. Since 1975, the rate has climbed to 22.8 percent. If this trend continues unchecked, the Federal Government would consume 27 percent of GNP by 1985. That is the path we are on.

If this bill is enacted into law, the trend toward ever-larger Government would be reversed.

I ask unanimous consent to insert in the Record at this point a brief table showing the expected impact of this bill on Federal spending as a percent of GNP.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

IMPACT OF DANFORTH PROPOSAL

[Dollar amounts in billions]

Fiscal year	Estimated GNP	Federal spending under proposal [1]	Federal spending as a percent of GNP
1979	$2,263	$490	21.7
1980	2,496	533	21.4
1981	2,759	578	20.9
1982	3,045	625	20.5
1983	3,362	673	20.0
1984	3,702	726	19.6

[1] Federal spending assuming surtax is not imposed.

Mr. DANFORTH. One final thing, Mr. President. There is a provision in the bill which provides a safety valve in the case of a national recession. Since GNP declines and Federal spending increases during recessionary periods, it would be counterproductive to increase taxes at such times. Therefore, the bill provides that the surcharge will not be imposed in any year in which national unemployment exceeds 7.5 percent for 3 consecutive months.

That is the plan. It is not the answer to all our Nation's economic woes. But it is a step in the right direction in an environment of excessive Federal spending and budget deficits.

Mr. President, at this point I ask unanimous consent that the bill, which I will introduce, be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Excess Government Spending Surtax Act of 1978".

SEC. 2.

Add the following new part to subchapter A of chapter 1 of subtitle A of the Internal Revenue Code of 1954:

"PART V—SURTAX ON INDIVIDUALS AND CORPORATIONS

"SEC. 51. EXCESSIVE GOVERNMENT SPENDING SURTAX

"(a) There is hereby imposed on each person a surtax computed in a manner described in subsection (b).

"(b) The surtax described in subsection (a) shall be an amount determined by multiplying the surtax percentage determined in subsection (c), by the amount of tax computed under chapter 1 (but before application of the tax credits provided in part IV of subchapter A of such chapter). For purposes of this subsection, any tax imposed for the taxable year by section 56, 72(m)(5)(B), 508(f), 402(e), 531, 541, 1378, 1351(d)(1), shall not be considered tax imposed by this chapter for such year.

"(c)(1) The surtax percentage shall be a percentage rounded to the next highest whole number determined by the Secretary to be necessary to finance all federal outlays provided in the

(Amount of Federal outlays)

Taxable year of surtax beginning in:

1980, Federal outlays for the period October 1, 1979 through September 30, 1980 in excess of $500,000,000,000.

1981, Federal outlays for the period October 1, 1980 through September 30, 1981 in excess of $510,000,000,000.

1982, Federal outlays for the period October 1, 1981 through September 30, 1982 in excess of $520,000,000,000.

1983, Federal outlays for the period October 1, 1982 through September 30, 1983 in excess of $530,000,000,000.

"(2) The dollar amounts described in paragraph (1) for any fiscal year shall be increased by the percentage that the average consumer price index for the 12-month period ending on the September 30 preceding such fiscal year has increased from the average consumer price index for the 12-month period ending September 30, 1978.

"(3) The amount of Federal outlays for any fiscal year described in paragraph (1) shall be the amount of Federal outlays for such fiscal year agreed to by both Houses of Congress in the second budget resolution on or before the September 15 preceding the beginning of such fiscal year. Any changes in the Federal outlays for such fiscal year agreed to by Congress after the September 15 preceding the beginning of such fiscal year shall be considered as additional Federal outlays for the fiscal year next succeeding such fiscal year.

"(d)(1) The surtax imposed by subsection (a) shall be suspended for any calendar year in which the unemployment rate determined by the Bureau of Labor Statistics exceeds 7.5 percent for a third consecutive month.

"(2) Any tax year in which the surtax is suspended pursuant to paragraph (1), the

surtax will be reimposed in the subsequent year pursuant to subsection (a) unless paragraph (1) of this subsection would also suspend the surtax for such subsequent year.

"(e) Any surtax that is determined by the Secretary to be applicable as a result of this section shall be specifically identified on the tax forms issued by the Secretary as the 'Excessive Government Spending Surtax'.

"(f) For persons with taxable years other than a calendar year, the provisions of section 21 shall apply in the computation of the excessive Government spending surtax liability.".

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BELLMON. Mr. President, I am pleased to join as a co-author with the Senator from Missouri in the introduction of the Excess Federal Spending Control Act of 1978. I would like to congratulate the Senator from Missouri for the very careful thought that he has given to this important matter, and to say that I believe the consideration and, hopefully, ultimate passage of this act would be one of the most important actions Congress has ever taken to help bring a degree of discipline to Congress in the area of Federal spending.

I have been dismayed and even frightened by the inability of Congress to restrain spending. Here we feel enormous pressures to spend more and spend more, and do more and do more. Yet up to this time there has not been a countervailing pressure felt from those who must pay the bills.

The Danforth legislation, the Danforth Excessive Federal Spending Control Act, will put this kind of restraint on Congress which will be forced to recognize that any time we get above the limits set forth in the bill we will have to increase taxes and our taxpayers will have occasion to act on what we are doing and will be forced to make the choice of whether the programs put on the books are worth the costs we are paying.

I came to the Senate following service as Governor of the State of Oklahoma. In Oklahoma we have in our constitution a requirement that our State budget be balanced every year. There is no way for the State of Oklahoma to run a debt. Any time the legislature spends or appropriates more money than we collected in the previous fiscal year, then it is necessary for the legislature to pass and the Governor to sign a bill that will generate the revenues necessary to pay the bill.

After I came to the Senate, on different occasions I introduced legislation requiring that we have a balanced Federal budget. But for various reasons that approach has not been accepted, and probably would not be quite as successful here as it is at the State level because the Federal Government has responsibility for national defense and also for full employment. So there is a need for some flexibility.

The approach Senator DANFORTH has taken in drafting the Excess Federal Spending Control Act provides this flexibility, but, at the same time, it incorporates the discipline which we presently have been lacking.

Mr. President, as Members know, I serve as a member of the Senate Budget Committee, and I was supportive of the Budget Control Act which set up this process, and I believe it has had a significant impact on the spending practices of Congress. But still there is something missing. We are able, when we feel the pressure to do so, to run large deficits, and the result is that inflation grows, the size of the Federal debt grows, and the servicing of that Federal debt grows, and we are still not able to cope with the management of our Federal spending as effectively as we should.

I believe the Danforth approach will go a long way to strengthen the Budget Act and to make it possible for us to hold our deficit down except in times of dire circumstances.

I believe that the discipline which the surtax will bring is what has been missing. I congratulate the Senator from Missouri for having devised this bill, and I am very proud to join as a cosponsor. I would expect to work actively with the Senator from Missouri in seeing that this bill is considered by the appropriate committee and brought to the floor at the earliest possible date. I think this is a very significant new legislative initiative, and I believe the efforts of Congress to hold down the Federal excessive spending will be greatly enhanced by the passage of this measure.

Mr. DANFORTH. Mr. President, I very much appreciate the comments of the senior Senator from Oklahoma. I wanted to spell out in the simplest possible terms the concept of this bill.

It is very straightforward in its approach. It does not prohibit Congress from doing anything.

A lot of people have suggested the possibility of a constitutional amendment to somehow restrict Federal spending This would be not nearly so inflexible as a constitutional amendment.

Congress under this proposal could spend anything it wants to spend. It could open whole new vistas of Federal spending. But what this proposal says is that after a point there is no free lunch.

It seems to me that is the message we have just missed here in Washington. We have the notion we can spend absolutely anything we want to and that somehow money just grows on trees. It does not grow on trees. It comes either out of the pockets of the taxpayers or with the increasing deficits it comes out of the pockets of all the people in the form of the most regressive of all taxation; namely, inflation.

What this proposal says is if Congress increases Federal spending more than 2 percent of real growth per year then a surcharge on the income tax will be automatically imposed. The effect of this is that when the politician comes back home he is not only going to be able to point with pride to the wonderful things he has done for his constituents, but he is also going to have to answer to those constituents as to why they find on April 15 a separate line on their income tax which is a surcharge on the income tax, because what would happen is if the amount of Federal spending increase exceeds a real growth rate of more than 2 percent a year, on April 15 there would be a separate item on the income tax, a surcharge on the income tax, and the taxpayer would have to compute the amount of the surcharge based on his income tax. It would be called an excessive spending tax, and I think it would focus national attention on the other side of proposition 13.

So often when we talk about proposition 13 we are talking about people not willing to pay taxes. When I go home to Missouri the people are not only talking about the rate of taxation but they are talking about the size and the cost of Government. That is what we want to control, and I think this proposal provides some handle on it.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. DANFORTH. Certainly.

Mr. BELLMON. I would imagine that as the various spending bills moved through the Senate, or through Congress, at some point in time we would be able to raise the flag and say, "If we appropriate this money, we are also going to have to raise taxes."

To me, that would be one of the most stern and effective forms of discipline Members could have, because when we voted for the spending proposition, we would also be voting for the tax to pay the cost, and we would have to decide if the program was meritorious enough for us to incur the wrath of the taxpayers in order to pay the cost.

I think this is what we have been needing in Congress, and it would be a highly effective way of making us measure the worth of programs we fund against the actual cost. At the present time, we can spend and spend and borrow and borrow, weaken the value of our currency, and increase inflation, and at the same time not feel any direct political pressures.

The Senator's amendment, I think, would make us far more responsible, because we would have to vote the taxes to pay the bill, and thereby the voters would be able to know what we had done, and that they would have to pay the taxes.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. BELLMON. I yield.

Mr. HELMS. The Senator from Missouri has proposed an intriguing discipline, and I think it would be the most direct and obvious discipline that could be imagined. The interest on the Federal debt this year——

Mr. BELLMON. Is between $45 billion and $50 billion.

Mr. HELMS. I believe the more accurate figure is close to $56 billion.

Mr. BELLMON. It may be. There are some reflows, I understand.

Mr. HELMS. The Senator is correct.

I proposed a measure 2 or 3 years ago in this body which was resoundingly defeated. I suggested at that time that the salaries of Senators and Representatives, Members of Congress, be reduced by the same per centum by which Congress failed to balance the Federal budget. I think I got seven votes on that proposition; but I think that would be an effective discipline; and I wish the Senator well in any effort he makes to achieve some sanity on the part of Congress in spending the people's money.

Mr. DANFORTH. I thank the Senator.

We are approaching the consideration of a major tax reduction bill. I think everyone is convinced that if we are going to have a prosperous economy, we are going to have to have a tax reduction. There has been some debate, and there will continue to be some debate, as to the amount and distribution of the reduction. My own feeling is that the President's proposal as it came out of the House of Representatives is too small a tax cut, but I do think it is important that, at the same time as we talk about cutting Federal taxes, we also talk about some measures to try to restrain Federal spending.

Therefore, in connection with the tax cut in the Senate Finance Committee I will be offering this proposal. It may be that I will get the same seven votes the Senator from North Carolina managed to muster a few years ago. But I really think it is a point worth making.

It is so easy and so popular to be talking about reductions in Federal taxes; but we also have to look at the other side of the coin, which is the side of the coin which I think most people in the country are most concerned about.

Mr. BELLMON. Mr. President, if the Senator will yield, I think what the Senator has said reflects an attitude that is growing across the country, which is that there has to be some restraint in Federal spending, that a lot of the programs we thought would solve problems have not worked too well, and that it is time we look more carefully at the way we use our tax dollars.

I also find, in Oklahoma, when meeting constituents, that the great majority, when given a chance to express their views, prefer to see us cut down on the deficit to having a tax reduction.

I think this is very significant. In other words, people are now saying they are willing to cut down the deficit and hold down inflation rather than have reduced taxes.

I believe if we had had in the past what the Senator from Missouri is proposing this morning, a Federal spending control act, we would not be facing the problems we face today.

Mr. DANFORTH. According to a Roper poll released about 2 weeks ago, when people were asked, "Do you want a one-shot major tax reduction, or would you rather have indexing of your tax bracket to hold you harmless from inflation putting you in higher and higher brackets," by a margin of about 2 to 1, as I remember, people were saying, "We would rather be held harmless against inflation putting us into higher brackets."

So it seems to me that what people are concerned about is not so much the rate of taxation today as the rate of taxation tomorrow, caused by inflation.

Again, it is the effect that inflation is having not only on the spending power of a person's earnings, but also on continuing to increase the total tax bite on that individual. If we could get some handle on inflation, which is the same as saying a handle on Federal spending, I think it would be a great step forward.

Mr. BELLMON. I believe that the Senator from Missouri has made a large step in that direction this morning, and I applaud him.

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

Mr. PELL. Mr. President, will the Senator withhold that?

The PRESIDING OFFICER (Mr. McGOVERN). Will the Senator withhold until the Chair lays before the Senate the unfinished business?

Mr. DANFORTH. Certainly.

COLLEGE OPPORTUNITY ACT OF 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now resume the consideration of the unfinished business, S. 2539, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 2539) to amend the Higher Education Act of 1965 to improve the basic educational opportunity grants program and for other purposes.

The PRESIDING OFFICER. The time for debate on this bill is limited to 5 hours, to be divided with 1 hour to the Senator from Maine (Mr. MUSKIE) and with 4 hours to be equally divided between and controlled by the Senator from Rhode Island (Mr. PELL) and the Senator from New York (Mr. JAVITS), with 1 hour on any amendment and 20 minutes on any debatable motion, appeal, or point of order.

Mr. PELL. Mr. President, this bill was laid before the Senate last night and the Senator from New York (Mr. JAVITS) and I made our opening statements, so that our colleagues could be informed of what our basic positions were on this bill. This bill really gives us another, more practical, and more effective way of helping the youngsters of middle-income American families.

By going this route, we would not be starting any new program whatsoever. We would not be eroding the Internal Revenue Code in order to provide money to middle-income families. We would be leaving educational policy to be determined by those members of Congress who are mainly concerned with the policies of education, rather than the fiscal aspects of what we do, and we would be reducing the amount of paperwork.

It would also mean that you would not have to have any additions to our income tax form, which you would have to have if one were to benefit from the tax credit bill passed yesterday. Under the approach of S. 2539, we would simply take the present basic education opportunity grant program and increase the income allowable from about $12,500 or $13,000 under which a family is now eligible to $25,000. This would mean that increased help would then go to those middle-income families with incomes between $12,000 or $13,000 and $25,000 a year.

It would not, as in the case of the bill passed yesterday, provide more than half the help to families with more than $25,000, who do not need the help so much.

In addition, we would remove the establishment of income limitations for the guaranteed student loans, thus reducing the paperwork even further than would be the case otherwise. The principle here was that there was no use in having 98 percent of our people go through a tremendous amount of paperwork in order to exclude 2 percent. Under S. 2539, any American family is eligible for an interest-subsidized guaranteed student loan.

Under this bill, we have increased the work study and the supplemental education grant figures.

That is about the gist of the bill which is before us.

After reading the morning press, one realizes there is a very real likelihood that the President will veto the tax credit bill. This bill would then be the more practical route that we should take to help middle-income Americans.

Mr. President, I made my statement last night. I would welcome any amendment which might come forward.

Mr. President, I suggest the absence of a quorum with the time to be equally charged against both sides.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold that?

Mr. PELL. I do, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, efforts are being made at this point to determine whether or not there are any amendments. I prefer that we not ask for a quorum call at this moment.

RECESS SUBJECT TO CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, if the distinguished manager of the bill will agree, I ask unanimous consent that we stand in recess awaiting the call of the Chair, and the time charged equally against both sides. We should know if there are any amendments within a few minutes.

There being no objection, at 10:11 a.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 10:12 a.m., when called to order by the Presiding Officer (Mr. McGOVERN).

Mr. PELL. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask that the bill go to third reading.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate vote on the bill at the hour of 11:45 a.m. today, with paragraph 1 of rule XII waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, this will be a rollcall vote. I believe there are enough Senators in the Chamber now to ask for the yeas and nays.

Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there

a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I further suggest that Mr. SCOTT come to the Chamber.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SENATE WORKLOAD—LABOR DAY RECESS SCHEDULE

Mr. ROBERT C. BYRD. Mr. President, the Senate has a considerable amount of work ahead of it. I hope it will be possible to get a good amount of that work done before the Labor Day holiday recess. It is entirely possible that by working hard, long, and successfully, the 2 days that the Senate was to be in, the 28th and 29th, it is possible that we could scratch those 2 days and add them to the holiday. But I should want to be assured that we would have time agreements on measures ready to take up on the Wednesday when the Senate is supposed to come back; otherwise, there might be a tendency to fall victim to the syndrome that, well, we are not going to do anything that week, let us stay home and come in on the next Monday. So if we can get time agreements so that we know that we have work, know that we shall move forward on that Wednesday and have a good work week—Wednesday, Thursday, Friday, possibly even Saturday of that week; maybe not, but certainly Wednesday, Thursday, and Friday—so that we know we are going to be doing work, know we have time agreements, I am sure we will be willing to consider adding 2 days onto the holiday. But it just depends on how things go. I thought that might be nice to know.

Mr. President, Mr. SCOTT, the valiant, very able warrior from the State of Virginia, is present. He has tied his steed to the hitching post outside and left his lance there, but he carries with him his sword and it is polished and gleaming and he is ready to do battle.

Mr. HELMS. Will the Senator from West Virginia lay down his sword for just a moment?

Mr. ROBERT C. BYRD. I am outnumbered at this point.

Mr. HELMS. The Senator was referring to time agreements. I wonder if we could not get a time agreement on order No. 918, S. 3100. I am willing to accept 5 minutes on my side and give 5 hours to the other side to show what a sporting proposition I am willing to offer.

Mr. ROBERT C. BYRD. Let us talk about that later.

Mr. HELMS. The Senator was interested in getting a time agreement. I just wanted to show my willingness to cooperate with him.

Mr. ROBERT C. BYRD. The Senator is always willing to cooperate. I have never found him unwilling.

Mr. HELMS. I thank the distinguished majority leader. Now he can pick up his sword again.

COMMITTEE MEETINGS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate today to hold a markup session on two nominations; five public building proposals; S. 2900, oil spill liability legislation and S. 2995, the National Visitors' Center.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet during the session of the Senate today to mark up postal legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Subcommittee on Criminal Laws and Procedure of the Committee on the Judiciary be authorized to meet during the session of the Senate today to conduct an oversight hearing on LEAA.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Health and Scientific Research Subcommittee of the Committee on Human Resources be authorized to meet during the session of the Senate today beginning at 2:30 p.m. to hold a markup session on S. 3115, the disease prevention bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RECOGNIZE SENATOR MORGAN AT 11:25 A.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. MORGAN be recognized at 11:30 a.m. today to address some remarks to the subject of the higher education bill and that he be allotted 15 minutes just before the rollcall vote.

Mr. JAVITS. Mr. President. if the Senator will yield to me, is this on the education bill?

Mr. ROBERT C. BYRD. Yes, he just wants to speak on it.

Mr. JAVITS. That is fine, except I am sure he would agree that we ought to leave maybe 2 minutes—make it 13 and 2, because if there is anything he says we want to answer before the vote, we would want a chance to do that.

Mr. MORGAN. Mr. President, maybe we could make it a little more, because, to be perfectly candid, I thought we had four amendments and so much time on the bill that I would be able to get my amendments ready. When you do not have a prepared text, it takes a little longer.

Mr. JAVITS. Could the Senator make it 15 minutes and 5 to us and start a little earlier, just as a precaution? We may not want to say anything at all.

Mr. ROBERT C. BYRD. Is that agreeable to the Senator from North Carolina? I want him to have whatever time he needs.

Mr. MORGAN. I think that is best.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, at 11:25 a.m. today, the distinguished Senator from North Carolina be recognized to speak on the higher education bill; that he have 15 minutes and Mr. JAVITS have 5 minutes; that if Mr. JAVITS does not use his 5 minutes, Mr. MORGAN will have it.

The PRESIDING OFFICER. On whose time?

Mr. ROBERT C. BYRD. The time has been yielded back. I am just asking unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

Mr. ROBERT C. BYRD. Mr. President, the Senator from Virginia has burnished his spurs and has his sword in his right hand and is ready to start.

Mr. SCOTT. Could the Senator change that to left hand? I happen to be left-handed.

Mr. ROBERT C. BYRD. The left hand is a little closer to me.

I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 554.

Mr. SCOTT. Mr. President, reserving the right to object, I would want to pose some parliamentary inquiries.

Mr. ROBERT C. BYRD. The Senator cannot do that. He either has to object, or unanimous consent.

Mr. SCOTT. Reserving the right to object, I would ask the distinguished majority leader whether or not it appears to him to be proper to bring a bill up that has been passed by the House when a companion bill has been referred to the Senate Judiciary Committee, when the Subcommittee on the Constitution has had hearings on that measure, but had not taken any action on it, when the chairman of the full committee, the distinguished Senator from Mississippi, is out of the country.

Mr. ROBERT C. BYRD. Mr. President, I will not ask for regular order. I will answer the Senator's question.

I have established contact with the Senator from Mississippi and he says that it is perfectly agreeable with him for me to try to get the measure up while he is away, and under rule XIV, of course, the proper procedure is available to those who wish to avoid the committee consideration of the measure, and that was done in this instance under the rules. The measure has been on the calendar now since April 24. April, May, June, July, August—for almost 4 months it has been on the calendar.

So what is being done is perfectly proper.

Mr. SCOTT. Mr. President, I do not doubt the propriety of what the distinguished majority leader is attempting to do, but I do not believe any useful purpose would be served by a further reservation.

I do object.

ADJOURNMENT FOR 1 SECOND

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate stand in adjournment for 1 second.

The motion was agreed to; and at 10:31 a.m. on Wednesday, August 16, 1978, the Senate adjourned for 1 second.

AFTER ADJOURNMENT

WEDNESDAY, AUGUST 16, 1978

The Senate met at 10:31 and 1 second, pursuant to adjournment, and was called to order by Hon. GEORGE McGOVERN, a Senator from the State of South Dakota.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of Proceedings be dispensed with.

Mr. HELMS. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will read the Journal.

Mr. ROBERT C. BYRD. Read it fast.

The Journal Clerk (James E. Thorndike) proceeded to read the Journal of Wednesday, August 16, 1978.

During the reading, the following occurred.

Mr. ROBERT C. BYRD. Read faster.

The Journal Clerk resumed the reading of the Journal.

During the reading the following occurred:

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the Journal be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDING OFFICER. Are there petitions or memorials to be presented?

Are there reports of standing and select committees?

Are there bills and joint resolutions?

Are there other resolutions?

If not, morning business is closed.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

Mr. ROBERT C. BYRD. Mr. President, I move to proceed to the consideration of the D.C. representation in Congress bill.

Mr. SCOTT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCOTT. Is this motion debatable?

The PRESIDING OFFICER. The motion is not debatable.

Mr. SCOTT. Well, then, Mr. President, I would appeal from the ruling of the Chair.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

There is no appeal from a parliamentary inquiry.

The question is on agreeing to the motion.

Mr. SCOTT. Mr. President, I make a point of order that the motion is debatable.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The point of order is not sustained.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

Mr. SCOTT. Then I appeal from the ruling of the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. McCLURE. I object.

The PRESIDING OFFICER. Objection is heard.

The second assistant legislative clerk resumed calling the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11:25 A.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until 11:25 a.m. today, at which time Mr. MORGAN is to be recognized to speak on the higher education bill.

There being no objection, the Senate, at 10:40 a.m., recessed until 11:25 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HODGES).

COLLEGE OPPORTUNITY ACT OF 1978

The Senate continued with the consideration of the bill (S. 2539).

The PRESIDING OFFICER (Mr. HODGES). The Senator from North Carolina is recognized for 15 minutes.

Mr. MORGAN. Mr. President, I am sorry I have to address such a very important bill under such difficult circumstances. When I left the floor of the Senate this morning to go to the Judiciary Committee, it was my understanding that there were a number of amendments pending, and that there was no time limit on the bill. But be that as it may, I should have stayed here in the Chamber and been present so that I could have protected my interests. It is apparently too late to address any remarks on this subject now, but it is something, Mr. President, that I feel very strongly about.

There has come a time, I believe, in America when we simply have to say to ourselves that we cannot do everything that we would like to do. I think in the area of higher education the time has arrived. With about a $50 billion deficit staring us in the face, we now propose to increase aid to those attending college by some pretty astronomical amounts. As a matter of fact, if we pass the bill before us, and then fully fund the basic grants program to take care of the additional 1.5 million new students, it would take $3.3 billion, a 65-percent increase at a time when we are $50 billion in debt.

I am not sure what the tax credit bill finally carried last night, but I understand it carried a $1.5 billion increase in Federal spending. Add those together and, as the distinguished chairman of the Budget Committee pointed out, we will never balance the budget.

That may not be important to some Members, but it is important to my people who happen to believe that we ought to pay for what we do now and not leave the debt for our children to pay.

Dr. Arthur Burns tried to tell us, the first 2 years that I was in the Senate and on the Banking Committee, that we ought to be cautious in deficit spending. Here we just throw caution to the wind. It is not as if we were not doing anything for the young men and women who want to attend college in this country. I pointed out last night just how much we are doing.

Under the programs that are covered in this bill, and the others where we provide student assistance, we already provide about $7.25 billion. Then if we take into consideration the tax losses that come by excluding certain benefits for attending college from the tax laws, we add another $1.25 billion. So when we add it all up, and considering the fact that there are only about 9.2 million students in this country, we are already appropriating almost $1,000 per student.

Last night we adopted the tax credit bill with only 27 Members of the Senate objecting to it when just a week or two ago 59 Members of this Senate had already voted in favor of a balanced budget.

It seems that we are talking in Congress out of both sides of our mouths. Every State in the Union—certainly my State—makes provisions for grants, for scholarships, and for loan funds to students attending college. We appropriate somewhere between $2,000 and $3,000 for every student attending a State institution. We also make direct grants for those attending private institutions.

I am simply trying to say, Mr. President, that I do not believe that the Federal Government should do everything. I wish it were possible for us to provide free higher education for everybody, but all we seem to think we do here is spend and spend and find ourselves more and more and deeper in debt.

I do not know what it means to the rest of the Senate, but last Saturday, I went down for about an hour and bagged groceries in a local supermarket in my town just to see what the rank and file people were having to pay for their groceries. Three apples, 97 cents. I guessed at each basket that came

through, and I could not even come within half of the cost of it.

We are going to continue to have runaway inflation as long as we here in Congress continue to appropriate and authorize the expenditure of funds recklessly, just because they tend to serve a noble purpose.

I think the President's request earlier this year, when he recommended about a $200 million increase in the present student aid programs, was a reasonable request. I would vote for almost any increase in the work-study program. But let me tell you about one university that I happen to know about. It has 32,000 students, and out of those 32,000 students, 17,000 were receiving Federal grants, Federal aid, Federal loans, or Federal scholarships. Of those students, about 80 percent came from families with incomes over $15,000.

When someone complained about it, the dean said, "Why, you turned my son down." The remark was made, "You are making $42,000. Surely, you do not want your son to go to school on this Federal money that was designed to help the poor."

He said, "He is 18 years old now, he is independent."

So, if we keep this up, what we are going to do is carry the full burden of higher education in this country and we are going to find ourselves just like the city of New York that tried to furnish free tuition, free higher education for everybody, except there will be nobody else for us to turn to. It is no wonder the value of the dollar continues to slip abroad.

Mr. President, I had thought of working on some amendments that would have provided some safeguards from the provisions of this bill in the event that the Appropriations Committee does not appropriate all the funds necessary. As I understand the bill as it is now written, a new million and a half students added on would get their pro rata share and those poor and receiving help now would have their assistance reduced.

Mr. JAVITS. Will the Senator yield on that point?

Mr. MORGAN. Yes.

Mr. JAVITS. The Senator is always extremely thoughtful and extremely considerate. I appreciate the consideration he is showing Senator PELL and myself in respect of the amendment and the third reading proposition. I am very sympathetic to the direction of the Senator's thinking on this question, and I respectfully suggest the following:

We shall have the ESEA bill up, probably within a week or thereabouts. It is a "must" bill; there is no way of getting around that. We would be very happy to work creatively with the Senator, and I believe and hope my colleague would, too, to see what we work out in a well-articulated way to try to effectuate the justness of the result—to wit, that the new edition should not preempt the established program.

Mr. MORGAN. I thank my distinguished colleague. That, frankly, is about the only alternative left to me. But I do once again want to express my consternation at the continually increasing appropriations for expenditures of money that we do not have, and that my children and my grandchildren are going to have to pay for. We are not going to do anything about the business of inflation or balancing the budget or deficit spending until we do just as we have to do in our own families at times, say to ourselves, "There are some nice things we would like to have. We would like to have everything, to do everything for everybody, but we cannot afford to do it."

What we are doing now is spending money that none of us in this Senate will ever pay for. It will be these young people sitting over here on the side and their grandchildren and their grandchildren. We do not do it in North Carolina. I think it is a bad practice for the Federal Government, and I think the bill we passed last night and the increases in this bill are two good illustrations of what we are doing in Congress.

I yield back the remainder of my time.

Mr. PELL. Mr. President, I should like to respond briefly.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Who has the time to follow Senator MORGAN?

The PRESIDING OFFICER. The Senator from New York was to be recognized for 5 minutes immediately following Senator MORGAN.

Mr. JAVITS. I yield half the time to the Senator from Rhode Island.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. MORGAN's 3 minutes which he yielded back may either be restored to him or, in the event he does not want it, be given to Mr. PELL.

The PRESIDING OFFICER. Without objection, is is so ordered. The Senator from Rhode Island will proceed for 3 minutes and the Senator from New York will follow for 5 minutes.

Mr. JAVITS. Mr. President, I yield 1 minute to the Senator from Rhode Island so he may have equal time.

Mr. PELL. Mr. President, I appreciate the quandary in which the Senator from North Carolina finds himself, but there was a time limitation on this bill of 4 hours, agreed to some time back. The points he made I sympathize with.

The only thing I can say is that, from the viewpoint of cost benefit to the Nation, I can think of no better expenditure than money spent on education. Because the Nation is exactly as rich and strong as the quality of the education of its people. I recognize the dire state of our budget and the need to cut back, but I guess this is where we have to agree to disagree. The last place I should want to see us cut back in is education. I would rather see us cut back in almost any other program than that.

I agree with the Senator that we want to be sure that those poor youngsters who can least afford a college education are not in any way jeopardized as we try to make more education available to our people.

Mr. JAVITS. Mr. President, I have already expressed myself on the proposition which Senator MORGAN put before us. Again, I shall undertake, and I hope the subcommittee itself will undertake some creative way of helping with the situation. The Appropriations Committee may not recommend that the Senate appropriate everything which is authorized. It generally does not recommend to fully fund education programs.

Second, I wish to address myself to the proposition of our grandchildren. Unfortunately, for all of us living in this very dangerous and tempestuous world, there is far more involved for our grandchildren than these higher education appropriations. Well over $115 billion is likely to be appropriated this year for defense; our grandchildren and their grandchildren will be paying that as well. In any kind of rational and intelligent world, a good would be considered real waste.

Mr. President. The real problem is that we have to address ourselves to the priorities of many, many other things. I am all for an intelligent marshaling of our resources. I believe that, in the present parliamentary impasse, this view has to be reflected in the second budget resolution. I understand it will be, and I shall lend myself to that question at that time. We have to take our choice of priorities. We cannot simply strike out in this direction or that direction because we are spending too much money, with which I thoroughly agree.

That is why I generally vote against so-called "meat-ax" cuts. They do not discriminate in terms of priorities and in terms of the different values of A, B, or C. They just cut things across the board. Cutting for the sake of cutting is not what I feel we were sent here for. But I agree with Senator MORGAN on running a tight ship. I am totally with him on that.

Finally, Mr. President, we have about 11 million college students in the United States, and it is a fact that we are spending far less than has been stated earlier. Still, substantial sums of money are being spent. We estimate it is somewhere in the area of upwards of $500 per student who gets the benefit of these particular student aid programs effected by this bill. Other aid, such as social security education benefits to survivors or veterans benefits are not available to the general population. The basic grants or guaranteed loans affected by this bill will be available to the general population of postsecondary students.

A problem in our country right now is that we need this highly educated population according to the demands of modern science and business, but we do not have adequate entry level employment for them. Too many Ph. D.'s are driving taxicabs.

Of course, we already are very much ahead in the world because we have such an educated population. So I certainly hope, and as the ranking member of this committee, I shall address myself to the question of opportunity and effective utilization that has been demonstrated. I hope that these expenditures will be found to be more than justified in terms of priorities.

Finally, I would like to again thank

Senator MORGAN for his interest in this important matter and his accommodation so we can get this bill passed. I hope that consistent with his expressed desire to assure that the poor are not to lose benefits, we may be able to fashion on the ESEA bill a feasible resolution.

Mr. BELLMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. JAVITS. I yield to the Senator. How much time does he want?

Mr. BELLMON. Five minutes.

The PRESIDING OFFICER. There is not 5 minutes between now and the vote scheduled for 11:45.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent the Senator may have whatever time remains between now and the vote.

Mr. JAVITS. I will yield all my remaining time to the Senator from Oklahoma.

Mr. BELLMON. Mr. President, I find it hard to believe that we are about to rush this bill through the Senate without even giving some of our colleagues the opportunity to offer their amendments.

Just last night, the Senate passed—by an overwhelming majority—a tuition tax credit. S. 2539 is the administration's and the Human Resources Committee's proposed alternative to that tax credit bill. I voted against the tax credit, Mr. President, but most of our colleagues voted for it.

I cannot imagine why we would pass two bills, on two successive days to accomplish the same objective. As may be known, I have consistently opposed both the tax credit and the bill before us. I have introduced S. 3403—the National Student Loan Bank Act—which I believe is a better solution than either tax credits or expanded grants to the problems confronting middle-income families whose children want to attend relative expensive institutions of higher learning. I hope—and expect—that the Senate will hold hearings on that bill next year, in conjunction with reauthorization of existing higher education legislation.

But we passed a tax credit bill last night, Mr. President; and it passed by a 65 to 27 vote. Why would we pass this bill today, unless we want two programs to do the same job?

During consideration of the first concurrent resolution on the budget, it was unclear which of the two middle-income tuition assistance proposals before us this year the Senate would prefer. It was generally agreed, however, that under no circumstances should we fund both bills. The first budget resolution, therefore, included assumptions which would have accommodated one-half on the projected cost of the tax credit, and one-half of the projected cost of the bill before us today. Our understanding at that time was that, once the Senate made a choice, we would adjust the assumptions for middle-income tuition assistance in the second resolution to reflect that choice. I repeat, Mr. President, the expectation was that the Senate would make a choice between the bills—not enact both.

Since the Senate has passed the tax credit, I believe the second resolution should reflect that. The tax credit will cost about $500 million in fiscal year 1979. Its cost, cumulative to 1983, is projected by CBO at $5.3 billion. If we were to add the cost of S. 2539 to the cost of the tax credit, Mr. President, CBO projects the total expenditure for these two bills—revenue loss and spending combined—would exceed $11 billion over the next 5 years. If we are to have any hope of a balanced budget, we cannot have both, Mr. President.

There are those who will argue that President Carter will veto the bill we passed last night. They will say, therefore, that we must pass S. 2539, if we are to enact middle-income tuition assistance this year. I cannot believe, Mr. President, that the U.S. Senate is prepared to legislate on this presumption. The only conceivable reason for voting in favor of the bill before us today—on the heels of our action last night—is if we favor enactment of both.

What if the President does veto the tax credit? Is there anyone here who can give me an absolute assurance that Congress will not override? If the Senate prefers a tax credit, is not the Senate ready to fight for the tax credit? If not, what were we doing for the last 3 days? Was that just an empty exercise in answer to political pressure, in this election year? And, Mr. President, if our constituents so prefer a tax credit to the bill before us, and if that is the reason we spent the last 3 days working on the tax credit bill, by what logic do we desert their desires at this point? Is it the agenda of the managers of this bill to make it easier for the President to veto the tax credit? If that is so, is that what we want?

I am going to vote against S. 2539, Mr. President; and I urge my colleagues to do likewise. It seems to me that those of you who voted for the tax credit can do no less for the proposal that you obviously support; and in the name of fiscal responsibility, I do not see how the Senate can do anything else.

● Mr. CULVER. Mr. President, I am pleased to support S. 2539, the College Opportunity Act of 1978. I am convinced this initiative will prove to be an effective means of providing aid to middle-income families working so hard to put their children through college.

We are all well aware of the ever-increasing costs of higher education. Over the past 10 years, the costs of sending a child to college have increased almost 100 percent. And, as always, the burden of these rising expenses falls most heavily on the midlevel taxpayer. Americans have always been willing to make sacrifices to obtain good education for their children. Nonetheless, in a country dedicated to equal educational opportunity, putting a child through college should not be the severe financial hardship it has become to so many parents.

The College Opportunity Act will provide financial assistance to students from middle-income families while increasing the funding now available to students from low and lower middle-income families. It expands and improves several current programs, including the basic educational opportunity grants, supplemental educational opportunity grants, college work study, and guaranteed student loans. These programs have aided many students in the past years, but they have not been as sensitive as they should to the needs of one of the largest segments of our population—the middle-income taxpayer. This proposal would help correct this shortfall.

The basic educational opportunity grant program was originally enacted in 1972 to provide direct cash grants to help defray high college costs. It has grown since then and now aids more than 2.1 million students a year. S. 2539 raises the current qualification limit of a $15,000 annual income to $25,000, which would make approximately 1.5 million new students eligible for such funds. Grants would be provided on a graduated scale based on a family's income and ability to afford the costs of higher education, taking into account such considerations as family size, unusual expenses such as high medical bills, or other circumstances which might affect the family's ability to pay during the year. Paperwork is to be kept at a minimum, and calculations for a family's possible eligibility will be provided free of charge.

In addition, the College Opportunity Act increases the authorization for supplemental educational opportunity grants, which provide assistance to qualified students of exceptional financial need, from the fiscal year 1978 authorization of $270 million to $370 million for fiscal year 1979. It is estimated that an additional 180,000 students from middle-income families would benefit by this increase.

The college work-study program permits higher education institutions and other nonprofit agencies to hire college students for part-time work and be reimbursed for 80 percent of the student's salary. Students thus have a chance to earn money while acquiring useful work experience. Increasing the authorization for this program to the level included in S. 2539 will create many more job opportunities for deserving students.

The guaranteed student loan program, which has been the primary aid available to middle-income families, is currently limited to families with less than a $25,000 gross yearly income. The College Opportunity Act lifts the income ceiling entirely for interest-subsidized loans, opening up eligibility to hundreds of thousands of additional students, and eliminates the burdensome paperwork formerly required for preparing a needs analysis.

Mr. President, the approach offered by this legislation is superior—both as fiscal policy and as education policy—to alternatives utilizing the Tax Code. I have heard from many Iowans about the pressing burden of rising education costs, and I believe we need an assistance plan which will address the widely varying financial needs and capabilities of recipients. Proposals for tuition tax credits would extend the same flat credit rate for college students in all families. The result on the one hand would be a windfall for wealthy families who require

neither the financial incentive nor assistance to send their children to college. For hard-pressed middle-income families, on the other hand, the amount would do little to relieve the college costs burden. The College Opportunity Act targets funds far more directly to the need and is provided at the time the student is faced with paying for tuition and fees, not months later. According to estimates by the Senate Human Resources Committee, S. 2539 provides an average grant of $700 for a student with a $19,000 family income, and a grant of more than $1,000 for a student in a $15,000 income family.

Mr. President, I believe that this legislation will enable us to move toward a goal of denying no qualified student a college education because of cost barriers. I hope the Senate will approve it.●

Mr. ROBERT C. BYRD. Mr. President, Federal education policy has benefited immeasurably from the sure and able leadership of the senior Senator from Rhode Island, CLAIBORNE PELL. Serving since 1969 as chairman of the Subcommittee on Education, Arts, and Humanities, he has had the responsibility of helping to guide and shape the Federal commitment to education.

Senator PELL's personal commitment to improving educational opportunity is perhaps best viewed in the legislative record. Indeed, the College Opportunity Act of 1978 which we have debated today is but the latest of a long series of education initiatives with which he has been associated.

Most well known, of course, is the student aid program which bears his name. The program, enacted in 1972, has insured that a college education will not be beyond the means of millions of young Americans. It is estimated that some 2.1 million needy students will receive grants under this program in 1978. It is no exaggeration to say that without the Pell grants program many would have been unable to attend the college of their choice.

Increased education assistance for disadvantaged children is another area in which Mr. PELL has successfully labored to focus the Federal commitment on education. During the time he has served as chairman of the Education, Arts, and Humanities Subcommittee, grants for disadvantaged children under title I of the Elementary and Secondary Education Act have more than doubled. Such a level of commitment made it possible for some 5.5 million children to receive education services last year.

Mr. President, I believe that the senior Senator from Rhode Island should be commended for the leadership which he has provided for so many years in the area of education. His most recent work on the Higher Education Act amendments—together with the work of the senior Senator from Vermont, Mr. STAFFORD, who is also deserving of the praise of this body—exemplifies his dedication to developing an appropriate Federal role in meeting the education needs of the Nation.

Mr. STEVENS. Mr. President, I truly regret that I must rise in opposition to S. 2539, the College Opportunity Act. Two years ago, however, I had an extended colloquy with both the floor managers of the higher education bill when we considered a similar program extension. At that time I stated:

I am going to oppose any further extension, ever, of this retreaded concept that continues to pile program on program and administrative cost on administrative cost, and refuse to simplify the process of providing assistance to the students who are in need.

In 1976 the able managers of the bill said that they would try hard to see what could be done to simplify the programs. Apparently, they have decided that this is not possible as what we have before us still contains four grant programs: Basic educational opportunity grants, supplemental educational opportunity grants, work-study, and State student incentive grants. Eligibility for BEOG's is determined at the national level; eligibility for SEOG's and work-study is determined by the financial aid officer of the college or university; and, eligibility for State student incentive grants is determined by the States.

I do not plan to reiterate all of the information I provided 2 years ago regarding the excessive administrative costs and expanding Federal bureaucracy associated with administering four different grant programs, but I do have copies of my earlier statements which I would be pleased to share. All of the arguments I made then remain valid except that I, thankfully, no longer have four children in college.

As a member of the Committee on Appropriations, however, I must state my strong objections to the mandatory funding provisions contained in this legislation for the supplemental educational opportunity grants and the work-study program. And, therefore, must regrettably vote against this bill.

Mr. JAVITS. Will the Senator yield to me?

Mr. BELLMON. I am glad to yield to the Senator.

Mr. JAVITS. I have conferred with Senator PELL. We will have hearings on higher education bills. If the Senator introduces it next year, I can assure him we will give him a hearing.

Second, the majority leader, Senator PELL and I made it clear to everybody what would be the progress of this legislation.

So, really, I think everybody who wanted to amend or do anything else about the bill had a chance, and there will be a rollcall vote.

The PRESIDING OFFICER. All time has expired. The hour of 11:45 having arrived, the question is, Shall the bill (S. 2539), as amended, pass? The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Mississippi (Mr. EASTLAND), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Connecticut (Mr. WEICKER) is necessarily absent.

The result was announced—yeas 68, nays 28, as follows:

[Rollcall Vote No. 324 Leg.]

YEAS—68

Allen	Gravel	Metzenbaum
Anderson	Griffin	Moynihan
Baker	Hart	Nelson
Bayh	Hatfield, Mark O.	Pearson
Bentsen	Hatfield, Paul G.	Pell

Goldwater	McIntyre	Tower
Hansen	Morgan	Zorinsky
	Muskie	

NOT VOTING—4

Abourezk	Johnston
Eastland	Weicker

So the bill (S. 2539) was passed, as follows:

S. 2539

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "College Opportunity Act of 1978".

SEC. 2. (a) Section 411(a)(3)(B) of the Higher Education Act of 1965 is amended by adding at the end thereof the following new division;

"(iv) Beginning with the academic year 1979–1980 and thereafter, in determining the expected family contribution under this subparagraph no rate in excess of 10.5 per centum shall be applied to parental discretionary income.".

(b) Section 411(b)(5)(B) of that Act is amended by striking out "$237,400,000" and inserting in lieu thereof "$500,000,000".

(c)(1) Section 411(b)(5)(A) of that Act is amended by striking out "$130,093,000" and inserting in lieu thereof "$370,000,000 for the fiscal year 1979, and $450,000,000 for the fiscal year 1980, and thereafter".

(2) Section 413A(b)(1) of that Act is amended by striking out "and for each of the succeeding fiscal years ending prior to October 1, 1979" and inserting in lieu thereof the following: "and for each of the five succeeding fiscal years, and $250,000,000 for the fiscal year ending September 30, 1979".

(d) Section 415C(b)(4) is amended by inserting before the semicolon at the end thereof a comma and the following: "except in any State in which participation of nonprofit institutions of higher education is in violation of the Constitution of the State".

SEC. 3. (a) Section 428(a)(2)(A) of that Act is amended to read as follows:

"(2)(A) Each student qualifying for a portion of an interest payment under paragraph (1) shall have provided to the lender a statement from the eligible institution, at which the student has been accepted for enrollment, or at which he is in attendance in good standing (as determined by such institution), which—

"(i) sets forth such student's estimated cost of attendance, and

"(ii) set forth such student's estimated financial assistance.".

(b) Section 428(a)(2)(B) of that Act is repealed.

(c) Subparagraphs (C) and (D) of section 428(a)(2) of that Act, and all cross references thereto, are redesignated as subparagraphs (B) and (C), respectively.

(d) Section 428(a)(2)(B) of that Act (as redesignated by subsection (c) of this section) is amended by striking out the semicolon at the end of clause (iii) and inserting in lieu thereof a period, and by striking out clause (iv) of such section.

(e) Section 428(a)(9) of that Act is repealed.

(f)(1) Section 425(a)(1)(A) of that Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

(2) Section 428(b)(1)(A)(i) of that Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

MOTION TO TABLE MOTION TO RECONSIDER VOTE ON S. 2539

Mr. PELL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STAFFORD. I move to lay that motion on the table.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. ANDERSON). Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Is that debatable?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Call the roll.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider the vote by which the bill was passed.

On this motion, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Louisiana (Mr. JOHNSTON), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Colorado (Mr. HART) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

The result was announced—yeas 75, nays 17, as follows:

[Rollcall Vote No. 325 Leg.]

YEAS—75

Anderson	Church	Griffin
Baker	Clark	Hatfield,
Bartlett	Cranston	Mark O.

Hansen	McClure	Stevens
Hatch	Morgan	Tower
	Moynihan	Zorinsky

NOT VOTING—8

Abourezk	Gravel	Johnston
Allen	Hart	Randolph
Eastland	Haskell	

So the motion to lay on the table was agreed to.

POINT OF ORDER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senator from North Carolina may make a point of order. I yield to him for—2 minutes? One minute?

Mr. HELMS. No longer than it takes to make a point of order.

Mr. ROBERT C. BYRD. Yes.

Mr. HELMS. I thank the distinguished majority leader.

Mr. President, with all due respect to the Chair——

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. May we have order in the Senate? Mr. President, may we have order in the Senate? I hope we may get order.

The PRESIDING OFFICER. The Senate will be in order. The Senator from North Carolina may proceed.

Mr. HELMS. I thank the Chair, and I thank the able majority leader.

Mr. President, with all due respect for the Chair and the Parliamentarian, and we all make errors, I make the point of order that the Chair did erroneously close morning business before resolutions and motions coming over under the rule were laid before the Senate this morning. I ask the Chair to rule.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, there are three things I have to say about this.

First of all, rule VII makes no reference whatsoever to resolutions and motions coming over under the rule.

Second, the point of order comes too late.

Third, the motion before the Senate was legitimately offered because the Chair had announced the conclusion of morning business.

I am not going to say any more than that. I am ready to vote.

The PRESIDING OFFICER. The Chair did close morning business erroneously. Therefore, the point of order is sustained, the motion to proceed falls, and the Chair lays before the Senate the first resolution coming over under the rule.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The clerk will please state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 39) disapproving pay recommendations of the President.

Several Senators addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, did the clerk finish the reading of the title of the first resolution?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Then, Mr. President, I move to proceed to the consideration of Calendar Order No. 686.

Mr. HELMS. Mr. President——

The PRESIDING OFFICER. The motion is not debatable.

Mr. McCLURE. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. McCLURE. Mr. President, I make the point of order that it is not in order to consider this matter until resolutions and motions coming over under the rule have been considered and disposed of.

Mr. ROBERT C. BYRD. Mr. President, I call attention to Senate Procedure, page 574, wherein it is stated:

A resolution laid before the Senate as coming over from a previous legislative day and displaced by an affirmative vote to proceed to the consideration of a bill prior to the expiration of the Morning Hour, is placed on the Calendar and not again laid before the Senate.

The PRESIDING OFFICER. The point of order is not well taken, the first hour of the morning now having elapsed, the motion is in order.

Mr. McCLURE. Mr. President, I appeal from the ruling of the Chair, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I move to lay the appeal on the table.

Mr. McCLURE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the appeal from the ruling of the Chair. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announced that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mr. ALLEN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Florida (Mr. STONE), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The yeas and nays resulted—yeas 64, nays 28, as follows:

[Rollcall Vote No. 326 Leg.]

YEAS—64

NOT VOTING—7

Abourezk	Eastland	Johnston
Allen	Goldwater	
Clark	Hart	

So the motion to proceed to consider Calendar No. 686 was agreed to.

The Senate proceeded to consider the joint resolution (H.J. Res. 554) proposing an amendment to the Constitution to provide for representation of the District of Columbia in Congress.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

CLOTURE MOTION

Mr. ROBERT C. BYRD. Mr. President, I offer a cloture motion.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair, without objection, directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate on H.J. Res. 554, a joint resolution proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

Robert C. Byrd, Birch Bayh, Charles McC. Mathias, Jr., Wendell R. Anderson, Edmund S. Muskie, Robert T. Stafford, Jennings Randolph, Mike Gravel, Adlai E. Stevenson, George McGovern, Edward M. Kennedy, Howard M. Metzenbaum, Donald W. Riegle, Jr., Daniel K. Inouye, John A. Durkin, Alan Cranston, William D. Hathaway, Paul S. Sarbanes, Patrick J. Leahy, Warren G. Magnuson, Gaylord Nelson.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion to proceed was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. MELCHER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, to begin historic debate in the Senate today, and significant——

Mr. MELCHER. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. May we have order?

Mr. SCOTT. Will the Senator yield for a unanimous consent request?

Mr. KENNEDY. Without losing my right to the floor.

Mr. SCOTT. Mr. President, I ask unanimous consent that Ted Humes and Pete Velde of the Senate Judiciary Committee staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I yield to the Senator from Virginia for a similar request.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that John I. Brooks and Roger Sindelar of my staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I make the same request for Ben Dixon and Fred Williams of Senator BAYH's staff; Ralph Neas from Senator BROOKE's staff; Mike Klipper from Senator MATHIAS' staff; Peter Parham, Tom Susman and Carey Parker of my staff; Tom Polgar of Senator MORGAN's staff; and Jim Davidson of Senator MUSKIE's staff be granted privilege of the floor during consideration of this legislation and any votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I yield for a similar request to the Senator from North Carolina.

Mr. HELMS. Mr. President, I make the same request for Dr. James Lucier, Sam Currin, John Carbough, and Mary Calhoun.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I make the same request for Romano Romani.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I make the same request for Bruce Eggers.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, we begin an historic debate in the Senate today on a significant issue of civil rights and human rights—an amendment to the Constitution to provide representation in Congress for the people of Washington, D.C.

In matters of fundamental justice and human rights involving the citizens of our Nation, there is no left or right, liberal or conservative. Yet, under the Constitution and laws of the United States, there is an anachronism that defies justice and denies one of the basic and most cherished rights of representative government for the people of the Nation's capital—the right to have a voice in the decisions of the Senate and the House of Representatives.

The issue is one of simple justice for the 690,000 citizens of the Nation's capital. For decades, going back to the beginning of the 19th century, ordinary District citizens, concerned local leaders,

and many Members of Congress have sought this basic goal. Indeed, the goal is remarkable and unusual only in the sense that it has been so flagrantly denied for so long to so many citizens. In a nation that was founded on the principle of representative government and that has prided itself for two centuries on the strength and vitality of its democracy, it is a travesty of history that the District of Columbia has no voice in Congress.

The eyes of three constituencies are upon us—the hundreds of thousands of citizens of the District of Columbia who ask only the same basic political right that all other Americans enjoy; the Americans in States throughout the country, who have made this question a national issue of civil rights; and millions more throughout the world who will see in our action a sign of America's real commitment to human rights. No other action Congress takes can so clearly demonstrate that our Nation's worldwide concern and sensitivity for human rights begin at home, on the doorstep of the Capitol, in the Chambers of the House and Senate.

In recent weeks, the Senate has spoken out with a virtually unanimous voice in condemning the violations of human rights in the Soviet Union. Our noble words, however—important as they are in giving hope to so many in other lands who are denied their basic rights—would acquire a hollow ring if the Senate now turns its back on the rights of the people of the District of Columbia to share in our democracy.

In the view of legal scholars, there is no constitutional impediment to enactment of this measure. Enfranchisement of the District was not an issue the Founding Fathers faced. They could hardly foresee that the sparsely settled marshy area along the Potomac River—the "District (not exceeding 10 miles square)" about which they wrote in 1787—would one day be not only the seat of government of the United States, but the capital of the free world, a celebrated city of several hundred thousand residents.

The population of the District is now larger than seven States. Residents of the District pay large amounts of taxes to the Federal Government. District residents fought and died in Vietnam and in all the Nation's other wars. And yet they continue to endure both taxation without representation and conscription without representation.

Last March, by an impressive two-thirds vote, the House of Representatives approved the pending constitutional amendment (H.J. Res. 554) to provide full voting representation for the District of Columbia in both the House and the Senate—two Senators and two members of the House of Representatives on the basis of recent population estimates.

Now, the spotlight is on the Senate. We have a realistic opportunity to achieve the goal, and we should not let the opportunity slip away. One of the most honored principles of our democracy is the concept of "one person, one vote." In the District of Columbia, however, that principle has no application. Instead, for District citizens, the rule is "690,000 persons, no votes." Nowhere in America should the principles of democracy be more firmly established than in the Nation's capital. The time has come to remove the cloud of America's "Last Colony" from the District of Columbia.

The proposed amendment has strong bipartisan support. It has been endorsed by the chairmen of both the Democratic National Committee and the Republican National Committee. Both the Democratic and Republican party platforms in the 1976 election contained explicit planks supporting voting representation in the Senate and House for citizens of the District. In 1970, testifying before a Senate committee on behalf of the Nixon administration, Assistant Attorney General William H. Rehnquist, now a Supreme Court Justice, endorsed a constitutional amendment to achieve this goal. His words emphasized the long-standing injustice perpetrated on citizens of the District:

> The need for an amendment of that character at this late date in our history is too self-evident for further elaboration; continued denial of voting representation from the District of Columbia can no longer be justified.

But what was self-evident to Mr. Rehnquist and the platform committees has not been obvious to Congress. In recent years, the Senate has usually been regarded as the graveyard for aspirations of District residents to participate in their National Government. A breakthrough occurred in 1961, when the 23d amendment to the Constitution gave the District the vote in Presidential elections; that amendment was ratified by the States in 9 months—a record at the time.

But success has not come as easily for congressional representation. Opposition so far has seemed to arise from four "toos" on the part of some Members of the Senate—the fear that Senators elected from the District of Columbia may be too liberal, too urban, too black or too Democratic. There is also the mystique of the Senate club, the reluctance to expand the membership beyond the current 100 Senators. But such arguments cannot bear the light of day. They deny basic justice. They are unworthy of the Senate and the Nation, and provide no justification for denying representation in Congress to the people of the District of Columbia.

Here in the Senate, we often differ on the degree to which the Federal Government should be involved in the affairs of the citizens of this country. But we should all agree that in this age of big government, no Americans are truly free unless they have a voice in the election of those who write the Nation's laws. Two hundred years and 95 Congresses after the Nation was founded, it is time to welcome Senators and Representatives from the District of Columbia into our congressional deliberations and decisions—and our cloakrooms.

Wherever I travel, I find people surprised to learn that the citizens of Washington cannot vote for Members of Congress. This mood, and the precedent of swift approval for the 23d amendment, give confidence that the generous and decent instincts of the American people will produce prompt ratification of an amendment to give the District the vote in Congress, once we send the amendment to the States.

THE CASE BASED ON POPULATION

One of the strongest arguments in favor of House Joint Resolution 554 is the simple fact that the District of Columbia is not just a museum collection of Federal monuments and Government buildings. It is also the home of hundreds of thousands of men, women, and children—690,000 people in all.

Under one of the most basic principles of our democracy, the citizens of each of the States are represented in the Senate and the House. Yet, the 690,000 citizens of the District are denied this fundamental right.

As table 1 indicates, the District of Columbia has a population greater than, or equal to, that of seven States, based on the most recent data available from the Bureau of the Census—the population estimates for 1977:

District of Columbia	690,000
South Dakota	689,000
North Dakota	653,000
Nevada	633,000
Delaware	582,000
Vermont	483,000
Alaska	407,000
Wyoming	406,000

If, instead of the 1977 estimates, the official census figures for 1970 are used, the District has a population greater than the population of 10 States—including Idaho, Montana, and New Hampshire, in addition to the above seven States. Each of these States has its own representation in Congress—two Senators, and either one or two Members of the House of Representatives, depending on the population of the State. Yet, the people of the Nation's Capital have no such voice.

In this era of profound involvement by Congress in so many different aspects of American life, it is a denial of basic justice and human rights for the citizens of the District to have no voice in the decisions of Congress.

THE CASE BASED ON TAXES

Since the days of the Revolutionary War, a fundamental principle of our Nation has been the rejection of taxation without representation.

Yet, today, two centuries after America was founded, the citizens of the District of Columbia are forced to endure the unfair burden of such taxation. As citizens of the United States, the residents of Washington, D.C. are obliged to pay large amounts in taxes each year to the Federal Government. Yet these citizens are denied representation in Congress, which writes the Nation's tax laws.

The Library of Congress has prepared data summarizing Federal tax payments from each of the 50 States and the District of Columbia. The data, based on concepts developed by the Tax Foundation, shows dramatically the degree to which the District of Columbia bears the burden of taxation without representation.

As shown by table 1, residents of the

District paid out $1.4 billion in taxes to the Federal Government in fiscal year 1977. That amount is greater than the taxes paid by 11 States:

	Billions
District of Columbia	$1.470
Maine	1.400
New Hampshire	1.330
Alaska	1.225
Nevada	1.190
Idaho	1.155
Delaware	1.120
Montana	1.085
North Dakota	0.945
South Dakota	0.840
Wyoming	0.735
Vermont	0.630

Each of these States is represented in Congress by two Senators and by either one or two Members of the House of Representatives, depending on the population of the State. The citizens of these States, therefore, have a voice in the way they are taxed by the Federal Government. But the citizens of the District of Columbia have no such voice.

If the Federal tax burden is calculated on a per capita basis, the comparison becomes even more stark. For District of Columbia residents, the per capita tax burden is $2,116, or $491 above the national average of $1,625. Only one other State—Alaska—has a higher per capita tax burden; in 49 of the 50 States, the Federal tax burden is smaller than in the District of Columbia.

These figures provide a compelling argument for granting representation in Congress to the District of Columbia. House Joint Resolution 554 would enable the District to elect Members of both the Senate and the House of Representatives. It deserves to be enacted, so that at last we can end a serious blight on our contemporary democracy, the burden of taxation without representation that has existed so long and so unfairly for the citizens of the Nation's Capital.

THE CASE BASED ON CASUALTIES IN VIETNAM

One of the most important arguments in favor of House Joint Resolution 554 is contained in the statistics of the Department of Defense on casualties in the Vietnam war. The figures reveal that 237 citizens of the District lost their lives in Vietnam. As table 1 indicates, the casualty level for the District is higher than the levels for 10 States—Alaska, Delaware, Idaho, Nevada, New Hampshire, North Dakota, Rhode Island, South Dakota, Vermont and Wyoming.

The people of those 10 States, and of every other State, were represented in the House and Senate throughout the period of the Vietnam war. These people—and the people in every other State—had a voice in the decisions of Congress on the war, decisions that affected the lives of so many thousands of their citizens who were asked and compelled to serve their country in that war. But the citizens of the District of Columbia had no such representation and no such voice.

We cannot remedy that injustice for the past. But we can do so for the future. At a time when Congress exerts such a profound and growing influence over so many different aspects of American life, the people of the District of Columbia have a right to be heard in our deliberations. House Joint Resolution 554 would give them the voice they deserve.

A DISTRICT OF COLUMBIA GOLD STAR MOTHER'S CASE

At the Senate hearings in April on the pending amendment, one of the most dramatic and moving moments came in the testimony by our distinguished colleague from Missouri, Senator EAGLETON.

In that testimony, he told of a letter he had received from a District of Columbia Gold Star mother, whose son had been killed in the Vietnam war. Yet, as she told Senator EAGLETON, she had no one in Congress to represent her views in decisions on the war. As Senator EAGLETON testified:

This letter was from a mother who had two sons in the army. 1971, as the Chairman will recall, was still a very high point in the Vietnam War. Her elder son had been killed, and naturally that had had a traumatic impact on her, her thinking, et cetera, and she wrote me a very moving but simple letter saying, in essence, "I have lost one son. I may well lose another. Yet I have no voice in voting on how far this war should go, or how long it should go on, or how much expanded it should be—into the Parrot's Beak, or how many bombs we should drop on the Ho Chi Minh Trail. I am hopeless, and in that sense I am voiceless."

I think that one letter did more to shape my thinking than a million words or a 200-page memorandum. The appeal is not simplistic, it is just fair and equitable.

And that was the testimony of Senator EAGLETON.

That letter sums up very well what this issue is all about. On basic issues of vital importance to the lives of all Americans—issues like war and peace, inflation and unemployment, and the countless other areas in which actions by Congress affect the daily lives and hopes of every citizen of this land—the people of the District of Columbia are denied their rightful voice. That denial contradicts the most central principles on which our democracy rests. It is an anachronism of history that no American should tolerate.

THE NEXT GENERATION

Few things matter more to the long-run future of the United States than the values we hand on to the next generation of the Nation's leaders.

One of the most impressive witnesses at the Senate hearings last April was Natasha Pearl, a 17-year-old student who graduated this year from Woodrow Wilson High School in the District of Columbia.

Ms. Pearl's testimony goes indirectly to the heart of the issue—the fact that the 700,000 citizens of Washington, D.C., are denied one of the basic rights that other American citizens enjoy: the right to participate in our democracy by sending their own elected representatives to Congress.

Recalling her experience as a delegate to the Senate youth program, Ms. Pearl testified:

The lack of voting representation for the District was an issue I often discussed with my fellow delegates. Shock and disbelief were expressed upon learning of the grossly unfair and undemocratic situation existing in our nation's capital. Knowing that our forefathers fought and died so that taxation without representation would never again occur in this country, many delegates could not understand why my parents and other District residents pay federal taxes, bearing all the burdens of citizenship, like their parents—yet have no representation. To the Senate Youth delegates, it was incomprehensible that in 1978, in the United States of America, nearly three quarters of a million American citizens are without the privilege that all the other Senate Youth delegates took for granted—voting representation in the Senate and House of Representatives.

She also recalled her feelings on the day set aside for the delegates to visit the offices of their Senators:

You may recall the one day of the Senate Youth Program that was set aside for the delegates to visit their Senators. I have never before felt inferior to fellow Americans. That day I did. All I could do was listen at dinner that evening when my friends told of how they had discussed important national issues, such as the Panama Canal Treaties, energy policy, and health care with their Senators. I, too, have opinions on these and other vital issues. That day, I could share them with no one who had a voice or a vote in the United States Senate.

Finally, she spoke of an occasion last February when she represented the District of Columbia at "Convention II," a mock constitutional convention held in Washington:

It was a marvelous experience. Two hundred and seventy-five students from nine states and the District considered one hundred and fifty-five constitutional amendments. These amendments dealt with a wide variety of issues, many of which are currently being considered by Congress. Only two of the one hundred and fifty-five proposed amendments were passed. I sponsored one of them. It provided voting representation for the District of Columbia. The vote was 182 in favor and 16 opposed—an overwhelming statement of support by youth for this issue.

Ms. Pearl's testimony makes a compelling case for approval of House Joint Resolution 554. The question is really a very simple one—is it fair for Congress to continue to deny to Ms. Pearl and the other residents of the Nation's Capital the same full rights that 200 million other Americans enjoy? To a large extent, the way we answer questions like this one will be a signal to the next generation of the depth of our commitment to the democratic ideals on which the Nation was founded.

THE CASE BASED ON THE EXPERIENCE OF FOREIGN NATIONS

According to a study earlier this year by the Library of Congress, among 115 nations in the world with elected national legislatures, the United States and Brazil stand alone in denying representation in the legislature for citizens of their capital cities.

The analysis is an important study in comparative government and a significant source of additional support for House Joint Resolution 554, which offers Congress the chance to end the serious injustice perpetrated on the citizens of Washington, D.C. They deserve a voice in the Senate and the House like any other American citizen, and like citizens in other nations the world over.

The study provides dramatic documentation of the lonely and reactionary position of the United States in the in-

ternational community with respect to one of the fundamental and most widely recognized human rights in the world today—the right to vote for elected representatives. The study makes clear that in this important respect the United States, the emperor of human rights, has no clothes. Aside from the authoritarian and repressive regime of Brazil, America stands alone among the nations of the world in imposing this flagrant restriction on the civil and political rights of the citizens of its capital city.

As table 2 reveals, the virtually universal practice in nations with elected legislatures—whether democracies or totalitarian systems—is to accord representation to the capital city on a parity with other cities in the nation.

A key element of the study is its documentation that even in nations with federal systems of government like the United States, this principle of parity is followed.

The study included 16 federal nations, with the following findings:

Nine federal nations (Australia, Canada, West Germany, India, Nigeria, Pakistan, Switzerland, the Soviet Union, and Yugoslavia) have capital cities which are not special federal districts and which receive the same representation in the legislature afforded to other cities.

Seven federal nations (Argentina, Australia, Brazil, Malaysia, Mexico, Venezuela, and the United States) have capital cities which are federal districts with a special status similar to that of the District of Columbia. Only Brazil and the United States, however, deny voting representation in the legislature for residents of the capital cities.

It is clear from this study that opponents of representation in Congress for the District of Columbia cannot hide behind the Federal analogy. Theoretical arguments for denying representation, based on the view that the District of Columbia is not a State, are easily outweighed by the demand of the citizens of the Capital City to participate in the basic rights of democracy. With the exception of Brazil, other federal nations modeled on our own Federal Government have resolved this issue against discrimination and in favor of representation for the capital. In this respect, the onrushing tide of world democracy and human rights has left the United States sadly in its wake.

THE BLEMISHED RECORD OF ADMISSION OF STATES TO THE UNION

The effort to end discrimination against D.C. residents is hardly a novel chapter in American history. One of the continuing currents in the Nation's 200-year history has been the struggle of peoples in the various territories of the Union to achieve the full rights of citizenship. The pages of our history contain numerous examples of the frustrations, failures, and eventual successes of the citizen of various regions of the Nation in becoming full partners in the Union.

In these cases, of course, the goal was statehood. But statehood is a goal not readily available to the District of Columbia, because of the unique character of the District as the Nation's Capital within our federal system. In a larger sense, however, the aspiration is the same and is independent of the statehood issue. That aspiration is the desire of American citizens to enjoy as nearly as possible the full benefits of American democracy.

Analysis of the issues involved in the admission of States to the Union provides a number of illuminating examples. In many cases, States were admitted without any great difficulty. In other cases, however, there were long delays and serious controversies, involving complex political, economic and social issues. The best known of these controversies was the 19th century issue over whether new States should be admitted as slave States or free States. The Missouri Compromise and the compromise of 1850 were the landmark events of this period. Missouri, Maine, Arkansas, Florida, Texas, Michigan, Iowa, Wisconsin, and California were able to join the Union as a result of these famous but fragile compromises.

In other cases. other issues were involved. Often, admission to the Union was delayed by partisan or racial factors.

The admission of Oregon was hindered by Republican fears that it would be a Democratic State. But Oregon was admitted in 1859 and voted for Lincoln in 1860.

Kansas endured severe civil violence and divided the Democratic Party before it became a state in 1861.

The admission of Idaho was delayed in part by religious controversies over the Mormon minority.

The admission of Wyoming was resisted in part because of its progressive attitude toward the political equality of women.

The admission of Utah was delayed more than 40 years, in large part because of the controversy over the Mormon religion.

The admission of Oklahoma was resisted because of the controversy over the status of the Indian territory.

The admission of Montana was delayed for over 20 years by Republican opponents, who feared that the State would be a Democratic stronghold, and who refused to agree to statehood unless the Dakota Territory was divided into two States likely to be Republican. In 1889, an omnibus statehood bill admitted Montana, North Dakota, South Dakota, and Washington to the Union.

Blatant racial discrimination against the Spanish-speaking population was a key factor in the long delay before admission of New Mexico to the Union.

In more recent times, before they finally gained statehood in 1959, the admission of Alaska and Hawaii became a political football, with Democrats fearing a Republican Hawaii and Republicans fearing a Democratic Alaska.

The lessons of these numerous examples is that partisan and discriminatory factors have no place in the decision to admit citizens anywhere in the Nation to the blessings of full participation in our system of government. The people of the District of Columbia have already waited far longer than the citizens of any territory to obtain the basic right of representation in Conrgess. House Joint Resolution 554 would end this long injustice.

ORIGIN OF THE DISTRICT OF COLUMBIA

The concept of a separate Federal district under the exclusive control of Congress developed as the response of the Founding Fathers at the Constitutional Convention to the "Philadelphia Mutiny" of June 21, 1783. On that occasion, 80 to 250 disgruntled and angry Revolutionary Army soldiers demanding back pay disobeyed their officers and marched on Independence Hall in Philadelphia, where the Continental Congress was meeting. The Congress requested protection from the Pennsylvania militia, but the request was refused, and the Congress was forced to flee to Princeton, N.J., under cover of darkness.

The Philadelphia Mutiny was the central factor in the approval of article I, section 8, clause 17 of the Constitution by the convention in 1887, which gave Congress the power to protect itself at the site to be chosen for the Nation's Capital:

> The Congress shall have Power . . . To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the acceptance of Congress, become the Seat of the Government of the United States.

When the First Congress met in New York in 1789, a major question was the "residence" issue—the selection of a site for the capital city. The primary concern of the legislators was the issue of economic advantage. As the historian Constance Green has written, the assumption underlying the debate was that—

> Wherever Congress chose to locate the federal city, there a great commercial center would arise. That conviction explains more fully than any consideration of prestige or legislators' convenience why sectional controversy had run so strong during the congressional debates on the 'residence' bill.

The debates narrowed the issue to a choice between a southern site near the 'geographic center" of the Nation (site on the Potomac River) and a northern site near the 'population center" (a site on the Susquehanna River in Pennsylvania). In a compromise achieved by Secretary of State Thomas Jefferson and Secretary of the Treasury Alexander Hamilton, the southern site was accepted by the northern faction in Congress, in return for southern acceptance of a northern proposal by which the Federal Government would assume the debts of the States from the Revolutionary War.

In anticipation of the action by Congress, territory for the site had been ceded to the Federal Government by Maryland in 1788 and by Virginia in 1789. The Residence Act of 1790 enacted by the First Congress specified in general terms a broad area on the Potomac River from which the site could be chosen. But the act fixed the southern most possible portion of the site at the junction between the Potomac and the Anacostia River. Jn addition, the act authorized President Washington to appoint and supervise three commissioners to choose the actual site and survey and define the District. In effect, the selection of the

precise site was left to President Washington.

President Washington, however, because of his desire to include the city of Alexandria in the capital area, chose a southern corner for the site a few miles farther south than the 1790 Act of Congress permitted, with the result that approximately one-third of the actual area selected by the President lay outside the authorization by Congress. Subsequently, Congress enacted additional legislation approving the site.

On the first Monday in December 1800, in accord with the original legislation enacted by Congress in 1790, the national capital was officially transferred from its temporary location in Philadelphia to the new site.

The area originally included in the District of Columbia consisted of only two significant communities—Georgetown in the Maryland portion with a population of about 3,000 and Alexandria in the Virginia portion with a population of about 5,000. In addition, there were two tiny trading post settlements in the territory—Carollsburgh on the present Anacostia River, and Hamburg on the site of the present Foggy Bottom.

During the period 1790–1800, the city of Washington came into being, covering the area east of Georgetown and north of the Potomac to the present Florida Avenue. The region north of the city of Washington became Washington County. According to the census of 1800, the population of the entire District of Columbia was 14,000.

Until the official transfer of the Federal Government to the District of Columbia in 1800, Maryland and Virginia laws continued in operation in the territory and residents of the local communities voted in Federal elections as citizens of their respective States. This practice ended, however, in December 1800, when the exclusive jurisdiction of Congress over the District took effect, and the residents lost their status as citizens of a State.

THE FEDERAL PAYMENT FALLACY

So far, opposition to House Joint Resolution 554 has crystallized around a series of arguments that are easily rebutted.

Some opponents argue that if the District of Columbia is to receive the status of a State with respect to representation in Congress, then the District must give up the so-called "Federal payment" by which, it is claimed, the District receives special financial treatment from Congress not available to the States.

But the argument misconstrues the nature of the Federal payment, which is an annual appropriation intended to offset the overall negative fiscal impact of the Federal Government on the District. In effect, the appropriation—$276 million in fiscal year 1978—represents an effort by Congress to account for the difference between the special burdens imposed on the city (such as tax-exempt Federal land and buildings) and the special benefits (such as revenues from tourism and Federal construction projects) accruing to the city as a result of the Federal presence.

Obviously, there is occasional fiscal tension between Congress, in its role as legislator for the District, and the municipal government of the District, as shown by the continuing controversies over D.C. appropriations bills. But these controversies have little to do with the rights of the citizens of the District to be represented in Congress and to have a voice in the many actions of the House and Senate on issues of foreign and domestic policy. Whatever the view of individual Senators as to the excessive or inadequate nature of the Federal payment, I hope we can agree that the issue is separate from the question of representation in Congress and should be considered accordingly.

In fact, the Federal payment for fiscal year 1979 is likely to be significantly lower than the figure for 1978. Over the years, the amount of the Federal payment has ranged from a high of 43 percent of total congressional appropriations in 1921, to a low of 9 percent in 1953. In the 1970's, the figure has fluctuated between 27 percent in 1975 and 20 percent, where it is today.

In addition, there are a number of specific factors that help to explain the purpose and size of the current Federal payment:

The Federal Government owns 38 percent of the land area in the District, and this land is exempt from the local tax rolls. For many States, the figure is in the range of 4 percent. If this low figure applied to the District, it is estimated that local property tax revenues would be increased by $60 million, and that local sales and income taxes would go up by even larger amounts.

The District must provide extensive fire and police protection for the Federal facilities, as well as sidewalks, streets, and other services not required in States with a smaller Federal presence.

So far, Congress has forbidden the District to enact a commuter tax, which would spread the special costs imposed by the Federal presence more equitably among the Federal employees who work in the District but live in the suburbs. Other States make reasonable use of such taxes in such situations. But Congress denies this source of revenue to the District—estimated at $200 million a year in the typical versions used by various States.

Congress refuses to permit the District to issue tax-exempt bonds. States have this option, and use it extensively to borrow funds at interest rates significantly below the market rate for tax-free bonds. Currently, the Federal tax subsidy for tax-exempt bonds in the various States totals $6 billion, or an average of $120 million per State. Yet the District is denied access to this source of revenue.

Congress imposes a height limit on buildings in the District. These limits restrict business development, and reduce the access of the District to property and other taxes.

Finally, District residents pay 11.7 percent of their principal income in the form of local taxes to the District. That figure exceeds the percentage for 23 States. Clearly, the Federal payment is not a device that allows District residents to avoid their fair share of local taxes.

As the above examples indicate, there are substantial areas in which Congress restricts the revenue sources available to the District. In effect, the Federal payment is a lump sum appropriated by Congress in lieu of these alternative revenues. It is hardly a symbol of an undeserved financial windfall for the District that impairs the case for representation of District citizens in the Senate and House of Representatives.

THE FEDERAL EMPLOYEE FALLACY

A variation of this argument occasionally made by the opponents of representation in Congress for District residents is that representatives elected by the District would be special pleaders for Federal employees.

It is true that a significant number of District workers are Federal employees. As shown by table 1, there are 221,000 Federal jobs in the District, reflecting the following pattern according to residence:

D.C. residents	112,000
Maryland residents	63,000
Virginia residents	46,000
Total	221,000

If the number of Federal jobs in the Maryland and Virginia suburban counties is also taken in account, the result is that each of the two suburban areas has more Federal employees than the District of Columbia. In fact, the District accounts for less than one-third of all Federal employees in the Washington area.

District of Columbia	110,000
Maryland suburbs	140,000
Virginia suburbs	143,000
Total	393,000

In addition, as table 1 also shows, three other States—California, Texas, and Virginia—provide more Federal jobs than the District of Columbia.

The opponents' argument also ignores the many other economic and social facets of the District, apart from Federal employment. Members of the House and Senate elected from the District would also represent the interests of small business, the construction industry, banks, veterans, teachers, the elderly, the poor, and virtually all the other interest groups found in the various States. It would be as unreasonable to deny representation to the District because of its Federal employees' bloc, as to deny representation to a State because of its farm bloc.

The work of Congress impinges increasingly heavily on all Americans, whether they are residents of the District or the States, and the citizens of the District deserve to participate in the decisions of Congress on a parity with all other American citizens.

Equally important, in light of the mandate of article I of the Constitution giving Congress exclusive jurisdiction over the District of Columbia, elected representatives from the District would enable Congress to conduct its oversight responsibilities in a more informed and effective manner.

THE STATEHOOD FALLACY

Opposition to the proposed amendment has usually crystallized around a series of fallacious arguments that are easily rebutted.

Some opponents of full representation claim that the District is a city, not a State, and that only States are entitled to representation in the House and Senate. They argue that there is no greater reason for this city to be represented in Congress than there is for other large cities which are also denied this right.

But this argument ignores the obvious fact that other American cities are political subdivisions of States. They already have representation in both the Senate and the House, while the citizens of the District have no representation at all.

In other ways, Congress has been willing to treat the District of Columbia as a State. For example, the District has long been treated as a State in virtually every major Federal grant legislation. In program after program, in statute after statute, all of us in Congress are familiar with the well-known clause in legislation, "For the purpose of this legislation, the term 'State' shall include the District of Columbia."

The statehood argument is no more than a thinly veiled excuse to perpetuate the denial of congressional representation to the people of the District. The District is neither a city nor a State. In fact, statehood may well be an impossible alternative, given the practical and constitutional questions involved in changing the historical status of the Nation's Capital. But such debate should not be allowed to mask the basic fact that, 200 years after the Nation was founded, the people of Washington are second-class citizens, deprived of the right to participate in the making of the laws by which they are governed.

THE ARTICLE V CONSTITUTIONAL FALLACY

Another occasional objection to representation in Congress for the District of Columbia rests on the proviso in article V of the Constitution, which declares that "no State, without its Consent, shall be deprived of its equal Suffrage in the Senate."

To state the obvious, however, what House Joint Resolution 554 proposes is a constitutional amendment. Since, by definition, a constitutional amendment cannot be unconstitutional, the suggestion that House Joint Resolution 554 is unconstitutional is a contradiction in terms and a fatal flaw in the logic of those who raise their curious objection.

In any event, it is far too late in our history to argue that granting representation in Congress to the District of Columbia would deprive any State of its "equal suffrage in the Senate." Since the ratification of the Constitution by the Original Thirteen States, 37 additional States have been admitted to the Union. As a result, the suffrage of the original 13 States in the Senate has been "diluted" nearly fourfold, from 2 to 26 to 2 to 100. Yet, not one seriously argues that any of the older States has been deprived of its equal suffrage in the Senate by the admission of new States.

The principle is clear. So long as the District of Columbia is represented in the Senate equally with every other State, representation for the District of Columbia will not offend the provisions of article V. Each State will still have two votes in the Senate, and each State will still have the same proportionate vote as every other State.

During extensive hearings by both the Senate and House Judiciary Subcommittees on this issue, leading constitutional scholars strongly endorsed full voting representation for the District, including representation in the Senate as well as in the House. Among those testifying on House Joint Resolution 554, for example, was Prof. Charles Alan Wright of the University of Texas School of Law, who dealt bluntly with the article V objection:

> It seems to me that the clear purpose of (the "Equal Suffrage Clause") was to insure that the Great Compromise would not be undone and that the representation in the Senate would not be put on the basis of population. That purpose is not compromised by allowing the District to have two Senators any more than it is when a new state is admitted.

THE RETROCESSION FALLACY

It is sometimes argued that voting representation for the people of the District should not be achieved by independent representation in Congress, but by alternative methods linking the District in various ways to the State of Maryland. But there are serious objections to these alternatives, which go by the names of "full retrocession" (ceding the District's territory back to Maryland) or "partial retrocession" (allowing District citizens to vote in Maryland elections).

First, as a matter of principle, it would be unwise policy and unfair to the citizens of both Maryland and the District. The geographical area comprising the original District was formally ceded to the Federal Government in the 18th century, shortly after the ratification of the Constitution, and consisted of Maryland and Virginia portions. The Virginia portion of the District was retroceded to Virginia in 1846, but the Maryland portion has continued to the present time as the District of Columbia.

Thus, the District has not been a part of Maryland since 1788, when the territory that now comprises the District was ceded by Maryland to the Federal Government. Two centuries after the original act of cession by Maryland, there are simply no cultural, community, or similar ties that would warrant attempting to relink the District to Maryland, and the ancient historical tie is far too slender and obsolete to justify that step today. The District has developed its own community and its own interests, separate and apart from Maryland, and it deserves representation in Congress in its own right, and not merely as an artificial adjunct to a State with which it has no common history.

We might just as well try to link the District to Virginia—or even to Oklahoma or Idaho—as try to fit it back into Maryland.

Those who favor retrocession draw on the fact that under the different circumstances of an earlier era, the territory ceded by the State of Virginia to the Federal Government in 1789, which formed roughly one-third of the original District, was ceded back to Virginia by Congress in 1846.

But historical analysis indicates that the circumstances surrounding the Virginia retrocession are in no way comparable to the situation that exists today. In fact, at the time of the Virginia retrocession, there was nothing "Federal" to retrocede. To allay criticism of his role in selecting a site for the new Federal District so close to his Mount Vernon estate, President Washington had insisted that no Federal building should be constructed in the Virginia portion of the District.

The preamble to the Retrocession Act of 1846 recites the view that the Federal Government had not used the Virginia portion of the District and would probably never need it. The preamble also refers to the fact that a few months earlier, the Virginia legislature had enacted legislation accepting the retrocession.

The historical analysis also indicates that the Virginia retrocession was directly affected by the political, social, and economic factors of the time, particularly the resentment of the citizens of the town of Alexandria over their inclusion in the District. A major additional factor was the struggle between the slaveholding eastern regions of Virginia and the western portions of the State for control of the Virginia Legislature. Neither retrocession nor any other measure could resolve the enormous pressures that were building in this period. As the Civil War began, the State of West Virginia was created from the western counties of Virginia and was admitted to the Union in 1863.

Seen in historical perspective, the retrocession of the Virginia portion of the District in 1846 is not a precedent for action today on the issue of voting representation in Congress for the District of Columbia.

Second, there is a much more obvious and recent precedent which argues strongly in favor of independent representation in Congress for the District of Columbia, rather than in combination with Maryland or any other State. That precedent is the 23d amendment, which was ratified in 1961 and which gave citizens of the District an independent voice in Presidential elections through the electoral college. It does not, obviously, route District voters through Maryland elections to achieve its goal.

Recently, I asked the Library of Congress whether the concept of retrocession—allowing District residents to vote in Maryland Presidential elections, instead of giving the District independent representation in the electoral college—was considered as a possible alternative during the debates on the 23d amendment. The Library of Congress has informed me:

> To our knowledge, there was no mention of retrocession to Maryland or any related alternative arrangement during discussion of the 23rd amendment in Congress—either in the hearing records or during floor debate.

Thus, Congress overwhelmingly recognized in 1960 that there was no jus-

tification for tying the District to Maryland for purposes of voting in Presidential elections. There is no justification today for tying the District to Maryland for purposes of voting in Senate and House elections.

Our action on the 23d amendment is, therefore, a strong precedent against any current effort by Congress to tie the District to Maryland for voting purposes. The District now has its own voice in Presidential elections, and it is entitled to its own voice in congressional elections.

Third, as a practical matter, I know of nothing to indicate that Maryland would be at all receptive to the idea. Retrocession proposals surfaced briefly in the course of the House subcommittee's consideration of House Joint Resolution 554. But they were quickly discarded, in large part because of the obvious resistance of the Maryland congressional delegation. The proposals were not raised again, either in the full House Judiciary Committee proceedings or as a floor amendment in the House.

Fourth, there are a number of legal, even constitutional, questions that would have to be resolved to make retrocession a serious possibility. Full retrocession would subject the Federal Government to the powers of the State of Maryland and fly in the face of the settled constitutional provision creating the District as a Federal entity. Partial retrocession—simply turning District citizens into Maryland residents for the purpose of voting in Senate and House elections—would raise such questions as whether District residents should then be entitled to send representatives to Annapolis to participate in drawing new congressional district boundaries to vote for the Governor of Maryland who would have the power to fill vacancies in the congressional delegations, and other similar issues.

For these reasons, retrocession is a blind alley we ought not to go down in seeking congressional representation for the people of the District.

In sum, the arguments against full voting representation in Congress for the District of Columbia are shallow at best and pernicious at worst. It is a sad commentary on American democracy that such flimsy arguments have consistently been used to deny representation in Congress for the citizens of our Nation's Capital. At a time when the role of Congress has an increasingly profound influence on the lives of each American, it is also time to honor the promise of America for every citizen, without exception.

Mr. President, I ask unanimous consent that the material to which I made reference be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

QUOTATIONS ON REPRESENTATION IN CONGRESS FOR THE DISTRICT OF COLUMBIA

Republican Party Platform 1976:

We . . . support giving the District of Columbia voting representation in the United States Senate and House of Representatives.

Democratic Party Platform 1976:

We support . . . full voting representation in the Congress [for the District of Columbia.]

James Madison (The Federalist No. 43):

The extent of this federal district is sufficiently circumscribed to satisfy every jealousy of an opposite nature. And as it is to be appropriated to this use with the consent of the State ceding it; as the State will no doubt provide in the compact for the rights and the consent of the citizens inhabiting it; as the inhabitants will find sufficient inducements of interest to become willing parties to the cession; as they will have had their voice in the election of the government which is to exercise authority over them; as a municipal legislature for local purposes, derived from their own suffrage, will of course be allowed them; and as the authority of the legislature of the State, and of the inhabitants of the ceded part of it, to concur in the cession, will be derived from the whole people of the State, in their adoption of the Constitution, every imaginable objection seems to be obviated.

President Andrew Jackson 1831:

It was doubtless wise in the framers of our Constitution to place the people of this District under the jurisdiction of the General Government. But to accomplish the objects they had in view, it is not necessary that this people should be deprived of all the privileges of self-government . . . I earnestly recommend the extension to them of every political right which their interests require and which may be compatible with the Constitution.

President Richard Nixon; Message to Congress; April 28, 1969:

It should offend the democratic sense of this nation that the 850,000 citizens of its Capital, comprising a population larger than 11 of its States, have no voice in the Congress.

Assistant Attorney General William H. Rehnquist; Senate Hearings, 1970:

The need for an amendment of that character at this late date in our history is too self-evident for further elaboration; continued denial of voting representation from the District of Columbia can no longer be justified.

Vice President Walter F. Mondale, September 1977:

We believe there is no justification for denying citizens equal representation at the federal level because they happen to reside in the District of Columbia.

President Jimmy Carter, State of the Union Message 1978:

We proposed last year a series of reforms, including full voting representation in Congress, designed to give the residents of the District significantly greater control over their local affairs. My administration will continue to work for the passage of those reforms this year.

Professor Charles Alan Wright; University of Texas Law School; Senate Hearings 1978:

It seems to me that the clear purpose of [the Equal Suffrage Clause, Article V of the Constitution] was to ensure that the Great Compromise would not be undone and that representation in the Senate would not be put on the basis of population. That purpose is not compromised by allowing the District to have two Senators any more than it is when a new state is admitted.

Senator Thomas F. Eagleton; Senate Hearing 1978:

This letter was from a mother who had two sons in the army. 1971, as the Chairman will recall, was still a very high point in the Vietnam War. Her elder son had been killed, and naturally that had had a traumatic impact on her, her thinking, et cetera, and she wrote me a very moving but simple letter saying, in essence, "I have lost one son. I may well lose another. Yet I have no voice in voting on how far this war should go, or how long it should go on or how much expanded it should be—into the Parrot's Beak, or how many bombs we should drop on the Ho Chi Minh Trail, I am hopeless, and in that sense I am voiceless."

I think that one letter did more to shape my thinking than a million words or a 200-page memorandum. The appeal is not simplistic, it is just fair and equitable.

Natasha Pearl; Senior, Woodrow Wilson High School, D.C.; Senate Hearings 1978:

You may recall the one day of the Senate Youth Program that was set aside for the delegates to visit their Senators. I have never before felt inferior to fellow Americans. That day I did. All I could do was listen at dinner that evening when my friends told of how they had discussed important national issues, such as the Panama Canal Treaties, energy policy, and health care with their Senators. I, too, have opinions on these and other vital issues. That day, I could share them with no one who had a voice or a vote in the United States Senate.

TABLE 1.—STATISTICAL COMPARISONS BETWEEN THE DISTRICT OF COLUMBIA AND THE 50 STATES TAXATION (FY 1977)

State	Population		Total Federal taxes (billion)	Per capita Federal taxes	State and local taxes (percent personal income) [1]	killed in Vietnam war, 1961–77	Employment [2]		Percent land area held by Federa Government
	1970 census	1977 estimate					Number Federal jobs	Percent Federal jobs	
Alabama	3,444,000	3,690,000	$4.482	$1,221	9.9	1,187	79,173	1.9	3.4
Alaska	303,000	407,000	1.225	3,011	21.8	55	36,873	.9	96.4
Arizona	1,775,000	2,296,000	3.211	1,418	13.9	604	57,756	1.4	42.8

U.S. SENATE,
Washington, D.C., March 2, 1978.

DEAR COLLEAGUE:

This morning, by an impressive two-thirds vote, the House of Representatives approved a constitutional amendment (H.J. Res. 554) to provide full voting representation for the District of Columbia in both the House and the Senate. As supporters or cosponsors of the companion Senate measure, we are writing to urge your support for the amendment and for an end to the long-standing and unjust second class status of District citizens in our government.

One of the most honored principles of our democracy is the concept of "one person, one vote." In the District of Columbia, however, that principle has no application. Instead, for District citizens, the rule is "700,000 persons, no votes." For too long, the District of Columbia has been called "America's Last Colony."

Now, for the first time in many years, we have the chance to change all that. That House of Representatives has voted to end the injustice by which citizens of the District are denied their proper representation in Congress, and we believe the Senate should act as well.

During extensive hearings by the House Judiciary Subcommittee on Civil and Constitutional Rights, leading Constitutional scholars strongly endorsed full voting representation for the District, including representation in the Senate as well as in the House. Among those testifying in support of H.J. Res. 554, for example, was Professor Charles Alan Wright of the University of Texas School of law, who testified:

"It seems to me that the clear purpose of [the 'Equal Suffrage Clause' of the Constitution; Article V] was to insure that the Great Compromise would not be undone and that representation in the Senate would not be put on the basis of population. That purpose is not compromised by allowing the District to have two Senators any more than it is when a new state is admitted."

* ". . . no State, without its Consent, shall be deprived of its equal Suffrage in the Senate."

For your interest, we are attaching a staff briefing paper prepared in the House in support of H.J. Res. 554. It deals with all of the major issues and makes a solid case for approval of the Resolution.

We urge your support for this fundamental principle of justice for the citizens of the nation's capital, and we look forward to favorable Senate action on this Resolution.

Sincerely,

BIRCH BAYH.

And 19 others.

MAY 23, 1978.

DEAR SENATOR: Full voting representation in Congress for the District of Columbia as embodied in House Joint Resolution 554 is a legislative matter which is a top priority for all of us. We urge you to support the measure when it comes to a vote in the Senate.

As you know, the House of Representatives on March 2nd, passed H.J. Res. 554 by a two-thirds vote, 289–127. This historic vote marked the first truly significant step forward in an effort which began in December, 1808. Since that beginning there have been more than 150 joint resolutions introduced to provide some form of voting representation to the citizens of Washington, D.C. Hearings totaling about 25 years have been held in Senate and House Committees throughout the years. The Senate now, however, has a chance to bring this issue to final resolution.

A two-thirds vote in the Senate will send this measure on to the states for a final decision. We believe the state legislatures should have the opportunity to vote on H.J. Res. 554. The arguments in favor of this fundamental principle need not be repeated here. We ask only that you voice your support now and vote for H.J. Res. 554 when it comes to the Senate floor. Thank you.

Sincerely,

WALTER E. WASHINGTON,
Mayor.

And 17 others.

Mr. SCOTT. Mr. President, I ask unanimous consent on behalf of Senator BAKER that Everett Wallace, of his staff, be accorded the privilege of the floor during the pending business, and on behalf of the Senator from South Carolina (Mr. THURMOND) that Eric Hultman and Jim Lockemy of the Judiciary Committee staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Mr. Alan Boyd, of Senator CASE's staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I ask unanimous consent that Matthew Goldman, of my staff, have the privilege of the floor during this debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, the Subcommittee on the Constitution of the Committee on the Judiciary had 3 days of hearings on the Senate bill that would grant full congressional representation to the District of Columbia as if it were a State.

(Mr. DECONCINI assumed the chair.)

Mr. SCOTT. The committee, after the hearings, has not taken any further action. The full Senate Judiciary Committee has not taken any action, and the Senate bill is still pending before the committee.

The chairman of the full committee, the Judiciary Committee, of the Senate, Chairman EASTLAND, is out of the country. It seems inappropriate to bring up a bill affecting his committee while he is out of the country. It would have seemed reasonable to have awaited his return.

It also seems unreasonable to bypass our own committee, and to bring a measure passed by the House of Representatives directly to the floor for consideration. This is unusual procedure because we generally operate by and through the committee system.

I believe, Mr. President, that my views on this bill are well known, but I would like to share a newsletter in a moment or so which I sent to constituents throughout Virginia expressing these views.

We are not talking about human rights today. We are not talking about civil rights. We are discussing whether the capital city concept that was developed by the Founding Fathers should be retained or whether we should let some expediency of the day change this.

If we look at the Constitution, article I, section 8, paragraph 17—section 8, of course, speaks of the power of the Congress, it states:

The Congress shall have power to exercise exclusive Legislation in all Cases whatsoever, over such district (not exceeding 10 Miles square) as may, by Cession of particular States, and the acceptance of Congress, become the Seat of the Government of the United States,

The rest of that paragraph relates to other property that the Federal Government may obtain through purchase or condemnation or donation. This is the Federal City concept.

Mr. President, I ask unanimous consent to print in the RECORD a series of enabling acts passed by Congress pursuant to this constitutional provision with regard to the District of Columbia. The first one is the act of cession from the State of Virginia; the act authorizing cession from the State of Maryland; the act of Maryland ratifying the cession; the Maryland Act of 1792 supplementary to act of cession; Maryland Act of 1793 supplementary to act of cession; congressional acceptance of ceded territory; proclamation by the President respecting a survey, and defining the limits of, the District of Columbia; acts relative to boundaries of the District of Columbia; proclamation fixing boundaries of the District of Columbia; Organic Act of 1801; act of 1802 incorporating the city of Washington; act of 1812 amending the charter of Washington; act of 1820 reorganizing the government of the city of Washington; act of 1848 reorganizing the government of the city of Washington; act of retrocession of county of Alexandria; Virginia act accepting retrocession; and the proclamation relative to retrocession.

I ask unanimous consent that these be included as a part of the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ACT OF CESSION FROM THE STATE OF VIRGINIA

An act For the cession of ten miles square, or any lesser quantity of territory within this State, to the United States, in Congress assembled, for the permanent seat of the General Government

[Passed December 3, 1789]

I. Whereas the equal and common benefits resulting from the administration of the General Government will be best diffused, and its operations become more prompt and certain, by establishing such a situation for the seat of the said Government as will be most central and convenient to the citizens of the United States at large; having regard as well to population, extent of territory, and a free navigation to the Atlantic Ocean, through the Chesapeake Bay, as to the most direct and ready communication with our fellow-citizens on the western frontier; and whereas it appears to this assembly that a situation combining all the considerations and advantages before recited may be had on the banks of the river Potomac, above tide-water, in a country rich and fertile in soil, healthy and salubrious in climate, and abounding in all the necessaries and conveniences of life, where, in a location of ten miles square, if the wisdom of Congress shall so direct, the States of Pennsylvania, Maryland, and Virginia, may participate in such location:

II. *Be it therefore enacted by the general assembly,* That a tract of country not exceeding ten miles square, or any lesser quantity, to be located within the limits of the State, and in any part thereof, as Congress may by law direct, shall be, and the same is hereby forever ceded and relinquished to the Congress and Government of the United States, in full and absolute right, and exclusive jurisdiction, as well of soil as of persons residing or to reside thereon, pursuant to the tenor and effect of the eighth section of the first article of the Constitution of the Government of the United States.

III. *Provided,* That nothing herein contained shall be construed to vest in the United States any right of property in the soil, or to affect the rights of individuals therein, otherwise than the same shall or may be transferred by such individuals to the United States.

IV. *And provided also,* That the jurisdiction of the laws of this commonwealth over the persons and property of individuals residing within the limits of the cession aforesaid, shall not cease or determine until Congress, having accepted the said cession, shall, by law, provide for the government thereof, under their jurisdiction, in manner provided by the articles of the Constitution before recited (Burch's Digest, p. 213.)

ACT AUTHORIZING CESSION FROM STATE OF MARYLAND

An act To cede to Congress a district of ten miles square in this State for the seat of the Government of the United States.

Be it enacted. by the General Assembly of Maryland, That the representatives of this state in the house of representatives in the congress of the United States, appointed to assemble at New York on the first Wednesday of March next, be and they are hereby authorized and required, on the behalf of this state, to cede to the congress of the United States, any district in this state, not exceeding ten miles square, which the congress may fix upon and accept for the seat of government of the United States. (Md. act, December 23, 1788, ch. 46.)

ACT OF MARYLAND RATIFYING THE CESSION

An act Concerning the Territory of Columbia and the city of Washington

[Passed December 19, 1791]

Whereas the President of the United States, by virtue of several acts of Congress, and acts of the assemblies of Maryland and Virginia, by his proclamation, dated at Georgetown on the thirtieth day of March, seventeen hundred and ninety-one, did declare and make known that the whole of the territory of ten miles square, for the permanent seat of government of the United States, shall be located and included within the four lines following, that is to say: Beginning at Jones Point, being the upper point of Hunting Creek, in Virginia, and at an angle at the outset forty-five degrees west of north, and running a direct line ten miles for the first line; then beginning again at the same Jones Point and running another direct line at a right angle with the first across the Potomac ten miles for the second line; then from the terminations of the said first and second lines running two other direct lines ten miles each, the one across the Eastern Branch and the other Potomac, and meeting each other in a point, which has since been called the Territory of Columbia; and,

Whereas Notley Young, Daniel Carroll, of Duddington, and many others, proprietors of the greater part of the land hereinafter mentioned to have been laid out in a city, came into an agreement, and have conveyed their lands in trust to Thomas Beall, son of George, and John Mackall Gantt, whereby they have subjected their lands to be laid out as a city, given up part to the United States, and subjected other parts to be sold to raise money as a donation to be employed according to the act of Congress for establishing the temporary and permanent seat of the Government of the United States, under and upon the terms and conditions contained in each of the said deeds; and many of the proprietors of lots in Carrollsburg and Hamburg have also come into an agreement, subjecting their lots to be laid out anew, giving up one-half of the quantity thereof to be sold, and the money thence arising to be applied as a donation as aforesaid, and they to be reinstated in one-half of the quantity of their lots in the new location, or otherwise compensated in land in a different situation within the city, by agreement between the Commissioners and them, and in case of disagreement, that then a just and full compensation shall be made in money; yet some of the proprietors in Carrollsburg and Hamburg, as well as some of the proprietors of other lands, have not, from imbecility and other causes, come into any agreement concerning their lands within the limits hereinafter mentioned, but a very great number of the landholders having agreed on the same terms, the President of the United States directed a city to be laid out comprehending all the lands beginning on the east side of Rock Creek, at a stone standing in the middle of the road leading from Georgetown to Bladensburgh; thence along the middle of side of the Reedy Branch of Goose Creek; southeasterly, making an angle of sixty-one degrees and twenty minutes with the meridian, to a stone standing in the road leading from Bladensburgh to the Eastern Branch ferry; then south to a stone eighty poles north of the east and west line already drawn from the mouth of Goose Creek to the Eastern Branch; then east, parallel to the said road to a stone standing on the east said east and west line, to the Eastern Branch; then with the waters of the Eastern Branch, Potomac River, and Rock Creek to the beginning, which has since been called the City of Washington; and

Whereas it appears to this general assembly highly just and expedient that all the lands within the said city should contribute, in due proportion, in the means which have already greatly enhanced the value of the whole; that an incontrovertible title ought to be made to the purchasers, under public sanction; that allowing foreigners to hold land within the said territory will greatly contribute to the improvement and population thereof; and that many temporary provisions will be necessary till Congress exercise the jurisdiction and government over the said territory; and

Whereas in the cesssion of this State, heretofore made, of territory for the Government of the United States, the lines of such cession could not be particularly designated; and it being expedient and proper that the same should be recognized in the acts of this State—

2. *Be it enacted by the General Assembly of Maryland,* That all that part of the said territory called Columbia which lies within the limits of this State shall be, and the same is hereby, acknowledged to be forever ceded and relinquished to the Congress and Government of the United States, and full and absolute right and exclusive jurisdiction, as well of soil as of persons residing or to reside thereon, pursuant to the tenor and effect of the eighth section of the first article of the Constitution of Government of the United States: *Provided,* That nothing herein contained shall be so construed to vest in the United States any right of property in the soil as to affect the rights of individuals therein, otherwise, than the same shall or may be transferred by such individuals to the United States: *And provided also,* That the jurisdiction of the laws of this State over the persons and property of individuals residing within the limits of the cession aforesaid shall not cease or determine until Congress shall, by law, provide for the government thereof, under their jurisdiction, in manner provided by the article of the Constitution before recited.

3. *And be it enacted,* That all the lands belonging to minors, persons absent out of the State, married women, or persons non compos mentis, or the lands the property of this State, within the limits of Carrollsburg and Hamburg, shall be and are hereby subjected to the terms and conditions hereinbefore recited, as to the lots where the proprietors thereof have agreed concerning the same; and all the other lands, belonging as aforesaid, within the limits of the said city of Washington, shall be, and are hereby, subjected to the same terms and conditions as the said Notley Young, Daniel Carroll, of Duddington, and others, have by their said agreements and deeds, subjected their lands to, and where no conveyances have been made, the legal estate and trust are hereby invested in the said Thomas Beall, son of George, and John Mackall Gantt, in the same manner as if each proprietor had been competent to make, and had made a legal conveyance of his or her land, according to the form of those already mentioned, with proper acknowledgements of the execution thereof, and where necessary, of release of dower, and in every case where the proprietor is an infant, a married woman, insane, absent out of the State, or shall not attend on three months' advertisement of notice in the Maryland Journal and Baltimore Advertiser, the Maryland Herald, and in the Georgetown and Alexandria papers, so that allotment can not take place by agreement, the commissioners, aforesaid, or any two of them, may allot or assign the portion or share of such proprietor as near the old situation as may be, in Carrollsburg and Hamburg, and to the full value of what the party might claim under the terms before recited; and as to the other lands within the said city, the commissioners aforesaid, or any two of them, shall make such allotment and assignment, within the land belonging to the same person, in alternate lots, determined by lot or ballot, whether the party shall begin with the lowest number: *Provided,* That in the cases of coverture and infancy, if the husband, guardian, or next friend will agree with the commissioners, or any two of them, then an effectual division may be made by consent; and in case of contrary claims, if the claimants will not jointly agree, the commissioners may proceed as if the proprietor was absent; and all persons to whom allotments and assignments of lands shall be made by the commissioners, or any two of them, on consent and agreement, or pursuant to this

act without consent, shall hold the same in their former estate and interest, and in lieu of their former quantity, and subject in every respect to all such limitations, conditions, and incumbrances as their former estate and interest, and in lieu of their former quantity, and subject in every respect to all such limitations, conditions, incumbrances as their former estates and interests were subject to, and as if the same had been actually reconveyed pursuant to the said deed in trust.

4. *And be it enacted,* That where the proprietor or proprietors, possessor or possessors, of any lands within the limits of the city of Washington, or within the limits of Carrollsburg or Hamburg, who have not already, or who shall not, within three months of this act, execute deeds in trust to the aforesaid Thomas Beall and John M. Gantt, of all their land within the limits of the said city of Washington, and on the terms and conditions mentioned in the deeds already executed by Notley Young and others, and execute deeds in trust to the said Thomas Beall and John M. Gantt of all their lots in the towns of Carrollsburg and Hamburg on the same terms and conditions contained in the deeds already executed by the greater part of the proprietors of lots in the said towns, the said commissioners, or any two of them, shall and may, at any time or times thereafter, issue a process, directed to the sheriff of Prince Georges County, commanding him, in the name of the State, to summon five good substantial freeholders, who are not of kin to any proprietor or proprietors of the lands aforesaid, and who are not proprietors themselves, to meet on a certain day, and at a certain place within the limits of the said city, to inquire of the value of the estate of such proprietor or proprietors, possessor or possessors, on which day and place the said sheriff shall attend, with the freeholders by him summoned, which freeholders shall take the following oath, or affirmation, on the land to be by them valued, to wit: "I, A. B., do solemnly swear (or affirm) that I will, to the best of my judgment, value the lands of C. D. now to be valued so as to do equal right and justice to the said C. D. and to the public, taking into consideration all circumstances," and shall then proceed to value the said lands; and such valuation, under their hands and seals and under the hand and seal of the said sheriff, shall be annexed to the said process and returned by the sheriff to the clerk appointed by virtue of this act, who shall make record of the same, and the said lands shall, on the payment of such valuation, be and is hereby vested in the said commissioners in trust, to be disposed of by them or otherwise employed to the use of the said city of Washington; and the sheriff aforesaid and freeholders aforesaid shall be allowed the same fees for their trouble as are allowed to a sheriff and juryman in executing a writ of inquiry; and in all cases where the proprietor or possessor is tenant in right of dower or by the courtesy the freeholders aforesaid shall ascertain the annual value of the lands and the gross value of such estate therein, and upon paying such gross value or securing to the possessor the payment of the annual valuation, at the option of the proprietor or possessor, the commissioners shall be and are hereby vested with the whole estate of such tenant, in manner and for the uses and purposes aforesaid.

5. *And be it enacted,* That all the squares, lots, and parcels of land within the said city which have been or shall be appropriated for the use of the United States, and all the lots and parcels which have been or shall be sold to raise money as a donation as aforesaid shall remain and be to the purchasers, according to the terms and conditions of their respective purchase; and purchases and leases from private persons claiming to be proprietors, and having, or those under whom they claim having, been in the possession of the lands purchased or leased, in their own right, five whole years next before the passing of this act, shall be good and effectual for the estate, and on the terms and conditions of such purchases and leases, respectively, without impeachment, and against any contrary title now existing; but if any person hath made a conveyance, or shall make a conveyance or lease, of any lands within the said city, not having right and title to do so, the person who might be entitled to recover the land under a contrary title now existing may, either by way of ejectment against the tenant or in an action for money had and received for his use against the bargainer or lessor, his heirs, executors, administrators, or devisees, as the case may require, recover all money received by him for the squares, pieces, or parcels appropriated for the use of the United States, as well as for lots or parcels sold and rents received by the person not having title as aforesaid, with interest from the time of receipt; and, on such recovery in ejectment, where the land is in lease, the tenant shall thereafter hold under, and pay the rent reserved to, the person making title to and recovering the land; but the possession bona fide acquired in none of the said cases shall be changed.

6. *And be it enacted,* That any foreigner may, by deed or will hereafter to be made, take and hold lands within that part of the said territory which lies within this State in the same manner as if he were a citizen of this State; and the same lands may be conveyed by him, and transmitted to, and inherited by his heirs or relations, as if he and they were citizens of this State; provided that no foreigner shall, in virtue hereof, be entitled to any further or other privilege of a citizen.

7. *And be it enacted,* That the said commissioners, or any two of them, may appoint a clerk for recording deeds of land within the said territory, who shall provide a proper book for the purpose, and therein record, in a strong, legible hand, all deeds duly acknowledged, of lands in the said territory, delivered to him to be recorded, and in the same book make due entries of all divisions and allotments of lands and lots made by the commissioners in pursuance of this act, and certificates granted by them of sales, and the purchase money having been paid, with a proper alphabet in the same book of the deeds and entries aforesaid; and the same book shall carefully preserve and deliver over to the commissioners aforesaid, or their successors, or such person or persons as Congress shall hereafter appoint, which clerk shall continue such during good behaviour, and shall be removable only on a conviction of misbehaviour in a court of law; but before he acts as such he shall take an oath or affirmation well and truly to execute his office, and he shall be entitled to the same fees as are or may be allowed to the clerks of the county courts for searches, copying, and recording.

8. *And be it enacted,* That acknowledgments of deeds made before a person in the manner and certified as the laws of this State direct or made before, and certified by, either of the commissioners shall be effectual; and that no deed hereafter to be made, of or for lands within that part have been acknowledged as aforesaid, and delivered to of the said territory which lies within this State, shall operate as a legal conveyance, nor shall any lease for more than seven years be effectual, unless the deed shall the said clerk to be recorded within six calendar months from the date thereof.

9. *And be it enacted,* That the commissioners aforesaid, or some two of them, shall direct an entry to be made in the said record book of every allotment and assignment to the respective proprietors in pursuance of this act.

10. And for the encouragement of master builders to undertake the building and finishing houses within the said city by securing to them a just and effectual remedy for their advances and earnings, *Be it enacted,* That for all sums due and owing on written contracts for the building any house in the said city, or the brickwork or carpenters' or joiners' work thereon, the undertaker or workmen employed by the person for whose use the house shall be built shall have a lien on the house and the ground on which the same is erected, as well as for the materials found by him: *Provided,* The said written contract shall have been acknowledged before one of the commissioners, a justice of the peace, or an alderman of the corporation of Georgetown and recorded in the office of the clerk for recording deeds, herein created, within six calendar months from the time of acknowledgment as aforesaid, and if within two years after the last of the work is done he proceeds in equity he shall have as upon a mortgage, or if he proceeds at law within the same time he may have execution against the house and land, in whose hands soever the same may be; but this remedy shall be considered as additional only, nor shall, as to the land, take place of any legal incumbrance made prior to the commencement of such claim.

11. *And be it enacted,* That the treasurer of the western shore be empowered and required to pay the seventy-two thousand dollars agreed to be advanced to the President by resolutions of the last sessions of assembly, in sums as the same may come to his hands on the appointed funds, without waiting for the day appointed for the payment thereof.

12. *And be it enacted,* That the Commissioners aforesaid for the time being, or any two of them, shall from time to time, until Congress shall exercise the jurisdiction and government within the said Territory, have power to license the building of wharves in the waters of the Potomac and the Eastern Branch, adjoining the said city, of the materials, in the manner and of the extent they may judge durable, convenient, and agreeing with the general order; but no license shall be granted to one to build a wharf before the land of another, nor shall any wharf be built in the waters without license as aforesaid; and if any wharf shall be built without such license, or different therefrom, the same is hereby declared a common nuisance. They may also, from time to time, make regulations for the discharge and laying of ballast from ships or vessels lying in the Potomac River above the lower line of the said Territory and Georgetown, and from ships and vessels lying in the Eastern Branch. They may also, from time to time, make regulations for landing and laying materials for building the said city, for disposing and laying earth which may be dug out of the wells, cellars, and foundations and for ascertaining the thickness of the walls of houses, and to enforce the observance of all such regulations by appointing penalties for the breach of any one of them not exceeding ten pounds current money, which may be recovered in the name of the said Commissioners, by warrant, before a justice of the peace, as in case of small debts, and disposed of as a donation for the purpose of the said act of Congress. And the said Commissioners, or any two of them, may grant licenses for retailing distilled spirits within the limits of the said city, and suspend or declare the same void. And if any person shall retail or sell any distilled spirits, mixed or unmixed, in less than ten gallons to the same person, or at the same time actually delivered, he or she shall forfeit for every such sale three pounds, to be recovered and applied as aforesaid.

13. *And be it enacted,* That an act of as-

sembly of this State to condemn lands, if necessary, for the public buildings of the United States be, and is hereby, repealed. (Md. act, 1791, ch. 45.)

MARYLAND ACT OF 1792 SUPPLEMENTARY TO ACT OF CESSION

A supplement to the act entitled "An Act concerning the Territory of Columbia and the city of Washington"

[Passed December 23, 1792]

Whereas, doubts have arisen upon the act to which this is a supplement, whether it be essential to the validity of deeds and other conveyances of land in that part of the Territory of Columbia which lies within this state, that the same be recorded in the manner prescribed by the laws of this state before the passage of the said act; to remove which doubts—

2. *Be it enacted, by the General Assembly of Maryland,* That all deeds and other conveyances of land lying within the said territory, and recorded agreeably to the directions and provisions of the said act by the clerk appointed in the manner therein provided for the recording of deeds within the said territory, shall be as good, valid, and sufficient, in law, for the purposes of passing the estates therein mentioned, and for all other purposes, as if the same were also recorded in the manner prescribed by the laws of this state, before the passage of the said act for the recording of deeds and other conveyances of land within this state. (Md. act, 1792, ch. 49.)

MARYLAND ACT OF 1793 SUPPLEMENTARY TO ACT OF CESSION

A further supplement to the act concerning the Territory of Columbia and the city of Washington

Be it enacted, by the General Assembly of Maryland, That the certificates granted, or which may be granted, by the said commissioners, or any two of them, to purchasers of lots in the said city, with acknowledgement of the payment of the whole purchase money, and interest, if any shall have arisen thereon, and recorded agreeably to the directions of the act concerning the territory of Columbia and city of Washington, shall be sufficient and effectual to vest the legal estate in the purchasers, their heirs and assigns, according to the import of such certificates, without any deed or formal conveyance.

II. *And be it enacted,* That on sales of lots in the said city by the said commissioners, or any two of them, under terms or conditions of payment being therefor at any day or days after such contract entered into, if any sum of the purchase money or interest shall not be paid for the space of thirty days after the same ought to be paid, the commissioners, or any two of them, may sell the same lots at public vendue, in the city of Washington, at any time after sixty days notice of such sale, in some of the public newspapers of Georgetown and Baltimore-town, and retain in their hands sufficient of the money produced by such new sale to satisfy all principal and interest due on the first contract, together with the expenses of advertisements and sale, and the original purchaser, or his assigns, shall be entitled to receive from the said commissioners, at their treasury, on demand, the balance of the money which may have been actually received by them, or under their order, on the said second sale; and all lots, so sold, shall be freed and acquitted of all claim, legal and equitable, of the first purchaser, his heirs and assigns.

III. *And be it enacted,* That the commissioners aforesaid, or any two of them, may appoint a certain day for the allotment and assignment of one half of the quantity of each lot of ground in Carrollsburgh and Hamburgh, not before that time divided or assigned, pursuant to the said act concerning the territory of Columbia and the city of Washington, and on notice thereof in the Annapolis, some one of the Baltimore, the Eastern and George-town news-papers, for at least three weeks, the same commissioners may proceed to the allotment and assignment of ground within the said city, on the day appointed for that purpose, and therein proceed at convenient times till the whole be finished, as if the proprietors of such lots actually resided out of this state; provided, that if the proprietor of any such lot shall object in person, or by writing delivered to the commissioners, against their so proceeding as to his lot, before they shall have made an assignment of ground for the same, then they shall forbear as to such lot, and may proceed according to the before-mentioned act.

IV. *And be it enacted,* That the said commissioners may make a seal of office of the clerk for recording deeds within the district of Columbia, which shall be kept by him; and that the like fees shall be paid for, and the like credit shall be given to, certificates under seal, as to the like acts under the seal of a county court, and the said clerk shall be entitled to demand and receive his fees when the services enjoined him by this act, and the act to which this is a further supplement, shall be performed. (Md. act, 1793, ch. 58.)

CONGRESSIONAL ACCEPTANCE OF CEDED TERRITORY

An act for establishing the temporary and permanent seat of the Government of the United States

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That a district of territory, not exceeding ten miles square, to be located as hereafter directed on the river Potomac, at some place between the mouths of the Eastern Branch and Connogochegue, be, and the same is hereby accepted for the permanent seat of the government of the United States. *Provided nevertheless,* That the operation of the laws of the state within such district shall not be affected by this acceptance, until the time fixed for the removal of the government thereto, and until Congress shall otherwise by law provide.

SEC. 2. *And be it further enacted,* That the President of the United States be authorized to appoint, and by supplying vacancies happening from refusals to act or other causes, to keep in appointment as long as may be necessary, three commissioners, who, or any two of whom, shall, under the direction of the President, survey, and by proper metes and bounds define and limit a district of territory, under the limitations above mentioned; and the district so defined, limited and located, shall be deemed the district accepted by this act, for the permanent seat of the government of the United States.

SEC. 3. *And be it [further] enacted,* That the said commissioners, or any two of them, shall have power to purchase or accept such quantity of land on the eastern side of the said river, within the said district, as the President shall deem proper for the use of the United States, and according to such plans as the President shall approve, the said commissioners, or any two of them, shall, prior to the first Monday in December, in the year one thousand eight hundred, provide suitable buildings for the accommodation of Congress, and of the President, and for the public offices of the government of the United States.

SEC. 4. *And be it [further] enacted,* That for defraying the expense of such purchases and buildings, the President of the United States be authorized and requested to accept grants of money.

SEC. 5. *And be it [further] enacted,* That prior to the first Monday in December next, all offices attached to the seat of the government of the United States, shall be removed to, and until the said first Monday in December in the year one thousand eight hundred, shall remain at the city of Philadelphia, in the state of Pennsylvania, at which place the session of Congress next ensuing the present shall be held.

SEC. 6. *And be it [further] enacted,* That on the said first Monday in December, in the year one thousand eight hundred, the seat of the government of the United States shall, by virtue of this act, be transferred to the district and place aforesaid. And all offices attached to the said seat of government, shall accordingly be removed thereto by their respective holders, and shall, after the said day, cease to be exercised elsewhere; and that the necessary expense of such removal shall be defrayed out of the duties on imports and tonnage, of which a sufficient sum is hereby appropriated.

Approved, July 16, 1790 (1 Stat. 139, ch. 28).

PROCLAMATION BY THE PRESIDENT RESPECTING A SURVEY, AND DEFINING THE LIMITS OF, THE DISTRICT OF COLUMBIA

A PROCLAMATION

WHEREAS the General Assembly of the State of Maryland, by an act passed on the twenty-third day of December, in the year one thousand seven hundred and eighty-eight, entitled "An act to cede to Congress a District of ten miles square in the State, for the seat of the government of the United States," did enact, that the Representatives of the said State, in the House of Representatives of the Congress of the United States, appointed to assemble at New York, on the first Wednesday of March then next ensuing, should be and they were thereby authorized and required on the behalf of the said State, to cede to the Congress of the United States, any District in the said State, not exceeding ten miles square, which the Congress might fix upon and accept for the seat of Government of the United States.

And the General Assembly of the Commonwealth of Virginia, by an act passed on the third day of December, one thousand seven hundred and eighty-nine, and intituled "An act for the cession of ten miles square, or any lesser quantity of territory within this State, to the United States in Congress assembled, for the permanent seat of the General Government," did enact that a tract of country not exceeding ten miles square, or any lesser quantity to be located within the limits of the said State, and in any part thereof, as Congress might by law direct, should be and the same was thereby forever ceded and relinquished to the Congress and Government of the United States, in full and absolute right, and exclusive jurisdiction, as well of soil as of persons residing or to reside thereon, pursuant to the tenor and effect of the eighth section of the first article of the Constitution of Government of the United States.

And the Congress of the United States, by their act passed the sixteenth day of July, one thousand seven hundred and ninety, and intituled "An act for establishing the temporary and permanent seat of the Government of the United States," authorized the President of the United States to appoint three commissioners to survey under his direction, and by proper metes and bounds to limit a district of territory, not exceeding ten miles square, on the River Potomac, at some place between the mouths of the Eastern Branch and Connogocheque, which District, so to be located and limited, was accepted by the said act of Congress, as the District for the permanent seat of the Government of the United States.

Now, therefore, in pursuance of the powers

to me confided and after duly examining and weighing the advantages and disadvantages of the several situations within the limits aforesaid, I do hereby declare and make known, that the location of one part of the said District of ten miles square, shall be found by running four lines of experiment in the following manner, that is to say, running from the Court-house of Alexandria in Virginia, due southwest half a mile, and thence a due southeast course, till it shall strike Hunting Creek, to fix the beginning of the four lines of experiment:

Then beginning the first of the said four lines of experiment at the point on Hunting Creek, where the said southeast course shall have struck the same, and running the said first line due northwest ten miles; thence the second line into Maryland due northeast ten miles, thence the third line due southeast ten miles; and thence the fourth line due southwest ten miles, to the beginning on Hunting Creek.

And the said four lines of experiment being so run, I do hereby declare and make known, that all that part within the said four lines of experiment which shall be within the State of Maryland and above the Eastern Branch, and all that part within the same four lines of experiment which shall be within the Commonwealth of Virginia, and above a line to be run from the point of land forming the Upper Cape of the mouth of the Eastern Branch due southwest, and no more, is now fixed upon, and directed to be surveyed, defined, limited and located for a part of the said District accepted by the said act of Congress for the permanent seat of the Government of the United States; (hereby expressly reserving the direction of the survey and location of the remaining part of the said District, to be made hereafter contiguous to such part or parts of the present location as is or shall be agreeable to law.)

And I do accordingly direct the said commissioners, appointed agreeably to the tenor of the said act, to proceed forthwith to run the said lines of experiment, and the same being run, to survey, and by proper metes and bounds to define and limit the part within the same, which is hereinbefore directed for immediate location and acceptance; and thereof to make due report to me, under their hands and seals.

In testimony whereof, I have caused the seal of the United States to be affixed to these presents, and signed the same with my hand. Done at the city of Philadelphia, the twenty-fourth day of January, in the year of our Lord one thousand seven hundred and ninety-one, and of the independence of the United States the fifteenth.

GEO. WASHINGTON.

By the President: THOMAS JEFFERSON.

ACTS RELATIVE TO BOUNDARIES OF THE DISTRICT OF COLUMBIA

An act To amend "An act for establishing the temporary and permanent seat of the Government of the United States"

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That so much of the act, intitled "An act for establishing the temporary and permanent seat of the government of the United States," as requires that the whole of the district of territory, not exceeding ten miles square, to be located on the river Potomac, for the permanent seat of the government of the United States, shall be located above the mouth of the Eastern Branch, be and is hereby repealed, and that it shall be lawful for the President to make any part of the territory below the said limit, and above the mouth of Hunting Creek, a part of the said district, so as to include a convenient part of the Eastern Branch, and of the lands lying on the lower side thereof, and also the town of Alexandria, and the territory so to be included, shall form a part of the district not exceeding ten miles square, for the permanent seat of the government of the United States, in like manner and to all intents and purposes, as if the same had been within the purview of the above recited act: *Provided,* That nothing herein contained, shall authorize the erection of the public buildings otherwise than on the Maryland side of the river Potomac, as required by the aforesaid act.

Approved, March 3, 1791 (1 Stat. 214, ch. 17).

PROCLAMATION FIXING BOUNDARIES OF THE DISTRICT OF COLUMBIA

A proclamation by the President of the United States

Whereas, by a proclamation bearing date the twenty-fourth day of January of this present year, and in pursuance of certain acts of the States of Maryland and Virginia, and of the Congress of the United States therein mentioned, certain lines of experiment were directed to be run in the neighborhood of Georgetown, in Maryland, for the purpose of locating a part of the territory, of ten miles square, for the permanent seat of Government of the United States, and a certain part was directed to be located within the said lines of experiment on both sides of the Potomac, and above the limit of the Eastern Branch, prescribed by the said act of Congress;

And Congress, by an amendatory act, passed on the third day of this present month of March, have given further authority to the President of the United States "to make any part of the said territory below the said limit, and above the mouth of Hunting Creek, a part of the said district, so as to include a convenient part of the Eastern Branch and of the lands lying on the lower side thereof, and also the town of Alexandria:

Now, therefore, for the purpose of amending and completing the location of the whole of the said territory, of ten miles square, in conformity with the said amendatory act of Congress, I do hereby declare and make known, that the whole of the said territory shall be located and included within the four lines following; that is to say:

Beginning at Jones's Point, being the upper cape of Hunting Creek, in Virginia, and at an angle in the outset of forty-five degrees west of the north, and running in a direct line ten miles, for the first line; then beginning again at the same Jones's Point and running another direct line, at a right angle with the first, across the Potomac, ten miles, for the second line; thence from the termination of the said first and second lines, running two other direct lines of ten miles each, the one crossing the Eastern Branch aforesaid, and the other the Potomac, and meeting each other in a point.

And I do accordingly direct the commissioners named under the authority of the said first-mentioned act of Congress to proceed forthwith to have the said four lines run, and by proper metes and bounds defined and limited; and thereof to make due report, under their hands and seals; and the territory so to be located, defined, and limited shall be the whole territory accepted by the said act of Congress as the district for the permanent seat of the Government of the United States.

In testimony whereof, I have caused the seal of the United States to be affixed to these presents, and signed the same with my hand. Done at Georgetown aforesaid, the thirtieth day of March, in the year of our Lord seventeen hundred and ninety-one, and of the Independence of the United States the fifteenth.

[SEAL.] GEORGE WASHINGTON.

By the President:

THOMAS JEFFERSON.

ORGANIC ACT OF 1801

An act concerning the District of Columbia

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the laws of the state of Virginia, as they now exist, shall be and continue in force in that part of the District of Columbia, which was ceded by the said state to the United States, and by them accepted for the permanent seat of government; and that the laws of the state of Maryland, as they now exist, shall be and continue in force in that part of the said district, which was ceded by that state to the United States and by them accepted as aforesaid.

SEC. 2. *And be it further enacted,* That the said district of Columbia shall be formed into two counties; one county shall contain all that part of said district, which lies on the east side of the river Potomac, together with the islands therein, and shall be called the county of Washington; the other county shall contain all that part of said district which lies on the west side of said river, and shall be called the county of Alexandria; and the said river in its whole course through said district shall be taken and deemed to all intents and purposes to be within both of said counties.

SEC. 3. *Be it further enacted,* That there shall be a court in said district, which shall be called the circuit court of the district of Columbia; and the said court and the judges thereof shall have all the powers by law vested in the circuit courts and the judges of the circuit courts of the United States. Said court shall consist of one chief judge and two assistant judges resident within said district, to hold their respective offices during good behaviour; any two of whom shall constitute a quorum; and each of the said judges shall, before he enter on his office, take the oath or affirmation provided by law to be taken by the judges of the circuit courts of the United States; and said court shall have power to appoint a clerk of the court in each of said counties, who shall take the oath and give a bond with sureties, in the manner directed for clerks of the district courts in the act to establish the judiciary of the United States.

SEC. 4. *Be it further enacted,* That said court shall, annually, hold four sessions in each of said counties, to commence as follows, to wit: for the county of Washington, at the city of Washington, on the fourth Mondays of March, June, September and December; for the county of Alexandria, at Alexandria, on the second Mondays of January, April, July, and the first Monday of October.

SEC. 5. *Be it further enacted,* That said court shall have cognizance of all crimes and offences committed within said district, and of all cases in law and equity between parties, both or either of which shall be resident or be found within said district, and also of all actions or suits of a civil nature at common law or in equity, in which the United States shall be plaintiffs or complainants; and of all seizures on land or water, and all penalties and forfeitures made, arising or accruing under the laws of the United States.

SEC. 6. *Provided, and be it further enacted,* That all local actions shall be commenced in their proper counties, and that no action or suit shall be brought before said court, by any original process against any person, who shall not be an inhabitant of, or found within said district, at the time of serving the writ.

SEC. 7. *Be it further enacted,* That there shall be a marshal for the said district, who shall have the custody of the gaols of said counties, and be accountable for the safe keeping of all prisoners legally committed therein; and he shall be appointed for the same term, shall take the same oath, give a bond with sureties in the same manner, shall have generally, within said district, the same

powers, and perform the same duties, as is by law directed and provided in the case of marshals of the United States.

SEC. 8. *Be it further enacted*, That any final judgment, order or decree in said court, wherein the matter in dispute, exclusive of costs, shall exceed the value of one hundred dollars, may be re-examined and reversed or affirmed in the supreme court of the United States, by writ or error or appeal, which shall be prosecuted in the same manner, under the same regulations, and the same proceedings shall be had therein, as is or shall be provided in the case of writs of error on judgments, or appeals upon orders or decrees, rendered in the circuit court of the United States.

SEC. 9. *Be it further enacted*, That there shall be appointed an attorney of the United States for said district, who shall take the oath and perform all the duties required of the district attornies of the United States; and the said attorney, marshal and clerks, shall be entitled to receive for their respective services, the same fees, perquisites and emoluments, which are by law allowed respectively to the attorney, marshal and clerk of the United States, for the district of Maryland.

SEC. 10. *Be it further enacted*, That the chief judge, to be appointed by virtue of this act, shall receive an annual salary of two thousand dollars, and the two assistant judges, of sixteen hundred dollars each, to be paid quarterly, at the treasury of the United States.

SEC. 11. *Be it further enacted*, That there shall be appointed in and for each of the said counties, such number of discreet persons to be justices of the peace, as the President of the United States shall from time to time think expedient, to continue in office five years; and such justices, having taken an oath for the faithful and impartial discharge of the duties of the office, shall, in all matters, civil and criminal, and in whatever relates to the conservation of the peace, have all the powers vested in, and shall perform all the duties required of, justices of the peace, as individual magistrates, by the laws herein before continued in force in those parts of said district, for which they shall have been respectively appointed; and they shall have cognizance in personal demands to the value of twenty dollars, exclusive of costs; which sum they shall not exceed, any law to the contrary notwithstanding; and they shall be entitled to receive for their services the fees allowed for like services by the laws herein before adopted and continued, in the eastern part of said district.

SEC. 12. *And be it further enacted*, That there shall be appointed in and for each of the said counties a register of wills, and a judge to be called the judge of the orphans court, who shall each take an oath for the faithful and impartial discharge of the duties of his office; and shall have all the powers, perform all the duties, and receive the like fees, as are exercised, performed, and received, by the registers of wills and judges of the orphans' court, within the state of Maryland; and appeals from the said courts shall be to the circuit court of said district, who shall therein have all the powers of the chancellor of the said state.

SEC. 13. *And be it further enacted*, That in all cases where judgments or decrees have been obtained, or hereafter shall be obtained, on suits now depending in any of the courts of the Commonwealth of Virginia, or of the state of Maryland, where the defendant resides or has property within the District of Columbia, it shall be lawful for the plaintiff in such case upon filing an exemplification of the record and proceedings in such suits, with the clerk of the court of the county where the defendant resides, or his property may be found, to sue out writs of execution thereon, returnable to the said court, which shall be proceeded on, in the same manner as if the judgment or decree had originally been obtained in said court.

SEC. 14. *And be it further enacted*, That all actions, suits, process, pleadings, and other proceedings of what nature or kind soever, depending or existing in the courts of Hustings for the towns of Alexandria and Georgetown, shall be, and hereby are continued over to the circuit courts to be holden by virtue of this act, within the District of Columbia, in manner following; that is to say: all such as shall then be depending and undetermined, before the court of Hustings for the town of Alexandria, to the next circuit court hereby directed to be holden in the town of Alexandria; and all such as shall then be depending and undetermined, before the court of Hustings for Georgetown, to the next circuit court hereby directed to be holden in the city of Washington: *Provided nevertheless*, that where the personal demand in such cases, exclusive of costs, does not exceed the value of twenty dollars, the justices of the peace within their respective counties, shall have cognizance thereof.

SEC. 15. *And be it further enacted*, That all writs and processes whatsoever, which shall hereafter issue from the courts hereby established within the district, shall be tested in the name of the chief judge of the District of Columbia.

SEC. 16. *And be it further enacted*, That nothing in this act contained shall in any wise alter, impeach or impair the rights, granted by or derived from the acts of incorporation of Alexandria and Georgetown, or of any other body corporate or politic, within the said district, except so far as relates to the judicial powers of the corporations of Georgetown and Alexandria.

Approved, February 27, 1801 (2 Stat. 103, ch. 15).

ACT OF 1802 INCORPORATING THE CITY OF WASHINGTON

An act to incorporate the inhabitants of the city of Washington, in the District of Columbia

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the inhabitants of the city of Washington be constituted a body politic and corporate, by the name of a mayor and council of the city of Washington, and by their corporate name, may sue and be sued, implead and be impleaded, grant, receive, and do all other acts as natural persons, and may purchase and hold real, personal and mixed property, or dispose of the same for the benefit of the said city; and may have and use a city seal, which may be broken or altered at pleasure; the city of Washington shall be divided into three divisions or wards, as now divided by the levy court for the county, for the purpose of assessment; but the number may be increased hereafter, as in the wisdom of the city council shall seem most conducive to the general interest and convenience.

SEC. 2. *And be it further enacted*, That the council of the city of Washington shall consist of twelve members, residents of the city, and upwards of twenty-five years of age, to be divided into two chambers, the first chamber to consist of seven members, and the second chamber of five members; the second chamber to be chosen from the whole number of councillors elected, by their joint ballot. The city council to be elected annually, by ballot, in a general ticket, by the free white male inhabitants of full age, who have resided twelve months in the city, and paid taxes therein the year preceding the election's being held: the justices of the county of Washington, resident in the city, or any three of them, to preside as judges of election, with such associates as the council may, from time to time, appoint.

SEC. 3. *And be it further enacted*, That the first election of members for the city council shall be held on the first Monday in June next, and in every year afterwards, at such place in each ward as the judges of the election may prescribe.

SEC. 4. *And be it further enacted*, That the polls shall be kept open from eight o'clock in the morning till seven o'clock in the evening, and no longer, for the reception of ballots. On the closing of the poll, the judges shall close and seal their ballot-boxes, and meet on the day following in the presence of the marshal of the district, on the first election, and the council afterwards, when the seals shall be broken, and the votes counted: within three days after such election, they shall give notice to the persons having the greatest number of legal votes that they are duly elected, and shall make their return to the mayor of the city.

SEC. 5. *And be it further enacted*, That the mayor of the city shall be appointed, annually, by the President of the United States. He must be a citizen of the United States, and a resident of the city, prior to his appointment.

SEC. 6. *And be it further enacted*, That the city council shall hold their sessions in the city hall, or, until such building is erected, in such place as the mayor may provide for that purpose, on the second Monday in June, in every year; but the mayor may convene them them oftener, if the public good require their deliberations. Three fourths of the members of each council may be a quorum to do business, but a smaller number may adjourn from day to day: they may compel the attendance of absent members, in such manner, and under such penalties, as they may, by ordinance, provide: they shall appoint their respective presidents, who shall preside during their sessions, and shall vote on all questions where there is an equal division; they shall settle their rules of proceedings, appoint their own officers, regulate their respective fees, and remove them at pleasure: they shall be judge of the elections, returns and qualifications of their own members, and may, with the concurrence of three fourths of the whole, expel and member for disorderly behaviour, or mal-conduct in office, but not a second time for the same offence: they shall keep a journal of their proceedings, and enter the yeas and nays on any question, resolve or ordinance, at the request of any member, and their deliberations shall be public. The mayor shall appoint to all offices under the corporation. All ordinances or acts passed by the city council shall be sent to the mayor, for his approbation, and when approved by him, shall then be obligatory as such. But if the said mayor shall not approve of such ordinance or act, he shall return the same within five days, with his reasons in writing therefor; and if three fourths of both branches of the city council, on reconsideration thereof, approve of the same, it shall be in force in like manner as if he had approved it, unless the city council, by their adjournment, prevent its return.

SEC. 7. *And be it further enacted*, That the corporation aforesaid shall have full power and authority to pass all by-laws and ordinances; to prevent and remove nuisances; to prevent the introduction of contagious diseases within the city; to establish night watches or patrols, and erect lamps; to regulate the stationing, anchorage, and mooring of vessels; to provide for licensing and regulating auctions, retailers of liquors, hackney carriages, wagons, carts and drays, and pawnbrokers within the city; to restrain or prohibit gambling, and to provide for licensing, regulating or restraining theatrical or other public amusements within the city; to regulate and establish markets; to erect and repair bridges; to keep in repair all necessary streets, avenues, drains and sewers, and to pass regulations necessary for the preservation of the same, agreeably to the plan of the

said city; to provide for the safe keeping of the standard of weights and measures fixed by Congress, and for the regulation of all weights and measures used in the city; to provide for the licensing and regulating the sweeping of chimneys and fixing the rates thereof; to establish and regulate fire wards and fire companies; to regulate and establish the size of bricks that are to be made and used in the city; to sink wells, and erect and repair pumps in the streets; to impose and appropriate fines, penalties and forfeitures for breach of their ordinances; to lay and collect taxes; to enact bylaws for the prevention and extinguishment of fire; and to pass all ordinances necessary to give effect and operation to all the powers vested in the corporation of the city of Washington: *Provided,* that the by-laws or ordinances of the said corporation, shall be, in no wise, obligatory upon the persons of non-residents of the said city, unless in cases of intentional violation of by-laws or ordinances previously promulgated. All the fines, penalties and forfeitures, imposed by the corporation of the city of Washington, if not exceeding twenty dollars, shall be recovered before a single magistrate, as small debts are, by law, recoverable; and if such fines, penalties and forfeitures exceed the sum of twenty dollars, the same shall be recovered by action of debt in the district court of Columbia, for the county of Washington, in the name of the corporation, and for the use of the city of Washington.

SEC. 8. And be it further enacted, That the person or persons appointed to collect any tax imposed in virtue of the powers granted by this act, shall have authority to collect the same by distress and sale of goods and chattels of the person chargeable therewith; no sale shall be made unless ten days previous notice thereof be given; no law shall be passed by the city council subjecting vacant or unimproved city lots, or parts of lots, to be sold for taxes.

SEC. 9. *And be it further enacted,* That the city council shall provide for the support of the poor, infirm and diseased of the city.

SEC. 10. *Provided always, and be it further enacted,* That no tax shall be imposed by the city council on real property in the said city, at any higher rate than three quarters of one per centum on the assessment valuation of such property.

SEC. 11. *And be it further enacted,* That this act shall be in force for two years, from the passing thereof, and from thence to the end of the next session of Congress thereafter, and no longer.

APPROVED, May 3, 1802 (2 Stat. 195, ch. 53).

ACT OF 1812 AMENDING THE CHARTER OF WASHINGTON

An act Further to amend the charter of the city of Washington

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the first Monday of June next, the corporation of the city of Washington shall be composed of a mayor, a board of aldermen and a board of common council, to be elected by ballot, as herein after directed. The board of aldermen shall consist of eight members, to be elected for two years, two to be residents of and chosen from each ward by the qualified voters resident therein; and the board of common council shall consist of twelve members, to be elected for one year, three to be residents of and chosen from each ward in manner aforesaid: and each board shall meet at the council chamber on the second Monday in June next (for the despatch of business) at ten o'clock in the morning, and on the same day and at the same hour annually thereafter. A majority of each board shall be necessary to form a quorum to do business, but a less number may adjourn from day to day. The board of aldermen, immediately after they shall have assembled in consequence of the first election shall divide themselves by lot into two classes; the seats of the first class shall be vacated at the expiration of one year, and the seats of the second class shall be vacated at the expiration of two years, so that one half may be chosen every year. Each board shall appoint its own president from among its own members, who shall preside during the sessions of the board, and shall have a casting vote on all questions where there is an equal division: *Provided,* such equality shall not have been occasioned by his previous vote.

SEC. 2. *And be it further enacted,* That no person shall be eligible to a seat in the board of aldermen or board of common council, unless he shall be more than twenty-five years of age, a free white male citizen of the United States and shall have been a resident of the city of Washington one whole year next preceding the day of election, and shall, at the time of his election, be a resident of the ward for which he shall be elected, and possessed of a free-hold estate in the said city of Washington, and shall have been assessed two months preceding the day of election. And every free white male citizen of lawful age, who shall have resided in the city of Washington for the space of one year next preceding the day of election, and shall be a resident of the ward in which he shall offer to vote, and who shall have been assessed on the books of the corporation not less than two months prior to the day of election, shall be qualified to vote for members to serve in the said board of aldermen and board of common council, and no other person whatever shall exercise the right of suffrage at such election.

SEC. 3. *And be it further enacted,* That the present mayor of the city of Washington shall be, and continue such until the second Monday in June next, on which day, and on the second Monday in June annually thereafter, the mayor of the said city shall be elected by ballot of the board of aldermen and board of common council in joint meeting, and a majority of the votes of all the members of both boards shall be necessary to a choice; and if there should be an equality of votes between two person, after the third ballot, the two boards shall determine the choice by lot. He shall, before he enters upon the duties of his office, take an oath or affirmation, in the presence of both boards, "lawfully to execute the duties of his office to the best of his skill and judgment, without favour or partiality." He shall, exofficio, have and exercise all the powers, authority and jurisdiction of a justice of the peace for the county of Washington, within the said county. He shall nominate, and, with the consent of a majority of the members of the board of aldermen, appoint to all offices under the corporation, (except the commissioners of election,) and any such officer shall be removed from office on the concurrent remonstrance of a majority of the two boards. He shall see that the laws of the corporation be duly executed, and shall report the negligence or misconduct of any officer to the two boards. He shall appoint proper persons to fill up all vacancies during the recess of the board of aldermen, to hold such appointment until the end of the then ensuing session. He shall have power to convene the two boards, when in his opinion the good of the community may require it; and he shall lay before them from time to time, in writing, such alterations in the laws of the corporation, as he shall deem necessary or proper, and shall receive for his services annually, a just and reasonable compensation, to be allowed and fixed by the two boards, which shall neither be increased nor diminished during the period for which he shall have been elected. Any person shall be eligible to the office of mayor, who is a free white male citizen of the United States, who shall have attained to the age of thirty years, and who shall be the bona fide owner of a freehold estate in the said city, and shall have been resident in the said city two years immediately preceding his election: and no other person shall be eligible to the said office. In case of the refusal of any person to accept the office of mayor upon his election thereto, or of his death, resignation, inability or removal from the city, the said two boards shall elect another in his place to serve the remainder of the year.

SEC. 4. *And be it further enacted,* That the first election for members of the board of aldermen and board of common council, shall be held on the first Monday in June next, and on the first Monday in June annually thereafter: The first election to be held by three commissioners, to be appointed in each ward by the mayor of the city, and at such place in each ward as he may direct; and all subsequent elections shall be held by a like number of commissioners, to be appointed in each ward by the two boards in joint meeting, which several appointments, except the first, shall be at least ten days previous to the day of each election. And it shall be the duty of the mayor, for the first election, and of the commissioners for all subsequent elections, to give at least five days' previous public notice of the place in each ward where such elections are to be held. The said commissioners shall, before they receive any ballot, severally take the following oath or affirmation, to be administered by the mayor of the city or any justice of the peace for the county of Washington: "I, A. B., do solemnly swear, or affirm (as the case may be); that I will truly and faithfully receive and return the votes of such persons as are by law entitled to vote for members of the board of aldermen and board of common council in ward, No. according to the best of my judgment and understanding; and that I will not, knowingly, receive or return the vote of any person who is not legally entitled to the same, so help me God." The polls shall be opened at ten o'clock in the morning, and be closed at seven o'clock in the evening of the same day. Immediately on closing the polls, the commissioners of each ward, or a majority of them, shall count the ballots and make out under their hands and seals a correct return of the two persons for the first election, and of the one person for all subsequent elections, having the greatest number of legal votes, together with the number of votes given to each, as members of the board of aldermen; and of the three persons having the greatest number of legal votes, together with the number of votes given to each, as members of the board of common council; and the two persons at the first election and the one person at all subsequent elections, having the greatest number of legal votes for the board of aldermen; and the three persons having the greatest number of legal votes for the board of common council, shall be duly elected; and in all cases of an equality of votes the commissioners shall decide by lot. The said returns shall be delivered to the mayor of the city on the succeeding day, we shall cause the same to be published in some newspaper printed in the city of Washington. A duplicate return, together with a list of the persons who voted at such election, shall also be made by the said commissioners to the register of the city, on the day succeeding the election, who shall preserve and record the same; and shall within two days thereafter notify the several persons so returned, of their election. And each board shall judge the legality of the elections, returns and qualifications of its own members; and shall supply vacancies in its own body, by causing elections to be made

to fill the same in the ward and for the board in which such vacancies shall happen, giving at least five days' notice previous thereto; and each board shall have full power to pass all rules necessary and requisite to enable itself to come to a just decision in cases of a contested election of its members; and the several members of each board shall, before entering upon the duties of their office, take the following oath or affirmation: "I do swear, (or solemnly, sincerely and truly affirm and declare, as the case may be) that I will faithfully execute the office of to the best of my knowledge and ability," which oath or affirmation shall be administered by the mayor or some justice of the peace for the county of Washington.

SEC. 5. *And be it further enacted,* That in addition to the powers heretofore granted to the corporation of the city of Washington, by an act, entitled "An act to incorporate the inhabitants of the city of Washington, in the District of Columbia," and an act, entitled "An act supplementary to an act entitled An act to incorporate the inhabitants of the city of Washington, in the District of Columbia," the said corporation shall have power to lay taxes on particular wards, parts or sections of the city, for their particular local improvements; that after providing for all objects of a general nature, the taxes raised on the assessable property in each ward shall be expended therein, and in no other, in regulating, filling up and repairing of streets and avenues, building of bridges, sinking of wells, erecting pumps and keeping them in repair; in conveying water in pipes, and in the preservation of springs; in erecting and repairing wharves; in providing fire engines and other apparatus for the extinction of fires; and for other local improvements and purposes, in such manner as the said board of aldermen and board of common council shall provide; but the sums raised for the support of the poor, aged and infirm, shall be a charge on each ward in proportion to its population or taxation, as the two boards shall decide. That whenever the proprietors of two thirds of the inhabited houses, fronting on both sides of a street or part of a street, shall, by petition to the two branches, express their desire of improving the same by laying the curbstone of the foot pavement, and paving the gutters or carriageway thereof, or otherwise improving said street agreeably to its graduation, the said corporation shall have power to cause to be done at any expense not exceeding two dollars and fifty cents per front foot, of the lots fronting on each improved street or part of a street, and charge the same to the owners of the lots fronting on said street or part of a street in due proportion; and also on a like petition, to provide for erecting lamps for lighting any street or part of a street, and to defray the expense thereof, by a tax on the proprietors or inhabitants of such houses, in proportion to their rental or valuation, as the two boards shall decide.

SEC. 6. *And be it further enacted,* That the said corporation shall have full power and authority to erect and establish hospitals or pest houses, workhouses, houses of correction, penitentiary and other public buildings, for the use of the city, and to lay and collect taxes for defraying the expenses thereof; to regulate party and other fences, and to determine by whom the same shall be made and kept in repair; to lay open streets, avenues, lanes and alleys, and to regulate or prohibit all enclosures thereof; and to occupy and improve for public purposes, by and with the consent of the President of the United States, any part of the public and open spaces or squares in said city not interfering with any private rights; to regulate the measurement of, and weight by which all articles brought into the city for sale shall be disposed of; to provide for the appointment of appraisers and measurers of builder's work and materials, and also of wood, coals, grain and lumber; to restrain and prohibit the nightly and other disorderly meetings of slaves, free negroes and mulattoes, and to punish such slaves by whipping, not exceeding forty stripes, or by imprisonment, not exceeding six calendar months, for any one offence; and to punish such free negroes and mulattoes for such offences, by fixed penalties, not exceeding twenty dollars for any one offence; and in case of the inability of any such free negroe or mulatto to pay and satisfy any such penalty and cost thereon, to cause such free negro or mulatto to be confined to labour for such reasonable time, not exceeding six calendar months for any one offence, as may be deemed equivalent to such penalty and costs; to cause all vagrants, idle or disorderly persons, all persons of evil life or ill fame, and all such as have no visible means of support, or are likely to become chargeable to the city as paupers, or are found begging or drunk in or about the streets, or loitering in or about tippling houses, or who can show no reasonable cause of business or employment in the city; and all suspicious persons; and all who have no fixed place of residence, or cannot give a good account of themselves; all evesdroppers and night walkers; all who are guilty of open profanity or grossly indecent language behaviour publicly in the streets; all public prostitutes and such as lead a notoriously lewd or lascivious course of life; and all such as keep public gaming tables or gaming houses, to give security for their good behaviour for a reasonable time. and to indemnify the city against any charge for their support; and in case of their refusal or inability to give such security, to cause them to be confined to labour for a limited time, not exceeding one year at a time, unless such security should be sooner given; but if they shall afterwards be found again offending, such security may be again required, and for want thereof, the like proceedings may be again had, from time to time, as often as may be necessary; to prescribe the terms and conditions upon which free negroes, mulattoes and others, who can show no visible means of support, may reside in the city; to cause the avenues, streets, lanes and alleys to be kept clean, and to appoint officers for that purpose; to authorize the drawing of lotteries for effecting any important improvement in the city which the ordinary funds or revenue thereof will not accomplish: (*a*) *Provided,* that the amount to be raised in each year, shall not exceed the sum of ten thousand dollars: *And provided also,* that the object for which the money is intended to be raised, shall be first submitted to the President of the United States, and shall be approved of by him; to take care of, preserve and regulate the several burying grounds within the city; to provide for registering of births, deaths, and marriages; to cause abstracts or minutes of all transfers of real property both freehold and leasehold, to be lodged in the registry of the city at stated periods; to authorize night watches and patrols, and the taking up, and confining by them in the night time of all suspected persons; to punish by law; corporeally, any servant or slave guilty of a breach of any of their by-laws or ordinances, unless the owner or holder of such servant or slave, shall pay the fine annexed to the offence; and to pass all laws which shall be deemed necessary and proper for carrying into execution the foregoing powers and all other powers vested in the corporation or any of its officers, either by this act or any former act.

SEC. 7. *And be it further enacted,* That the marshal of the district of Columbia shall receive and safely keep within the jail for Washington county, at the expense of the city, all persons committed thereto under the sixth section of this act, until other arrangements be made by the corporation, for the confinement of offenders within the provisions of the said section. And in all cases where suit shall be brought before a justice of the peace, for the recovery of any fine or penalty arising or incurred for a breach of any by-law or ordinance of the corporation, upon a return of nulla bona to any fieri facias issued against the property of the defendant or defendants, it shall be the duty of the clerk of the circuit court for the county of Washington, when required, to issue a writ of capias ad satisfaciendum against every such defendant, returnable to the next circuit court for the county of Washington, thereafter, and which shall be proceeded on as in other writs of the like kind.

SEC. 8. *And be it further enacted,* That unimproved lots in the city of Washington, on which two years' taxes remain due and unpaid, or so much thereof as may be necessary to pay such taxes, may be sold at public sale for such taxes due thereon: *Provided,* that public notice be given of the time and place of sale, by advertising in some newspaper printed in the city of Washington, at least six months, where the property belongs to persons residing out of the United States; three months, where the property belongs to persons residing in the United States, but without the limits of the district of Columbia; and six weeks, where the property belongs to persons residing within the district of Columbia or city of Washington; in which notice shall be stated, the number of the lot or lots, the number of the square or squares, the name of the person or persons to whom the same may have been assessed; and also the amount of taxes due thereon: *And provided also,* that the purchaser shall not be obliged to pay at the time of such sale, more than the taxes due, and the expenses of sale; and that if within two years from the day of such sale the proprietor or proprietors of such lot or lots, or his or their heirs, representatives or agents, shall repay to such purchaser the monies paid for the taxes and expenses as aforesaid, together with ten per centum per annum as interest thereon, or make a tender of the same, he shall be reinstated in his original right and title; but if no such payment or tender be made within two years next after the said sale, then the purchaser shall pay the balance of the purchase money of such lot or lots, into the city treasury, where it shall remain subject to the order of the original proprietor or proprietors, his or their heirs or legal representatives; and the purchaser shall receive a title in fee simple to the said lot or lots, under the hand of the mayor and seal of the corporation, which shall be deemed good and valid in law and equity.

SEC. 9. *And be it further enacted,* That the said corporation shall in future be named and styled "The Mayor, Aldermen and Common Council of the City of Washington;" and that if there shall have been a non-election or informality in the election of a city council on the first Monday in June last, it shall not be taken, construed or adjudged, in any manner, to have operated as a dissolution of the said corporation, or to affect any of its rights, privileges or laws, passed previous to the second Monday in June last, but the same are hereby declared to exist in full force.

SEC. 10. *And be it further enacted,* That the corporation shall, from time to time, cause the several wards of the city to be so located as to give, as nearly as may be, an equal number of voters to each ward: and it shall be the duty of the register of the city, or such officer as the corporation may hereafter appoint, to furnish the commissioners of election, for each ward, on the first Monday in June annually, previous to the opening of the polls, a list of the persons having a

right to vote, agreeably to the provisions of the second section of this act.

SEC. 11. *And be it further enacted,* That so much of any former act, as shall be repugnant to the provisions of this act, be, and the same is hereby repealed.

Approved, May 4, 1812 (2 Stat. 721, Ch. 75).

ACT OF 1820 REORGANIZING THE GOVERNMENT OF THE CITY OF WASHINGTON

An act To incorporate the inhabitants of the city of Washington, and to repeal all acts heretofore passed for that purpose.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the act, entitled "An act to incorporate the inhabitants of the city of Washington, in the District of Columbia," and the act of supplementary to the same, passed on the twenty-fourth of February, in the year one thousand eight hundred and four, and the act, entitled "An act further to amend the charter of the city of Washington," and all other acts, or parts of acts, inconsistent with the provisions of this act, be, and the same are hereby, repealed: *Provided, however,* That the mayor, the members of the board of aldermen, and the members of the board of common council, of the corporation of the said city, shall and may remain and continue as such, for and during the terms for which they have been respectively appointed, subject to the terms and conditions in such cases legally made and provided; and all acts or things done, or which may be done, by them in pursuance of the provisions, or by virtue of the authority, of the said acts, or either of them, and not inconsistent with the provisions of his act, shall be valid, and of as full force and effect as if the said acts had not been repealed.

SEC. 2. *And be it further enacted,* That the inhabitants of the city of Washington shall continue to be a body politic and corporate, by the name of the "Mayor, board of aldermen, and board of common council, of the city of Washington," to be elected by ballot, as hereinafter directed, and, by their corporate name, may sue and be sued, implead and be impleaded, grant, receive, and do all other acts, as natural persons; and may purchase and hold real, personal, and mixed, property, or dispose of the same, for the benefit of the city; and may have and use a city seal, and break and alter the same at pleasure.

SEC. 3. *And be it further enacted,* That the mayor of the said city shall be elected on the first Monday in June next, and on the same day in every second year thereafter, at the same time and place, in the same manner, and by the persons qualified to vote for members of the board of aldermen and the board of common council. That the commissioners hereinafter mentioned shall make out duplicate certificates of the result of the election of mayor; and shall return one to the board of aldermen and the other to the board of common council, on the Monday next ensuing the election; and the person having the greatest number of votes shall be the mayor: but in case two or more persons, highest in vote, shall have an equal number of votes, then it shall be lawful for the board of aldermen and the board of common council to proceed forthwith, by ballot, in joint meeting, to determine the choice between such persons. The mayor shall, on the Monday next ensuing his election, before he enters on the duties of his office, in the presence of the boards of aldermen and common council, in joint meeting, take an oath, to be administered by a justice of the peace, "lawfully to execute the duties of his office, to the best of his skill and judgment, without favour or partiality." He shall, ex officio, have an exercise all the powers, authority, and jurisdiction, of a justice of the peace for the county of Washington, within the said county. He shall nominate, and with the consent of the board of aldermen, appoint to all offices under the corporation, (except commissioners of election,) and may remove any such officer from office at his will and pleasure. He shall appoint persons to fill up all vacancies which may occur during the recess of the board of aldermen, to hold such appointments until the end of the then ensuing session. He may convene the two boards when, in his opinion, the public good may require it; and he shall lay before them, from time to time, in writing, such alterations in the laws of the corporation as he may deem necessary and proper; and he shall receive, for his services, annually a just and reasonable compensation, to be allowed and fixed by the two boards, which shall neither be increased nor diminished during his continuance in office. Any person shall be eligible to the office of mayor who is a free white male citizen of the United States, who shall have attained to the age of thirty years, who shall have resided in the said city for two years immediately preceding his election, and who shall be the bona fide owner of a freehold estate in the said city; and no other person shall be eligible to the said office. In case of the refusal of any person to accept the office of mayor, upon his election thereto, or of his death, resignation, inability, or removal from the city, the said boards shall assemble and elect another in his place, to serve for the remainder of the term, or during such inability.

SEC. 4. *And be it further enacted,* That the board of aldermen shall consist of two members to be residents in, and chosen from, each ward, by the qualified voters therein, and to be elected for two years, from the Monday next ensuing their election; and the board of common council shall consist of three members, to be residents in, and chosen from, each ward, by the qualified voters therein, and to be elected for one year, from the Monday next ensuing their election; and each board shall meet at the council chamber, on the second Monday in June next, for the despatch of business, at ten o'clock in the morning, and at the same hour on the second Monday in June, in every year thereafter; and at such other time as the two boards may, by law, direct. A majority of each board shall be necessary to form a quorum to do business, but a less number may adjourn from day to day; they may compel the attendance of absent members, in such manner, and under such penalties, and allow such compensation for the attendance of the members, as they may, by law, provide; each board shall appoint its own President, who shall preside during its sessions, and who shall be entitled to vote on all questions; they shall settle their rules of proceedings, appoint their own officers, regulate their respective compensations, and remove them at pleasure; and may, with the concurrence of three-fourths of the whole, expel any member for disorderly behaviour or malconduct in office, but not a second time for the same offence; each board shall keep a journal of its proceedings, and the yeas and nays shall be entered thereon, at the request of any member; and their deliberations shall be public. All ordinances or acts, passed by the two boards, shall be sent to the mayor for his approbation, and, when approved by him, shall be obligatory as such. But, if the mayor shall not approve of any ordinance or act, so sent to him, he shall return the same, within five days, with his reasons in writing therefor; and if two thirds of both boards, on reconsideration thereof, agree to pass the same, it shall be in force, in like manner as if he had approved it; but, if the two boards shall, by their adjournment, prevent its return, the same shall not be obligatory.

SEC. 5. *And be it further enacted,* That no person shall be eligible to a seat in the board of aldermen, or board of common council, unless he shall be more than twenty-five years of age, a free white male citizen of the United States, and shall have been a resident of the city of Washington for one year next preceding the day of election, and shall, at the time of his election, be a resident of the ward for which he shall be elected, and be then the bona fide owner of a freehold estate in the said city, and shall have been assessed on the books of the corporation, for the year ending on the thirty-first day of December next preceding the day of election. And every free white male citizen of the United States, of lawful age, who shall have resided in the city of Washington for one year next preceding the day of election, and shall be a resident of the ward in which he shall offer to vote, and who shall have been assessed on the books of the corporation, for the year ending on the thirty-first day of December next preceding the day of election, and who shall have paid all taxes legally assessed and due on personal property, when legally required to pay the same, and no other person shall be entitled to vote at any election for members of the two boards. And it shall be the duty of the register of the city, or such officer as the corporation may hereafter direct, to furnish the commissioners of election in each ward, previous to opening the polls at every election, a list of the persons having a right to vote, agreeably to the provisions of this section.

SEC. 6. *And be it further enacted,* That an election for members of the board of aldermen and board of common council shall be held on the first Monday of June next, and on the first Monday in June annually thereafter; and all elections shall be held by three commissioners to be appointed in each ward by the two boards in joint meeting, which appointment shall be at least ten days previous to the day of each election. And it shall be the duty of the commissioners so appointed to give at least five days' previous notice of the place in each ward where such elections are to be held. The said commissioners shall, before they receive any ballot, severally take an oath or affirmation, to be administered by some justice of the peace for the county of Washington, "truly and faithfully to receive and return the votes of such persons as are by law entitled to vote for members of the board of aldermen and board of common council, in their respective wards, according to the best of their judgment and understanding; and not knowingly to receive or return the vote of any person who is not legally entitled to the same." The polls shall be opened at ten o'clock in the morning, and be closed at seven o'clock in the evening of the same day. Immediately on closing the polls, the said commissioners for each ward, or a majority of them, shall count the ballots, and make out, under their hands and seals, a correct return of the persons having the greatest number of legal votes for members of the board of aldermen and for members of the board of common council, respectively, together with the number of votes given to each person voted for: and the persons having the greatest number of votes for the two boards, respectively, shall be duly elected; and, in all cases of an equality of votes, the commissioners shall decide the choice by lot. The said returns shall be delivered to the mayor, on the day succeeding the election, who shall cause the result of the election to be published in some newspaper printed in the city of Washington; a duplicate return shall, together with a list of the persons who voted at such election, also to be made, on the day succeeding the election, to the register of the city, who shall preserve and record the same; and shall, within two days thereafter, notify the several persons, so returned, of their election. And each board shall judge of the legality of the elections, returns, and qualifications of its own members, and shall supply vacancies in its own body, by causing elections to be held to fill the same, and appoint commissioners to hold the same, and

such commissioners shall give at least five days' public notice of the time and place of holding such elections; each of the members of either board, shall, before entering on the duties of his office, take an oath or affirmation, "faithfully to execute the duties of his office, to the best of his knowledge and ability;" which oath or affirmation shall be administered by the mayor or some justice of the peace for the county of Washington.

SEC. 7. *And be it further enacted*, That the corporation aforesaid shall have full power and authority to lay and collect taxes upon the real and personal property within the said city; provided that no tax shall be laid upon real property, at a higher rate than three quarters of one per centum on the assessment valuation thereof, except for the special purposes hereinafter provided; and that no tax shall be laid upon the wearing apparel, or necessary tools and implements used in carrying on the trade or occupation, of any person; nor shall the same be subject to distress and sale for any tax; and, after providing for all objects of a general nature, the taxes raised on the assessable property in each ward shall be expended therein, and in no other; to establish a board of health, with competent authority to enforce its regulations, and to establish such other regulations as may be necessary to prevent the introduction of contagious diseases, and for the preservation of the health of the city; to prevent and remove nuisances; to establish night watches or patrols, and erect lamps in the streets; to preserve the navigation of the Potomac and Anacostia rivers adjoining the city; to erect, repair, and regulate, public wharves, and to deepen creeks, docks, and basins; to regulate the manner of erecting, and the rates of wharfage, at private wharves; to regulate the stationing, anchorage, and mooring of vessels; to provide for licensing, taxing, and regulation, auctions, retailers, ordinaries, and taverns, hackney carriages, wagons, carts, and drays, pawn-brokers, venders of lottery tickets, money-changers, and hawkers and pedlars; to provide for licensing, taxing, regulating, or restraining, theatrical or public shows and amusements; to restrain or prohibit tippling houses, lotteries, and all kinds of gaming, to regulate and establish markets; to erect and repair bridges; to open and keep in repair streets, avenues, lanes, alleys, drains, and sewers, agreeably to the plan of the city, to supply the city with water; to provide for the safe-keeping of the standard weights and measures as fixed by Congress, and for the regulation of all weights and measures used in the city; to regulate the sweeping of chimneys, and fix the rates or fees therefor; to provide for the prevention and extinguishment of fires; to regulate the size of bricks to be made or used; and to provide for the inspection of lumber and other building materials to be sold in the city; to regulate, with the approbation of the President of the United States, the manner of erecting, and the materials to be used in the erection, of houses; to regulate the inspection of tobacco, flour, butter, and lard, in casks or boxes, and salted provisions; to regulate the gauging of casks and liquors; the storage of gunpower, and all naval and military stores, not the property of the United States; and the weight and quality of bread; to impose and appropriate fines, penalties, and forfeitures, for the breach of their laws or ordinances; and to provide for the appointment of inspectors, constables, and such other officers, as may be necessary to execute the laws of the corporation.

SEC. 8. *And be it further enacted*, That the said corporation shall have full power and authority to lay taxes on particular wards, parts, or sections, of the city, for their particular local improvements; and, upon application of the owners of more than one half of the property upon any portion of a street, to cause the curb-stones to be set, and the footways to be paved, on such portion of a street, and to lay a tax on such property, to the amount of the expense thereof: *Provided*, That such tax shall not exceed three dollars per front foot; and, upon a like application to cause the carriage-way of any portion of a street to be paved, or lamps to be erected therein, and light the same, and lay a tax, not exceeding the whole expense thereof, in due proportion, on the lots fronting on such portion of a street; and, also, to impose an addition or interest on the amounts of any such taxes, not exceeding ten per centum per annum, when the same shall not have been paid within thirty days after the same shall become due. The said corporation shall also have power and authority to provide for the establishment and superintendence of public schools, and to endow the same; to establish and erect hospitals or pest-houses, watch and workhouses, houses of correction, penitentiary, and other public buildings, and to lay and collect taxes for the expenses thereof; to regulate party or other walls and fences, and to determine by whom the same shall be kept in repair; to cause new alleys to be opened through the squares, and to extend those already laid out, upon the application of the owners of more than one half the property in such squares.

Provided, That the damages which may accrue thereby, to any individual or individuals, shall be first ascertained by a jury, to be summoned and impannelled by the marshal of the District of Columbia, (and it is hereby made his duty to summon and impannel the same, in all such cases, upon application to him in writing by the mayor of the city,) and such damages to be paid by the corporation; the amount thereof, and the expenses accruing, shall be levied, in due proportion, upon the individuals whose property on such squares shall be benefited thereby, and collected as other taxes are; to occupy and improve, for public purposes, by and with the consent of the President of the United States, any part of the public and open spaces and squares in said city, not interfering with any private rights; to regulate the admeasurement and weight by which all articles brought into the city for sale shall be disposed of; to provide for the appointment of appraisers and measurers of builders' work and materials, and also of wood, coal, grain, and lumber; to restrain and prohibit the nightly and other disorderly meetings of slaves, free negroes, and mulattoes, and to punish such slaves by whipping, not exceeding forty stripes, or by imprisonment, not exceeding six months, for any one offense; and to punish such free negroes and mulattoes, by penalties, not exceeding twenty dollars for any one offence; and in case of the inability of any such free negro or mulatto to pay any such penalty and cost thereon, to cause him or her to be confined to labour for any time not exceeding six calendar months; to cause all vagrants, idle or disorderly persons, all persons of evil life or ill-fame, and all such as have no visible means of support, or are likely to become chargeable to the corporations as paupers, or are found begging or drunk in or about the streets, or loitering in or about tippling houses, or who can show no reasonable cause of business or employment in the city, and all suspicious persons who have no fixed place of residence, or who cannot give a good account of themselves; all evesdroppers and nightwalkers; all who shall be guilty of open profanity, or grossly indecent language or behaviour publicly in the streets; all public prostitutes, and such as lead a notoriously lewd or lascivious course of life, and all such as keep public gaming tables, or gaming houses, to give security for their good behaviour for a reasonable time, and to indemnify the city against any charge for their support; and, in case of their refusal or inability to give such security, to cause them to be confined to labour until such security shall be given, not exceeding, however, one year at a time; but if they shall be found again offending, the like proceedings may be again had, and from time to time, as often as may be necessary to enforce the departure of such vagrants and paupers as may come into the city to reside, unless they shall give ample security that they will not become chargeable on the corporation for their support; to provide for the binding out as apprentices of poor orphan children, and the children of drunkards, vagrants, and paupers; to prescribe the terms and conditions upon which free negroes and mulattoes may reside in the city; to authorize, with the approbation of the President of the United States, the drawing of lotteries for the erection of bridges and effecting any important improvements in the city, which the ordinary revenue thereof will not accomplish, for the term of ten years:

Provided, that the amount so authorized to be raised in each year shall not exceed the sum of ten thousand dollars, clear of expenses; to take care of and regulate burial grounds; to provide for the registering of births, deaths, and marriages; to punish corporeally any coloured servant or slave for a breach of any of their laws or ordinances, unless the owner or holder of such servant or slave shall pay the fine in such cases provided; and to pass all laws which shall be deemed necessary and proper for carrying into execution the powers vested by this act in the said corporation or its officers.

SEC. 9. *And be it further enacted*, That the marshal of the District of Columbia shall receive and safely keep within the jail for the county of Washington, at the expense of the said corporation, all persons committed thereto under or by authority of the provisions of this act. And in all cases where suit shall be brought before a justice of the peace, for the recovery of any fine or penalty arising or incurred for a breach of any law or ordinance of the corporation, execution shall and may be issued, as in all other cases of small debts.

SEC. 10. *And be it further enacted*, That real property, whether improved or unimproved, in the city of Washington, on which two or more years' taxes shall have remained due and unpaid, or on which any special tax, imposed by virtue of authority of the provisions of this act, shall have remained unpaid for two or more years after the same shall have become due, or so much thereof, not less than a lot, (when the property upon which the tax has accrued is not less than that quantity,) as may be necessary to pay any such taxes, with all legal costs and charges arising thereon, may be sold at public sale to satisfy the corporation therefor: *Provided*, That public notice be given of the time and place of sale, by advertising once a week in some newspaper printed in the city of Washington, for at least six months, where the property is assessed to persons residing out of the United States; for three months, where the property is assessed to persons residing in the United States, but without the District of Columbia; and for six weeks, where the property is assessed to persons residing within the District of Columbia; in which advertisement shall be stated the number of the lot or lots, (if the square has been divided into lots,) the number of the square or squares, or other sufficient or definite description of the property selected for sale, the name of the person or persons to whom the same may have been assessed, for the respective years' taxes due thereon, as also the name of the person to whom the same is assessed, and the aggregate amount of taxes due.

The purchaser or purchasers of any such property shall pay, at the time of such sale, the amount of the taxes due on the property so purchased by him, her, or them, respectively, with the amount of the expenses of sale; and he, she, or they, shall pay the

residue of the purchase money within ten days after the expiration of two years from the day of sale, to the collector of taxes, or other officer of the corporation authorized to receive the same; and the amount of such where it shall remain, subject to the order of the original proprietor or proprietors, his, her, or their, legal representatives; and the residue shall be placed in the city treasury, purchaser or purchasers shall receive a title in fee simple, in and to the lot or lots so sold and purchased, under the hand of the mayor and seal of the corporation, which shall be deemed good and valid in law and equity: *Provided nevertheless,* That if, within two years from the day of any such sale, or before such purchaser or purchasers shall have paid the residue of the purchase money as aforesaid, the proprietor or proprietors of any property which shall have been sold as aforesaid, his, her, or their heirs, agents, or legal representatives, shall repay to such purchaser or purchasers the moneys paid for the taxes, and expenses as aforesaid, together with ten per centum per annum, as interest thereon, or make a tender thereof, or shall deposit the same in the hands of the mayor of the city, or other officer of the corporation appointed to receive the same, for the use of such purchaser or purchasers, and subject to his, her, or their heirs, or legal representatives' order, of which such purchaser, his heirs or legal representatives, shall be immediately informed, by notice in some newspaper printed in the city of Washington, or otherwise; he, she, or they, shall be reinstated in his, her, or their, original right and title, as if no such sale had been.

And if any such purchaser shall fail to pay the residue of the purchase money as aforesaid, within the time required by this section, for any property so purchased by him, he shall pay ten per annum, as interest thereon, and in addition to such residue, to be computed from the expiration of the two years as aforesaid, until the actual payment of such residue, and the receiving of a conveyance from the corporation; and the said interest shall alike be subject to the order of the original proprietor or proprietors, as the residue of the purchase money as aforesaid: *Provided, also,* That no sale shall be made, in pursuance of this section, of any improved property whereon there is personal property of sufficient value to pay the said taxes: and that minors, mortgages, or others having equitable interest in real property, which property shall be sold for taxes as aforesaid, shall be allowed one year after such minors' coming to, or being of full age, or after such mortgages, and others having equitable interests, obtaining possession of, or a decree for the sale of, such property, to redeem the property so sold from the purchaser or purchasers, his, her, or their, assigns, on paying the amount of purchase money so paid therefor, with ten per cent interest thereon as aforesaid, and all the taxes that have been paid thereon by the purchaser, or his assigns, between the day of sale and the period of such redemption, with ten per cent interest on the amount of such taxes, and also the full value of the improvements which may have been made or erected on such property, by the purchaser or his assigns, while the same was in his or their possession. *And provided, moreover,* That where the estate of the tenant in default, as for years, or for life or lives, shall be sufficient to defray the taxes chargeable thereupon, such estate only shall be liable to be sold under the provisions of this act.

SEC. 11. *And be it further enacted,* That it shall be lawful for the collector or other officer (duly authorized) to postpone, after such advertisement, the sale of any property advertised according to the provisions of the foregoing section, to any future day, for the want of bidders, he giving public notice of such postponement, and the sale made at such postponed time shall be equally valid as if made on the day stated in the advertisement.

SEC. 12. *And be it further enacted,* That the person or persons appointed to collect any tax imposed by virtue of the powers granted by this act, shall have authority to collect the same by distress and sale of the goods and chattels of the person chargeable therewith; but no such sale shall be made unless ten days' previous notice thereof be given in some newspaper printed in the city of Washington. And the provisions of the acts of Assembly of Maryland, now in force within the county of Washington, relating to the right of replevying personal property taken in execution for public taxes, shall apply to all cases of personal property taken by distress to satisfy taxes imposed by virtue of this act.

SEC. 13. *And be it further enacted,* That the levy court of the county of Washington, in the District of Columbia, shall not possess the power of assessing any tax on property in the city of Washington; nor shall the corporation of the said city be obliged to contribute, in any manner, towards the expenses or expenditures of said court, except for the one-half part of the expenses incurred on account of the orphans' court, the office of coroner, the jail of said county, and the opening and repairing of roads in the county of Washington, east Rock creek, leading directly to the city of Washington, but the said corporation shall have the sole control and management of the bridge across or over Rock Creek, at the termination of K street north; and shall be chargeable with the expense of keeping the same in repair, and rebuilding it when necessary.

SEC. 14. *And be it further enacted,* That the clerk of the circuit court, and the register of wills for the county of Washington, respectively, shall furnish the register of the city, or other officer of the corporation, appointed to receive the same, on or about the first Monday in January and July, in every year, correct lists of the transfers of real property in the city, during the next preceding half year, so far as can be ascertained by the records in their respective offices, and the said corporation shall make to the said clerk and register of wills such compensation therefor as shall be agreed on between the respective parties, not exceeding six cents for each transfer on such lists.

SEC. 15. *And be it further enacted,* That the commissioner of the public buildings, or other person appointed to superintend the United States' disbursements in the city of Washington, shall reimburse to the said corporation a just proportion of any expense which may hereafter be incurred, in laying open, paving, or otherwise improving any of the streets or avenues in front of, or adjoining to, or which may pass through or between any of the public squares or reservations, which proportion shall be determined by a comparison of the length of the front, or fronts, of the said squares or reservations of the United States, on any such street or avenue, with the whole extent of the two sides thereof; and he shall cause the curb stones to be set, and foot ways paved, on the side or sides of any such street or avenue, whenever the said corporation shall, by law, direct such improvements to be made by the proprietors of the lots on the opposite side of any such street or avenue, or adjacent to any such square or reservation; and he shall cause the footways to be paved, and the curb stones to be set, in front of any lot or lots belonging to the United States, when the like improvements shall be ordered by the corporation in front of the lots adjoining, or squares adjacent thereto; and he shall defray the expenses directed by this section, out of any moneys arising from the sale of lots in the city of Washington, belonging to the United States, and from no other fund.

SEC. 16. *And be it further enacted,* That the present boards of aldermen and common council shall, before the last Monday in May next, divide the said city into as many wards as in their opinion shall be most conducive to the interests of the city; and the boards of aldermen and common council, may, from time to time, as the interests of the city shall require, alter the number and boundaries of the said wards: *Provided,* That the said wards shall, at all times, be so laid off, altered, and bounded, that each ward shall comprise, as near as may be, an equal number of the inhabitants of the said city:

And provided, however, That if such division shall not be made prior to the said last Monday in May, then the said city shall be divided into six wards, in manner following, to wit: All that part of said city to the westward of Sixteenth street west, shall constitute the first: that part to the eastward of Sixteenth street west, and to the westward of Tenth street west, shall constitute the second; that part to the eastward of Tenth street west, to the westward of First street west, and to the northward of E street south, shall constitute the third; that part to the eastward of First street west, to the westward of Eighth street east, and to the northward of E street south, shall constitute the fourth; that part to the eastward of Tenth street west, to the westward of Fourth street east, and to the southward of E street south, shall constitute the fifth; and the residue of the city shall constitute the sixth ward. The expenses which may be incurred in improving and repairing the streets which form the boundaries of the several wards, shall be defrayed out of the taxes raised in the wards which adjoin the same, respectively, in equal proportions; and the present boards of aldermen and common council shall, before the first Monday in June next, apportion, by law, such portions of the debt of the city, as have been heretofore chargeable to the existing wards, amongst the wards established by this section, upon just and equitable principles. And the board of aldermen shall, so soon as the same shall have been organized, on the second Monday in June next, divide the members into two classes, in manner following, to wit: Those members who are now in office, and, by virtue of their election in June last, shall be entitled to take their seats in the new board, as members from the wards in which they shall, respectively, reside, shall be placed in the first class; and those members who shall be elected from the same wards in June next, shall be placed in the second class; and the other members shall be placed in their respective classes by lot; and the seats of the first class shall be vacated at the end of the first year, and the seats of the second class shall be vacated at the end of the second year; so that one member shall be elected in each ward every year thereafter. And the members of the board of aldermen shall be hereafter, ex officio, justices of the peace of the county of Washington, unless holding commissions in the army or navy of the United States.

SEC. 17. *And be it further enacted,* That this act shall continue in force for and during the term of twenty years, and until Congress shall, by law, determine otherwise.

Approved, May 15, 1820 (3 Stat. 583, ch. 104).

ACT OF 1848 REORGANIZING THE GOVERNMENT OF THE CITY OF WASHINGTON

An act to continue, alter and amend the charter of the city of Washington

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act of May fifteenth, eighteen hundred and twenty, entitled "An Act to incorporate the inhabitants of the city of Washington, and to repeal all acts heretofore passed for that purpose," and the act of May twenty-sixth,

eighteen hundred and twenty-four, entitled "An Act supplementary to 'An Act to incorporate the inhabitants of the city of Washington,' passed the fifteenth of May, one thousand eight hundred and twenty, and for other purposes," and the act or acts supplemental or additional to said acts which were in force on the fourteenth day of May, eighteen hundred and forty, or which may, at the passing of this act, be in force, be and the same are hereby continued in force for the term of twenty years from the date hereof, or until Congress shall by law determine otherwise, with the alterations, additions, explanations, and amendments following, that is to say:

SEC. 2. *And be it further enacted*, That the said corporation shall have full power and authority to lay and collect a tax of not exceeding three fourths of one per centum per annum upon the assessed value of all stocks which may be owned and possessed by any person whatever in any banking, insurance, or other incorporated or unincorporated company in the city of Washington; and to compel all such banking, insurance, or other incorporated or unincorporated company to furnish, when so required to do, within ten days thereafter, a full and complete list of the names of the stockholders in such company, and the amount of stock owned by each, under a penalty not exceeding fifty dollars for each and every week such company shall neglect or refuse or fail to furnish the same. And in default of payment of the tax due on said stock by the banking, insurance or other company, or by the holder or holders of the stock, the said corporation shall have full power and authority to sell the said stock, or so many shares thereof as shall be sufficient to pay the taxes due thereon, and costs of collection, as provided in the case of personal property.

The said corporation shall also have power to lay and collect a tax not exceeding three fourths of one per centum per annum on the assessed value of all bonds and mortgages, of stock of all kinds, and all public and private securities, and on every description of property with the said city, of which may be owned or held by the inhabitants thereof, except the wearing apparel and necessary tools and implements used in carrying on the trade or occupation of any person; and to compel persons to furnish, when required by the assessors, a full and correct list of all property by law taxable, held by them, and to punish with suitable fines and penalties persons refusing or omitting to furnish such lists. The said corporation shall have power to lay and collect a schooltax upon every free white male citizen of the age of twenty-one years and upwards, of one dollar per annum; to provide for licensing, taxing and regulating livery stables, and wholesale and retail dealers, in a ratio according to the annual average amount of the capital invested in the business of such wholesale and retail dealers; to license, tax and regulate agencies of all kinds of insurance companies; to tax private bankers, brokers and money lenders, not exceeding three fourths of one percentum per annum on the assessed amount of capital employed in the business of said private bankers, brokers and money lenders; to make all necessary regulations respecting hackney carriages and the rates of fare of the same, and the rates of hauling by cartmen, wagoners, carmen, and draymen, and the rates of commission of auctioneers; to regulate and graduate the licenses of nonresident merchants and traders, and the taxes on the same; to regulate and establish fish wharves and docks; to restrain and prohibit gaminghouses, and bawdy-houses; to punish those who may sell intoxicating liquors without having obtained license therefor, by fines not less than five dollars; and in default of the payment thereof, by imprisonment and labor in the workhouse for a term not exceeding ninety days; to provide for the punishing by fines and penalties, and by confinement to labor in the workhouse, any person and all persons who shall molest or disturb any church or other place of worship while the congregation are engaged in any religious exercises or proceedings; to provide for the weighing of all kinds of live stock brought into the city; to cause to be pulled down unsafe, dilapidated, or dangerous buildings; to take up and relay foot pavements and paved carriage-ways, and to keep them in repair, and to lay and collect taxes for paying the expenses thereof, on the property fronting on such foot-ways and carriage-ways; to lay and collect taxes for the support of public schools; to cause new alleys to be opened into the squares, and to open, change, or close those already laid out, upon the application of the owners of more than one half of the property in such squares, subject to the second proviso of the eighth section of the act of May the fifteenth, eighteen hundred and twenty, incorporating the inhabitants of the city of Washington.

And the said corporation shall have full power and authority to make all necessary laws for the protection of public and private property, the preservation of order, the safety of persons, and the observance of decency in the streets, avenues, alleys, public spaces, and other places in the said city, and for the punishment of all persons violating the same, as well as for the punishment of persons guilty of public profanity and prostitution.

SEC. 3. *And be it further enacted*, That at the first general election held after the passage of this act, a Board of Assessors, to consist of one member from each ward, shall be elected by the qualified voters therein, to serve for two years; and the returns of election for assessors shall be made in the same manner and form as the returns of the election for members of the Board of Aldermen and Board of Common Council; and the person having the greatest number of legal votes in each ward for assessor, shall be duly elected assessor; but in case two or more persons, highest in vote, shall have an equal number of votes, the commissioners of election for the ward in which such equality shall exist, shall decide the choice by lot. No person who is not eligible to a seat in the Board of Aldermen or Board of Common Council, shall be eligible to election as assessor. And on the first Monday of May next succeeding the first election of assessors under this act, the said board, or a majority of the members thereof, shall meet in the City Hall, and in the presence of the mayor and register, shall draw by lot the names of three members thereof, if the number of wards be seven, or if the number of wards exceed seven, the names of one half, as near as may be, of the members of said board; and the members whose names shall be thus drawn thereupon cease to be members of said board; and at the next general election a member shall be elected to serve for two years in each of the wards in which the members so drawn shall have been elected; and at every regular annual election thereafter in such wards as the time of the assessors is about to expire, an assessor shall be elected to serve for two years. No person holding any other office under the corporation, shall be elected to or hold the office of assessor. In the event of the death, resignation, inability, or refusal to serve of any person elected an assessor, the vacancy shall be filled immediately by the Board of Aldermen and Board of Common Council, in joint meeting, in which manner all vacancies in the board of assessors shall be filled:

Provided, That until the assessors authorized to be elected by this act, shall have been duly elected and qualified to enter upon their duties, full power and authority are hereby given to the said corporation to provide for the temporary appointment of assessors to perform the duties required of the assessors to be elected under this act. The board of assessors shall assess and value, and make return of all and every species of property by law taxable, at such times, and under such regulations, as the said corporation shall prescribe, and shall make return of all persons subject to a schooltax, in the said city, under such regulations as the said corporation shall prescribe; and if the said assessors, or either of them, shall refuse or wilfully neglect to assess and value, and make return of all and every species of property by law taxable, which may be known to them, or either of them, or come to their knowledge, or shall refuse or wilfully neglect to make return of any person subject to a schooltax, they, or the one so offending, shall be subject to a fine not exceeding one hundred dollars for each offence, at the discretion of the Circuit Court of the District of Columbia for the county of Washington, and shall thereafter be incapable of holding any office under the corporation; and the Board of Aldermen and Board of Common Council may, by joint resolution, remove any assessor from office for any misconduct in office.

SEC. 4. *And be it further enacted*, That the register, collector, and surveyor of the said city shall severally be elected on the first Monday in June next, and on the same day in every second year thereafter, at the same time and place, in the same manner, and by the persons qualified to vote for mayor and members of the Board of Aldermen and Board of Common Council:

Provided, That if the said first Monday in June next shall be the regular day for the election of mayor of the said city, then the next election thereafter, of register, collector, and surveyor, shall take place on the same day in the following year, and then on the same day in every second year thereafter, as above provided; and the commissioners of election shall make out duplicate certificates of the result of the election for register, collector, and surveyor, and shall return one to the Board of Alderman, and the other to the Board of Common Council on the Monday next ensuing the day of election; and the persons having the greatest number of votes for those offices respectively, shall be register, collector, or surveyor, as the case may be; but in case two or more persons highest in vote shall have an equal number of votes for either of said offices, then it shall be lawful for the Board of Aldermen and Board of Common Council to proceed forthwith by ballot, in joint meeting, to determine the choice between such persons; and the said register, collector and surveyor shall respectively hold their offices until their respective successors are duly elected and qualified, unless removed from office; and full power and authority are hereby granted to the Corporation of Washington to pass all such laws as may be necessary to define and regulate the respective duties, powers, and authority of the said register, collector, and surveyor; and also to prescribe the amount of bond and security to be given to the said corporation by each before entering upon the duties of their respective offices, and generally to pass all such laws as may be necessary to insure an efficient and faithful discharge of the duties of their respective offices, by the said register, collector, and surveyor; and in case the said officers, or either of them, shall fail or refuse to comply with any law, resolution, or order of the said corporation, or shall fail or refuse to obey any order of the mayor of the said city, or shall fail to discharge the duties of their respective offices with fidelity and a strict regard to the interests of the said corporation, or shall prove unable or incompetent, from any cause whatever, to discharge such duties, or shall be guilty of any malversation in office, or shall be convicted of any high crime or misdemeanor,

it shall be lawful for the majority of the Board of Aldermen and Board of Common Council, by joint resolution, to remove such officer, and to order an election to fill the vacancy; and in case of the refusal or failure of any person elected to either of said offices to accept of the same, or to give such bond and security as may be required by said corporation within twenty days after his election, or in case of the death, resignation, or removal from the said city of any person elected to or holding either of said offices, it shall be lawful for the Board of Aldermen and Board of Common Council to declare said office vacant, and to order an election to fill the vacancy. And in all cases where it shall become necessary to hold an election to fill a vacancy in either of said offices, the same regulations shall be observed as to the appointment of commissioners to hold said elections, and as to holding the elections and the returns of the same, as are observed at the regular elections: *Provided*, That authority is hereby given to the mayor of the said city to appoint temporarily, under such regulations as the said corporation may prescribe, some discreet person to discharge the duties of such vacant office until an election can be had and a successor duly elected and qualified to enter upon his duties.

SEC. 5. *And be it further enacted*, That every free white male citizen of the United States, who shall have attained the age of twenty-one years, and shall have resided in the city of Washington one year immediately preceding the day of election, and shall be a resident of the ward in which he shall offer to vote, and shall have been returned on the books of the corporation during the year ending the thirty-first of December next preceding the day of election as subject to a school-tax for that year, (except persons *non compos mentis*, vagrants, paupers, or persons who shall have been convicted of any infamous crime,) and who shall have paid the school-taxes, and all taxes on personal property due from him, shall be entitled to vote for mayor, members of the Board of Aldermen and Board of Common Council, and assessors, and for every officer authorized to be elected at any election under this act, or the act or acts to which this is amendatory or supplementary: *Provided*, That if, during the year ending on the thirty-first day of December next preceding the day of the first election after the passage of this act, no persons shall have been returned on the books of the said corporation as subject to a school-tax, then all persons who shall have been returned on the books of the said corporation as subject to a school-tax before the day of the said first election, and who shall in all other respects be qualified under this act to vote, and who shall have paid the said school-tax and all taxes due on personal property, shall be entitled to vote at the said first election after the passage of this act. And if any person shall buy or sell a vote, or shall vote more than once at any corporation election, held in pursuance of law, or shall give or receive any consideration therefor in money, goods, or any other thing of value, or shall promise any valuable consideration, or vote in consideration of such promise, he shall be disqualified forever thereafter from voting and holding any office under said corporation; and on complaint thereof to the attorney of the United States for the District of Columbia, it shall be the duty of said attorney to proceed against such offender or offenders by indictment and trial, as in other criminal cases; and if found guilty, it shall be the duty of the court to sentence him to pay a fine of not less than ten dollars, and to imprisonment not more than two months nor less than ten days.

SEC. 6. *And be it further enacted*, That in case of the refusal of any person to accept the office of mayor upon his election thereto, or of his death, resignation, inability, or removal from the city, the Board of Aldermen and Board of Common Council shall assemble in joint meeting and elect another in his place to serve for the remainder of the term or during such disability; but in case of temporary absence from the city, or sickness, the mayor may, in writing, depute the president of the Board of Aldermen to act as mayor during such temporary absence or sickness.

SEC. 7. *And be it further enacted*, That so much of the tenth section of the act incorporating the inhabitants of the city of Washington, approved May fifteenth, eighteen hundred and twenty, as is in the following words, viz.: "That real property, whether improved or unimproved, in the city of Washington, on which two or more years' taxes shall have remained due and unpaid, or on which any special tax, imposed by virtue of authority of the provisions of this act, shall have remained unpaid for two or more years after the same shall have become due, or so much thereof, not less than a lot, (when the property on which the tax has accrued is not less than that quantity,) as may be necessary to pay such taxes, with all legal costs and charges arising thereon, may be sold at public sale to satisfy the corporation therefor," be and the same is hereby amended, so as to read as follows, viz.: "That real property, whether improved or unimproved, in the city of Washington, on which one or more years' taxes shall have become due and remain unpaid, or on which any special tax imposed by virtue of authority of the provisions of this act, shall have become due and remain unpaid, or so much thereof, not less than a lot, (when the property on which the tax has accrued is not less than that quantity,) as may be necessary to pay any such taxes, with all interests, costs, and charges arising thereon, may be sold at public sale to satisfy the corporation therefor." And so much of the third proviso of the tenth section of the said act incorporating the inhabitants of the city of Washington, approved May the fifteenth, eighteen hundred and twenty, as is in the following words, viz.: "That no sale shall be made, in pursuance of this section, of any improved property whereon there is personal property of sufficient value to pay the said taxes," be and the same is hereby repealed.

And the authority given to the collector in the eleventh section of said act to postpone the sale of any property to a future day "for want of bidders," shall be so construed as to authorize the postponement for any other reasonable cause, if, in the opinion of the mayor, the collector, or other officer duly authorized, there shall be other reasonable cause for such postponement; but public notice shall in all cases be given of such postponement, and the sales made at such postponed time shall be equally valid as if made the day first designated for such sale; and no sale of any real property for taxes hereafter made shall be impaired or made void by reason of any error of the major, or other officer of the corporation, in making a calculation of computation of the amount of taxes due, the expenses attendant on the advertisement and sale, or of the purchase money and the interest thereon, notwithstanding the sum erroneously calculated or computed may have been paid by the purchaser, his heirs or assigns; but all such sales, and the deeds which may be granted on the certificates then issued, shall be valid and binding as if no such error had been made; and it shall be lawful for the heirs or assigns of any purchaser or purchasers of property sold for taxes in the said city, to receive, do, or perform any thing which by the said act of the fifteenth of May, eighteen hundred and twenty, incorporating the inhabitants of the city of Washington, or by any act or acts supplementary to or in execution of the same, it may be lawful for such purchaser or purchasers to receive, do, or perform.

SEC. 8. *And be it further enacted*, That the said corporation shall have power to cause to be made out plats of all the squares in the city of Washington, on which shall be shown the lines of all the subdivisions of said squares as the same shall actually exist at the date of the completion of the plat of each square, and to prescribe and regulate the manner in which description shall be made of all real estate sold or transferred in the said city: *Provided*, That the said plats shall be made out and drawn upon a uniform scale of not less than one inch to fifty feet; and that the method of description of real estate sold or transferred within the corporate limits which shall be prescribed by the said corporation shall be such that the plats shall at all times show the lines of property as actually existing in the squares; and the office of the surveyor of the city of Washington shall be the legal office of record of the plats of all property in the city of Washington.

SEC. 9. *And be it further enacted*, That the school-tax which may be levied and collected in pursuance of the powers in this act given, shall constitute a fund, or be added to any other fund now or hereafter to be constituted by any act of the corporation, for the establishment and support of common schools, and for no other purpose, under such regulations as may from time to time be established and provided by the corporation.

SEC. 10. *And be it further enacted*, That the corporation shall not have power to increase the present funded debt of the said corporation, either by borrowing money or otherwise, unless it shall be agreed to do so by two thirds of the legal voters in the said city at an annual election; and the said corporation shall annually apply a sum not less than ten thousand dollars of its revenues to the redemption of the present debt of the corporation.

SEC. 11. *And be it further enacted*, That all taxes, except taxes on real property, imposed by virtue of the powers granted by this act, or the acts to which this is amendatory or supplementary, in default of payment thereof within the time limited by act of the incorporation for payment, may be collected by distress and sale of the goods, and chattels, and personal effects of the person or persons chargeable therewith, under such regulations and limitations as the corporation may prescribe; but no such sale shall be made unless ten days' previous notice thereof be given in some newspaper printed and published in the city of Washington.

SEC. 12. *And be it further enacted*, That the commissioner of public buildings, or other officer having charge and authority over the lands and property of the United States lying within the city of Washington, shall from time to time cause to be opened and improved such avenues and streets, or parts or portions thereof, as the President of the United States, upon application of the corporation of the said city, shall deem necessary for the public convenience, and direct to be done; and he shall defray the expenses thereof out of any money arising, or which shall have arisen, from the sale of lots in the city of Washington, belonging, or which may have belonged, to the United States, and from no other fund. And it shall be the duty of the said commissioner, or other United States officer, as aforesaid, upon the application of the mayor, to repair and keep in repair the pavements, water-gutters, waterways, and flag footways which have been made or shall be made opposite or along the public squares, reservations, or other property belonging to the United States; as also, on like application, to repair and keep in repair such streets and avenues, or parts thereof, as may have been, or shall hereafter be, opened and improved by the United States; the expense of all such repairs to be paid out of the fund before mentioned.

SEC. 13. *And be it further enacted,* That the commissioner of public buildings be, and he is hereby, required to perform the duties required of the city commissioner by the fourteenth section of the act of the twenty-sixth of May, eighteen hundred and twenty-four, supplementary to the act of the fifteenth of May, eighteen hundred and twenty, incorporating the inhabitants of the city of Washington. And it shall be the duty of the commissioner of public buildings, within ninety days after the sale of any lots or squares belonging to the United States in the city of Washington, to report the fact to the corporation of Washington, giving the date of sale, the number of the lot and square, the name of the purchaser or purchasers, and the said lots or squares shall be liable to taxation by the said corporation from the date of such sale. And no open space, public reservation, or other public ground in the said city, shall be occupied by any private person, or for any private purposes whatever.

SEC. 14. *And be it further enacted,* That the justices of the peace, whether they be members of the Board of Aldermen or Board of Common Council or not, who may be selected from time to time by the said corporation, to enforce the police regulations and penal laws of the said city, as also to issue warrants and to hear and determine cases within the jurisdiction of justices of the peace, in which the mayor, Board of Aldermen and Board of Common Council of the said city shall be plaintiffs, shall have power to issue all such warrants, and all other warrants or processes deemed necessary and proper in cases of violations of the police regulations and penal laws of the corporation, and to hear and determine all such cases, and under the orders of the corporation to issue execution or other final process thereon; and the said justices shall also have power to compel the attendance of witnesses by attachment and to punish them by fine not exceeding ten dollars, or by imprisonment not exceeding ten days, for refusing obedience to a summons.

SEC. 15. *And be it further enacted,* That hereafter the justices of the peace for the county of Washington, in the District of Columbia, shall be appointed for three years; and upon indictment and conviction of any justice of the peace, before any court of competent jurisdiction, of incompetency, habitual drunkenness, corruption in office, or of any other wilful misconduct in the discharge of his duties as justice of the peace, his commission shall be void, and he shall cease to exercise the office and powers of justice of the peace; and for all criminal process or business issued or tried by or before any justice of the peace in the city and county of Washington, in the District of Columbia, the said justice and the constable who shall execute the process shall respectively be entitled to charge and receive the same fees as are authorized to be charged and received in the case of process issued and served by them respectively in cases of small debts; and the said costs shall be certified by the said justices to the District Attorney, for his revision and approval, and when approved shall be paid by the marshal of the District of Columbia.

SEC. 16. *And be it further enacted,* That in addition to the seven members now authorized to be appointed to the Levy Court of the county of Washington, from and after May, eighteen hundred and forty-eight, the President of the United States is hereby authorized and required annually to appoint four additional members from the city of Washington; and the said court shall thereafter consist of eleven members.

SEC. 17. *And be it further enacted,* That the corporation of the said city of Washington shall have full power and authority to pass all laws which may be needful and necessary to carry into full and complete effect the powers granted to the said corporation, or to any of its officers or servants, by this act, or by the act or acts to which this act is amendatory or supplementary. And all acts or parts of acts in conflict with the provisions of this act, be, and the same are hereby, repealed.

Approved, May 17, 1848 (9 Stat. 223, ch. 42).

ACT OF RETROCESSION OF COUNTY OF ALEXANDRIA

An act to retrocede the county of Alexandria, in the District of Columbia to the State of Virginia

Whereas no more territory ought to be held under the exclusive legislation given to Congress over the District which is the seat of the General Government than may be necessary and proper for the purposes of such a seat; and whereas experience hath shown that the portion of the District of Columbia ceded to the United States by the State of Virginia has not been, nor is ever likely to be, necessary for that purpose; and whereas the State of Virginia, by an act passed on the third day of February, eighteen hundred and forty-six, entitled "An act accepting by the State of Virginia the county of Alexandria, in the District of Columbia, when the same shall be receded by the Congress of the United States," has signified her willingness to take back the said territory ceded as aforesaid: Therefore,

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That with the assent of the people of the county and town of Alexandria, to be ascertained as hereinafter prescribed, all of that portion of the District of Columbia, ceded to the United States by the State of Virginia, and all the rights and jurisdiction therewith ceded over the same, be, and the same are hereby, ceded and forever relinquished to the State of Virginia, in full and absolute right and jurisdiction, as well of soil as of persons residing or to reside thereon.

SEC. 2. *And be it further enacted,* That nothing herein contained shall be construed to vest in the State of Virginia any right of property in the custom-house and postoffice of the United States within the town of Alexandria, or in the soil of the territory hereby re-ceded, so as to affect the rights of individuals or corporations therein otherwise than as the same shall or may be transferred by such individuals or corporations to the State of Virginia.

SEC. 3. *And be it further enacted,* That the jurisdiction and laws now existing in the said territory, ceded to the United States by the State of Virginia, as aforesaid, over the persons and property of individuals therein residing, shall not cease or determine until the State of Virginia shall hereafter provide, by make proclamation of the "result" of and judicial system over the said territory hereby re-ceded.

SEC. 4. *And be it further enacted,* That this act shall not be in force until after the assent of the people of the county and town of Alexandria shall be given to it, in the mode hereinafter provided. Immediately after the close of the present session of Congress, the President of the United States shall appoint five commissioners (any three of whom may act), citizens of the said town or county of Alexandria, and freeholders within the same, who shall be sworn, before some justice of the peace in and for the said town or county, to discharge the duties hereby imposed upon them faithfully, impartially, and to the best of their ability. These commissioners, or any of them, shall proceed, within ten days after they are notified of their appointment, to fix upon the time, place, and manner, of taking the vote within the town or county of Alexandria, and shall give notice of the same by advertisement in the newspapers of the said town. And on the day and at the place so appointed, every free white male citizen of the United States, who shall have resided in said county of Alexandria for six months preceding the time when he offers his vote, insane persons and paupers excepted, shall vote *viva voce* upon the question of accepting or rejecting the provisions of this act. The said commissioners shall preside when this vote is taken, and decide all questions arising in relation to the right of voting under this act. Within three days after this vote is taken as aforesaid, the said commissioners shall make out three statements of the result of this poll, upon oath, and under their seals. Of these, one shall be transmitted to the President of the United States, one to the governor of the Commonwealth of Virginia, and one shall be deposited in the clerk's office of the county court of Alexandria. If a majority of the votes so given shall be cast against accepting the provisions of this act, then it shall be void and of no effect; but if a majority of the said votes should be in favor of accepting the provisions of this act, then this act shall be in full force, and it shall be the duty of the President of the United States to inform the governor of Virginia that this act is in full force and effect, and to make proclamation of the fact.

SEC. 5. *And be it further enacted,* That, in such case, the right of property in the half square in Alexandria on which stands the courthouse, bounded by Columbus, Queen, and Princess streets, and the half square on which stands the jail, bounded by Princess, St. Asaph, and Pitt streets, shall be conveyed to the governor of Virginia, and his successors, for the use of the county and corporation of Alexandria forever; and the Solicitor of the Treasury of the United States is hereby authorized and required, in the name and on the behalf of the United States, to make all the proper and necessary conveyances for that purpose.

SEC. 6. *And be it further enacted,* That Congress will in no event assume and pay the debt, or any part thereof, now due by the corporation of the city of Alexandria. (July 9, 1846, 9 Stat. 35, ch. 35.)

VIRGINIA ACT ACCEPTING RETROCESSION

An act accepting by the State of Virginia the county of Alexandria, in the District of Columbia, when the same shall be re-ceded by the Congress of the United States

[Passed February 3, 1846]

Whereas the general assembly of this commonwealth, on the third day of December, in the year seventeen hundred and eighty-nine, passed an act, entitled "an act for the cession of ten miles square, or any lesser quantity of territory within this state, to the United States, in congress assembled, for the permanent seat of the general government;" and by the said act it was enacted, that "a tract of country not exceeding ten miles square, or any lesser quantity, to be located within the limits of this state, and in any part thereof as congress may by law direct, shall be and the same is hereby forever ceded and relinquished to the congress and government of the United States, in full and absolute right, and exclusive jurisdiction as well of soil as of persons residing or to reside thereon, pursuant to the tenor and effect of the eighth section of the first article of the constitution of the government of the United States." And whereas the congress of the United States did, under the provisions of the said act, locate that portion of the territory of Virginia now known as the county of Alexandria in the District of Columbia, lying south and west of the river Potomac, and bounded by said river and the lines which separate the District of Columbia from Virginia: And whereas the congress of the United States, on the twenty-seventh day of February, in the year eighteen hundred and one, passed an act, entitled "an act concerning the District of Columbia," by the provisions of which act the exclusive jurisdiction of the United States was extended over the

territory so located as aforesaid, which territory has since formed a part of the District of Columbia: And whereas a petition has been presented to the general assembly by the citizens residing in said county of Alexandria, representing that they now have pending before the congress of the United States an application for the re-cession of the said county of Alexandria to the commonwealth of Virginia, and praying the consent of the general assembly to such re-cession, and for the passage of a law to give effect thereto, if the same should be granted by congress; and as the prayer of the said petition is deemed reasonable.

1. *Be it therefore enacted by the general assembly,* That so soon as the congress of the United States shall by law re-cede to the commonwealth of Virginia the said county of Alexandria, and relinquish their exclusive jurisdiction, as well of territory as of persons residing or to reside thereon, the same shall be re-annexed to the said commonwealth, and constitute a portion thereof, subject to such reservation and provisions respecting the public property of the United States, as congress may enact in their act of re-cession.

2. *Be it further enacted,* That the general assembly hereby assents that the jurisdiction and laws of the United States, as well as the rights and privileges of the citizens of said county, and bodies politic and corporate thereof, shall continue in force and be exercised in like manner, and to the same extent, as they now exist, until the general assembly of Virginia shall by law provide for the government of said county under the constitution and laws of this commonwealth.

3. This act shall be in force from the passing thereof. (Virginia act, February 3, 1846, ch. 64.)

PROCLAMATION RELATIVE TO RETROCESSION

A proclamation by the President of the United States of America declaring Alexandria County to be retroceded to Virginia

Whereas, by the act of Congress, approved July 9, 1846, entitled "An Act to retrocede the County of Alexandria, in the District of Columbia, to the State of Virginia," it is enacted, That, with the assent of the people of the county and town of Alexandria, to be ascertained in the manner therein prescribed, all that portion of the District of Columbia ceded to the United States by the State of Virginia, and all the rights and jurisdiction therewith ceded over the same, shall be ceded and forever relinquished to the State of Virginia, in full and absolute right and jurisdiction, as well of soil as of persons residing or to reside thereon: And whereas, it is further provided, that the said act "shall not be in force until after the assent of the people of the county and town of Alexandria shall be given to it, in the mode therein provided;" and if a majority of the votes should be in favor of accepting the provisions of the said act, it shall be the duty of the President to make proclamation of the fact:

And whereas, on the 17th day of August, 1846, after the close of the late session of the Congress of the United States, I duly appointed five citizens of the county or town of Alexandria, being freeholders within the same, as commissioners, who, being duly sworn to perform the duties imposed on them, as prescribed in the said act, did proceed, within ten days after they were notified, to fix upon the first and second days of September, 1846, as the time, the court-house of the county of Alexandria, as the place, and *viva voce* as the manner of voting; and gave due notice of the same; and at the time, and at the place, in conformity with the said notice, the said commissioners presiding, and deciding all questions arising in relation to the right of voting under the said act, the votes of the citizens qualified to vote were taken *viva voce,* and recorded in poll-books, duly kept, and on the third day or [of] September instant, after the said polls were closed, the said commissioners did make out, and on the next day did transmit to me, a statement of the polls so held, upon oath, and under their seals; and of the votes so cast and polled, there were, in favor of accepting the provisions of the said act, seven hundred and sixty-three votes, and against accepting the same, two hundred and twenty-two—showing a majority of five hundred and forty-one votes for the acceptance of the same;

Now, therefore, be it known, that I, James K. Polk, President of the United States of America, in fulfillment of the duty imposed upon me by the said act of Congress, do hereby make proclamation of the "result" of said "poll," as above stated, and do call upon all and singular the persons whom it doth or may concern, to take notice, that the act aforesaid, "is in full force and effect."

In witness whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed.

Done at the City of Washington, this seventh day of September, in the year of our Lord one thousand eight hundred and forty-six, and of the Independence of the United States, the seventy-first.

JAMES K. POLK.

By the President. N. P. TRIST, *Acting Secretary of State.*

Mr. SCOTT. Mr. President, in my newsletter sent to constituents throughout the State of Virginia I attempted to address myself in a concise way that newsletters, of course, must follow, with regard to this question, and I would like to share this with my colleagues here in the Senate:

A proposed constitutional amendment has passed the House of Representatives and is pending in the Senate to provide full Congressional representation for the District of Columbia. This would, of course, include two senators. The Founding Fathers' insistence on having as the seat of government a place over which the Congress would have exclusive jurisdiction and control was due at least in part to a soldiers' mutiny which threatened the Continental Congress, meeting in Philadelphia, and the failure of that city to protect the members. The District of Columbia was chosen as the permanent seat of government or Capitol of the United States so decisions affecting the entire Nation could be made free from undue influence of any state and immune from harassment or political entanglements.

While we hear phrases like "the last colony" or "taxation without representation," Washingtonians elect their own school board, their city council, mayor, participate in presidential elections, and have a nonvoting delegate in the House of Representatives. Moreover, citizens of the District of Columbia in Fiscal Year 1977

These are the latest figures that were available when we prepared the newsletter. Continuing:

Contributed $275.9 million toward Federal grants and received $942.1 million in return. The Federal treasury collected only 29¢ for every dollar it provided the city. Per capita income of the city is the second highest in the Nation, $8,067, compared with a national average of $6,399.

Today, the Federal Government employs approximately 40 percent of the work force of the City of Washington, and an additional 25 percent work in industries servicing the government. It could be called a "company town" with virtually everyone dependent upon the Federal Government for his or her livelihood. If full representation in the Congress were granted the city, it would insure the election of senators sympathetic to the needs and concerns of big government, who would promote the welfare of government agencies and employees. Senators from the District would be under no compulsion to consider the needs of any competing interest, such as farmers, miners, manufacturers, or many of the divisions of labor and management located within the fifty states.

Washington today is a city of approximately 700,000 people

I believe my distinguished colleague referred to it as 690,000 today. Continuing:

with news media espousing the viewpoint of city residents, upon which members of the Congress depend as a major source of knowledge of recent events and developments.

Now, Mr. President, any of us who have been reading the comments of the press realize the bias that exists in favor of the District of Columbia and in favor of this bill among the media in the District of Columbia. I continue:

Full representation in the Congress for the City of Washington would not be in the national interest and would inevitably lead to the kinds of pressures that the framers of the Constitution wanted to avoid when they provided for a Federal City. Washington is not a state but a city exceeded in population by ten other American cities. Under our Federal concept of government, there is no basis for electing two senators to represent it.

All members of Congress represent the District of Columbia because it is the national capital. Committees exist in both Houses of Congress to consider special needs of the city. In my opinion, we should be concerned about the welfare of the individual citizens of Washington, but this should not minimize our concern for and realization that the welfare of the people of the entire Nation is paramount, and it was concern for the general welfare of the country that caused the Constitutional Convention in 1787 to adopt the Federal City concept. It would appear that time has confirmed the good judgment of our Founding Fathers.

Then I asked constituents if they cared to share their views on this subject, and stated that I would certainly be glad to hear from them.

Mr. HATCH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. SCOTT. Of course.

Mr. HATCH. Mr. President, I ask unanimous consent that Tom Parry, Deirdre Houchins, and Dan Livingston of my staff be accorded the privilege of the floor throughout the consideration of this measure and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I think it might be pertinent to convey the thoughts, or constructive to think about the thoughts, of Madison in the Federalist Papers, No. 43, with regard to this matter. He refers to congressional authority over the District of Columbia as "to exercise exclusive legislation"—this is on page 272:

To exercise exclusive legislation, in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of the government of the United States; and to exercise like authority over all places purchased by the consent of the legislatures of the States in which the same shall be, for the erection

of forts, magazines, arsenals, dockyards, and other needful buildings.

This is Madison speaking:

The indispensable necessity of complete authority at the seat of government carries its own evidence with it. It is a power exercised by every legislature of the Union, I might say of the world, by virtue of its general supremacy. Without it not only the public authority might be insulted and its proceedings interrupted with impunity, but a dependence of the members of the general government on the State comprehending the seat of the government for protection in the exercise of their duty might bring on the national councils an imputation of awe or influence equally dishonorable to the government and dissatisfactory to the other members of the Confederacy. This consideration has the more weight as the gradual accumulation of public improvements at the stationary residence of the government would be both too great a public pledge to be left in the hands of a single State, and would create so many obstacles to a removal of the government, as still further to a bridge its necessary independence. The extent of this federal district is sufficiently circumscribed to satisfy every jealousy of an opposite nature. And as it is to be appropriated to this use with the consent of the State ceding it; as the State will no doubt provide in the compact for the rights and the consent of the citizens inhabiting it; as the inhabitants will find sufficient inducement of interest to become willing parties to the cession; as they will have had their voice in the election of the government which is to exercise authority over them; as a municipal legislature for local purposes, derived from their own suffrages, will of course be allowed them; and as the authority of the legislature of the State, and of the inhabitants of the ceded part of it, to concur in the cession will be derived from the whole people of the State in their adoption of the Constitution every imaginable objection seems to be obviated.

Then he speaks of "a like authority over forts, magazines," and so forth.

Mr. President, if we may look at "The Principles of Consitutional Law" by Professor Cooley—Thomas M. Cooley, professor of consitutional law at the University of Michigan; this is a book written around the turn of the century—Professor Cooley spoke of this same matter, and he said:

Congress is further empowered "to exercise exclusive legislation in all cases whatsoever over such district, not exceeding ten miles square, as may by cession of particular States and the acceptance of Congress become the seat of the government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dock-yards, and other needful buildings." [4]

Then specifically with regard to the District of Columbia:

The cession contemplated by this clause was afterwards made by the legislatures of Maryland and Virginia, and Congress, as the legislature of the Union,[5] assumed the exercise of exclusive legislation over it, but creating municipal governments with limited powers. This exclusive legislation over people who have no voice in the selection of legislators is inconsistent with the right of self-government, on the recognition of which American institutions rest, and, like the control over territories, must be regarded as one of the necessary exceptions to which, in their application, such general principles are subject.[1] In respect to a portion of this territory Congress has relinquished its jurisdiction by retroceding it to Virginia, and for a time it gave to the remainder a territorial government. But the power in Congress thus to delegate its general legislative authority has been denied, with much apparent reason.[2]

The Constitution, as we have seen, provides for the exclusive jurisdiction in the United States, not only over the seat of government, but over other places purchased with the consent of the legislature of the State for the erection of needful buildings. This power of exclusive legislation carries with it exclusive jurisdiction; [3] the full sovereign authority over such places passes under such circumstances into the hands of the national government. The State, therefore, cannot take cognizance of acts committed there, and the inhabitants of those places cease to be inhabitants of the State, and can no longer exercise any civil or political rights under the laws of the State.[4] But land within the limits of a State can be acquired for governmental purposes in other ways than by purchase with the consent of the legislature; and if acquired in any other way, exclusive jurisdiction and legislative power do not pass to the United States. The property may be purchased without the consent of the legislature, may be taken under the power of eminent domain,[1] or may be part of territory originally belonging to the United States, and not exempted from the jurisdiction of the State at the time of the admission of the State wherein the property lies. In these cases the interest of the United States is that of an ordinary proprietor; [2] but doubtless under any circumstances the federal proprety, however acquired, would be free from any such interference and jurisdiction of the State as would destroy its effective use for federal purposes.[3] The State may also cede jurisdiction to the federal government over any such place, and in doing so may make such restrictions or conditions as it may see fit, provided they are inconsistent with the effective use of the property for the purposes for which it was acquired.[4]

Mr. President, I share these articles with the Senate because of the time in which we live, when suggestions are made that there are some other purposes for which we would deny the District of Columbia two Senators, two Members of the Senate.

Let me just review "The Constitution Annotated," because I believe this is something that is of importance to us, beginning on page 351 of "The Constitution Annotated." This is an edition which is prepared at the direction of the Congress by the Library of Congress, interpreting the constitutional provisions starting with—

Congress shall have power to exercise exclusive Legislation in all cases whatsoever, over such District (not exceeding 10 Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of Government of the United States.

Then it has this commentary supported by authorities. Under Seat of the Government, it is stated:

SEAT OF THE GOVERNMENT

The Convention was moved to provide for the creation of a site in which to locate the Capital of the Nation, completely removed from the control of any State, because of the humiliation suffered by the Continental Congress on June 21, 1783. Some eighty soldiers unpaid and weary marched on the Congress sitting in Philadelphia, physically threatened and verbally abused the members, and caused the Congress to flee the City when neither municipal nor state authorities would take action to protect the members.[1] Thus, Madison noted that "[t]he indispensable necessity of complete authority at the seat of government, carries its own evidence with it. . . . Without it, not only the public authority might be insulted and its proceedings interrupted with impunity, but a dependence of the members of the general government on the State comprehending the seat of government, for protection in the exercise of their duty, might bring on the national council an imputation of awe or influence, equally dishonorable to the government and dissatisfactory to the other members of the confederacy." [2]

The actual site was selected by compromise, Northerners accepting the Southern-favored site on the Potomac in return for Southern support for a Northern aspiration, assumption of Revolutionary War debts by the National Government.[3] Maryland and Virginia both authorized the cession of territory [4] and Congress accepted.[5] Congress divided the District into two counties, Washington and Alexandria, and provided that the local laws of the two States should continue in effect.[6] It also establisehd a circuit court and provided for the appointment of judicial and law enforcement officials.[7]

There seems to have been no consideration, at least none recorded, given at the Convention or in the ratifying conventions to the question of the governance of the citizens of the District.[8] Madison in *The Federalist* did assume that the inhabitants "will have had their voice in the election of the government which is to exercise authority over them, as a municipal legislature for all local purposes, derived from their own suffrages, will of course be allowed them. . . ." [9] Although there was some dispute about the constitutional propriety of permitting local residents a measure of "home rule," to use the recent term,[10] almost from the first there were local elections provided for. In 1802, the District was divided into five divisions, in some of which the governing officials were elected; an elected mayor was provided in 1820. District residents elected some of those who governed them until this form of government was swept away in the aftermath of financial scandals in 1874 [11] and replaced with presidentially appointed Commission in 1878.[12] The Commission lasted until 1967 when it was replaced by an appointed Mayor-Commissioner and an appointed city council.[13] In recent years, District residents have been afforded the opportunity to vote for President and Vice President,[14] to elect a nonvoting delegate to Congress,[15] and to elect a school board.[16]

Constitutionally, it appears that Congress is neither required to provide for a locally elected government [17] nor precluded from delegating its powers over the District to an elective local government.[18] The Court has indicated that the "exclusive" jurisdiction granted was meant to exclude any question of state power over the area and was not intended to require Congress to exercise all powers itself.[19]

Chief Justice Marshall for the Court held in *Hepburn* v. *Ellzey* [20] that the District of Columbia was not a State within the meaning of the diversity jurisdiction clause of Article III. This view, adhered to for nearly a century and a half,[21] was overturned by the Court in 1949 upholding the constitutionality of a 1940 statute authorizing federal courts to take jurisdiction of nonfederal controversies between residents of the Distirct of Columbia and citizens of a State.[22] The decision was by a five to four division but the five in the majority disagreed among themselves on the reasons. Three thought the statute to be an appropriate exercise of the power of Congress to legislate for the Dis-

Footnotes at end of article.

trict of Columbia pursuant to this clause without regard to Article III.[23] Two others thought that *Hepburn* v. *Ellzey* had been erroneously decided and would have overruled it.[24] But six Justices rejected the former rationale and seven Justices rejected the latter one; since five Justices agreed, however, that the statute was constitutional, it was sustained.

It is not disputed that the District is a part of the United States and that its residents are entitled to all the guarantees of the United States Constitution including the privilege of trial by jury[25] and of presentment by a grand jury.[26] Legislation which is restrictive of liberty and property in the District must find justification in facts adequate to support like legislation by a State in the exercise of its police power.[27]

Congress possesses over the District of Columbia the blended powers of a local and national legislature.[28]

Mr. President, of course, this was later changed, but at the time of the writing of this article, that was true:

This fact means that in some respects ordinary constitutional restrictions do not operate; thus, for example, in creating local courts of local jurisdiction in the District Congress acts pursuant to its legislative powers under clause 17 and need not create courts which comply with Article III court requirements. And when legislating for the District Congress remains the legislature of the Union, so that it may give its enactments nationwide operation to the extent necessary to make them locally effective.

Then under the hearing of "Authority Over Places Purchased"—Mr. President, there is no useful purpose to be served in reading that. But I do read from the pocket part of the Constitution Annotated. It does have this additional provision:

In 1973, Congress provided for a limited form of self-government in the District with the major offices to the filled by election.

Of course, that is the District of Columbia Self-Government and Governmental Reorganization Act. That is Public Law 93–198, 87 Statutes at Large, 774.

Mr. President, I do have other material to go over. Senator HATCH and Senator THURMOND had each asked to be afforded the opportunity to speak. In the meantime, on behalf of Senator Bartlett, I ask unanimous consent that the privilege of the floor be accorded to Tom Wasinger of Senator BARTLETT'S staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I have looked at a legal encyclopedia to get further information, because it is so easy for us to be talking about a matter without looking at the laws and the reasons for the type of government that we have in the District of Columbia, the Federal concept that our forefathers found. If we look in volume 27 of Corpus Juris Secundum—I believe this is the largest legal encyclopedia. It has 144 volumes. Under the portion related to the District of Columbia, it does review the law. Some of it is repetitions of the matters that I have discussed. I do want to share it at a later time, but I see my distinguished colleague from South Carolina is now on the floor. He did indicate that he wanted to speak on this matter at this time. So, Mr. President, I yield to the Senator from South Carolina.

Mr. MELCHER. Mr. President, I wonder if the Senator would yield to me first. I note that I shall be occupying the chair in 5 minutes and I have a few remarks.

Mr. SCOTT. The Senator from South Carolina is agreeable. Of course, I am glad to yield to the Senator from Montana.

Mr. MELCHER. I thank the Senator for the courtesy.

Mr. President, I want briefly to paraphrase parts of the opening remarks so eloquently made by the Senator from Massachusetts. In matters of fundamental justice and human rights, the issue is one of simple justice for 690,000 citizens who must have representation in Congress. In the view of legal scholars, there is no constitutional impediment to enactment of this measure.

Mr. President, it is my belief that, no, there is no constitutional impediment. It is also my belief and my best judgment that the drafters of the Constitution were wrong in denying permanently the right of vote to the residents of the District of Columbia. I believe that error should be corrected by an amendment to the Constitution—but not this amendment.

I have long supported election by District residents for representation in the House that they are entitled to on the basis of population. I now support the right of residents of the District to vote for Senators in Maryland. I do not say that lightly.

I am not aware that the people of Maryland, or the Senators representing the State of Maryland, would welcome it. But there is a basis for it. A portion of the original District of Columbia, on the Virginia side of the Potomac, was reabsorbed into the State of Virginia by Congress ceding it back to the State, and, of course, Virginia accepted it willingly. That procedure is not now advocated for the balance of the District of Columbia. Yet the right of representation is the fundamental right of a citizen in this country and it is a right that should not be denied. That right for citizens of the District of representation in the Senate, should be accomplished by amending the Constitution and amending this very res-

olution that is before us to permit these citizens in the District to vote in Maryland for representation to the Senate.

That is not what the residents of the District of Columbia are beating the drums for. That is not what is proposed by this House Joint Resolution No. 554, which passed the House. But that is a course that is available for the District residents and it is available for us here in Congress to provide them that opportunity by this constitutional amendment.

Why? The dilution of the value of a State's vote here in the Senate by enlarging the Senate, as proposed in House Joint Resolution 554, is precisely 2 percent. Many people would shrug, as that would be an insignificant amount. However, my State would view it as significant. During the course of the debate on the issue here before us, I shall attempt to add further meaning and further clarification as to why my State would view an enlargement of the Senate by two more Members as a significant dilution of the votes in the Senate and what they regard as a protection mechanism framed by the Constitution and provided for them, regardless of population, that the State would always have two Senators.

Mr. President, again, I thank the Senator from Virginia for yielding to me and the opportunity afforded me also by the Senator from South Carolina in graciously permitting me this short time.

Mr. HATCH. Mr. President, as I understand it, the distinguished Senator from North Carolina would like some time?

Mr. THURMOND. Mr. President, who is keeping time on our side?

The PRESIDING OFFICER. There is no time control on this measure.

Mr. SCOTT. Mr. President, I did agree to yield to the distinguished Senator from South Carolina. I am sure that the Senator will be agreeable to that.

Mr. HATCH. I am happy to yield to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I am just wondering, has the Senator from Virginia given up the floor?

Mr. SCOTT. The Senator from Virginia has given up the floor for the time being, but I shall return.

Mr. THURMOND. I see.

How long will the Senator take?

Mr. HATCH. I was planning on speaking for quite a while, but I am happy to yield the floor to the Senator.

Mr. THURMOND. If the Senator wants to go ahead, if it is short, but if it is long, perhaps I should go.

Mr. HATCH. The Senator can go ahead first and I will follow up.

Mr. THURMOND. That is fine.

Mr. President, I rise today to voice my support for House Joint Resolution 554, a resolution to provide for the amending of the U.S. Constitution to allow full voting representation for the District of Columbia in the Congress.

I have come out in favor of this resolution for one simple reason. It is just not fair, that in the year 1978, more than 700,000 American citizens do not have the right to elect representatives to Congress. No one in 1790, when the District was created, could have imagined the rapid growth and changes that were to take place in the District of Columbia. Thus, I believe the time has now come for the Congress to debate this issue and then submit it to the States for their consideration.

Mr. President, we should not allow this transformation of the District to be ignored any longer. Because of the fact there were only 14,000 people in the District when it was created, it has now resulted in the denial to more than 700,000 citizens of the right that all Americans cherish—the right to vote for their Representatives to Congress.

UNFORESEEN GROWTH OF THE DISTRICT

History tells us that the failure to provide the District of Columbia with representation was an oversight and not because of any specific intent by the Founding Fathers. As early as 1783, the Continental Congress was meeting in various places throughout the East. This so-called gypsy Congress was outraged with its situation and thus, in 1787, resolved that:

> The Congress shall have power . . . to exercise exclusive legislation in all cases whatsoever over such District (not exceeding ten miles square as may by the cession of particular states, and the acceptance of Congress, become the seat of government of the United States) . . ." (Article I of the Constitutional Convention, the Seventeenth paragraph of Section Eight).

Finally, in 1790, the Congress approved legislation establishing a permanent seat of government.

Unfortunately, there were many problems that overshadowed the creation of the District of Columbia. There was an intense public debate over where exactly this seat of Government should be located. In addition, there were other pressing problems that needed attention by the youthful Government, and thus the matter of representation for a yet-to-be identified group of citizens fell by the way, even though there were occasional expressions of concern over who would look after the interests of the citizens of the District.

James Madison, in the Federalist No. 43, recognized the future needs of the inhabitants of the District and that they should have a voice in the election of the Government which was to exercise authority over them. Once again, however, the expressions of concern about the residents of the District never became reality. When the Congress accepted the cession of the District of Columbia by Maryland and Virginia in 1790, the voting rights of its residents were governed by the respective laws of Virginia and Maryland. Thus, until 1800, District residents voted in either Virginia or Maryland.

Soon after December, in 1800, Congress passed legislation to freeze the laws of the two States which effectively disenfranchised the residents of the District of Columbia.

Mr. President, when Congress finally moved to the District of Columbia, there were only 14,000 residents in the city. This was far less than the 50,000 residents required for statehood, and less than the 30,000 required for the establishment of a congressional district. Clearly, the small population of the District was instrumental in the lack of attention paid to it by the Congress. Moreover, the growth of the District was unforeseen by Congress. Certainly Congress did not envision the eventual disenfranchisement of nearly 750,000 persons—15 times the minimum number of persons originally required for statehood.

The provisional estimates of the U.S. Census Bureau, July 1, 1977, lists the population of the District of Columbia as greater than seven States: Wyoming, Nevada, Alaska, North Dakota, South Dakota, Delaware, and Vermont. Seven States, Mr. President, have populations less than the District of Columbia. Yet each of these States has two Senators and Congressional Representatives in the Congress.

D.C. REPRESENTATION AS MATTER OF FAIRNESS

Mr. President, the residents of the District of Columbia deserve the right to representation in Congress if for no other reason than simple fairness. According to a 1975 Congressional Research Service report, it was estimated that the citizens of the District of Columbia paid more than $1 billion in Federal income taxes. Yet they have no representation.

Taxation without representation. That was an axiom that was rejected early in American history. It was not fair in 1776 to tax and not allow representation, and it is not fair today.

District of Columbia residents pay their fair share of the support of the Federal Government. District residents paid $664 per capita in Federal taxes in 1976. This amount was $77 above the national average. There are only seven States with a higher per capita of Federal taxes paid. The residents of the District of Columbia are not getting a free ride. They are paying a substantial share of Federal taxes, but receive no opportunity to have a say in how those tax dollars should be spent. As a matter of fairness, they should.

Mr. President, not only do the residents of the District of Columbia pay Federal taxes with no voice in how those tax dollars are spent, they are subject to laws in which they have little or no opportunity for input. Congress often passes on legislation that affects the District as well as the States. In most cases, the issues that affect more than 220 million Americans also affect the residents of the District of Columbia. But those residents have no representatives to cast votes in the Congress on those issues. Fundamental fairness dictates they should have that opportunity.

LEADERSHIP IN HUMAN RIGHTS

Mr. President, recently much has been made of the issue of human rights. The President has predicated a portion of his foreign policy on this issue. So has the Congress on various occasions. I say we cannot talk about human rights to others in the world until we here at home can show we are recognizing basic human rights. One of America's fundamental rights is the right to participate in a democracy. Residents of the District are being denied that right.

Throughout the world community, only two other Federal districts deny

their residents full voting representation in their national legislatures—Brazil and Nigeria. Citizens of London, Paris, and Bonn are represented in their national legislatures. Are we to be considered less democratic than England, France, or West Germany? I would hope not.

Mr. President, human rights begin at home, here in the Nation's Capital. The fact that more than 700,000 people do not have a voice in the election of those who write the Nation's laws is not a very good position from which to preach human rights. We need to practice what we preach. That means, at the least, giving the residents of the District of Columbia the right to elect their own Representatives and Senators to Congress.

Finally, there are many arguments being made that the Constitution prohibits the District from having voting representation by adoption of House Joint Resolution 554. I have studied all of the arguments in this regard and have concluded that nothing in the Constitution prevents House Joint Resolution 554, or any similar measure, if adopted, from giving the District full voting representation. It can be done if Congress, by two-thirds vote of both bodies, votes for it, and if three-fourths of the States ratify it within 7 years. I believe this procedure is consistent with broad constitutional principles, and gives the District of Columbia the opportunity it so well deserves—to be treated as a State with respect to the right to have voting representation in Congress.

Mr. President, the District of Columbia is a unique place. It is probably the No. 1 tourist attraction in the Nation. Visitors from far and wide come to see our national monuments, parks, statutes, and other landmarks. They visit the White House, the Congress, and the Supreme Court.

But there is more to Washington, D.C., than just tourist attractions. Three-quarters of a million people live and work in the District. These are people who are affected by high taxes, inflation, foreign policy, farm prices, educational issues—issues that affect each and every American. Yet, no one represents their views with a vote in Congress. This is unfair, Mr. President, and I strongly urge my colleagues in the Senate to join me in taking steps to end this injustice by voting for House Joint Resolution 554.

By supporting this resolution the Senate is not taking final action to give the District voting representation in the Congress, because the States of the Nation will have to consider it and three-fourths of them will have to ratify before it becomes part of the Constitution. The people of each State will have the opportunity to express their views on this matter before any change is made to our Constitution.

The procedure to amend the Constitution is long and tedious to make sure that careful consideration is given by the Congress and the States to each proposed amendment thereto. This insures that whatever decision is reached will truly represent the wishes of the people of the Nation.

Mr. CURTIS. Mr. President I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. HATCH. Mr. President the privilege of participating in the electoral process is a basic principle of our system of government. Both the Republican and Democratic platforms of 1976 have endorsed the principle of representation of the District of Columbia in Congress, and I share the conviction of both parties that the District residents should enjoy all the privileges of American citizenship.

House Joint Resolution 554, however, seeks to invest citizens of the District with the powers to participate fully in the electoral process, but in doing so it ignores certain fundamental constitutional principles and raises more questions than it answers.

Because a large number of District residents are black, supporters of this measure have attempted to characterize the opposition as racist in nature. This simply is not true. This is not a racial question, and anybody who argues that way, I think, is stretching the point far beyond where it should be stretched.

The fact is—and I would like to make it very clear—that I support the intent of this amendment and would never seek to deny anyone, regardless of their race or religion, their rights as American citizens. My objections to House Joint Resolution 554 stem entirely from the fact that it was poorly drafted and completely ignores the basic constitutional principles which define popular participation in government. My objections are constitutional and deserve a great deal of consideration.

At the heart of the difficulty is section 1 of the proposed amendment, which treats three different kinds of voting procedures—electing Members of Congress, electing the President and the Vice President, and ratifying amendments—as one and the same, even though each requires a different means of election or popular participation. Only in congressional elections do the people participate directly. Yet, House Joint Resolution 554, the matter before us at this time, purports to grant to the citizens of the District of Columbia the right to participate directly in all elections and in the consideration of amendments to the Constitution.

The proposal seeks to grant the District the right to participate in the amendatory process, even though the District of Columbia has no State legislature. It fails to indicate which political body shall determine the acceptance or rejection of an amendment and avoids the question entirely, with the vague and meaningless phraseology of section 2, which states that:

The exercise of rights and powers shall be by the people of the District . . . and as shall be provided by the Congress.

If "the people" are to ratify proposed constitutional amendments, then District of Columbia residents would have rights that no other citizen in the country has. They would possess a privilege that no citizen of any other State has.

If ratification is determined "by the Congress," then Congress has the new power to ratify the amendments it proposes, in direct contradiction of article V of the Constitution.

These are pretty important constitutional issues. This is poorly drafted, the workmanship is shoddy, it is unconstitutional, it is unsound, and it conveys privileges to the citizens of the District which no other citizens in any other State have.

Section 3 of House Joint Resolution 554 repeals the 23d amendment to the Constitution, thereby abolishing the District of Columbia's electoral votes. Yet, only State legislatures can appoint electors, and the District of Columbia has no State legislature. Congress does not have the authority to appoint electors. So it would seem that the proposal gives District citizens the right to vote directly for the President, without providing electors to reflect the vote. That would be a privilege no other citizen in this country has.

So, in our zeal to try to provide a means whereby the residents of the District of Columbia can vote for national legislative representatives, we ignore the rights of citizens of other States throughout the country.

Finally, House Joint Resolution 554 gives District citizens the right to vote for two Senators who would represent a city, not a State.

No matter what the arguments are, no matter that they can show that some States may have smaller populations, may pay less revenues into the Federal Government, they nevertheless are States that were brought into the Union pursuant to constitutional mandates and pursuant to the system set up by the Founding Fathers. It is completely different from what we have here.

There is nothing in the Constitution that says that States have to have the same population or that they have to pay the same amount of revenues. There is no real valid argument that can be made there. So those are emotional arguments that are made as, it seems to me, a ploy to try to ignore the constitutional reality.

The fact is that if you review it, House Joint Resolution 554 gives the District citizens, members of the city, the right to vote as though they are citizens of a State. We know it is just a city. It contains no substantial interest group other than the Federal Government.

One reason why the Founding Fathers created it the way they did is that they wanted the States to have these rights. They did not want to give them indiscriminately. They wanted to create geographical entities with diversity of interests.

I submit that this is a Federal enclave. There is no real diversity of interests.

The District of Columbia does not meet the qualifications of a State, which has some people within the State who believe only the Federal Government can solve the problems and some people who

believe otherwise. In fact, I submit the vast majority would believe otherwise if they had watched this system of government the way it has been operating in the last 42 of the last 46 years.

In accordance with the fundamental nature of our federal system Senators from all other States must continually balance a variety of State interests against the national interests. D.C. Senators would be little more than spokesmen for a single interest group, the Federal Government, and none of the State restraints basic to our system of government would be applicable.

These are pretty important issues and pretty important questions, and they cannot be done away with through emotional arguments. I do not think the majority of the States are going to let them be done away with merely through emotional arguments.

These are some of the major problems I see raised by this carelessly drafted proposal. Its basic intent, voting representation for the citizens of the District, is commendable. But by failing to address itself to the special Federal nature of the present District of Columbia, by conveniently ignoring the fact that the District does not possess the attributes of statehood necessary to exercise the privileges that it would confer, this resolution's effect would be nothing less than a disfigurement of the constitutional principles which apply to every State in the Union.

Some mention should be made here of the tactics used to bring the proposal to the Senate floor for consideration. The Senate version, Senate Joint Resolution 65, was never reported out of the subcommittee and consequently never even considered by the full Judiciary Committee. The chairman of that committee, Senator EASTLAND, is out of town and in fact out of the country. And now we are asked to consider the flawed House version without having the opportunity to correct some of the provisions which make it unacceptable to a number of us.

I suggest, Mr. President, that these high-handed tactics fail to serve the Members of this body, and even more importantly, they fail to serve the citizens of the District whose full participation in our government we are seeking to effect.

If we add it up, what we are trying to do here emotionally and literally is ignore the basic mandates of our U.S. Constitution.

There are a number of arguments which have been given against full voting representation as evidenced by this House resolution.

No. 1, granting representation to the District would be contrary to the intent of the framers of the Constitution. It was the intent of the Framers that the seat of Federal Government would be set aside for that purpose only outside the jurisdiction of any State, secure from entangling interests. I think we could refer to the Federalist Papers No. 43. It was not intended to be a sovereign power in the same sense as the other States. I do not think any emotional stretch of logic can accomplish that.

No. 2, granting the District power as though it were a "State" would violate the Constitution and work a qualitative change upon our Federal system. The Constitution refers only to "States" as having representation in the Senate and the House of Representatives. There is no language to suggest that any other political entity could qualify for voting representation in either Chamber. The courts have held the District is a "State" only in limited cases. The District lacks a legislature or any of the necessary indicia of a sovereignty which would make it a "State" within the meaning of the Constitution. This resolution would create a "pseudo state" which would do violence to the Constitution and undermine the nature of the Federal system of our Republic.

No. 3, granting full representation would violate article V of the Constitution. The framers intended article V to protect the States from having their "equal suffrage" diminished in the Senate.

To grant the District voting representation in Congress would contravene this language and alter the Federalist nature of this Republic. To accord two Senators from an entity other than a State, a district, purposely set aside from the State, would diminish that "equal suffrage" in the Senate.

So article V of the Constitution would be violated by this emotional approach to solve what I agree is a serious problem and one that I would like to solve but in a way that would not only give everyone the right to vote, but also the commensurate responsibilities to go along with it and not give them special rights that other citizens in the country do not presently have.

No. 4, granting the District full representation is to award it all the benefits of statehood without the accompanying burdens. By virtue of its status as a Federal entity, the District is dependent upon Congress and it is not concerned with the responsibilities, problems, or revenue needs of the individual States. Such a proposal is unfair to the States and runs counter to the principle of equality inherent in our Constitution.

No. 5, the District of Columbia is a city, not a State, and if the District of Columbia can elect its own Senators, it is logical and equitable to give every other city of equivalent size the same rights of representation or, at least, that is going to be an argument we will hear from this day forward and I think a fallacious one at that. The fact that these cities already elect representatives in Congress is irrelevant. They must share their Senators with the rest of the States. If the District of Columbia had two Senators, they would speak only for a single urban area. It would grossly overrepresent the only city in the Nation which already has two congressional committees dedicated solely to its needs.

No. 6, Washington, D.C., is already a "company town." Thirty-nine percent of the population of the District is employed by the Federal Government and services make up 25 percent more of those jobs. To grant full representation would insure that the interests of the Federal bureaucracy would receive even greater attention in Congress than they already receive. A Senator would have the Federal Government itself as his chief interest in direct conflict with the intent of the framers of the Constitution.

In all honesty at least 60 percent of the people within the District have some relationship to the Federal Government, either directly as employees, directly as providing services to the Federal Government, or making money off the Federal Government representing various special interest groups.

It is a huge, huge Federal enclave that has no characteristic that anyone can compare with statehood. It is a "company town." And it certainly should not be treated as a State even though that would be the language of this amendment.

(Mr. McGOVERN assumed the chair.)

Mr. HATCH. I believe the language itself would be unconstitutional even though we may, in the course of proceeding, report this amendment out.

No. 7. The residents of the District already have representation in Congress. No other State or city in the country can claim its own special committee in the House and a committee in the Senate which handle their problems exclusively. The District is exclusively the concern of Congress and, in a larger sense, all Members of Congress represent all residents of the District.

In view of the fact that the taxpayers of the District receive far more in Federal benefits each year than they contribute to the Federal Treasury, it would appear that they are already well represented in Congress.

However, I have to concede that under present circumstances they may not vote for voting representatives. I would like to see that remedied, but this is not the way to remedy it. This flies in the face of every basic Federal belief we have had through the years, and certainly every constitutional principle and historical principle backing up the Constitution that we have had since the beginning of this great Nation.

The article granting representation would set a bad precedent for other non-States. You know, residents of the District are not the only ones who cannot vote for Senators and Congressmen, even though their privileges are in many ways better than any other citizen in any other State. There is no reason to assume that Puerto Rico, Guam, American Samoa, and the Canal Zone could not be granted Senate and House representation if the non-State of the District were granted such representation.

So it is not just the District that is suffering or having this difficulty. We have to solve this difficulty for others as well, and there will be a clamor to do so.

I can remember on another subject during the Panama Canal debate that even before it began I said if we ratify those treaties you are going to find that the next clamor will be for us to give up Guantanamo Naval Base, give up Puerto Rico, Guam, and so forth. Lo and behold just a month or so ago that clamor has already begun, and I can tell you this is

not going to end just because of an amendment granting this Federal enclave special privileges.

When I say special privileges, I mean special privileges in that they will have the privilege of direct election of the President, which no other citizen has, and they will lose certain privileges, as I have stated before in my remarks.

The residents of the District are not victims of "taxation without representation." In fiscal year 1977 the Federal payment to the District totaled $276 million. In addition, Federal grants amounted to $340 million. The District received $32 million in revenue-sharing funds. In Federal loans the District total was $101,292,000. In addition to these, the Metro system is heavily funded from Federal revenue; and over $300 million is contributed annually by the Federal Government to the city budget to reimburse the city for Federal property it cannot tax.

Obviously, the residents of the Nation's capital are not being shortchanged. The District is heavily favored in the Congress by virtue of its special committees on the District.

No. 10. Granting full representation poses insurmountable handicaps. State legislatures must realize that their own States power in Washington will be reduced with the addition of two Senators and Representatives for the District of Columbia. There is a genuine concern about the mandate of the Constitution in this area as well, as previously explained.

The granting of Senate and House representation opens the door to a whole myriad of jurisdiction.

The District would have all of the privileges of statehood without the concurrent responsibilities, and our system of dual federalism would be seriously damaged.

There are many other reasons, of which these are only a few.

On March 2 the House of Representatives, by a vote of 289 to 127 approved House Joint Resolution 554, a constitutional amendment that would give the District of Columbia voting representation in the House and Senate and, in addition, would allow the District to participate like the States in the ratification of constitutional amendments.

Since all legislation in the Senate has been delayed by the length of the Panama Canal debate, it was not known, frankly it had not been known up until now—when we would be taking up this measure. Labor reform also caused some delays in taking up this measure.

Frankly, it is here and we are going to have to face the responsibility of doing whatever is right under the circumstances.

The text of the House Joint Resolution 554 is as follows:

Joint resolution proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

Section 1.

As I mentioned before, section 1 has some grave defects:

For the purpose of representation in the Congress, election of the President and Vice President, and article V of this Constitution, the District constituting the seat of government of the United States shall be treated as though it were a State.

No amount of reasoning is going to make the District of Columbia a State. As a matter of fact, it would be more aptly described as a Federal enclave and, as George Will described it, as a Federal enclave surrounded on all four sides by reality.

The fact is that under section 1 of this House joint resolution, the three different kinds of voting procedures—of electing Members of Congress, electing the President and Vice President, and ratifying amendments—are treated as one and the same though each requires a different means of election or popular participation, because only in congressional elections do the people participate directly. Yet this resolution, this proposed constitutional amendment, purports to grant to the citizens of the District of Columbia the right to participate directly in all elections and in the consideration of amendments to the Constitution. No other citizen has that right at the present time.

The proposal, as I stated before, seeks to grant the District the right to participate in the amendatory process, even though the District of Columbia has no State legislature. It fails to indicate which political body shall determine the acceptance or rejection of an amendment, and avoids the question entirely within the vague and meaningless phraseology of section 2, which is as follows:

Section 2. The exercise of the right and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

So, as you can see, section 2 states that the exercise of the rights and powers shall be by the people of the District and as shall be provided by the Congress.

If the people are to ratify proposed constitutional amendments, then again the District of Columbia residents will possess rights and privileges which no other citizen of any other State has, and that is to participate directly in the amendatory process, which can only be done for citizens in other States through their State legislatures.

There is a very good reason for that, and that reason is because in their infinite wisdom, which I believe was inspired, our Founding Fathers wanted this to be a Federal Republic with, in essence, two groups that would fight to effectuate better government for the whole, and that is the Federal group and the States groups.

We have had an erosion of State government for 42 of the last 46 years, as we basically had one philosophy rule in this society. Frankly, I, for one, believe we need that balance between the States and the Federal Government in order to not lose that which we have, and in order not to undermine the Constitution, the basic document of our society and of our Government, upon which our whole society depends.

If the people were to ratify this constitutional amendment, with this particular section 2, then District of Columbia citizens will be able to vote directly in the ratification process, something that no other citizen in the country can do.

And that is in direct contradiction of article V of the Constitution, which provides that only State legislatures can do this. So this is not some simple little amendment that gives voting rights to elect two Senators and a Representative to the District. This little "simple" amendment actually attacks the very basic fabric of our constitutional way of life. I think it has to be considered on that basis.

(Mr. MELCHER assumed the chair.)

Mr. HATCH. Section 3 reads as follows:

The twenty-third article of amendment to the Constitution of the United States is hereby repealed.

What that does, in repealing the 23d amendment to the Constitution—again, this is not just a simple little step, it is a radical step—pursuant to section 3, is abolish the District of Columbia's electoral votes. So, on the one hand, we are giving them the right to vote for the President and Vice President directly, and, on the other hand, we are taking away their electors. Congress does not have the authority to appoint electors, and so, as I have said before, it would seem that the proposal gives District citizens the right to vote directly for the President without providing electors to reflect that vote.

That is up in the air. It is literally up in the air whether they have the right to vote directly or not, but I think the argument has to be that they do, and if they do, no citizen of any other State has that right. Whether that is a good right or not is a debate for another time and another place, but nevertheless it shows we are undermining the basic tenets of the Constitution.

This little, simple amendment to the Constitution which is so emotionally well advanced has to be scrutinized if we believe in the Constitution and our system of government.

You know, when you start talking about the Constitution of the United States, you are not talking about something that can just be changed at will. As I have stated, in the history of this country there have been some 6,000 proposed amendments, but of the 6,000 amendments there have been only 32 which have come out of Congress, out of 6,000. It is not easy to amend the Constitution of the United States; it is tough, and there is a very good reason for that.

This is not supposed to be an easily amended document. This document has lasted because it is not easily amended, because no special interest power group can change it at will. That is something that is of great advantage to us.

Of the 6,000 proposed amendments, only 32 have come through. Of the 32, only 26 have amended the Constitution; and of the remaining 6, there is only 1 left, and that is the equal rights amendment. It has had almost 7 years for ratification, and I suppose we will be into that within the next few weeks. But it has had almost 7 years now.

That is an interesting point. On rati-

fication, the average time for ratification of amendments to the Constitution is 1 year and 4 months. The equal rights amendment has had almost 7 years, and because it does not look as though they can get 38 States to ratify it by March 21, 1979, they want an additional 7 years.

We have a lot of people who are attacking the basic fabric of our society. Of the basic document of our society they say, "No, it should be amendable at will."

As to the time for ratification of amendments, of these 26 which have been ratified, none have taken longer than 4 years. All have been less than 4 years. So you can see this is serious business; it is not just an emotional argument on either side, although I think the argument of the other side, the proponents of this particular resolution, is primarily an emotional one.

I sympathize with the emotional argument that every citizen of the United States should have the right to vote and have representation, but there are ways of doing that, short of dramatically changing the basic system of our Government, which have served us long and well. Cities vote within the States, and do not vote solely as cities, and consequently as one special interest group.

The fact of the matter is, if this does come out of the Senate and the House, as difficult as this proposed amendment is, I submit to you that there will not be much enthusiasm for it by the other sovereign States, which of course know that their rights are being reduced as a result of this type of an emotional approach to solving what is a very real problem.

Again, I must add that I sympathize sincerely with the very real problem, and will work to try to solve that problem in a constitutional way, whether it is by recession to Maryland, whether it is by granting the right to citizens of the District of Columbia to vote in any State of their choice, once they make the decision, whether it is by granting them the right to vote in States of their ancestors, or whether it is by a combination of some of those. I would support that, because it would alleviate this admitted problem which should not exist, without emasculating the basic federal republican nature of our Government—and, of course, when I talk about "Republican" in this context, it does not mean the Republican Party. The Republic of the United States of America; this is a Federal Republic made up of 50 States.

Section 4 of the resolution says this:

> This article shall be inoperative, unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

What that means is that 38 States will have to ratify it. I submit that this is almost an exercise in futility, because I cannot imagine 38 States giving the powers of statehood to a Federal enclave known as a city, and which is in fact only a city—an important one, a beautiful one, a magnificent one, if you will, but only a city. I cannot imagine the States doing that.

As a matter of fact, I can imagine them doing anything but that. So, instead of solving these problems, all we have done is defer them for another 7 years.

But 38 States will have to ratify this proposal, and in 7 years, the same as the equal rights amendment, although the House, since the equal rights amendment cannot seem to make it, has given them another 39 months, plus, in order to have another crack at it.

Let me give you some background on the District of Columbia. The exceptional case of the area of land known as the District of Columbia is defined in article I, section 8, clause 17 of the Constitution.

The Congress shall have the power:

> To exercise exclusive legislation in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of particular States, and the acceptance of Congress, become the seat of the government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings. . . .

In Federalist No. 43, James Madison explains the above-quoted clause in this way:

> The indispensable necessity of complete authority at the seat of government, carries its own evidence with it. It is a power exercised by every legislature of the Union, I might say of the world, by virtue of its general supremacy. Without it, not only the public authority might be insulted and its proceedings interrupted with impunity; but a dependence of the members of the general government on the State comprehending the seat of the government, for protection in the exercise of their duty, might bring on the national councils an imputation of awe or influence, equally dishonorable to the government and dissatisfactory to the other members of the Confederacy.

Congress assumed authority over the District of Columbia, an area of 100 square miles created from lands ceded by Virginia and Maryland, by an act of February 27, 1801, that provided merely that the laws of Virginia and Maryland should continue in force where they had previously applied. At first there were five units of local government in the District—the county of Washington, the city of Washington, and the city of Georgetown, all in the former Maryland territory; and the county and city of Alexandria in the former Virginia territory. The last two left the District with the retrocession of the lands of Virginia back to the State in 1846. Since that date, Washington has remained the same area: 62.7 square miles.

The dramatic rise in population spurred by the events of the Civil War led to the adoption of districtwide government in 1871. Controversy preceding the establishment of the new form of government centered on the issue of suffrage and secondarily on the division of authority between Congress and local officials. A territorial form of government was agreed on as a compromise. This form provided for a governor appointed by the President for a term of 4 years, an upper legislative chamber composed of 11 members appointed by the President for 2-year terms, and a house of delegates composed of 22 members elected annually from 22 districts. The District was entitled to elect a nonvoting territorial delegate to the House of Representatives. Broad powers to make regulations and disburse money on its own warrant were vested in a five-man board of public works, headed by Alexander R. Shepherd. The board energetically set about making public improvements, but spent $20 million in so doing—nearly three times what had been estimated by Congress. Having made Washington a city habitable but bankrupt, the territorial government died ignominiously. In 1874 Congress replaced the territorial form of government with a three-man board of commissioners appointed by the President. The office of nonvoting delegate to the House of Representatives was abolished.

With the ratification of the 23d amendment to the Constitution, which gave the city three electoral votes, in 1961, Washingtonians were given the right to vote in Presidential elections for the first time. The Reorganization Plan No. 3 of 1967 instituted a mayor-council form of government with appointed offices. In 1968 Congress passed an act allowing residents of the city to elect members of their school board. In 1968 President Nixon proposed that the Nation's Capital be granted both "meaningful self-government" and the right to elect representatives to Congress. In 1970, Congress granted the people of the District the right to elect a nonvoting delegate to Congress, a position that has been held by WALTER E. FAUNTROY ever since.

And I might add held very well. I think he has done a tremendous job for the District of Columbia. I think he has tremendous influence in the Congress. In my opinion, he is a wonderful guy, and he has acquitted himself well. He has done a great job in advocating this particular amendment. I think a great deal of him.

The delegate sits on House committees where he may vote, and participates in floor debates where he may not vote. In 1973, the Council received power to legislate in local matters. Congress retains power, under article I of the Constitution, to enact legislation and to veto or supersede the Council's acts.

Since assuming his delegate seat, FAUNTROY has been diligently championing full voter representation in Congress for the District. On February 18, 1976, the House Rules Committee agreed, for the first time in more than a century, to release a constitutional amendment proposing District voting representation in the Senate and House. The bill failed to receive the necessary two-thirds affirmative votes for passage.

SECTION 1—REPRESENTATION IN THE HOUSE

A constitutional amendment is required in order to give the District voting representation in Congress. The Constitution states (article I, section 2) that "the House of Representatives shall be composed of Members chosen every second year by the people of the several States," and (article I, section 3) "the Senate of the United States shall be composed of two Senators from each State." Because the District of Columbia is not a State, House Joint Resolution 554 provides that "for purposes of representation in the

Congress * * * the District * * * shall be treated as though it were a State." Since the ratification of the Constitution in 1789, no lands or territories have achieved voting representation in Congress without first becoming a State under article IV, section 3, clause 1 of the Constitution.

Because representation in the House of Representatives is based on the apportionment of population by State, it has become a firm tradition to regard the House as "the people's House." Proponents of House Joint Resolution 554 argue that it is unjust to deny representation to nearly 700,000 citizens. Thus, the favorable report of the House Committee on the Judiciary maintains that—

It seems indeed ironic that a nation which has, over the years, continued, through congressional and judicial action, to extend the franchise still denies representation in the National Legislature to American citizens residing in the Nation's Capital.

The regular membership of the House of Representatives has remained unchanged at 435 for 66 years. When Alaska and Hawaii became States, each was assigned one seat, temporarily increasing the size of the House to 437. However, the statehood enactments for both of these States provided that the total of 435 would be restored in the apportionment based on the 1960 census. If the proposed constitutional amendment, as defined in House Joint Resolution 554, were ratified, one of the several unanswered questions confronting Congress would be whether to increase the size of the House of Representatives.

That is another constitutional question that not too many people have thought about.

Article I, section 2, clause 3, of the Constitution provides that even though the number of representatives shall be apportioned according to the national population, "each State shall have at least one representative." After one representative has been assigned to each State as required by the Constitution, the apportionment by population takes place.

Proponents of the constitutional amendment contend that the District of Columbia has a larger population than seven of the States. And since the populations of these States are represented by at least one U.S. representative, the residents of the District should be at least equally represented. Further, they argue that land area is no qualification for voting representation in the House. (Rhode Island, the smallest State, has an area of 1,214 square miles, as compared to the 62.7 square miles of the District.)

I would argue again, that is a significant difference, and it shows the differences between a State and something which they want to call a State which could never be a State. Everybody agrees that the District could never become a State under the circumstances of its present existence, or under any circumstances. I think it is interesting to note that compared to the nine less populous States the population of the District of Columbia is decreasing while the others are increasing. In fact, the District's population has been decreasing steadily since 1950, when it reached a high of 800,000 people. Nevertheless, the city itself has more people than seven States.

On the other hand, it clearly has less land area and clearly is not a State and clearly cannot become a State. It would be really pushing it to try to argue that we should make the District a State, so rather than do that, they agree that it should become as though it were a State. Of course, calling something a State does not make it a State.

There are certain ways that geographical areas can become States and, of course, we have watched that process through the years as various States have come into the country.

If the District of Columbia had been granted congressional voter representation in 1970, it would have received two Members of the House. If House Joint Resolution 554 passes the Senate and is ratified by three-fourths of the States, the District will probably receive one Member of the House after the 1981 reapportionment based on the 1980 decennial census.

Although the population of the District is 690,000, its registered voter turnout for the 1976 Presidential elections was lower in percentage than any of the least populous States (59 percent, the same as Alaska). Its voter turnout of those eligible to vote, registered or nonregistered, (31 percent)* was substantially lower than the next lowest turnout (Alaska with 47 percent.) In addition, the percent of eligible voter turnout in the District for the 1976 elections was the lowest in the Nation, and the percent of the registered voters voting was the lowest in the Nation.

Since the District turned out 59 percent of the registered voters and 31 percent of the voting age population for the Presidential election of 1976, then the lack of voter representation in Congress can be calculated to affect 281,355 registered voters and 535,483 persons of voting age, who are not registered.

By way of comparison, the residents of the following territories of the United States are U.S. citizens but do not vote for President or have voting representation in Congress.

Puerto Rico, which may or may not desire statehood and may or may not get statehood, depending upon many factors, has a population of 3,210,000 people. The Virgin Islands, has a very small population of 100,000 people, American Samoa, has only 31,000 American citizens—I am talking about American citizens—and Guam, 100,000 American citizens. So, in Puerto Rico, 3,210,000; Virgin Islands, 100,000 American citizens; American Samoa, 31,000 American citizens; and Guam, 100,000 American citizens.

*The problems in determining how many citizens of the District are in fact affected by the lack of voting representation in Congress is complicated by the sizable number of citizens who reside in the District but maintain legal domiciles in other states. No records exist of the number of District residents casting absentee ballots in other states. In the court case of *Carliner* v. *Board Education*, it was estimated that 200,000 residents of the District were eligible to vote in other jurisdictions. Whether this number is accurate cannot be determined.

Most of the proponents of House Joint Resolution 554 have resurrected the great American battle cry: "No taxation without representation." They argue that since the residents of the District of Columbia have no immunity from Federal taxation, they should by right have voting representation in Congress. But, it must be remembered that during the first several decades of the Republic, the converse of the battle cry was also true, that is, most States allowed only taxpaying landowners to vote and thereby have a say in their representation. Yet, the notion of no taxation without representation (and its converse), while still very much a part of the American spirit, has been somewhat attenuated by modern American history. In the Federal and State legislatures, and in court rulings, the modern trend has been to separate the issue of taxation from the issue of representation. Numerous classes of citizens, fully subject to and protected by the laws, pay no Federal or State income tax whatever, even though they regularly vote in Federal elections in the State of their residence. These groups include, among others, retired persons living solely on social security, students attending colleges and universities, disabled Americans supported entirely by veteran's or other compensation, and individuals living entirely on welfare.

As stated before, if House Joint Resolution 554 passes the Senate and is ratified by the required three-fourths of the States, the Congress will have to decide whether to increase the membership of the House of Representatives or keep it at 435. The population of the District of Columbia is not presently figured into the national population for purposes of apportionment. The United States is facing a decennial census in 1980 which will be the basis of reapportionment of congressional districts in 1981. If the House decides to keep its membership at 435 and if the population trends, as estimated by the Bureau of the Census, continue until 1981, then adding the population of the District to the apportionment population would result in the loss of one seat from Illinois and the assigning of the seat to the District.* In other words, Illinois, a State whose population is increasing, will be deprived of representation in the House by a non-State whose population has been declining for 28 years. This reapportionment is in addition to the prognosticated reapportionment resulting from the 1980 census of national population migration.

SECTION 1—THE SENATE

The argument for representation in the Senate is conceded by both proponents and opponents to be more tenuous and difficult to make. Members of the House represent numbers of people, but Senators represent their States at large. The Senate is the body of equal representation of the States while the House is the body of proportional representation of the people. This distinction is a result of the "Great Compromise" of

*This was calculated using the Census Bureau's "method of equal proportions" which has been the official method since 1910.

the Constitutional Convention of 1787 which resolved the competing interests of the large versus the small States. It is the foundation of the uniquely American ideas of governmental federalism and State "sovereignty." Thus, in Federalist No. 62, the author (either Hamilton or Madison) remarks:

> In this spirit it may be remarked, that the equal vote allowed to each state is at once a constitutional recognition of the portion of sovereignty remaining in the individual states, and an instrument for preserving that residuary sovereignty.

STATE SOVEREIGNTY

House Joint Resolution 554 would give the District Federal representation "as though it were a State." But what is a "State" and what matter of sovereignty is there in the States? Chief Justice Marshall, in Cherokee Nation against Georgia (1831), defined a State as—

> A political community of free citizens, occupying a territory of defined boundaries, and organized under a government sanctioned and limited by a written Constitution, and established by the consent of the governed.

James Brown Scott in "Sovereign States" offered this definition:

> The State is an artificial person, representing and controlled by its members but not synonymous or identical with them. Created for a political purpose, it is a body politic. It is a distinct body, and artificial person; it has a will distinct from its members, although its exercise is controlled by them.

(Mr. GRAVEL assumed the chair.)

Mr. MATSUNAGA. Will the Senator from Utah yield?

Mr. HATCH. I am delighted to yield without losing the floor for a question.

Mr. MATSUNAGA. As I listened to the Senator talking about Americans elsewhere, I believe I heard the Senator say that in American Samoa, there are 31,000 American citizens.

Mr. HATCH. That is what I understand.

Mr. MATSUNAGA. It is my understanding that they are not American citizens, but American nationals, without even the right to vote.

Mr. HATCH. That is correct.

Mr. MATSUNAGA. Is that the Senator's understanding?

Mr. HATCH. I think the Senator has stated it correctly.

Mr. MATSUNAGA. Because we do have a number, as a matter of fact, a rather large population of American Samoans in Hawaii, but because they——

Mr. HATCH. I am talking about 31,000 actual citizens, but the other people in American Samoa are American nationals; that is correct.

Mr. MATSUNAGA. They are American nationals as opposed to American citizens.

Mr. HATCH. But the 31,000 I mentioned are American citizens who do not have the right to vote.

Mr. MATSUNAGA. The entire population of American Samoa is 31,000.

Mr. HATCH. The Senator may be right on that. I shall have to check that out to be certain.

Mr. MATSUNAGA. Take it from the Senator from Hawaii, who has been there.

Mr. HATCH. He may very well be right.

Mr. MATSUNAGA. We have many dealings with the people from Samoa.

Mr. HATCH. Will the Senator assist me in understanding the status of American Samoa? Will he explain what that is?

Mr. MATSUNAGA. I did not quite hear that.

Mr. HATCH. What is the political nature of American Samoa?

Mr. MATSUNAGA. American Samoa is a territory of the United States. But it is not an incorporated territory as Hawaii was prior to becoming a State, and because of the unique situation known as the Matai system in American Samoa and because of the desire on the part of the American Samoans to retain that system, they have chosen not to become full American citizens. They are American nationals.

So that even when they go to Hawaii, they do not have voting rights, although they may establish residence in Hawaii.

And they have to go through the naturalization process to have full American citizenship rights.

Mr. HATCH. What the Senator says is that those who are not citizens in American Samoa are nationals and the way he defines it is that they are residents within an American territory who will have to go through naturalization in order to be full-fledged citizens?

Mr. MATSUNAGA. A naturalization process to become full citizens. Yes, that is what I am saying.

Of course, if a Samoan national happened to go to Hawaii, which is a State, fully incorporated even when it was a territory, the children born on American soil are American citizens by birth.

Mr. HATCH. I understand.

Mr. MATSUNAGA. But we have a very unusual situation in the case of American Samoa. I thought perhaps, by the statement made earlier by the Senator from Utah, he was not cognizant of that fact. I thought in order to keep the record straight, I should bring up this matter.

Mr. HATCH. I am appreciative of the Senator's wisdom.

Is the Senator also arguing the same could exist in Puerto Rico, Guam, the Canal Zone, and others?

Mr. MATSUNAGA. No; we have a different situation in the case of Puerto Rico. They are American citizens.

Mr. HATCH. So the Senator from Hawaii would admit that the Senator from Utah's position as to the American citizens in Guam, Canal Zone, Puerto Rico, and even in American Samoa, is well taken; that they also do not have the rights that would be conferred here pursuant to this constitutional amendment, and would have every reason to complain themselves that their rights are not being taken care of. Is that not correct?

Mr. MATSUNAGA. Yes, but because one segment of Americans are denied certain rights does not necessarily mean we should treat other Americans in other areas by denying them the full rights of American citizens.

Mr. HATCH. That is precisely my point, because why is there not the zeal to get the rights for all these other citizens, and if this resolution comes through, would that not be the next series of steps so that we have Puerto Rico and the Canal Zone, as well as the last one in American Samoa?

Mr. MATSUNAGA. As the Senator well knows, and from listening to him on the floor on other occasions as well, he is an excellent student of history, we in Hawaii went through the same process.

Mr. HATCH. But you did become a State.

Mr. MATSUNAGA. Yes, we did. That is correct.

Mr. HATCH. And the rights of American citizens——

Mr. MATSUNAGA. We did become a State, but prior to becoming a State we were an incorporated territory denied full citizenship. We could not vote for our own Governor even at that time. We could not vote for the President and Vice President of the United States.

We suffered the same fate that the residents of the District of Columbia are now suffering.

Of course, when we knocked at the doors of Congress to be admitted as a State, we were told we could never become a State because of our noncontiguity.

Fortunately, we overcame that. One of the prime reasons why we overcame that was the great record which the members of the 100th Infantry Battalion and the 442d Regimental Combat Team performed, the great record they made in World War II, as the Senator well knows.

Here we have the similar situation where the District of Columbia in the Vietnam war, for example, sacrified more lives than any other State in the Union, if I am correct.

Mr. KENNEDY. More than 10 other States.

Mr. MATSUNAGA. I am sorry.

So, there, I think they have shown that they valued their citizenship to the extent that they were willing to give up their lives to protect their right.

Mr. KENNEDY. If I may say, in terms of per capita, they were fourth in terms of per capita loss per population for those that were killed. There were seven States that lost less, but in terms of per capita, they were the fourth highest.

Mr. MATSUNAGA. As compared to?

Mr. KENNEDY. The whole country.

Mr. MATSUNAGA. Other States and territories.

Mr. HATCH. Let me say to the distinguished Senator from Hawaii, I do not believe he was here when I began my remarks, I began by saying they should have voting rights in the District. I do not think there is any question. But I think citizens in these other places ought to have them as well.

The point I am making is that we do not do it through this defective amendment, in a way that gives them special rights and privileges other citizens do not have.

I was considerably younger when Hawaii became a State. I was very enthusiastic then, as I am now, that Hawaii became a State. Had I been sitting in the Senate at that time, I would have supported it, because Hawaii went through a process of becoming a State. It is not a Federal enclave. Hawaii is a geographical entity as described by, I think, Chief

Justice Marshall. His description fits Hawaii just as it would any other State. I think Brown's description fits Hawaii like any other State.

But I do not think any American citizen should be deprived of the right to vote.

Mr. MATSUNAGA. May I ask this question of the Senator from Utah?

Mr. HATCH. Surely.

Mr. MATSUNAGA. I was for making the District of Columbia a State. But, of course, that failed.

Does the Senator from Utah believe that the District of Columbia ought to be made a State.

Mr. HATCH. No.

Mr. MATSUNAGA. He does not.

Mr. HATCH. No. I believe we can solve the problem here by, one, retrocession to Maryland; or two, by providing a constitutional amendment which would provide the right of the residents of the District of Columbia to vote in any State of their choice, or the State from which their ancestors came, or from which they came, whichever the case may be, or, where they cannot determine the same, within some reasonable formula, or some other approach. But give the right to vote for Representatives and Senators within the framework of the States and not within a Federal enclave committed to the Federal Government.

There is a tremendous distinction between the sovereign State of Hawaii and all it went through to become a State, which I support, and supported as a young person, and the District of Columbia.

Mr. MATSUNAGA. I certainly appreciate that. I come from a State in whose development many Utahans played a major role, and I appreciate the contribution which the people from the State of Utah have made to the development of Hawaii and in making Hawaii a State.

As a matter of fact, a former resident of Utah, J. Ralph Brown, whom the Senator knows, was the chairman of my campaign committee from the time I first ran for Congress; and he had been chairman throughout, until his recent retirement only last year. He saw me through seven campaigns for the House of Representatives and one successfully for the U.S. Senate. So I have, as we say in Hawaii, much aloha for the people of Utah.

The Senator from Utah makes a very ingenious proposal. I understand that the people of Alexandria at one time belonged to the District, but they clamored for the right to vote for the President and to have representation, with votes in Congress, and they separated from the originally designated area of the District of Washington.

However, until such time as the proposal of the Senator from Utah can be adopted, I wish he would join us and give the people of the District of Columbia two voting Senators in this august body. If that happens, the world will little note nor long remember what we say here; but if the Senator from Utah would switch and support us in this effort, the world will never forget what he did here.

Mr. HATCH. I thank the distinguished Senator from Hawaii, whom I respect very much.

We in Utah do have a deep affinity for Hawaii. We think it is a great State. I have a great affection for the Senator from Hawaii and have listened very carefully to his suggestions, and I will continue to listen to the debate on both sides of this issue.

However, my problems with this resolution really are not the emotional ones. Emotionally, I would like every resident of the District to have a right to vote for his own Senator and Representative. On the other hand, I am concerned with some of the approaches to the Constitution that do arise here.

I think this approach not only is defective but also is unsound and is unjust to the rest of the citizens of this country, even though it would accomplish what the Senator from Hawaii and I would like to accomplish, to grant the right of franchise, to vote for Representatives and Senators, to the residents of the District. We do have different approaches.

Retrocession would be the simplest and best approach. It also may be a very difficult approach to accomplish, and I have to acknowledge that. Perhaps the other suggestion I have made would be best. I have not explored it thoroughly because of my short tenure in the Senate and the short consideration of this matter. I have been exploring this amendment, and we have done a great deal of work on this. But I believe that if retrocession is unacceptable to accomplish the end that both of us believe should occur, we should consider a constitutional amendment that allows the residents of the District to vote within either the last State from which they came or from which their ancestors came. Where we cannot ascertain that easily, we can formulate some other approach that would permit them to vote on some other basis.

Mr. MATSUNAGA. I thank the Senator for yielding. I have another appointment. I do hope the Senator will keep listening to what we have to say on this side and perhaps even support us in this matter.

Mr. HATCH. I thank the distinguished Senator from Hawaii, who is always sincere and cordial and courteous on the floor of the Senate and is my friend. I appreciate his comments here today.

As I said before, I do not think every American citizen is represented in Congress. I mention Guam, Samoa, the Canal Zone. They never have had Senators or Representatives. However, if full representation were granted by this joint resolution to a non-State, then the basis would be established for later providing representation in Congress to the U.S. Territories as well.

In fact, granting representation to District of Columbia residents would perpetuate an inequity, since many U.S. citizens who are not residents of any State or the District would still remain unrepresented in Congress. I would think that those who are so zealous of sponsoring this particular amendment to the Constitution knew that when they sponsored it. Yet, there has not been any effort put forth to take care of those in these other areas. I believe that my approach would take care of them a little better than this. It would take care of all the citizens, not just those within the District, who, in their eyes, are unrepresented at this time, and it would not give undue emphasis to a Federal enclave which we have here.

There is no use kidding about it. This is a Federal enclave that is dedicated to the Federal Government and literally unrepresentative of the principle of statehood. To call it a State does not make it a State. As a matter of fact, it is ridiculous to call it a State.

I do not think I have heard anybody except the distinguished Senator from Hawaii argue that we should make the District of Columbia a State. I do not believe there would be any real support for that contention or for that position.

The District of Columbia is no more than a city, and thus, in my opinion, it should not be granted representation in Congress, except through one of the methods I have outlined here, which I think good minds could formulate and make more precise.

Although it could not have been foreseen by the Founding Fathers, Washington, D.C., has developed into a large commercial city. Except for a small Federal enclave of the characteristic which typifies it, the District consists only of that urban center. The Framers did not intend that cities should be given representation in Congress. In fact, they specified in the Constitution that only States should have a voice in the Senate and in the House.

If one believes that the District should have representation in Congress, it does not follow that the city of Washington should be able to elect its own Senators and Representatives. To permit that would be to make a radical and qualitative change in our federal system.

If the Nation's Capital, with its roughly 700,000 inhabitants and 69.7 square miles, can elect its own Members of Congress, it is logical to give every other city in the United States of equivalent size and area the same rights of representation. I do not think that should be done, but I beileve there certainly could be a clamor to do that in the future.

I think that New York City, Chicago, and Los Angeles, all of which have more than 5 million citizens, probably would clamor for Senators of their own, and perhaps with some justification. So that is something to think about.

To permit that, as I said before, would make a radical and qualitative change in our federal system.

Back to what I was speaking about before we had the interesting colloquy with the Senator from Hawaii:

In the Constitution, all the powers and authorities enumerated in the articles are derived from the more perfect union of the States.

In Federalist Paper No. 39, Madison establishes his important idea that the proposed Constitution is neither a confederacy of sovereign States nor a consolidation of the States but a combination of both:

> It appears, on one hand, that the Constitution is to be founded on the assent and ratification of the people of America, given by deputies elected for the special purpose; but, on the other, that this assent and ratification is to be given by the people, not as individuals composing one entire nation, but

as composing the distinct and independent States to which they respectively belong.

Thus, Madison does not claim the type of State sovereignty enjoyed by the States under the Articles of Confederation but he does claim that the States are "distinct and independent."

State sovereignty, or the "portion" of State sovereignty envisaged by Madison, has been much reduced by events of American history. The Civil War destroyed the notion, as championed by John C. Calhoun, that the States were almost entirely sovereign. The 14th and 15th amendments to the Constitution were squarely aimed at limiting the independence of the States. The 16th amendment established a Federal tax on everyone's income. But, the 17th amendment, which changed the selection of U.S. Senators from appointment by the State legislatures to the direct election of the people, was the most crippling blow. Appointment of Senators by the States, through the State legislatures, was a continuing imposition of the reality of State sovereignty of the Federal Government. And the Supreme Court of the 20th century has consistently imposed Federal mandates on the States, especially through its interpretation of the 14th amendment.

Some of us may not like that very much, but it is a fact of life and it is a reality, not just an emotional argument.

So what is left of State sovereignty that by definition would preclude the awarding of two Senate seats to the District of Columbia? The States are sovereign or "distinct and independent," to use Madison's definition, in that they are political beings that can tax, spend, create, and execute law, punish crime, and administer justice. All of these authorities are carried out by the City Council of the District of Columbia but all are subject to congressional approval. So the District cannot be said to have "independence" in its City Council's deliberations as the States do in the deliberations of their legislatures. And the yearly budget, that exercise of the power of the purse, is not legislated at all by the District but is a duty of the appropriate committees of each House. And the police power in the District is not the exclusive jurisdiction of the city government since the city police exercises joint jurisdiction with several federally chartered police forces in some areas and has no jurisdiction over certain Federal properties at all.

In addition, the States may enter into interstate treaties and compacts, permissible under the Constitution subject to the approval of Congress, with other States. The States have used this right to a significant extent in the 20th century, especially concerning matters of commerce, large public works, and transportation. No other power of the States seems to be more definitive of the States' continuing distinctness and independence. The District of Columbia is currently party to several interstate compacts, but they have all been negotiated between the Congress and the interested States. Currently the procedures by which the District will become party to additional compacts are undergoing re-examination. Some interpret the home rule charter to mean that the District can enter into interstate compacts while others interpret it to mean the opposite. Legislation has been introduced into Congress to grant unequivocally the right for the District to enter into such compacts. But until such legislation passes, the District, unlike the States, has no such right.

THE TWO HOUSES

In his famous work, "Democracy in America," Alexis de Tocqueville, after scrutinizing the make-up of the national legislature, remarked:

> The principle of the independence of the States prevailed in the formation of the Senate, and that of the sovereignty of the nation predominated in the composition of the House of Representatives.

That the Senate balances the House in terms of the use of political power is argued by the Federalists as one of the most fundamental underpinnings of the Constitution. A representative, facing reelection every 2 years and representing only a locale of a State, not an entire State, can be subject to the demands of a narrow constituency. His constituency might be the political opposite of a bordering constituency of the same State. For instance, a Congressman representing a district heavily populated by members of labor unions would necessarily represent this interest in his voting record or face eviction from office at the next election. But the neighboring district of the same State might be rural and inclined to support the right-to-work laws, and such support would be reflected, in all likelihood, by its Congressman. In the words of the Federalists, the House is "the numerous body" and "the representative ought to be acquainted with the interests and circumstances of his constituents"—in Federalist Paper No. 56 goes on to state:

> Because ". . . it is particularly essential that the branch of it under consideration (i.e. the House) should have an immediate dependence on, and an intimate sympathy with, the people."

And in Federalist Paper No. 52:

> And because "the House of Representatives is so constituted as to support in the members an habitual recollection of their dependence on the people."

That is found in Federalist Paper No. 57.

Because of this constitutional mandate to keep close ties to the people, it has become customary for Congressmen to attend very closely to the needs and complaints of constituents. Thus, some Congressmen maintain as many as four constituent offices in their congressional districts while it is unusual for a Senator to maintain more than two offices in his entire State.

While competing interests may be few in a congressional district, a Senator, representing all the congressional districts in his State, must necessarily face a multitude of competing interests. As a result, he must have a more general view of all political issues. By way of example, the Senators from Illinois must represent a State whose House delegation is evenly split between the two parties—12 Republicans, 12 Democrats—and likewise the Senators from Arizona—2 Republicans, 2 Democrats. Today a Senator faces from within his State what Madison saw as a national characteristic in 1787, namely, a "dissimilarity in the ingredients," and a "diversity in the State of property, in the genius, manners, and habits of the people of the different parts of the union."

That is found in Federalist Paper No. 60.

In addition, the framers of the Constitution gave certain other powers to the Senate that they regarded as nonpolitical functions, namely the power to try impeachments, to ratify treaties, and to approve executive nominations. These tasks were assigned to the Senate because it is more likely to be free from the "demon of faction" than the House, that "numerous and changeable body." Thus, the Senate was contemplated by the Federalists to be "a select and stable body,"—as evidenced in Federalist Paper No. 63—an idea that Tocqueville later reemphasized by calling it "the great executive council of the nation," a body that will be "sufficiently independent"—in Federalist Paper No. 65—to wisely tend to "national concerns"—in Federalist Paper No. 64—and "the comprehensive interests of their country"—in Federalist Paper No. 62.

THE INDEPENDENCE OF THE STATES

The Constitution guarantees a "republican form of government" to each State—article IV, section 4. And all States have a republican constitution that closely mirrors the Federal Constitution—but not the District of Columbia whose city council takes the place of the State legislature, but every action of which is conditional on the approval of Congress and, therefore, not independent.

As Ignazio Silone said in his "School for Dictators":

> The first test to be applied in judging an alleged democracy is the degree of self-governing attained by its institutions.

The District has self-government at the pleasure of Congress, not independently of it. Indeed, Congress could abolish the City Council or the District of Columbia at will. It retains such constitutional prerogatives.

To give such a unique equal standing with the several States in the Senate would effect a basic fundamental change in the Senate. Indeed, one must wonder if certain other cities, for instance New York City, could make an equally justiciable claim to representation in the Senate.

Let us talk about the special case of the District of Columbia. Washington, D.C., is the "Federal enclave" and, as such, can be considered a "company town." It is not possible to separate the land area of the District of Columbia from its primary activity, the daily business of the Federal Government.

The Federal Government employs 38.3 percent or 223,900 employees of those working in the District, while the service industries, which are closely alined with the Federal Government, employ 25.5 percent or 149,200 employees.

Employment trends show an ever-in-

creasing domination by the Federal Government.

So it is a Federal enclave, and, as George Will said, surrounded on all four sides by reality which, I thought, was an excellent quote; that it really does not constitute a State, will not be a State, does not deserve to be a State, under the circumstances, and which should not be treated as a State when we have other means available which should be tried first, and which may be much simpler to enact and ratify. I suspect that everybody considering this problem has to acknowledge it is very unlikely that 38 States are going to ratify this defective amendment to the Constitution. I think most of them will not do so, so we may be putting not only the Senate and the Congress through an exercise in futility. We have some ability, at our disposal to accomplish justice and to provide those rights without emasculating our very important Constitution.

The District receives a direct grant from the Federal Government annually. This payment is provided in recognition of the District's role as the Nation's Capital, and helps compensate the city for tax losses due to the large amount of nontaxable Federal property in the city. It is based on Congress' jurisdiction over the city as provided in article I, section 8, clause 18 of the Constitution to which we have already referred.

Needless to say, none of the 50 States receives such an unrestricted annual grant from the Federal Government. Since 1950 when the population of the District began to decline, the amount of the Federal payment has steadily increased to the point where for 1978 the sum will be $300 million or 28.04 percent of the District's budget.

Total Federal aid to the District was $1,010 per capita in 1975, about four times more, on the average, in Federal aid than to any of the States, except Alaska, which received $739 per capita of Federal money.

Compared to the 48 largest cities in 1974, Washington, the 11th largest in the country, received more aid from the Federal Government than any city except New York City.

Washington would have a recession-proof economy as long as Federal spending stayed constant. Since Federal spending is ever increasing, the area of the District has an assured boom economy. In Washington, the Federal Government is omnipresent and nearly omnipotent. There are no competing factions or interests. Manufacturing employment in 1976 was only 16,100 people. So it is a Federal enclave and, as such, is hardly typical of the States.

On the basis of all this, it would seem that U.S. Senators from the District of Columbia would be in the seemingly paradoxical but unique position of representing the interests of the Federal Government to the Federal Government. In addition, it would seem that a Senator from the District would be under no compulsion to weigh the interests of any competing interests since there are no other interests that could have a significant influence on his election.

It is rather obvious to point out that the employees of the Federal bureaucracy, the overwhelmingly dominant class in the District, will elect representatives to the U.S. Congress who are sympathetic to the continued growth and prosperity of the Federal working class.

But bigger and more Federal agencies and programs, something which favors the economy of the District, have the effect on the people of the several States of greater Federal taxes and more Federal regulations.

While Senators from the several States must continually balance the claims of competing factions from within their own States, and also balance the federalist distinction of State versus Federal sovereignty, Senators from the District would have no immediately practical reason for doing so. Under the home rule charter, the City Council can be regarded as a kind of State legislature for the District of Columbia, but one of no sovereignty because of Congress' absolute veto over any of the actions of the Council and absolute legistive control over the city's budget.

Providing for election of Senators would give the District the status of a State since it would have equal representation in the Senate, almost a definition of a State. With the District regarded as a State in the Senate it would seem the Federal Government has become incarnated in a new way in that in addition to Federal law, regulation, and influence, there comes into existence a physical manifestation of the Federal Government, the land of the State of the District of Columbia, and a human manifestation in Senators of the District.

With this in mind, it would seem that for the Senators from the District none of these State restraints on the Federal Government that Madison speaks of would be any longer applicable:

> Thus each of the principal branches of the federal government will owe its existence more or less to the favour of the state governments, and must consequently feel a dependence, which is much more likely to beget a disposition too obsequious, than too overbearing towards them. On the other side the component parts of the state governments will in no instance be indebted for their appointment to the direct agency of the federal government, and very little, if at all, to the local members.

That is in Federalist Paper No. 45.

I think this amendment would grant special privileges to the District.

Another power granted to the District under section 1, which I have already mentioned but I am going to reiterate, of House Joint Resolution 554, is the participation of the District in the ratification of constitutional amendments under article V of the Constitution. But article V states that the proposed constitutional amendment shall be ratified by the legislatures of the several States. Since the District of Columbia is not a State, the District has no State legislature. Congress would have to decide whether the city council can function in this capacity, and if the city council does not function, then it means there has to be a direct election or a direct ratification of constitutional amendments, something which no citizen of any State now has.

Several other legislatures of the States have not yet ratified the controversial equal rights amendment; have considered putting the ratification to a referendum of the people. But the State attorneys general have already pointed out that such a referendum would be unconstitutional since the Constitution specifically provides that constitutional amendments shall be ratified by the State legislatures.

Since there are inherent contradictions in declaring that the city council of the District can function as a State legislature, Congress might decide that the people of the District may vote on the ratification of constitutional amendments, in which case the people of the District would enjoy, as I have mentioned before, a constitutional privilege not enjoyed by the people of the several States.

Another problem with section 1, as I have mentioned before, concerns the election of the President and Vice President. Since section 3 of House Joint Resolution 554 repeals the 23d amendment to the Constitution, which allows three electoral votes to the District, the District, under section 1, would be eligible to participate in the election of the President, but would have no electoral votes any longer assigned to it.

Thus it would seem that House Joint Resolution 554 grants direct election of the President by popular vote to the District, while the States, according to the Constitution, must elect the President through the Electoral College.

Both of these problems lead directly to a discussion of section 2 of the proposed constitutional amendment, namely "the exercise of the rights and powers considered under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress."

Neither a reading of the committee report of the House Committee on the Judiciary nor a reading of the record of the debate on the floor of the House on March 2 gives a satisfactory explanation of either the intent or the meaning of this section. In the dissenting committee views of Congressmen HENRY HYDE, CARLOS MOORHEAD, JACK BROOKS, CHARLES WIGGINS, and JOHN ASHBROOK:

> This section implies that the exercise of these foregoing rights and powers must be exercised jointly with the people of the District and the Congress, each holding veto power over the other. This might entail the Congress, for example, voting twice on the ratification of a constitutional amendment, first in discharging its constitutional role under Article V in proposing an amendment and a second time as a sort of legislative endorser for the "people of the District" under this proposed amendment.

What authority should Congress grant the City Council to determine the procedure to be employed concerning the three powers of section 1? And even if the City Council is granted substantial authority in these matters, it must be remembered that Congress always maintains absolute veto over all actions of the City Council. And since the Congress, not the City Council, has legislative authority over the city's budget, Congress would be appropriating the funds necessary to hold elections of its own Mem-

bers, in addition to issuing regulations on campaign contributions, expenditures, and campaign procedures.

In addition, if the District should ever have sufficient population to be allotted two representatives in the House, then Congress would have some authority in determining the lines of the two congressional districts. In the States, the drawing of district lines based on reapportionment is done by the State legislatures, another example of the continuing viability of State sovereignty. And, finally, it would seem that the Hatch Act, which prohibits Federal employees from participating in political campaigns, would necessarily have to be relaxed for the special case of the District of Columbia. Otherwise, a majority of the adult residents of the District would be unable to be active in campaign politics.

Not only because my name is HATCH, but because I support the principles of the Hatch Act, which is designed for the protection of the rights of Federal employees, I think that would be a drastic situation, totally unlike that of the States, and hardly good efficacy on the part of those who are proponents of this defective resolution.

Because of this unique relationship between the District's city council and the U.S. Congress, other questions arise when the three powers provided by Section 1 are contemplated in light of Section 2. In the event that H.J. Res. 554 passes the Senate, it appears likely that the states would be unable to determine the precise nature of what they are considering ratifying. In the event of the required three-fourths ratifications of the states, it could happen that the District of Columbia, with its new constitutional position "as though it were a state" might end up with substantial constitutional privileges not enjoyed by the several states.

I would suggest that it is not only possible, but that it really is going to happen.

These are all important points, and I think it shows that this is not a racial question. This is not a question that involves trying to deprive the people of the District of the right to vote. As I said at the beginning of my remarks, I think there are ways we can provide the right to vote not only for them, but for every citizen, including those of Guam, Puerto Rico, American Samoa, and even the Canal Zone in Panama—the right to vote for Senators and Representatives.

But let us do it within the framework of the Constitution, within the framework of that which was contemplated by the Founding Fathers and has worked so well for so many years. Let us not allow a radical departure from that framework which, in my opinion, will wind up costing us in the end, in an overzealous attempt to accomplish something which could otherwise be accomplished with a lot less effort, with a lot less chance of losing in the ultimate result, the opportunity for residents of the District to vote and be represented.

If they can get this resolution through and 38 of the States ratify it, the District will have their own Senators and Representatives right here in this little Federal enclave of 69.7 square miles. It does not seem to be a matter of having better representation; that can be given in a reasonable way. We might even be able to do it by statute rather than constitutional amendment. But that is not what this proposal grants. What it grants is two more Senators and another Representative, out of a constituency that represents one point of view.

It is something to think about. I think the arguments against it are somewhat overwhelming, but my colleagues here in the Senate may prove me wrong. We will have to wait and see.

As I have said before, I think every American citizen ought to have a right to vote for Senators and Representatives, but I do not think the District should be granted the rights this amendment would grant them, to have more rights than other citizens within the country. I do not think the Federal enclave should be given two Senators and a Representative, and I do not think we should abandon and radically depart from the Constitution, as this amendment would mandate. In the end, I think we would all be better off, and in the end can grant the District of Columbia voting representation, by proceeding in a constitutionally valid way.

Mr. President, I ask unanimous consent that Lisa Dowdy of Senator Stevens' staff be granted the privilege of the floor during the consideration of this measure and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. I notice that the distinguished Senator from Oklahoma is here. I am delighted to yield the floor to him at this time.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Tom Wasinger of my staff be accorded the privilege of the floor during the consideration, debate and votes on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, the matter of representation for the District of Columbia, I think, is very important, and I am very pleased that the chairman of the Subcommittee on Constitutional Amendments, who is present here now, saw fit to have extended hearings on this matter and accorded me the opportunity of presenting my views to the subcommittee during that time.

There are some people who say that the District presently is not represented. I daresay others will say and do say that it is over-represented. But certainly it is represented by the entire Congress.

The District has the distinction of having special committees in both the Senate and the House of Representatives, that is, the District Committees, to represent its interests and to bring those interests directly to the floor of the Senate and the floor of the House of Representatives for the enlightenment and the consideration of all Members.

In addition, the national media serve perhaps a more meaningful purpose as far as local issues are concerned with the District of Columbia than is the case with most States and with most communities within those States.

In the main, the members of the national media, the newspapers, TV and radio from around the country, live in or near the District, and most of them work here. So they are very familiar personally and intimately with what they feel to be the needs of the District.

It also gets its fair share, and I think rightfully so, of attention from the local media, newspapers, TV, and radio, and I believe that the media is as rightfully parochial in advancing the needs of the District, as the media sees it, as is the media of the States and of other communities and cities of a similar size to the District. But one of the differences is that the output of the media comes directly to the ears, eyes, and attention of the Representatives in Congress who have the responsibility of the District itself.

Mr. President, this proposal which would provide two Senators to represent the District is completely contrary to the intention of the framers of the Constitution, which was to have a neutral district in which the Capital City would be located.

I might go back to my first point and say I do not believe it can be very well demonstrated that the rights of the citizens who live in the District are not being protected and that their interests are not being considered or represented. Because of the special relationship to Congress as the seat of government and the Nation's Capital, the District of Columbia is of great concern and responsibility to both Houses of Congress.

Granting full representation to the District, as I said, would be contrary to the intent of the framers of the Constitution. They wanted to set aside, and did set aside, an area unique in character and free from any kind of entangling interests. They did not want to put the Federal Government in the position of being influenced by a State and become involved in that State's matters because of its location in that State.

The framers gave Congress exclusive control over the District, with full responsibility for local concerns. So failure to give the District two Senators was not an oversight, it was not an accident, it was a recognition that this District was different. It was given representation, but in a different way. We must remember that representation by two Senators was a privilege exclusively reserved to the States.

The District certainly has fared well with the present arrangement. I do not think it is possible to say that it has been mistreated by the Congress. The District ranks as one of the highest cities in terms of per capita income in the United States. It also has cultural and educational advantages that many parts of the country do not have, and much of this not provided at the expense of the taxpayers of the District.

It would be unfair to the States to provide two Senators to the District of Columbia because the States are sovereign and still have some of the sovereignty they had at the time they bestowed limited sovereignty on the U.S. Government. They did this to form a more perfect union. They provided sovereignty for the Federal Government, not the reverse. And they retain their individual sovereignty to a greater extent than the

Federal Government and the courts wish to recognize.

The point is that the States created the Federal Government and they also created the District. They did not confer sovereignty on the District. If this proposal is accepted we are saying that the Federal Government can bestow or confer sovereignty on an area.

If this proposal were submitted to the States and passed by the States, becoming part of our Constitution, we would be creating a new hybrid State, different from all the rest. Some might call it a superstate. It would have the benefits of statehood but not all of the responsibilities of statehood. It would have the appearance of sovereignty, yet would be totally dependent upon the Federal Government. It would still have, in addition to its representation of two Senators, representation by the entire Senate and from the Senate Committee on the District of Columbia.

(Mr. CULVER assumed the chair.)

Mr. BARTLETT. The States agreed to a more perfect union, and in the process created the District. They did so with the understanding that all of the States would be treated equally.

It is unlikely that they would have agreed to this union if they knew a nonsovereign entity would enjoy an equal or actually more than equal status than they were to enjoy.

Mr. President, granting the District representation as if it were a State would violate historical as well as constitutional mandates, and work a qualitative change upon our federal system of government.

Article I of the 17th amendment uses the word "state" with reference to membership in the Senate and the House.

For purposes of Federal representation, the District cannot be considered as a State since it lacks powers common to the States.

Congress possesses the power of exclusive legislation over the affairs of the District. Congress has all police and regulatory powers over the District. Congress has final authority over the District budget and appropriations. Congress can veto the decisions of the City Council of Washington, D.C. The defeat, recently, of the commuter tax is just such an example. And Congress could abolish the city government altogether if it wished.

Article 5 of the Constitution provides,

No States, without its consent, shall be deprived of its equal suffrage in the Senate.

This was a compromise to insure that large States would not, in the future, change the method of representation in the Senate. States have two Senators because they are sovereign. Federal representation is a measure of that sovereignty. To accord two Senators to an entity other than a State—a District purposely set apart from the States—would diminish and deprive States of their equal suffrage.

The District, as a hybrid State, would have its own special kind of representation through the entire Congress and the congressional committees and would have, as I shall mention later, special considerations that are not given to the other States. As long as every State is treated the same way as every other State, the equality of suffrage is not destroyed by admitting a new State to the Union. But this statement that the equality of suffrage would not be destroyed by admitting a new State to the Union would not hold true if a hybrid State, such as is proposed by this amendment, were created.

Inasmuch as the District enjoys particular advantages—that is, financial—that are not accorded to the other States, to extend Federal representation to the District would dilute and diminish sovereignty and would dilute the equal suffrage of the States. In my opinion, the States would never have agreed to such an agreement at the time they gathered to form this more perfect Union.

Some might say that if we did give the District full voting representation and include two Senators to represent them in addition to the present representation, we could no longer call ourselves the United States of America, but rather would be referred to as the "United States and Other Assorted Things of America."

The District is no more than a city. The framers did not intend that cities per se should be given representation directly in Congress. Again, States with sovereignty were to have the voice to represent the States in the Federal Government.

The fact that other cities already have elected Federal representation is irrelevant. They share their Senators with the entire State. But this would not be so if the District received two Senators. It would be patently unfair to enfranchise District residents to a greater extent than the people of other cities, cities much larger than Washington, D.C.—cities like New York, PhiladelPhia, and Chicago.

Mr. President, the District is not subject to taxation without representation. The Federal benefits exceed what the city contributes by way of Federal taxes. In 1976, the District paid into the Federal Treasury $645 million. It received however an annual direct payment, in 1977, of $276 million and Federal grants of $340 million. In Federal loans from the U.S. Treasury the District received $101 million in fiscal year 1979. This does not even include outlays for the hospitals, universities, the Smithsonian, the National Zoo, the Kennedy Center, police protection, upkeep of Federal monuments, the C. & O. Canal, and the national parks within the District. Also, the Federal Government, just recently, helped pay off the bonds for construction of RFK Stadium.

The District report on loss of revenue because of the Federal presence do not include revenues from the tourist business, convention business, construction of Federal buildings, and jobs created by such construction. Moreover the District Committee of the Senate recently saw fit to agree on a loan program for a convention center to be built in the District.

Granting the District Federal representation would create a situation in which the Federal interest would be promoted to the Federal Government for a Federal city. The District really is a company town and totally dependent, or nearly so, on the Federal Government for its livelihood, indeed, for its existence.

In 1976, the Federal Government directly employed almost 40 percent of those working in the District. Those businesses and industries servicing the Government employed another 25.5 precent.

There is hardly any manufacturing and no agriculture. Senators from the District thus would be under no compulsion to consider the needs of any competing interests other than the Federal Government because no other interests would rival that of the Federal Government. Such representation could inevitably lead to the kind of pressures that Madison spoke against and wanted to avoid when they created this unique Federal District.

I think we should, at the very least, if we saw fit to grant the District Federal representation, cut the District's umbilical cord to the Federal Treasury and to the entire Congress.

Mr. President, District representation is ultimately a constitutional issue. It is not, in my opinion, a race issue, as was alleged in the local press recently regarding the junior Senator from Oklahoma. I thought that was particularly interesting; the charge I am speaking of, in light of the fact that no arguments were made to support the charge. Certainly, when someone is supporting the position taken by the Founding Fathers to create a District as a separate entity, different from the States, this is a point of view that is reasonable and should be considered, even if it is not the point of view of the particular paper involved.

I do not think it necessarily bespeaks of racism to disagree with this particular legislation that would submit this important question to the people of this country. And it is interesting to note that as far as racism is concerned, the population trends suggest that by 1983 the whites will constitute a majority of the people in the District.

This is also not a liberal-conservative issue. No one knows what future course American politics will take.

Further, I do not think it is a matter of simple democracy, because we are a Republic, not a democracy. We have a unique setup as far as the District and as far as the country as a whole is concerned and I do not think it is in the best interests of this Nation to create a hybrid State that would have rights and privileges that the other 50 States would not have.

Mr. MATHIAS. Will the Senator yield to me briefly without losing his right to the floor?

Mr. BARTLETT. I am happy to yield to the distinguished Senator and my good friend from Maryland without losing my right to the floor.

Mr. MATHIAS. Mr. President, I thank the distinguished Senator from Oklahoma for his kindness in yielding a few seconds to me.

Mr. President, I am pleased to be here today as the Senate begins its consideration of a constitutional amendment

which has been high on my legislative agenda throughout my entire congressional career; an amendment to provide full voting representation for the District of Columbia in both Houses of Congress.

The subject matter of today's debate is not new. It has been around for a long time. In fact, a constitutional amendment to grant the District full voting representation was first considered almost immediately after residents in the District lost their voting rights in 1800 when Federal jurisdiction over the Capital took effect. Although the first constitutional amendment providing voting representation for the District was not offered in Congress until 1888, the prototype for that proposal and for all subsequent versions was drafted in 1801 by Augustus Brevoort Woodward, a close friend to President Jefferson.

Regrettably, despite early recognition of the need for such a constitutional amendment; despite the introduction of over 150 resolutions on the subject; despite the holding of more than 20 days of hearings, and above all, despite our Nation's efforts throughout its history to achieve universal suffrage, the citizens of the District of Columbia remain disenfranchised in the Congress of the United States. This can only be viewed as a travesty of justice. This intolerable situation has gone on far too long. It is a national disgrace. It must be finally corrected without further delay.

True, Congress has not totally ignored the imperative of removing the barriers which stand between democracy and the American citizens residing in the District of Columbia.

In 1961 the 23d amendment to the U.S. Constitution was adopted, allowing the residents of the District to vote in Presidential elections for the first time.

Then, 10 years later, in 1971, Congress created the position of non-voting delegate for the District of Columbia in the House of Representatives. And, in 1973, Congress provided significant self-government authority to the residents of the District of Columbia.

These steps are important. They are better than nothing. But they are not enough. Enactment and ratification of a constitutional amendment for full voting representation for the District of Columbia must be achieved expeditiously. It is the single most important piece of unfinished business on our national agenda.

We stand closer to reaching this goal today than at any other time in our history. On March 2, 1978, the House of Representatives, led by the District of Columbia's lone Representative, WALTER FAUNTROY, overwhelmingly passed House Joint Resolution 554, a constitutional amendment to provide full voting representation for the District in both Houses of Congress by a vote of 289 to 127. It is now up to the Senate to take the next historic step in the constitutional process by passing this resolution and speeding it on its way to the States for ratification.

As we review the case for a constitutional amendment granting full voting representation to the District of Columbia, one point will be crystal clear; there is no constitutional impediment to such an amendment. This message has been delivered to Congress many times in the past and was echoed in unambiguous terms earlier this Congress by several noted constitutional scholars.

Mr. President, the constitutional and legislative history supporting this amendment is in place. The only remaining issue to be resolved is a moral one. It relates to the basic rights of people in a free society. We must ask ourselves what it does to our democracy, to our professed ideals, if we permit this form of disenfranchisement of more than 700,000 Americans to continue. This is the real question facing the Senate and the American people.

I do not believe this should be a hard question to answer for a nation whose political system rests upon the principle that all citizens should be able to participate equally in our political process.

A citizen's right to be represented in the elected bodies of this Nation is no less precious than his right of free speech or his right to privacy or his right to due process under the law. The right to be represented is a fundamental freedom and is the bedrock of our constitutional government. All too often it is a right we take for granted. To be excluded from this process, to have no voice when the votes that determine peace or war are cast, is the worst of deprivations. It is, at this late date, "taxation without representation". Americans were not prepared to tolerate that injustice more than 200 years ago, and they should not tolerate it now.

Last year, in testimony before the House Judiciary Subcommittee on Civil and Constitutional Rights, I stated that the passage and ratification of the constitutional amendment now before us was necessary to provide full human rights in the District of Columbia. And, I called upon President Carter to bring his human rights campaign home to the Nation's Capital; to throw the full weight of his great office behind full voting representation for the District. To his credit, President Carter has done just that. We, in the Senate, must join with the President and reaffirm our support for human rights of the citizens of the District of Columbia. Simple justice demands it.

Mr. BARTLETT. Mr. President, I might say that the distinguished Senator from Maryland brings to mind one of the points I wanted to make at the very beginning. That is, that Senators from States such as Maryland have taken a particular interest in the District. Certainly, the distinguished Senator from Maryland has. With his position on the District Committee, he has, in my opinion, done a very fine job of representing the interests of the people in the District.

It was my pleasure and privilege to serve on this committee with the distinguished Senator from Maryland (Mr. MATHIAS). I would say I found it very rewarding.

Mr. MATHIAS. Will the Senator yield?

Mr. BARTLETT. I am glad to yield.

Mr. MATHIAS. I acknowledge the very valuable contributions the Senator has made as a member of the old Senate District Committee. Certainly he brought to that committee his experience as a Governor, his experience in the management of governmental affairs at the highest level, and he came with the kind of unique background which made it possible for him to look with an experienced eye and with a very sympathetic eye on the problems the committee had to face.

Mr. BARTLETT. I thank the distinguished Senator from Maryland.

I again commend the Senator for his great contributions to the District, for the many advances that have been made in the voting that now takes place, the elections that now take place, and the progress that has been made by the District.

Much of this can be directly traced to the distinguished Senator from Maryland.

Also, in carrying a little further the fact that the District representation is a constitutional issue; it should be noted that opposition to this proposal stems not from a callous disregard for human rights, but rather from genuine concerns about the mandates of the Constitution, about this union of States, indeed about the entire notion of federalism. Our scheme of Government would be altered dramatically and fundamentally if this particular proposal was passed by three-fourths of the States and became a part of our Constitution.

Mr. President, the proposal before us says that the District should be treated as if it were a State, but I do not believe it can, constitutionally. What we really do by this amendment is create a hybrid State, with rights that go beyond the other States.

I do not think this would be in the best interests of the entire country. Therefore, I am in opposition to submitting this question to the people of the various States for their consideration.

I believe that the Founding Fathers, when they created this more perfect Union and the opportunity for other areas to become States, created the District as a special entity with special representation. Mr. President, they knew what they were doing and reached a decision that was beneficial then to the welfare of this Nation and that is still beneficial today.

I ask unanimous consent that additional remarks on this subject be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DEWEY F. BARTLETT ON FULL VOTING REPRESENTATION FOR THE DISTRICT OF COLUMBIA

Mr. President, I appreciate the opportunity to speak on the subject of full voting representation for the District of Columbia.

Mr. President, because the District is neither sovereign nor a state those who now hope to give it full voting representation in Congress have had to sidestep the Constitution, which requires that both chambers of Congress be composed of individuals chosen by the various *states*. The pending resolution simply provides that for purposes of representation in the Congress, the District shall be treated as "if it were a state." But such a novel concept flies in the face of, and is

totally incompatible with, the role the District now plays in the overall structure and functioning of our federal system of government.

Our Constitution provides a framework in which the individual sovereign states would form a more perfect union. At the same time though, the Framers of the Constitution recognized "the indispensable necessity of complete authority at the seat of government," (Madison, Federalist No. 43). Without it they feared that the state encompassing the seat of government might unduly influence the national governing body. They wanted each state to be truly equal with the others, not one state more equal.

From this we clearly see the Founding Fathers' intention to carve out an area of land that was to be unique and special in every respect vis-a-vis any other state of the union. It was not to be a state. It was to be a solely federal district. It was to be responsible only for itself, the seat of the federal government. Unlike a state, the District was to have no legislature and no constitution. Most importantly, its peculiar character would deny it those qualities that make a state, any state, sovereign.

The special nature of the District is illustrated in another way. Every year it receives a direct grant from the federal government that supplements locally generated revenue; something the states do not get. For Fiscal Year 1977 this amounted to $279,357,000. In addition, it can borrow directly from the federal treasury to finance capital projects; something the states can not do. Loans for such outlays in 1977 came to $101,292,000. The District also participates in federal grant programs. In Fiscal Year 1978 it will receive roughly $300 million through such grants.

Appropriately enough, in Fiscal Year 1978, 47% of the total resource available to the District will come from federal sources. And these figures do not even include federal outlays for national parks, the Smithsonian Institution, the Kennedy Center, the National Zoo, St. Elizabeth's Hospital or the benefits the District receives from the large number of tourists brought to the area to see Washington's many federal attractions.

These financial privileges were granted to the District pursuant to the notion, first established by the Framers of the Constitution and later accepted by the several states, that it would be maintained by the Federal Government for the federal government's operations as compensation for its waiver of any claim to the incidents of sovereignty. It seems reasonable to me then that any attempt to remove the special political status of dependency of the District of Columbia must be accompanied by concomitant steps to remove its financial status of dependency. If the District now wishes to take its place among the several states, it should be willing to join a state such as Maryland and forego the federal largesse which has flowed as a result of its very special status.

Under our constitutional scheme of government the several states are to be treated with a modicum of equality. This scheme, in my opinion, cannot tolerate a situation in which one "hybrid state" is more equal than the others. There is, then, a serious question whether, by allowing federal representation of an entity which does not possess the attributes of statehood, we are not in fact treating the states less equally and depriving them of the exercise of their distinct measure of individual sovereignty, in violation of constitutional, as well as historical, mandates.

U.S. Senators and Congressmen from the District would be in the seemingly paradoxical, but at least unique, position of representing the interests of the federal district to the Congress which has the constitutional responsibility for the District, but not the states.

It is true that District residents pay federal taxes. But it is also true that because of the District's special status they enjoy distinct advantages not available to the residents of the sovereign states. Granting full voting representation to the District would in effect simply add another layer of cake to the one its residents already savor. In this instance the blessing of statehood would not be accompanied by the burdens generally associated with it.

In sum, the reasons for maintaining and insisting upon a unique federal district are no less compelling today than they were in 1789. But if we are going to legislate into existence this new "Hybrid state," then at the very least we should demand that its umbilical cord to the federal treasury be severed

Mr. BARTLETT. Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. BAYH. I will be glad to yield to the Senator from Nebraska.

Mr. CURTIS. I wanted the floor in my own right.

Mr. BAYH. I rise to offer my support enthusiastically for House Joint Resolution 554, a constitutional amendment to establish full voting representation for the more than 750,000 citizens of the District of Columbia.

Before I present my substantive argument in support of this resolution, let ate Joint Resolution 65, a similar measme make it clear that despite the fact that hearings were held in my Subcommittee on the Constitution, on Senure which has been introduced and sponsored by several of us in the Senate, I, nevertheless, feel that the House version is a far better vehicle by which to bring political equity to the citizens of the District of Columbia.

For that reason, I decided not to try to report out Senate Joint Resolution 65, but instead to join my very distinguished colleague (Mr. KENNEDY) in getting House Joint Resolution 554 expeditiously passed by the necessary two-thirds vote.

If, indeed, the Members of this body feel there is a substantive and equitable reason behind this effort, it seems to me that we cannot be blind to the procedures of the Senate Judiciary Committee, which would make the movement of the Senate bill through the subcommittee and the Judiciary Committee, for all intents and purposes, impossible, given the time constraints on the Senate at this time in our session.

Mr. President, let me look at the basic reasoning, the substantive reasoning, and suggest that if anyone desires to debate the procedure, I am prepared to do that as well. The substance, it seems to me, is the most important matter to consider in any legislative effort, and we should not let procedural differences stand in our way of accomplishing substantive equity.

Mr. President, it may appear strange to some observers that the senior Senator from Indiana has chosen to champion the cause of citizens living approximately 600 miles from his home State. But I chose to champion this cause out of a grave concern for an injustice that transcends State boundaries. That injustice has to do with a living paradox in the American scheme of government. Right here in the Nation's Capital, which is the seat of the greatest representative democracy the world has ever known, the democratic values and principles that we all cherish and protect are abused. Right here in Washington, D.C., nearly three-quarters of a million citizens are denied the right to representation as it is commonly granted in the 50 States of the Union.

I listened with a degree of understanding and patiently as my colleagues on the other side of this argument expressed their opposition. One can look at all the reasons for not supporting this amendment, but in no way can one deny the fact—that in Washington, D.C., we have nearly three-quarters of a million citizens who are denied the right of full representation as it is commonly granted in the 50 States of the Union. Second-class citizenship exists for three-quarters of a million Americans who live in the District, and there is no way to explain that away.

Residents of the District, though citizens of the United States subject to all obligations of such citizenship, have not had voting representation in Congress since 1800; and only since 1964, and the ratification of the 23d amendment to the Constitution, have District residents been entitled to vote for electors for the offices of President and Vice President of the United States. It was not until April 1971 that they were given the right to elect a nonvoting delegate to the House of Representatives. And let me add that the citizens of the District have been extremely well represented in the person of Delegate Walter Fauntroy for the past 7 years.

I wondered, as I listened to the arguments against giving representation to the citizens of the District, if indeed one is to follow that rationale for denying full citizenship in the congressional branch, that, to be consistent, those same voices should have been raised in opposition to letting the citizens of the District vote for the President; because much of the rationale, to be consistent, would have to apply across the board.

I had the good fortune, as the minority floor leader of the Indiana House, to be the principal sponsor of the ratification petition in the Indiana General Assembly.

It seems to me that we are talking about the rights of citizenship, and they are not visible. They have the right to vote for President but not the right to be heard as to those issues decided in Congress.

But more must be done and it must be done now. No more delays. No more talk of retrocession, or of studies to determine the feasibility of retrocession.

I respect the position of those who might suggest this alternative, but the time has come to act. We must go forward in extending full representation to the citizens of the District. I say this because I firmly believe that the circumstances leading to the disenfranchisement of the District's citizens have drastically changed. Let us look at history and lay it on the facts of life as they exist today.

The Founding Fathers were intent on providing a site over which the Federal Government would exercise exclusive

control. That has been discussed at some length by the opponents to this amendment. The Founding Fathers wanted a separate capital which would not only protect the national image, but which would be immune from both jurisdictional disputes as well as potentially harassing incidents. For many of the Founding Fathers, national representation for the District would necessarily have precluded the establishment of exclusive Federal control over the capital site. As James Madison so eloquently stated in the Federalist Papers, "Complete Federal authority at the seat of government" was necessary to avoid the "dependence of the members of the general government on the State comprehending that seat for protection in the exercise of their duties." Clearly, the founders perceived the need for a strong Federal territory, free of State encroachment, and secure from domestic unrest.

However, it should be noted that while the framers fully intended to establish a separate capital city, they never fully decided to exclude the residents of that city from political representation. As a matter of record, it is important to note that between 1790 and December 1800, residents of the District participated in State and National elections, including the Presidential election of November 1800, by voting in either Maryland or Virginia. However, when Congress finally assumed control of the District late in 1800, the lame-duck administration of John Adams rushed to take over the administration of the District before President-elect Thomas Jefferson's administration came to power. As Pulitzer Prize-winning historian Constance Green points out, the Federalists neglected to give the franchise to District residents when legislating the takeover. After the Federalists left office, attempts were made immediately to rectify the problem. Unfortunately, as the fight to retrieve suffrage for the District residents began in February 1801, the measure was lost in the shuffle of the Jefferson-Burr electoral college deadlock controversy which plagued that particular Congress. Since that time, there have been more than 150 attempts to provide representation for the District. Most of these measures have also been victimized by what was then considered much more pressing business before Congress.

So, Mr. President, it seems to me that we must realize that circumstances have changed. There is no longer the question concerning the harassment by citizens of the Nation's Capital, as was the major reason for the creation and concern for independence of a Capital City, as expressed earlier in my remarks, by President Madison.

Also, I emphasize again that our Founding Fathers did not desire—it was not in their thoughts—that the residents of the Capital City would not have a chance to be heard and represented in the Congress of the United States.

We must not overlook a very basic reason why the District failed to receive representation in the early years of the Republic. Its population was simply too small. In 1801, the District had only 14,000 residents, far fewer than the 50,000 required of territories that wanted to enter the Union at that time. Quite naturally, such a small population could be easily overlooked. Yet, during the 1801 debates on District suffrage, many Members of Congress spoke of providing representation for the District when its population reached the appropriate size.

Today, the population of the District is entirely appropriate for representation. Given its size alone as criterion, representation is essential. The District's present population is larger than 7 of the 50 States in the Union—and larger than that of any of the original 13 States during the first years of the Republic.

Finally, I must state what to me is the most important consideration in this discussion. There is nothing more abhorrent to the American people than the idea of taxation without representation. One of the fundamental principles enunciated by our Founding Fathers was the firm belief that those citizens who contributed to the public coffer should and would have the right to elect their leaders. Over 200 years ago, the injustice of taxation without representation served as one of the major elements which drove our forefathers to revolution. We will fail to be consistent with the dictates of our forefathers if we do not provide representation to a portion of our citizens who are law-abiding taxpayers.

So let us put an end to this glaring contradiction in our philosophical principles. Let us not make a mockery of our democracy. We have the means by which to make the dreams that our forefathers fought and died for a reality. It is a basic premise of our system of government that each deserves a chance to be heard and to express his or her political views through a freely elected representative or representatives. That is all the citizens of the District are asking. The irony of these proceedings is that they have to take place at all. Therefore, it is our responsibility and duty as members of the most democratic governmental unit in the world to correct this wrong, through the immediate passage of House Joint Resolution 554.

Mr. PELL. Mr. President, will the Senator yield for a question?

Mr. BAYH. I yield.

Mr. PELL. I have long been interested in this subject. I notice that originally, a substantial part of what is now Virginia, on one side of the river, and the District of Columbia, on the other, were in a 10-mile square. Then, some years ago, the part that was residential, which was on the other side of the river, was ceded back to Virginia as Arlington County.

I often have had the thought that the Federal Triangle itself obviously should not be under any State's rule—the Federal Triangle being that section bounded by the State Department, the Lincoln Memorial, and the Capitol—but that the rest of the area is really a residential city. It is not much different than the situation between Chevy Chase, Md., and the suburb on this side of the border. If it were part of Maryland, for example, it would then be the largest city, I guess, in Maryland. It would be Washington, Md.

Why was the idea never taken seriously of having it become part of Maryland? With the huge affectionate regard for the proponent of the bill, I am sure he can satisfy my curiosity.

Mr. BAYH. It seems to me, that the most immediate response or direct response is to say that there is no way I think of that we can constitutionally do this without the concurrence of the State of Maryland, and from talking with Members of Congress as well as the State government in Maryland they like things as they are now. They view the District of Columbia as a city within its boundaries and see no reason why they should suddenly have to assume responsibility and consider this as a part of the State of Maryland.

Mr. PELL. Have they ever been directly asked if they are interested in doing this?

Mr. BAYH. They certainly have been indirectly asked, and the response has been as I suggested to my friend from Rhode Island.

Mr. PELL. Will there be an amendment offered to that effect mandating its return to Maryland as the largest city in Maryland in the course of this debate?

Mr. BAYH. There is nothing to prevent anyone from doing that. I understand that is one of the proposals before us and that such a proposal will be offered. I do not know whether it is possible really to cut the heart out of a body and have much left. It seems to me most of us who have come to this city and many of our constituents who find themselves coming for the first time have come to think of the District of Columbia as more than just a Federal triangle but indeed as a geographical area that incorporates the entire city of Washington, D.C.

Mr. PELL. But what is the difference, for instance, between Wesley Heights, to take a very high income area, and Chevy Chase next door; or on the other side of Maryland between southeast Washington and the line over into the Maryland frontier? Would that not be the same?

Mr. BAYH. I suppose that is the difference between East Chicago, Ind., and Chicago, Ill. There is a boundary line separating it, and that is the distinction that exists right here.

Mr. PELL. It would still leave the Federal triangle. And basically should not the Federal buildings be a separate Federal establishment? And it would give the other people the right of representation. This could be one way to give them representation.

Mr. BAYH. I point out to my friend from Rhode Island when our Founding Fathers established this as a capital city, if one is to look at what happened then, they did not just establish a place that should be the Federal city and say this is where the Federal buildings are. But they envisioned this as a viable city, a capital city with people who work, have businesses, and have transportation lines, and homes. The essential establishment of the Nation's Capital was not an establishment of the Nation's Federal buildings but the Nation's city.

Mr. PELL. Maybe the Senator is much more steeped in this subject than I am and knows much more about it. Can he enlighten me why it was the Virginia side was returned to Virginia as Arlington County?

Mr. BAYH. The basic Federal structure alluded to earlier by the Senator from Rhode Island existed on the other side of the river plus there was no disagreement on the part of the State of Maryland to that retrocession.

Mr. PELL. In other words, the real crux of the problem, I guess, is that there is disagreement now and Maryland does not want it back. Is that not the essence of the problem?

Mr. BAYH. That is right, plus the reason I get really enthused in my support of this, just as I got enthused in my support of——

Mr. PELL. Many good causes.

Mr. BAYH. I thank the Senator. One was the measure championed and voted on earlier by my friend from Rhode Island who has done such an exceptional job in the area of education.

But I do not know how we can say that the citizens of the District should have the right to vote for President but they should not also have a chance to vote for Members of Congress, who vote and work on those same issues that are legislative in nature and also part of the President's program. And the reason I did that, as a citizen from Indiana and a member of the State legislature when I was the principal sponsor for ratifying the 23d amendment, was that this is partially my city. This city belongs to Indiana, to Rhode Island, to Virginia; it belongs to the whole United States of America. Having said that that does not mean that the people who live here should be second-class citizens and should have to pay taxes and see their sons die on the battlefield and not have a chance to be heard in the debate that supports that kind of war.

Mr. PELL. That is a good point. For example, in the Vietnam war, black Americans unfortunately made up a disproportionately high percentage of draftees.

Mr. BAYH. If one is to be consistent here we are talking about the District of Columbia had more deaths in Vietnam than 10 States.

Mr. PELL. And more population than seven States.

Mr. BAYH. They pay more taxes than 11 States.

Mr. PELL. And more people than seven States.

Mr. BAYH. And more people than seven States.

I am not to sure there is a correlation there on the question of race at all. But that it seems to me, I say to my good friend from Rhode Island, is not really the argument here. Regardless of the color of the people who live here, regardless of the income bracket, indeed, regardless of the size of the population, all three of which are represented on that chart back there, the question before us is whether there should be citizens of any color or any ethnic group, any income bracket living in a State of any size or geographical entity of any size that just plain do not have the right to be represented when their tax dollars are being apportioned, when their educational programs are being decided, when their warmaking capacity is being decided. That, it seems to me, is the basic equity that we are trying to resolve here.

Mr. PELL. I could not agree with the Senator more that they should be represented, particularly as they have not gotten a square deal very often in the past and, for that reason, they have an extra right to be represented.

As the Senator pointed out, if Maryland does not want to do it, it would be a very hard row to hoe.

Mr. BAYH. To be brutally frank that is the question. You can argue the theory and, indeed, as I argued sometime ago, that was the kind of practice that was envisioned early on in the history of our Nation. But because the laws were changed in times past and efforts to restore the francise failed, we have now gotten to the place where the State of Maryland does not want to return to that.

I think we have a lot of history which has passed where we have a lot of people out in the hinterlands who say, "That is our capital and that belongs to us and our 5.5 million people, the District of Columbia, as much as it does to the State of Maryland. Why give that city away?"

From a practical standpoint, I say the fact that the State of Maryland would rather remain separate and apart in their own characteristics now is the answer to the question.

Mr. PELL. I thank my colleague.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. BAYH. Yes, I would be glad to yield.

Mr. SCOTT. Will the Senator yield for a question?

Mr. BAYH. I yield.

Mr. SCOTT. I was interested in the remarks the Senator made with regard to the number of soldiers who died on the battlefield. Certainly we would be in complete agreement that we hate for any American youth to die in combat. We would be sympathetic with the family of those people. But is that the basis for determining representation in the Senate? The distinguished Senator from Indiana is chairman of the Subcommittee on the Constitution, where I am privileged to serve as the ranking Republican. I believe we both know that we are here representing our respective States, and we know the history of the fact that people were killed on the battlefield does not bear a relationship to representation in the Senate.

Each State has two Senators. I do not follow the logic of people being killed on the battlefield—people from every part of the country, almost every family group, have had someone who was lost in one battle or another, and I just do not follow the logic. Maybe the distinguished Senator would enlighten me on that.

Mr. BAYH. I will be glad to try to do so for the Senator from Virginia. I think enlightenment is not necessary because I am sure he is enlightened on that subject. Persuasion is something I shall try.

Mr. SCOTT. We will agree that representation in the Senate is based upon representation from our State, two Senators from each State; is that not right?

Mr. BAYH. That is accurate.

Mr. SCOTT. I do not want to pursue the matter. The distinguished Senator and I had a private understanding that we would disagree when we felt it necessary but we would not be disagreeable in this debate. I do not think there is anything wrong with publicizing that phase or any phase. That is the only agreement I believe we have.

Mr. BAYH. I would be glad to pursue this as long as the distinguished Senator, my friend from Virginia, cares to pursue it.

I would just like to point out that there is no question about how representation in the U.S. Senate was originally established. He is accurate. It depends upon representation in a State in question.

But the argument and the philosophy supporting the Senator from Indiana and those trying to persuade our friend from Virginia about the wisdom of this case are based on how we look at rights of American citizenship. One of the basic rights of American citizenship since the days of the Stamp Act and the Boston Tea Party, and all those other horrendous abuses that were imposed upon our Founding Fathers, was that a citizen of this country had the right to have a voice in governmental policy that affected his or her life. We went through half of the history of the country before we gave more than half of the citizens the right to vote. Finally we decided that was not right; that although the women had helped win the Revolutionary War, it was not until the success of the suffrage movement that we finally gave women the right to vote.

So it was with young people, the teenagers, who were paying taxes and dying in battle. We suddenly realized this was not equitable. Those people were being affected by governmental policy, yet they did not have a vote, so we gave them that.

It seems this is a logical extension of that same rationale.

Now, my friend from Virginia and I disagreed rather vigorously on what should have happened in the Panama Canal debate. No matter how you felt about the Panama Canal, if you lived in the District of Columbia, whether you were for or against the treaty, you did not have a right to express yourself to anybody. There was not anybody who could have represented how you felt. No matter how you stood on the issue you did not have a voice in this policy.

The battle we fought yesterday on tuition tax credits, I do not know where my friend from Virginia was on this matter. He and I may have been on opposite sides or the same side. But the people who live in the District of Columbia had no way of expressing themselves. We voted for that. We rammed it down their throats, and they pay for the policy. That just is not equitable, it seems to me, and that is why I feel so strongly about it.

Mr. SCOTT. I can understand the distinguished Senator's point of view, but

we are in disagreement. I think the distinguished Senator from Indiana represents the people from the District of Columbia. I think 100 Senators represent the people of the District of Columbia. If we accept the concept of the Federal city that formed the basis for the formation of the District of Columbia, then all of us represent the Nation's capital. I believe that is what this debate is all about, whether or not we should have a neutral city where we can debate the issues concerning the entire country free of the control of any State, where the Congress has exclusive jurisdiction.

I do not see that circumstances have changed since the Federal city concept was arrived at. To me this was good when it was decided at the Constitutional Convention, as it was explained in the Federalist Papers, and this is the basis for having the capital city. They do have the right to vote at all levels of Government. They have an elected representative or delegate in the House of Representatives. They do not have representation in the U.S. Senate, but they are not a State, they are a city. The city of Indianapolis as a city does not have any representation. The distinguished Senator represents the entire State. But I am saying that he and I and the other 98 Senators all represent the District of Columbia and we are interested in the welfare of the District of Columbia.

I have lived here in this area since 1935, since I was a teenager, and I am familiar with many of the problems of the District of Columbia, and I am sure the distinguished Senator from Indiana is familiar with many of the problems. But that does not mean we should give them two Senators. Guam does not have two Senators, the Canal Zone, when it was part of the United States, did not have two Senators; Puerto Rico does not have two Senators. This is not a territory; it is a Federal district, and it was never contemplated in the formation of our Nation that it would have two Senators. To me that is the basic objection which is the representation in the Senate.

As I understand, under the concurrent resolution the people of the District of Columbia would have the same right as the people of a State in determining whether further amendments to the Constitution would be ratified or not.

We have some basic differences, but certainly I am glad to have and appreciate the point of view of the distinguished Senator from Indiana. I just feel that history and the Federal city concept are contrary to the views that are being expressed by the distinguished Senator.

Mr. BAYH. Mr. President, I appreciate hearing the thoughts of my friend and colleague from Virginia.

I think it is important for us to understand what we are talking about here.

We know that traditionally we have three levels of government in the United States of America. We have our national government, that has certain functions, certain obligations, and determines certain policies.

We also have the State level of government, which has different responsibilities and different functions, and establishes different policies.

And we have a third level of government, the local government, which has certain functions and certain responsibilities, and establishes certain policies.

Now, the District of Columbia has a district local government that fulfills certain responsibilities and establishes and carries out local authority, local government for the citizens who live here.

Citizens who live here now can vote for their mayor and their city council, so there is no taxation without representation. The citizens of the District now have the right to vote for President, so there is no taxation without representation there.

We are saying that at the national level, just as the citizens of the District have the opportunity to vote for President and to participate in that part of the national policymaking adventure, we now suggest that they should have a similar opportunity to vote for Representatives and Senators, so that they can have a voice in determining legislative policy and participate in that part of the national adventure of Government.

So I think it is very clear that those decisions that are made by this body affect the lives and affect the economic well-being of the citizens of the District of Columbia. They cannot vote for any of us here. If they do not like what we do, there is no way they can change that representation.

What we are saying is, give the citizens of the District of Columbia, not the right to set up a State capital, not to have State legislatures but at least to have two Senators and the appropriate number of representatives that the population would suggest, so that they can have a voice and a vote in determining legislative policy. Then, if they do not like the way those legislators vote, they can do the same thing to them that our constituents at home can do to us. That is what we are after.

I was involved in a discussion that is very close to one of the concerns expressed by my good friend and colleague from Virginia when he rose a moment ago, and that is to point out that there were two problems, two basic concerns that existed, that were primarily responsible for creating a separate entity. One was the security question.

I do not believe anybody really is very concerned that there are going to be any marches on the Capitol Building against which we are not going to be defended. We may disagree, depending on whether you are on the right side of the political spectrum or whether you are on the left side of the political spectrum, or whether we will march down the avenue supporting equal rights for women or whether we will march down the avenue protesting the war in Vietnam, or participate in some of the marching we have had here by farmers protesting what has happened to farm income. Those citizens have had the right to petition, and they have not become a mob; and those who did get out of line ended up in jail.

So that business of suggesting that we are going to have a repeat of the Philadelphia situation, where the early members of the legislative branch of this country were fearful for their lives, is not about to be repeated. And the suggestion that that reason, which was a very real reason in the 1700's, exists in the latter part of the 20th century, is to suggest facts that frankly are not apparent to the Senator from Indiana and I think are not apparent to anyone who might wish to examine the facts as they exist, whether you are for or against this amendment.

Now, there was another reason, of course, that was considered by the Founding Fathers, that I think made a lot of sense if you look back that long ago. And I think that same reason can be used to distinguish the way in which we address ourselves to Guam—the Senator from Virginia mentioned Guam—and that is the very size of the entity involved.

Back in those days, there were very few people living in the District of Columbia. Its population was simply too small. In 1801, the District had only 14,000 residents, far fewer than the 50,000 required of territories that wanted to enter the Union at that time. Quite naturally, such a small population could be easily overlooked. Yet, during the 1801 debates on District suffrage, many Members of Congress spoke of providing representation for the District when its population reached the appropriate size.

Many of us search in vain, or at least we search, for what our Founding Fathers really means when they established this Federal city. One of the things they were concerned about was that the District not receive representation until it got large enough to do so. At that time, it was too small relative to the population requirements necessary to come into the Union as a State. We certainly cannot say that now. There are more people in the District of Columbia than live in seven of the States. So the size question, it seems to me, has disappeared. The size of the District of Columbia is entirely appropriate for representation today. Given its size alone as criterion, representation is essential. We need to understand that the District's present population is larger than that of any of the original 13 States during the first years of the Republic.

Moreover, it is rather clear that our Founding Fathers, those people concerned when they set up the Constitution, with creating the Federal district for the Nation's Capital, intended that when the District became large enough, it should receive representation.

I would think that consideration would encourage those who are searching for the Founding Fathers' intent to support this resolution.

Finally, Mr. President, I must state what to me is the most important consideration in this discussion. There is nothing more abhorrent to the American people, as I said earlier, than the idea of taxation without representation. One of the fundamental principles enunciated by our Founding Fathers was the firm belief that those citizens who contributed to the public coffer should and

would have the right to elect their leaders. Over 200 years ago, the injustice of taxation without representation served as one of the major elements which drove our forefathers to revolution.

We have had over 200 years of injustice, and the time has come to put that injustice behind us. The best and quickest way to do that is to join in the immediate passage of House Joint Resolution 554.

Mr. McGOVERN. Mr. President, I commend Senator KENNEDY and others for their leadership in this effort. I think it rights a wrong that should have been righted years ago. It reflects the sense of justice of the American people and the Congress of the United States, and I hope the effort will succeed.

I join in the bipartisan effort to provide for representation of the District of Columbia in the Congress of the United States. Such a move in the form of a constitutional amendment reflects the sense of justice of the American people, a people whose very beginning was forged in the struggle for fair representation.

During this debate, a litany of facts will necessarily be reviewed: facts which reveal the extent to which Washingtonians pay taxes, fight in wars, and defend the Nation. The numbers will reveal the equity of this move and the inequity of enduring both conscription and taxation without representation. This amendment will help right a longstanding wrong. The denial of this basic right must not go unresolved.

But in addressing this flaw in our representative system, we are doing more than acknowledging the statistical truth of the District of Columbia's case.

We are also recognizing the historical and culture uniqueness of the District of Columbia as a community, and as a city filled with people who are as strong and patriotic as any Americans.

Furthermore, we are bearing witness to basic human rights and our devotion to participatory democracy. In our political system there is simply no matter more basic, no right more sacred, than the right to have one's voice heard and one's case made by someone of his or her choice.

Aristotle said:

> Democracy arose from men's thinking that if they are equal in any respect, they are equal absolutely.

It is not too late in our history to further extend this ideal. That is why I want to lend my voice to those supporting this joint resolution leading to full representation for the citizens of the District of Columbia.

Mr. BROOKE. Mr. President, I am deeply pleased to speak in behalf of House Joint Resolution 554 and to reaffirm my deep commitment to the achievement of full voting representation in the Congress for the citizens of our Nation's Capital, the District of Columbia.

My enthusiastic endorsement of House Joint Resolution 554 is based primarily on fundamental concepts of liberty and justice. But my support and interest are also intensely personal. For my roots are in Washington, D.C. I was born and raised here. I attended and graduated from Dunbar High School and Howard University. And for as long as I can remember I have fought, along with family, friends, and colleagues, to attain the goal of providing for the citizens of the District of Columbia the same rights and privileges that other citizens throughout the Nation have enjoyed.

Over the past decade I have worked closely with a number of congressional allies, including D.C. Delegate WALTER FAUNTROY, Senator CHARLES MCC. MATHIAS, Senator EDWARD KENNEDY, and Senator BIRCH BAYH, to make this goal of full representation a reality. And thus it is with great pleasure that I take this opportunity to commend the House of Representatives for passing on March 2, 1978, House Joint Resolution 554. The passage of House Joint Resolution 554 is a testament to the leadership and dedication of many individuals, in and out of the Congress. But, in particular, I want to single out for praise the work of WALTER FAUNTROY and the broad bipartisan coalition that supported the House measure.

The proposal before the Senate, House Joint Resolution 554, would enable D.C. voters to elect two Senators and the number of Representatives in the House (probably two), to which the District would be entitled on the basis of population. Each Senator or Representative would be an inhabitant of the District, and would possess the same qualifications as to age and citizenship and have the same rights, privileges, and obligations as other Members of Congress. The amendment would provide for the full participation of the District of Columbia in the constitutional amendment process and in the Electoral College. And finally, the Congress would have the power to implement this amendment by appropriate legislation.

Nearly 200 years after its adoption, the U.S. Constitution has been amended but 26 times. Clearly, any proposal for amending the Constitution deserves careful and serious study and debate. However, proposals for granting D.C. voting representation in the Congress have been very thoroughly discussed and researched over the years. It seems useful to review briefly at this point the long history of efforts to achieve full voting representation in the Congress for the District. Thus we can rebut the contention, all too frequently raised as an excuse for inaction by opponents, that somehow we need time "for further study of legal ramifications" or whatever, of granting D.C. voting representation in the Congress.

From the beginning of the 19th century there were advocates of national representation in Congress for D.C. residents. One of the first was Augustas B. Woodward, who wrote a series of articles, published in the National Intelligencer between 1801 and 1803, in which he decried the pitiable state of those citizens residing in the District of Columbia who were subject to taxation without representation. Another ardent supporter of D.C. representation over the years was Theodore W. Noyes, a native Washingtonian long associated with the Washington Star, serving as its editor from 1908 to 1946. In the fourth of a series of articles, appearing early in 1888 and focusing on "some of Washington's grievances," Noyes outlined the political plight of the citizens of the District and proposed that a constitutional amendment be adopted to grant them voting representation in the Congress. On May 15, 1888, Senator Henry W. Blair introduced a joint resolution incorporating Noyes' vision, and this has been generally designated as the first amendment proposal introduced to provide D.C. voting representation. Literally hundreds of joint resolutions have been introduced in the subsequent years since the 50th Congress back in 1888.

And there have been dozens of hearings on the issue of D.C. representation in Congress. The first such hearings date back to 1916. The prophetic testimony of Theodore Noyes at that time still rings true. At one point Noyes was arguing that election of local officials in Washington, or of a nonvoting delegate to Congress, would not be sufficient. Rather, according to Noyes, full representation in the National Government constituted the "genuine American political birthright." Noyes stated, in part, at those first hearings on D.C. voting representation back in 1916:

> If Washingtonians are political slaves now they will still be political slaves after they have the power to elect a voteless delegate, or even District commissioners or any other municipal officials, if the exclusive power of legislation under the constitutional provision still remains in a Congress not elected by them and in which they are not represented. Their chains may be made a little lighter and may not clank so loudly; they may be granted by kind masters a greater freedom of movement, but they are not free. The power to take away their property, their freedom and life itself is in others not chosen by them and to whose rule they have not assented. There is no self-government when the power to tax one, to imprison one, and to send one to war is not in one's self or in those to whom one has voluntarily confided it as one's representative.

And there have been many more hearings since 1916. The Senate held hearings in April, the sixth such endeavor just since 1970. The House Judiciary Committee of course held hearings this year and in 1975, the Senate Judiciary Subcommittee in 1974, the House again in 1971, and the Senate in 1970.

While we are all familiar with the successful effort in the House this year, we may be less familiar with the episode in the Senate during the 86th Congress when D.C. representation was debated and endorsed. During floor debate on another constitutional amendment proposal, Senator Kenneth Keating offered a floor amendment, establishing a framework for ultimate D.C. voting representation in the Congress and also providing for Presidential electors from District of Columbia; the Keating amendment was approved by vote of 63 to 25. The vote on the tripartite resolution (which included segments authorizing Governors to fill temporary vacancies in the House and another abolishing tax and property requirements for voting as well) was 70 to 18, more than the necessary two-thirds. However, the House Judiciary Commit-

tee reported a much amended version of the resolution, containing the language ultimately incorporated into the 23d amendment. The sections relating to abolition of the poll tax and the filling of House vacancies were entirely deleted, and the remaining section addressing D.C. suffrage was watered down by elimination of any provision regarding congressional representation.

Without a doubt, there has been a very lengthy history of efforts to grant D.C. voting representation in the Congress. Mr. President, I would submit that what we need is not more study and talk, but speedy congressional action.

A fundamental concept of democratic political thought is that of consent. Thus the obligations of citizenship can be imposed legitimately only via "the consent of the governed." In the American context this exercise of consent often occurs through elected representatives in the Congress. The American Revolution was fought so that basic rights would be accorded the citizens of the American colonies. "No taxation with representation" was the rallying call of those who struggled for a free Nation. Participation in and control of the political process of the country by its citizens is a fundamental precept of democracy.

It seems almost inconceivable that in 1978, with memories of our Nation's Bicentennial fresh in mind, we find democracy flaunted with respect to the citizens of Washington, D.C. The plight of the citizens in the District, sadly, is more akin to that of a subjugated, colonial people. The situation with respect to voting representation for the District, instead of serving as an example of democracy for the rest of the country and indeed of the world, provides an outrage of inequity.

Mr. President. the U.S. citizens residing in the District of Columbia have all the obligations of American citizenship. They must pay taxes, defend the country in time of war, and obey the law. However, this sizable group of citizens, exceeding the population of seven States, do not have representatives in the House or Senate who can meaningfully express the consent or dissent of the D.C. residents by vote on the floor of Congress. This condition has applied to residents of the District since 1800, when Federal jurisdiction over the seat of the National Government was officially effected. Prior to that time, the eligible male residents of the Virginia and Maryland portions of the District of Columbia voted for U.S. Senators and Representatives in their respective States. But in 1978, the District of Columbia has no one exclusively advocating its interest in the Senate. Although several of my colleagues and I are concerned with the District, our primary interests and responsibilities, necessarily, lie elsewhere. Likewise, despite the noble efforts of D.C. Delegate FAUNTROY in the House, in the final analysis, the District is relatively powerless there as well since its interests can not be directly defended in critical floor votes.

It is my conclusion that lack of provision in the Constitution for D.C. representation is something of an historical accident. In the larger context of setting up a whole new Government for the Union, the status of the District of Columbia was not one of the major problems facing the delegates to the Constitutional Convention. Hence it is not surprising that the issue of D.C. representation is nowhere mentioned in the records of those debates. Moreover, the area ceded by Maryland and Virginia to become the Nation's Capital had few residents, and from 1789 when the Constitution was adopted, to December of 1800, when the "exclusive legislation" authority of the Congress took effect, those who lived within the portions of Maryland and Virginia that were to become the District of Columbia retained their political rights as citizens of those two States. It was only after 1800 that the disenfranchisement of citizens living in the District became a reality, and the efforts to reverse the situation began.

In recent years we have made substantial progress in broadening the base of representative government and extending the franchise in the United States. But this glaring piece of unfinished business remains. Fundamental concerns of justice and equity demand that the residents of the District of Columbia at last be granted the right to elect their own voting representatives in the Congress.

Mr. President, in closing, I might note that it required but 286 days for the requisite 39 States to ratify the 23th amendment to the Constitution, providing for D.C. participation in the Electoral College. Equally prompt action at the State level might reasonably be anticipated with respect to D.C. voting representation in the Congress. But before the States can have the opportunity to ratify such an amendment, granting voting represenation to 700,000 citizens of the District of Columbia, a proposal must of course be approved by a two-thirds majority in the Congress. The first step has been taken. The House has already acted. Now it is our turn. Therefore, I urge my colleagues to expeditiously and favorably take the necessary second step in the amendment process.

AMENDMENT NO. 1756

Mr. CURTIS. Mr. President, I send amendment No. 1756 to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. BAYH). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes amendment No. 1756:

Strike out all after the resolving clauses and insert the following:

That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE —

"SECTION 1. In exercising its powers under article I of the Constitution, and in particular its powers to lay and collect taxes, duties, imposts, and excises and to enact laws making appropriations, the Congress shall seek to assure that the total outlays of the Government during any fiscal year do not exceed the total receipts of the Government during such fiscal year.

"SEC. 2. No later than the twentieth day after the close of each fiscal year, the President shall—

"(1) ascertain the total receipts of the Government during such fiscal year, not including any receipts derived from the issuance of bonds. notes, or other obligations of the United States, and not including any receipts from any income tax surtax imposed under this article;

"(2) ascertain the total outlays of the Government during such fiscal year, not including any outlays for the redemption of bonds, notes, or other obligations of the United States; and

"(3) if the total receipts described in paragraph (1) are less than the total outlays described in paragraph (2), determine the percentage rate of income tax surtax, to be imposed as provided in section 3, which is necessary to provide an additional amount of revenue equal to the amount by which such total receipts are less than such total outlays, and transmit to the Congress, by special message, the rate of income tax surtax so determined.

"SEC. 3. Subject to the provisions of section 4, an income tax surtax, at the rate determined and transmitted by the President under section 2—

"(1) shall be effective for the calendar year following the close of the fiscal year with respect to which the determination was made, or for so much of such calendar year for which such surtax is not suspended under section 4, and

"(2) shall apply, as an additional income tax for the period for which it is in effect, with respect to the income tax liability of each taxpayer which is attributable to the portion or portions of such taxpayer's taxable year or years which fall within such period.

The income tax liability attributable to a portion of a taxable year falling within a period shall be based upon the ratio of the number of days in the taxable year within such a period to the total number of days in the taxable year.

"SEC. 4. In the case of a grave national emergency declared by Congress (including a state of war formally declared by Congress), the income tax surtax which would otherwise be in effect for a calendar year under section 3 may be suspended for such year, or a portion thereof, by a concurrent resolution, agreed to by a rollcall vote of three-fourths of all Members of each House of Congress, with such resolution providing the period of time, if less than the whole calendar year, during which such surtax is to be suspended.

"SEC. 5. This article shall apply with respect to the first fiscal year beginning after the ratification of this article and each succeeding fiscal year.

"SEC. 6. The Congress shall have power to enforce this article by appropriate legislation."

Mr. CURTIS was recognized.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. CURTIS. I am happy to yield.

Mr. ROBERT C. BYRD. Will he allow me to ask for the yeas and nays on his amendment?

Mr. CURTIS. I certainly will. As I stated before the Senator came in, this amendment is not offered as any delay of the D.C. representation bill. I am offering it because I think it is the most important constitutional amendment we might consider. Therefore, it is not to delay. I should be happy to have a time fixed for a vote tomorrow, early—say by noon. I mention that for the distingushed leader to consider, that he might know what we have in mind.

Mr. ROBERT C. BYRD. I appreciate that and I appreciate the willingness of the distinguished Senator to have a vote at a time certain.

If he is interested in having the yeas and nays on his amendment, perhaps we can get those yeas and nays now.

Mr. CURTIS. I have no objection.

Mr. ROBERT C. BYRD. It will not waive any rights of any Senator, and at least, Senators will know that a vote is going to occur, one way or the other, on the amendment.

Mr. CURTIS. I have no objection.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield again?

Mr. CURTIS. I am happy to yield to the Senator.

Mr. ROBERT C. BYRD. I beg the Senator's pardon for asking him twice, but I thought in view of the fact Senators may stay around thinking a rollcall vote would occur tonight, if agreeable with all Senators present, we could alert the respective cloakrooms to notify Senators that no rollcall votes are anticipated tonight.

Mr. CURTIS. That is very agreeable to me.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I make that statement, that there will be no rollcall votes tonight. I again thank the Senator.

Mr. CURTIS. Mr. President, I wish to state for the managers of the bill that this amendment is not offered for the purpose of delaying the proceedings. I offer it in the firm belief that it is the most important constitutional amendment which Congress could consider.

Rampant inflation is reaching dangerous proportions. One of the basic causes of inflation is the deficit spending. This proposal is a constitutional amendment which would compel the Congress to balance the budget each year. We would go on a pay-as-you-go basis.

In support of the statement that I have no desire to delay these proceedings, but I am only offering it on the basis that we should consider it as it will meet a very urgent need, I want to state that as far as this Senator is concerned I would be willing to agree to a reasonable time at which we might vote on this tomorrow, since it is now past 5 o'clock.

Mr. President, in support of my amendment in the nature of a substitute, I wish to speak about the finances of the U.S. Government.

Expenditures and taxes are astronomically high. In spite of the heavy burden that our taxpayers must bear, the U.S. Government runs a huge and inexcusable deficit of about $50 billion. This cannot go on.

Mr. President, if we look at the rising deficits of the past several years we can see the basic cause for the inflation. All prices go up and up, and many wages and salaries follow. The income of many people is more or less fixed, and they have no way to cope with the near uncontrollable inflation now rampant in this country. When we consider the effects of this inflation on life insurance programs, on pensions, and other values, it is no less than frightening.

Mr. President, while it is vitally necessary that we practice economy in every activity of the Government, it is equally important that we look at the basic cause of the great increase in the budget of the United States. The budget for the current fiscal year calls for spending in a total sum of $459 billion. Compare this with the amount of the budget for the last full fiscal year of the Eisenhower administration of $92 billion. We cannot blame this on defense costs, neither is this great increase caused by expenditures for the necessary functions of Government. It cannot be blamed upon the development of our natural resources. The cause of this huge budget is basically the welfare state. The cost of governing and regulating and policing is not what is bringing about the huge expenditures. It is that role of the Government which can best be described by the word "provide."

Much of the legislation involving the welfare state which is now so costly was enacted in the thirties and forties. Many additional programs were enacted in the period of 1961 to 1969. Here is what these programs are costing this year: Food, $8.955 billion; housing, $6.8 billion; education, $19.6 billion; assistance to local and State governments, $81.17 billion; medical and health programs, $56 billion; unemployment compensation, $10.6 billion; and retirement and disability, $122.44 billion.

Mr. President, bills are introduced in this body and speeches are made to add to the welfare state. For instance, let us look at the medical field. We have medicare for the aged, and we have medicaid for the poor. The drive for national health insurance results, then, in a drive to have the Government pay the medical and hospital bills of individuals who are neither aged nor poor. The Federal Government cannot take on such a burden. Furthermore, private insurance and labor contracts have taken care of a great portion of the problems and those programs are increasing day after day. If we were compelled to balance the budget each year, programs costing billions and billions of dollars would not be enacted. It would stop the expansion of Government.

Another example relates to the field of education. There are many proposals for new educational programs, including one that passed this body yesterday, but let us look at what has happened. In my State of Nebraska, the Federal Government pays estimated 10 percent of the total cost of all education in the State, yet the Federal Government comes near exercising 100 percent authority in running our schools. It has not been a good deal for the taxpayers or the students.

The welfare state has failed. It costs more than we can pay. It does not meet our problems. We have had public housing for decades; we have spent billions and billions of dollars on public housing. The need for housing is perhaps greater now than it ever was. Once the Federal Government subsidizes a housing project in a community, the community then becomes eligible for an additional grant in aid for schools because the public housing is not taxed. It results in a viscious cycle.

Mr. President, when are we going to return to the basic principle that the Government should not provide the things that individuals need when they are not victims of ill health, disaster, or advanced age, but rather, it is the responsibility of the Government to maintain an economic system that provides an opportunity for the ablebodied to produce, earn, and acquire the things they need. There are those who say it cannot be done. I refuse to accept the premise that self-government and individual freedom and private enterprise are so deficient.

Mr. President, we should, with great care, weigh every proposal that comes before us in this year and in all future years. The voices of error are rampant in the land. Some of these voices are found in government. The Director of the Congressional Budget Office, Ms. Alice Rivlin, has been quoted by the press as favoring increased expenditures and increased tax reduction, which would mean an increased deficit. The press states that her reason is to spur the economy. Mr. President, if increasing spending and enlarging the deficit would spur the economy in any true sense, we would not have an economic problem in the United States. We must realize that big government has failed.

Winston Churchill said you cannot unscramble eggs. This statement embodies a great truth. We cannot, and I do not advocate it, abolish all of these programs which I have labeled as the welfare state. We should stop enlarging the welfare state. There are some programs that ought to be ended, there are others that should be drastically changed, and we need to establish some priorities.

Among the social programs that, in my opinion, must have a high priority are those where we have a moral obligation to fulfill the Government's commitment. Social security was enacted to provide a retirement benefit for our people. We should confine it to such a program. Millions of individuals have paid and paid into the social security program; we cannot fail them. The social security tax is going to be difficult. It will take a courageous Congress to collect enough revenue to pay for it. The alternative is repudiation of the Government's commitment to our people, and this is unthinkable.

On the subject of social security, I do feel that we should take a look at medicare being paid through the social security tax. Individuals of modest means are being taxed to pay the hospital and medical costs of individuals regardless of wealth and income if they happen to be 65 years of age. We should also take a look at the disability program and the survivor program to see what gradual changes can be made in our social security system that will meet the intended goal for retirement with tax rates that our people can stand.

Reducing the size of the Government is an enormous task. It calls for intel-

ligence, hard work, establishment of priorities, and above all, men and women of courage who are deeply concerned about the future.

No one objects to balancing the budget of the U.S. Government. Most people say, "not now." In the meantime, the programs grow and the problem gets worse. We need fiscal discipline in our system of government. Most of our States have a constitutional provision which either prohibits deficits altogether or limits them. We must have the same idea incorporated into our Federal Constitution.

Mr. President, we need a constitutional amendment to require a balanced budget and bring an end to deficit spending. The constitutional amendment that I have pending in this Congress is Senate Joint Resolution 26, and it is now offered as a substitute for House Joint Resolution 554.

This constitutional amendment is clear and understandable. It requires Congress to balance the budget. If Congress fails to balance the budget, a procedure is set up for an automatic surtax to go into effect the following year to recoup the deficit. It has a provision whereby, in time of war or a declared national emergency by Congress, the requirements of the amendment can be set aside a year at a time.

This constitutional amendment is a stern procedure; it does have teeth in it. If Congress spends more than the Government takes in, the taxes automatically go up. If Congress is faced with the alternative of reducing spending or increasing taxes, I predict that they will reduce spending. If Congress fails to reduce spending and everyone's tax is increased with a surtax of 3 percent, or 10 percent, or 20 percent, whatever is needed, the taxpayers will know about it, and they have a remedy at the ballot box. A constitutional amendment which is a mere declaration of a requirement to balance the budget and which is not self-enforcing will not do the job.

Mr. President, the public polls indicate that a majority of the American people want a balanced budget. A sizable list of our State legislatures have acted to bring about a balanced budget on the part of the Federal Government. There are other constitutional proposals that are pending. All in all, more than 120 Congressmen and Senators in this Congress have either introduced such a constitutional amendment or have cosponsored an amendment of their colleagues.

Mr. President, the amendment that I have offered is in the nature of a substitute for the pending House joint resolution providing for representation in the Congress for the District of Columbia. This substitute of mine is the same proposal as I earlier introduced and it is numbered Senate Joint Resolution 26. My amendment, Senate Joint Resolution 26, has 21 cosponsors. We had 23, but we have lost two by death. They are Senators BARTLETT, BUMPERS, DOLE, EASTLAND, GARN, GOLDWATER, HANSEN, HATCH, HATFIELD, HELMS, LAXALT, MCCLURE, ROTH, SCOTT, STENNIS, TALMADGE, THURMOND, WALLOP, YOUNG, ZORINSKY, and DECONCINI. The late Senators James B. Allen and John L. McClellan were also cosponsors of my amendment.

This resolution, when adopted, would put an end to deficit financing on the part of the Federal Government, except in times of war or when a grave national emergency has been declared by Congress. The discipline of a constitutional amendment requiring fiscal responsibility is essential for the economic well-being of our country and the full employment of our citizens.

Failure on the part of the Federal Government to bring spending under control can lead to very serious consequences. Disaster is not too harsh a word to describe what could happen if we continue to follow the course that we have followed for the last quarter of a century. Mr. President, we have had only one balanced budget since the fiscal year 1960, and that was in fiscal 1969.

These continuous deficits are most disturbing. They were disturbing when they amounted to $4, $5, or $6 billion a year or less. Americans who are concerned about the future of our country rightly raise the question "where are we headed?" This question is especially pertinent when we find that the deficit for fiscal year 1975 exceeded $45 billion and the deficit for 1976 exceeded $66 billion. The deficit for fiscal year 1977 is estimated as $68½ billion and the deficit for fiscal year 1978, which we are now in, is being estimated at as much as $70 billion.

It will be less than that, but still very high. At one time certain members of the Carter transition team have been talking of a $75 billion deficit.

Seldom can you find a Member of Congress or a President who will express opposition to a balanced budget. Their answer is "not yet." There is always an impelling reason for the claim that we cannot balance the budget now. Advisors to Presidents often convince a President that the budget cannot be balanced in his term, but when they get through with their "fine tuning" it will be balanced at the end of 4 years. Then at the end of 4 years, we start all over again with a new takeoff of astronomical deficits. We should ask the question "where will it end?"

I believe that a great boon to our economy will come when we embark on a continuous course of balancing the budget. If everyone knew that the U.S. Government had its finances under control it would create confidence at home and abroad. The potential of this country is tremendous. The possibilities are unlimited. I do not believe that private enterprise and self-government are failing theories. I believe that the future can be bright if we reverse that trend toward totally uncontrollable deficit financing.

Is there anything more conducive to investment and the providing of more jobs than the sure knowledge that the Government in Washington was and would continue to follow a responsible course, pay bills and maintain the value of its money?

There can be little dispute that continued deficit financing leads to inflation. Inflation is a cause of unemployment. When inflation is rampant, it takes all of the income of most of our citizens to provide the bare necessities of life for themselves and for their families. In the absence of inflation, wage earners, farmers, businessmen, and professional men have sufficient income to buy much more than the bare necessities of life. These additional purchases, whether they be carpets, draperies, radios, TV's, furniture, new houses, additions, automobiles, boats, ski equipment, pianos, music lessons, or dental services, set in motion a wide range of activities that means jobs for more people. It does not take a sizable proportion of our workforce to produce the bare necessities of life. Full employment can only come when the people can buy additional items, including luxuries. Every time there is an article sold, it means that someone had to produce the raw material, someone had to manufacture, transport, advertise, sell, finance, and insure the article. All of which means economic activity and jobs for individuals of all ages.

Again, Mr. President, I point out that inflation creates unemployment because when prices are so high the purchases on the part of most of our citizens are limited to the bare necessities of life, because that is all they can afford. It is when they buy beyond the necessities of life that it takes jobs and more jobs to produce the things that they buy.

Washington is infested with too many self-proclaimed experts who hold to economic theories that are erroneous. These individuals assume the role of "fine tuners." They believe that if they can add to the Government spending, increase the deficits and dissipate revenues, somehow at some future date business will pick up, and an economic utopia will be reached, and the budget will balance itself. They overlook many factors, including the results of their own self-created inflation and the record of Congress in always voting more expenditures. The "fine tuners" have a very bad track record. Their theories have not worked and the record is clear. These would-be experts who are bent on fine tuning and managing our economy should immediately be replaced with intelligent, tough budget balancers.

Mr. President, we should start now to advance a pay-as-you-go constitutional amendment. At the best it takes several years to get the constitutionally required two-third vote in both the House and Senate and have an amendment ratified by three-fourths of the States. This means that if the Senate passes this resolution in this Congress, its effective date will be down the road several years, so that Congress will have time to comply and bring the budget into balance.

Mr. President, a great many of the States have constitutional provisions against deficit financing and the creation of Debt. They vary as to form. These provisions in our State constitutions have been responsible in maintaining the solvency of those States. We need a similar discipline at the Federal level.

The resolution being introduced today is a simple and workable plan. Yet it is firm and effective. It mandates the Congress to balance the budget every year.

But it goes further than merely declaring for a balancd budget. It has an enforcing provision. This amendment provides that within 20 days after the close of the fiscal year the President is required to ascertain if there is a deficit—if so, how much? The President is required to calculate the amount of surtax necessary to recoup the deficit in the next fiscal year. This surtax would be an added percentage tax on the income tax of all individuals and corporations. It might amount to a surtax of 3 percent, or 7 percent or 20 percent, whatever the case might be. The surtax would automatically go into effect for the coming year. The President would not be empowered to impose the surtax; the surtax would go in automatically under the authority of the constitution.

Under this plan, the people of the country would know what direction we are headed, and Congress would know it, also. Congressmen and Senators would not like an announcement made on or about the 20th day of October that a surtax would have to be imposed on individuals and corporations because Congress had spent too much money. The adoption of this resolution will bring about the necessary discipline which will lead to a balanced budget. Some programs can be eliminated; others can be postponed. New programs will be looked at more realistically. The question will be asked of all programs—are they necessary or merely desirable? If Congress is faced with the choice of reduced spending or increased taxes, expenditures will be reduced. If not, the voters have a remedy at the ballot box.

It would be foolish to amend our Constitution so that we could not use our credit in order to defend ourselves in time of war. It would be unwise to amend our Constitution so that our country could not meet a grave national emergency that pledged our entire Nation. Therefore, the resolution provides that upon three fourths vote of both Houses of Congress, the requirements of the amendment could be set aside for a year at a time, whenever there was a declaration of war or a finding by Congress of a grave national emergency. If the war or an emergency extended beyond a year, there would be another vote every year if the requirements of the amendment were to be waived.

Mr. President, we are faced with a grave situation. If the U.S. Government is to return to a course of fiscal responsibility, it will require courage and the making of some hard decisions. There is no easy answer. I believe in our country and in its future. I believe that the rewards that will come to our republic if we regularly balance the budget will be very great. I hope that the Senate can move on this resolution very soon.

Congress has a new budget act. It is required to pass the first budget resolution early in the year; then the budget is finalized in two subsequent resolutions. Many Americans had high hopes that the budget reform act would bring spending under control in our Federal Government. A balanced budget was the goal that Congress sought.

This new budget procedure has its good points. Primarily, it has been worthwhile because it directs the attention of Congress and the public to the budget as a whole. It calls attention and brings an awareness of the alarming situation in reference to our finances. All this is good.

The congressional budget act has its shortcomings. It does not produce a balanced budget. Congress uses the budget procedure as a means of approving deficits in advance. The passage of the budget resolution presupposes that the deficits are necessary, unavoidable, and to many desirable.

Another failing of the budget reform act that makes it ineffective in bringing a balanced budget is that it depends too much on the attitude of the chairman and the members of the Budget Committee. It has no self-disciplining features. It has no built-in procedures that will compel reduced spending and a balanced budget. If the chairman and the majority of the budget committee favor increased spending for social objectives it very likely will go in the budget. If the majority of the budget committee believe that some tax action in reference to business is tax reform and loophole closing, such action is very likely to be incorporated in the budget, even though the proposed tax action is not real loophole closing and might lead to less enterprise and fewer jobs and would be an insignificant amount in attaining a balanced budget.

In actual practice, a budget resolution that accepts the principle of a huge deficit is bound to fail. If a resolution is passed which in essence OK's a $57 billion deficit, how are you going to successfully argue that the country would be better served if the deficit were cut to $55 billion, or that our country would be in great jeopardy if it were increased to $59 billion? It becomes a battle of opinions. It is lacking in absolutes.

Our goal should be a balanced budget. The Budget Committee should be charged with bringing this about. If those Members of Congress who believe in bringing Federal expenditures under control can point out to their constituents that a proposed new program for spending would create a deficit and compel the Congress to increase taxes, it is a persuasive argument and it becomes much easier to vote against such "new proposal." On the other hand, an argument as to how large a figure is acceptable as a deficit is not effective in ending the trend of ever-increasing spending and debt.

Another feature lacking in the budget reform act is that its authority is purely statutory. It is a law, and a subsequent law can overrule it, including a law that calls for spending. The present budget procedure has no teeth in it.

What we need is an amendment to our Constitution, to be approved by Congress and ratified by the States, that compels the Federal Government to go on a pay-as-you-go basis, balance the budget, and have no increase of the national debt except in time of war or in times of a grave nationwide emergency.

I wish to speak about my proposed constitutional amendment which is offered as a substitute for House Joint Resolution 554. It has a built-in enforceable procedure which requires that if the budget is not balanced, an automatic surtax is added to the income tax of all persons and corporations in the following year to recoup the deficit. If our Congressmen and Senators and the President know that they must face the issue and spend less or increase taxes, they will spend less. If they fail to do so, the people have a remedy at the ballot box.

I am joining hands with every Senator who is sponsoring a pay-as-you-go constitutional amendment. We should stand united. Our first task is to build up sufficient support in the country and in Congress to advance such a constitutional amendment. I am convinced, however, that we must have some self-enforcing provision written into the pay-as-you-go amendment. A mere command to Congress or a declaration of principle will not be sufficient on the long, hard pull when massive persuasive arguments are presented for spending.

A majority of the States of our Union have a constitutional provision that puts a curb on spending and going into debt. These provisions have served the States well. It is the only plausible remedy in sight to deal with the problem of overspending in Washington and the chaos, hardship, and destruction that it will surely bring.

The adoption of a pay-as-you-go constitutional provision would bring great blessings. Government programs will be reviewed. Some things will be eliminated. Some proposals would be turned down. Some programs can be delayed, others can be reduced in cost. The Federal Government will be forced to face the question. Is a proposal necessary or is it just desirable? If a proposed Government program is worthwhile and in our best interests, why should we not pay for it as we go along,

It is my belief that such a constitutional amendment would serve notice at home and abroad that you can count on Uncle Sam, that once again the United States would become a pillar of financial strength and stability, and that this would result in a wave of prosperity at home and abroad, resulting in raising the standard of living and providing jobs for our people.

Mr. President, we cannot hope to get the two-thirds vote necessary to pass this without the cooperation of the majority leadership and those in charge of this bill. I earnestly hope that they will recognize that to do something specific, definite, and workable about inflation is the best thing for all Americans, including those who live in the District of Columbia.

The people of the country have put their finger on this as the No. 1 problem. Let us do something about it now and then at a later time we can consider a just way to give more self-government to the District of Columbia.

Mr. President, the question may be asked: Why do I offer this as a substitute for the proposal that would grant representation to the District of Columbia? I have done so for the very reason that we are proceeding on a bill that did not

come from a committee but was stopped at the desk. On the urgency of the situation we need to get it done. Inflation is America's No. 1 problem. It is causing uemployment. It is destroying values. And one of the major causes of inflation is the fact of deficit spending and the finances of this country are out of control.

So, Mr. President, it is my hope that when the roll is called this will be adopted, and later on receive the two-thirds vote, and then we can send it on the way and bring cheer and hope to all mankind.

Let us have a situation where the President of the United States does not need to go to an international meeting and beg and apologize for the condition of our economy, the loss of the value of our money, and the downward trend that we continue to stay on.

Mr. President, these deficits have been an accepted pattern of operation. There are too many people who believe a deficit is necessary. The opposite is true. We must end them as a necessary step to bring prosperity and full employment to this country, to restore the value of our money, to put confidence in people so they will enter into contract, build and expand, and provide jobs.

Mr. President, if deficit spending and inflation would solve our problems we would not have a problem in the whole land because we have had such a long, long period of such reactionary failing, worn out, economic activity.

Mr. President, I yield the floor.

Mr. KENNEDY. Mr. President, I listened with interest to my colleague from Nebraska making his presentation in support of his amendment. I will have additional remarks to make on the amendment at a later time. But I do want to point out several facts which, I think, are important for the Senate to consider on how to dispose of the amendment of the Senator from Nebraska.

Consideration of this amendment, or any modification to the Constitution of the United States, is a matter of great importance and should only be done as a result of very extensive examination. I think that is one of the points which commends this D.C. amendment so strongly. This issue has been before the Congress of the United States since the 1880's. It is an issue which has been studied from all sides throughout the history of this Nation. Most recently, it was studied by Senator BAYH and his Subcommittee on the Constitution in days of hearings last April. They listened to distinguished scholars, thoughtful men and women, and concerned citizens about the issue of D.C. representation.

The amendment which has been proposed by the Senator from Nebraska, although much more complex, has not been given that intensive review. Those who support D.C. representation have differing views about the balanced budget issue and how best to meet the challenge of a responsible fiscal policy for this Nation. Some who support a balanced budget would agree with the Senator from Nebraska that it would be wise to achieve the balance by increasing taxes; others might want to reduce spending; others might have a role for monetary policy. But, nonetheless, a wide variety of different economic recommendations have been made with respect to the problems of inflation and spending, the deficit, and the realization of a sound economy.

The Senator from Nebraska has proposed one approach. It is one on which serious issues and questions exist, even if we agreed on the objective of the Senator. It may not be the wisest way to proceed.

The amendment has simply not had the type of consideration that the Judiciary Committee of the Senate or of the House has given to the question of D.C. representation.

Over the history of this Nation we have not piggybacked different constitutional amendments, with the rare exception of the Bill of Rights, which was submitted to the States as a package under the very different set of circumstances that existed at the time of ratification of the Constitution. We have not, over the subsequent history of this Nation, been willing to piggyback different constitutional amendments one on top of another, to see if one can carry the other. It is a device which is used in varying degrees by the Senate, when we tag on riders to other bills. Sometimes, they become known as Christmas trees, decorated with numerous riders, on the theory that some feature of the measure is so compelling that the Senate or Congress or the President will swallow the other's features, too.

I know the Senator from Nebraska does not intend to do violence to the process of constitutional consideration. But, nonetheless, I think historical precedents would indicate quite clearly that any measure of the importance of the Senator's should be considered as an issue by itself that the Senate should consider and that the people of this Nation should consider. It should not be wrapped in a completely different question. The American people ought to deliberate about it and vote on it through the ordinary constitutional amendment process, completely separate from the matter we are considering today.

(Mr. MELCHER assumed the chair.)

Mr. KENNEDY. I have very serious reservations about the Senator's amendment because it would almost certainly kill the D.C. amendment and the limited but valued and worthwhile objective we are trying to achieve by providing for D.C. representation in Congress. It would necessitate returning any amendment we are considering here to the House of Representatives, requiring a new two-thirds vote there, and also requiring a new Senate vote after a conference between the two Houses.

We are reaching the final days of the session. All of us know that a measure of this complexity and of importance of the balanced budget issue will take the kind of time that this D.C. representation issue has been given in the House of Representatives under the very able leadership of Congressman FAUNTROY, and here in the Senate by the Judiciary Committee, the Subcommittee on the Constitution, under the chairmanship of Senator BAYH and other interested Members.

So, Mr. President, I think for these procedural reasons, it would be unwise for the Senate to adopt this amendment.

Moreover, Mr. President, not long ago—on July 31—the Senate went on record very clearly on this issue on the International Monetary Fund bill. By a vote of 58 to 28, we went on record to require a balanced budget for 1981 and the future. So the Senate is already clearly on record, if the Members want to be on record. They can make their positions clear again on the present resolution, while explaining that the present resolution is not a sutiable vehicle for action by the Senate.

On the merits, I also have serious questions about what would happen to the economy with the increased surtax that would be required by this amendment. I think it could virtually paralyze this Nation in circumstances.

If you look over the period of the recent past, you would be challenged to find a Republican economist or a Democratic economist or any responsible economist who would feel that on the basis of the performance of the American economy over the last 4 years that what we needed was a $50 billion tax increase annually to balance the budget and avoid the huge deficits we have had. We will have an opportunity to get into those issues on the merits tomorrow, and I would intend to get into the amendment at that time.

But I would certainly hope that the membership, when they review the record that we have made today, would understand a few key points. First, there is the procedural argument that this proposal would effectively kill the D.C. amendment. Second, the issue has not been given the kind of thorough consideration which a constitutional amendment needs. Third, with the historical precedents are that we do not piggyback various constitutional amendments on top of each other for submission to the States. Fourth, the Senate has already gone on record on the question of a balanced budget in the past couple of weeks. For these reasons and others it would be unwise to accept the Senator's amendment.

Finally, I would like to address a question to my friend and colleague from Indiana. I understand that the Senator, who is chairman of the Subcommittee on the Constitution, would be willing at least to consider, even though he is chairman of the Intelligence Committee and has many other responsibilities, this issue in his subcommittee. As I understand it, earlier this year he actually attempted to respond on that issue, to permit those who are offering this amendment to have hearings on the issue. But at that time there was very little interest in it. Am I correct? Would the Senator from Indiana care to respond to that question?

Mr. BAYH. Mr. President, I appreciate the Senator from Massachusetts addressing himself to that particular issue.

The matter has been before the committee. As the Senator knows, we all have a number of responsibilities that require us to search for time to fulfill them all. I had hoped we could find someone who was sufficiently interested in presiding over hearings on this matter that we could have some opportunity to explore what it really would do.

I still would like to have a chance to do that, because of the interest of the Senator from Nebraska. Frankly there has not been sufficient interest expressed by other members of the committee, so that I could find someone who was willing to spend some of his time to explore this particular issue.

I think it is important to note, if I might say so—and I guess I have to confess I think the Senator from Nebraska is correct in suggesting that perhaps there is a little inconsistency involved in some of our minds on this, when he says everyone is for balancing the budget, but not now. I think one could also say, in addressing ourselves to how we approach this issue, that we need to look long and hard at a constitutional amendment of this nature, because if one is looking at balancing the budget and dealing with all the ingredients of our economy, it takes fine tuning, and not a meat-ax approach.

To suggest, as this amendment does, that we are automatically going to turn over to the President of the United States the authority of raising taxes, when the Constitution very clearly says that is a prerogative of Congress, and to say that before any change can transpire we are going to have to get three-fourths of the House and three-fourths of the Senate to go along with it. I think anyone who has had a chance to serve in this body knows it is almost impossible to get three-fourths of the Members of the House and the Senate to concur on anything involving any significant controversy.

Even the ultimate in the legislative process, namely, the amending process which we are now involved in, requires only two-thirds. That is to suggest we are being somewhat hasty in connection with this kind of matter, which requires some very deft manipulation and handling of the various monetary and fiscal policies that ultimately affect the economy of this country.

Mr. KENNEDY. Would the Senator not agree with me that it is also interesting that we have this as a recommendation from a member of the Finance Committee? I would have thought the Finance Committee, which is so concerned for its jurisdiction, would have wanted to give some recommendation in terms of the fiscal and monetary implications of the procedure. But be that as it may, I think the Senator makes a worthwhile suggestion.

Is it, then, the Senator's response that the chairman of the committee was willing to hold hearings, or at least to permit others to chair hearings on this issue earlier this year, but there was no interest in doing so?

Mr. BAYH. That is a fair assessment. I would say to my distinguished friend and colleague from Nebraska that I would like to have had this matter heard, and frankly was not able to find someone sufficiently interested to be willing to preside over it. I have not found anyone in the committee who has the kind of interest in and support for the measure that they are willing to take some time.

I have said to the Senator from Nebraska that I am not for this amendment, for reasons that I will discuss tomorrow. Although I believe the objective he seeks is worthwhile; and I have not found anyone else who is sufficiently interested in this proposal to give some time to a hearing on the amendment.

Mr. SCOTT. Mr. President, will the Senator yield briefly?

Mr. BAYH. Yes.

Mr. SCOTT. Mr. President, I appreciate the distinguished Senator's yielding.

It is my recollection that during the 94th Congress the subcommittee did hold some hearings, and I would ask that the distinguished Senator from Indiana advise me whether or not there were some hearings on—I am not sure whether it was the identical measure, but on a constitutional amendment for a balanced budget. It is my recollection that there were some hearings sometime, not this year but within the past couple of years.

Mr. BAYH. The Senator is correct.

Mr. CURTIS. Mr. President, will the distinguished Senator yield?

Mr. SCOTT. The Senator from Massachusetts has the floor.

Mr. KENNEDY. Yes, I yield.

Mr. CURTIS. I think the distinguished Senator. We did have hearings in the last Congress. We had a number of witnesses, members of State legislatures, distinguished lawyers, some men from the academic world, and we had a number of our colleagues testify.

One of the discouraging things has been, just as the distinguished Senator from Indiana said, that he could not find anyone who wanted to give time to it. That discourages us in seeking committee review of the matter.

I call to the attention of the Senate that the matter before us is also here without the approval of a committee and without the approval of a subcommittee, though I am sure it has considerable support in the committee.

I have seven cosponsors who are members of the Judiciary Committee, including the chairman, Senator EASTLAND, Senator HATCH, Senator LAXALT, Senator SCOTT, Senator THURMOND, Senator ROTH, and Senator DECONCINI.

So if a bill without committee blessing is an orphan, there are two of us out here. The bill before us, technically, has not been to committee, and there is no committee report before us recommending this District of Columbia measure.

As I pointed out, there are 7 very distinguished members of the Judiciary Committee who are cosponsors of this amendment. I thank the Senator for yielding.

Mr. KENNEDY. Mr. President, I know of no effort that has been made within the Judiciary Committee to bring this issue to a vote. The only thing I would point out, and let the record show, is that next to me is a pile of books and documents that contains the record of the House and Senate hearings on this particular subject matter. I would daresay that the height of the stack measures at least 2 feet.

I think the contrast between the consideration which has been given to D.C. representation as compared to this item is striking. I yield to the Senator from Indiana.

Mr. BAYH. There is no question about the comparison of the time for study. The Senator from Massachusetts is correct.

Out of fairness to the Senator from Nebraska, he has diligently pursued this issue. He has introduced legislation on this matter and it has been before a Committee. But I must confess to him, and I am sure he could not refute this, that of the cosponsors he mentioned, members of the Judiciary Committee, there has not been a single one who has been willing to sit and preside over hearings. I think that is a good barometer of the kind of continuous interest which has existed on this matter.

It is a good matter to talk about and discuss. I think, as he said, everybody wants to balance the budget but not now, or perhaps not in this way. He has been persistent in the matter. He feels that it ought to be done now and in this way. Some of the rest of us feel that perhaps there is a different way of approaching this problem.

Mr. KENNEDY. Mr. President, I will have more to say as we continue with our discussion on this amendment in the morning.

I will suggest the absence of a quorum.

Mr. SCOTT. Will the Senator withhold?

Mr. KENNEDY. Yes.

Mr. ROBERT C. BYRD. Will the Senator yield to me?

Mr. SCOTT. Yes.

ORDER DESIGNATING PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. I ask unanimous consent, Mr. President, that when Mr. SCOTT and Mr. KENNEDY have yielded the floor for today, there be a brief period for the transaction of routine morning business with Senators allowed to speak up to 5 minutes each, and the period not to extend beyond 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The Senate continued with the consideration of the bill.

Mr. SCOTT. If the Senator will yield, is it the intention of the distinguished majority leader that there would be no votes today?

Mr. ROBERT C. BYRD. Yes, no votes today.

Mr. CURTIS. May I inquire?

Mr. ROBERT C. BYRD. Yes.

Mr. CURTIS. I do not know whether the majority leader or those in charge of the bill are free to state whether or

not there will be a motion to table. But could we have an understanding that there will be no vote on this amendment prior to 12 o'clock noon tomorrow? A number of people want to speak, I am sure.

Mr. KENNEDY. I would certainly be glad to consider the request of the Senator in the morning and communicate with him. At the present time, I have no intention of voting prior to that time, and I would have every intention of notifying the Senator.

Mr. CURTIS. This Senator will not be here early. Others will be here to speak.

Mr. KENNEDY. Then I would certainly not offer that motion prior to 12 o'clock.

Mr. CURTIS. I thank the Senator.

Mr. ROBERT C. BYRD. Will the distinguished Senator from Virginia yield to the Distinguished Senator from Indiana so he can proceed to a matter which he is entitled to proceed with, and which he would do in any event?

Mr. SCOTT. Yes, I will be glad to yield.

EXTENSION OF THE EQUAL RIGHTS AMENDMENT

Mr. BAYH. Mr. President, I understand there is a message from the House on House Joint Resolution 638. I ask the Chair to lay that message before the Senate and that it be read twice—Mr. President, I ask unanimous consent that it be placed on the Calendar.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. I reserve the right to object. Is this the ERA amendment?

Mr. SCOTT. I do object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. BAYH. Mr. President, I ask the Chair to lay before the Senate a message from the House on House Joint Resolution 638 and ask that it be read twice.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Reserving the right to object.

Mr. ROBERT C. BYRD. He has a right to have it laid before the Senate, Mr. President.

Mr. STEVENS. He has a right to have it laid before the Senate. I do not object to that. I want to make the RECORD clear on that. But I want to protect those on this side of the aisle who might want to object.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 638) extending the deadline for the ratification of the equal rights amendment.

Mr. BAYH. Mr. President, I ask that the House joint resolution be read the second time.

The PRESIDING OFFICER. Is there objection?

Mr. SCOTT. Mr. President, I object, and I would like to say to my distinguished friend from Indiana that this is a matter before our committee. Apparently this is an effort to bypass the very subcommittee on which the distinguished Senator and I serve. I would hope that the Senator would not utilize this procedure at least until we have finished with the unusual procedure we have here for District of Columbia representation.

The PRESIDING OFFICER. Objection being heard, the resolution has been read the first time by title.

Mr. BAYH. Mr. President, the Senator has yielded to me. I do not want to persist over another minute or two and will not do so if he desires I not do so. I want to make sure that everything done here is on top of the table and he does not feel I am trying to put something over on him.

Mr. SCOTT. I have no objection to the distinguished Senator utilizing as much time as he desires to use, Mr. President, but I do have objection to bringing up the joint resolution on the ERA extension. I voted for the matter when it was before the House and we lived in a different climate than we do today. But I am concerned about the precedent that it would set to extend it after the States have had 7 years. For the purpose of debate, I do not have the slightest objection to the disinguished Senator talking to the extent he desires to talk. I will have to talk less if he will talk more.

Mr. STEVENS. Will the Senator yield for a parliamentary inquiry?

Mr. SCOTT. I yield.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. STEVENS. The resolution has been read once, I understand, and there was an objection to it being read twice. According to the rules there has been no unanimous consent granted concerning this resolution so far. Is that correct?

The PRESIDING OFFICER. Objection was heard and it was only read once.

Mr. ROBERT C. BYRD. Will the Senator from Virginia yield to me?

Mr. SCOTT. Certainly.

Mr. ROBERT C. BYRD. Mr. President, when Senators complete their discussion of the pending business, we are ready to go into morning business. There will be no rollcall votes tonight.

Mr. SCOTT. If the Senator will yield, Mr. President, I have just conferred with the distinguished Senator from Massachusetts and neither he nor I, although prepared to talk further, see any need to do it tonight. We are willing to stop now.

Mr. BAYH. I would like to have about 2 or 3 minutes to at least find where we are on the joint resolution we just discussed so that the Senate would know what the future might hold.

Mr. SCOTT. Mr. President, for the purpose of the distinguished Senator discussing any matter that he wants, I am glad to yield the floor.

Mr. STEVENS. Mr. President, if I might respond to the Senator from Indiana, there is the statement the Senator from Utah made today. He is not here at this time. I want to make certain his rights are protected. He has indicated that he would oppose the joint resolution which was just presented. I will advise that perhaps the Senator would want to see about that being released.

Mr. BAYH. I appreciate the Senator from Alaska making that information available to me. I was fully aware of the opposition of the Senator from Virginia to this measure. I wanted to take advantage of the opportunity, which any Senator has, given certain circumstances which seem to make it unreasonable to follow the normal legislative process, but, nevertheless, to be able to see that an issue reaches the calendar.

For that reason, the policy I have undertaken is similar to the policy that we are pursuing on the matter of district representation for the same reason—because of the valiant efforts that the Senator from Virginia can make in opposition to legislation, which he has just mentioned. He has been very forthcoming along the way in letting me know of his intentions.

Mr. SCOTT. If the Senator will yield at that point, I believe the Senator and I both realize that of the six members of the subcommittee, three are opposed and three are in favor of the extension. The bill will not come out of the subcommittee under those circumstances. I think we are both aware of that.

The distinguished Senator said something about getting everything out in the open. I think that gets it out in the open.

Mr. BAYH. I think the Senator just described the circumstances and reasons for the procedure of the Senator from Indiana better than he could have done it himself. If we are concerned about the need to ratify the equal rights amendment and if we realize that the only way to get this done is to pass the extension, then we have to recognize that following the normal legislative process is important only because of the split which exists in the Committee on the Judiciary—not only because of the split which exists in the subcommittee, but the fact that, although a majority of the Judiciary Committee would support this resolution, there is no way it can ever be put to a vote.

Under the rules of the Judiciary Committee, one Senator has the complete right, as the distinguished Senator from Virginia knows, to take advantage of the provision which permits a discussion at length, shall I say, without any countervailing cloture provision which would permit the majority of the Senate Judiciary Committee to work its will.

The plan followed by the Senator from Indiana is to have the matter read today, to have it read a second time tomorrow and to object to its going to committee, and the third day, it will be on the calendar.

Hopefully, after that, the Senator will have the opportunity to discuss it and, hopefully, vote in favor of it, as we hope to be able to do on the District of Columbia measure.

That is where we are and I thank the Senator from Virginia for interrupting his discussion and yielding to me.

Mr. SCOTT. Mr. President, I shall not delay the adjournment but 1 minute to say that I do intend to object to anything that would tend to bring the matter before the Senate for consideration. I realize that can be motioned up after a period of time. To me, it is something that I hope the distinguished Senator from Indiana will not persist in.

This is a time when the chairman of

the full committee is not even in the country. As the distinguished Senator knows, the chairman of the full committee would oppose this bill and I think he ought at least to be present to speak for himself before this matter is brought up in this manner.

Mr. BAYH. Will the Senator yield?

Mr. SCOTT. I am glad to yield.

Mr. BAYH. I just want to assert that I did not misspeak myself when I said that the procedure that the Senator from Indiana has undertaken should not in any way be interpreted to suggest that he wants to interrupt the present legislative procedure. I think we should dispose of the District of Columbia representation issue, and perhaps certain other issues that the leader wants us to consider, in the next few days. But the procedure undertaken by the Senator from Indiana was to take the House bill which was just passed yesterday and been forwarded in the message of House Joint Resolution 638, and to keep it from being put into the Senate Judiciary Committee, which would kill it, in effect. The Senate would not have a chance to vote on it, and the Senate Judiciary Committee would not have a chance to vote on it, because any one Senator who wants to filibuster it can filibuster it.

The procedure followed by the Senator from Indiana would mean that in 3 days, it would be on the Calendar, like numerous other pieces of legislation, subject to the rights of any Senator to take it up or to object to its being taken up.

Mr. ROBERT C. BYRD. Will the Senator yield at that point?

Mr. BAYH. I yield the floor and I appreciate the courtesy of the leader.

Mr. ROBERT C. BYRD. I want to call to the attention of the Senator, as I am sure he wants the RECORD to say, that he is talking about legislative days, not calendar days. I point out that the last legislative day prior to today was May 17, 3 months ago tomorrow.

ORDER FOR SENATE TO RECESS AT 7 P.M. TODAY UNTIL 9:30 TOMORROW

Mr. STEVENS. Will the Senator yield?

Mr. ROBERT C. BYRD. I am prepared to yield.

I ask unanimous consent, Mr. President, that the Senate, at the hour of 7 o'clock p.m. today, stand in recess until 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. ROBERT C. BYRD. Under the order entered for the recess, if all Senators are disposed to walk off the floor at this minute, the Presiding Officer can also do so, can he not, and the Senate will stand in recess as of the hour of 7 p.m.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, as far as I am concerned, I am ready to go.

Mr. President, I suggest the absence of a quorum. Mr. PROXMIRE is coming to the floor.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, may we go to morning business now?

The PRESIDING OFFICER. The Senate will now proceed to the consideration of morning business.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Foreign Relations.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORTS OF THE U.S. NUCLEAR REGULATORY COMMISSION—MESSAGE FROM THE PRESIDENT—PM 208

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying reports, which was referred to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works, jointly, by unanimous consent:

To the Congress of the United States:

Pursuant to the provisions of Section 307(c) of the Energy Reorganization Act of 1974, I transmit herewith the second and third Annual Reports of the United States Nuclear Regulatory Commission. Both reports cover events prior to my Administration.

JIMMY CARTER.

THE WHITE HOUSE, *August 16, 1978.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a message from the President of the United States, transmitting the Second and Third Annual Reports of the Nuclear Regulatory Commission, be jointly referred to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT ON NATIONAL URBAN POLICY—MESSAGE FROM THE PRESIDENT—PM 209

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

I am forwarding herewith the First Biennial Report on National Urban Policy in accordance with Sections 702 and 703(a) of the Housing and Urban Development Act of 1970, as amended in 1977.

JIMMY CARTER.

THE WHITE HOUSE, *August 16, 1978.*

MESSAGES FROM THE HOUSE

At 6:15 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendments of the Senate to H.R. 11579, an act to designate the Veterans' Administration center located at 1901 South First Street, Temple, Tex., as the "Olin E. Teague Veterans' Center".

The message also announced that the House has passed the following bill and joint resolution in which it requests the concurrence of the Senate:

H.R. 12931. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes; and

H.J. Res. 638. A joint resolution extending the deadline for the ratification of the equal rights amendment.

The message further announced that the House disagrees to the amendment of the Senate to H.R. 11209, an act to provide for the establishment, ownership, operation, and governmental oversight and regulation of international maritime satellite telecommunications services; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. STAGGERS, Mr. MURPHY of New York, Mr. VAN DEERLIN, Mr. BIAGGI, Mr. CARNEY, Ms. MIKULSKI, Mr. WIRTH, Mr. RUPPE, Mr. BROYHILL, and Mr. FREY were appointed managers of the conference on the part of the House.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 696. A concurrent resolution providing for an adjournment of the House from August 17 to September 6, 1978.

HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 12931. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes; to the Committee on Appropriations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MAGNUSON, from the Committee on Appropriations, with amendments:

H.R. 12929. An act making appropriations for the Department of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes (Rept. No. 95-1119).

By Mr. PROXMIRE, from the Committee

on Banking, Housing, and Urban Affairs, with amendments:

S. 3036. A bill to amend the Coinage Act of 1965 to change the size, weight, and design of the one-dollar coin, and for other purposes (Rept. No. 95–1120).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. RANDOLPH, from the Committee on Environment and Public Works:

Karl Smith Bowers, of South Carolina, to be Administrator of the Federal Highway Administration.

Jane Hurt Yarn, of Georgia, to be a member of the Council on Environmental Quality.

(The above nominations from the Committee on Environment and Public Works were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. DANFORTH (for himself, Mr. BELLMON, and Mr. PROXMIRE):

S. 3416. A bill to control excessive government spending; to the Committee on Finance.

By Mr. ANDERSON (for himself, Mr. BENTSEN, Mr. BURDICK, Mrs. HUMPHREY, Mr. MCGOVERN, Mr. MATSUNAGA, Mr. ZORINSKY, Mr. HODGES, and Mr. MORGAN):

S. 3417. A bill to increase the amount for which loans may be made by the Commodity Credit Corporation to farmers for the construction or remodeling of grain storage facilities on the farm; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. JACKSON (for himself, Mr. MAGNUSON, Mr. CHURCH, Mr. MARK O. HATFIELD, Mr. PACKWOOD, and Mr. MCCLURE):

S. 3418. A bill to assist the electrical consumers of the Pacific Northwest through use of the Federal Columbia River Power System to achieve cost-effective energy conservation, to encourage the development of renewable energy resources, to establish a representative regional power planning process, to assure the region of an efficient and adequate power supply, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. CULVER (for himself, Mr. CLARK, Mr. MCGOVERN, Mr. METZENBAUM, and Mrs. HUMPHREY):

S. 3419. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income a portion of payments made under certain Federal and State cost-sharing programs the primary purpose of which is conservation of soil and water resources, environmental protection or restoration, forest enhancement, or the provision of wildlife habitat; to the Committee on Finance.

By Mr. HATHAWAY:

S. 3420. A bill to amend the Internal Revenue Code of 1954 to reduce individual and corporate income tax reductions, and for other purposes; to the Committee on Finance.

By Mr. DOLE (for himself and Mr. PEARSON):

S. 3421. A bill to authorize establishment of the Fort Scott National Historic Site, Kansas, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. WALLOP (for himself, Mr. BROOKE, Mr. BARTLETT, Mr. BELLMON, Mr. BENTSEN, Mr. CASE, Mr. DANFORTH, Mr. GARN, Mr. HATCH, Mr. PAUL G. HATFIELD, Mr. HAYAKAWA, Mr. HEINZ, Mr. INOUYE, Mr. JAVITS, Mr. LAXALT, Mr. LUGAR, Mr. MCCLURE, Mr. MCINTYRE, Mr. MATHIAS, Mr. PERCY, Mr. RIEGLE, Mr. SCHMITT, Mr. STAFFORD, and Mr. STEVENS):

S. 3422. A bill to establish a congressional award program for the purpose of recognizing excellence and leadership among young people; to the Committee on Governmental Affairs.

By Mr. BROOKE:

S. 3423. A bill to amend the Disaster Relief Act of 1974 and the Small Business Act to increase disaster relief assistance, and for other purposes; to the Committee on Environment and Public Works and the Select Committee on Small Business, jointly, by unanimous consent.

By Mr. CRANSTON:

S. 3424. A bill to amend section 8 of Public Law 93–223 to permit California to continue cash payments to SSI recipients in lieu of food stamps; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DANFORTH (for himself, Mr. BELLMON, and Mr. PROXMIRE):

S. 3416. A bill to control excessive Government spending; to the Committee on Finance.

(The remarks of Mr. DANFORTH when he introduced the bill appear elsewhere in today's proceedings.)

By Mr. ANDERSON (for himself, Mr. BENTSEN, Mr. BURDICK, Mrs. HUMPHREY, Mr. MCGOVERN, Mr. MATSUNAGA, Mr. ZORINSKY, Mr. HODGES, and Mr. MORGAN):

S. 3417. A bill to increase the amount for which loans may be made by the Commodity Credit Corporation to farmers for the construction or remodeling of grain storage facilities on the farm; to the Committee on Agriculture, Nutrition, and Forestry.

CCC FARM STORAGE LOANS

● Mr. ANDERSON. Mr. President, today I am introducing a bill to amend the Commodity Credit Corporation (CCC) Charter Act to authorize an increase in the ceiling on CCC farm storage facility loans from the present $50,000 to $100,000.

The CCC storage facility loan program has been very successful, enjoying a high participation rate among our Nation's family farmers. Family farmers have shown that they like to have the ability to store their crops on their farms and to market their crops when it best suits their needs. Like other businessmen, the farmer who knows exactly the amount of his product he has on hand can better make decisions about future production and marketing of his crops. My bill is designed to assure that this program remains an effective aid for our family farmers.

Under present law, a farmer can receive low-interest loans from the CCC for the construction of on-the-farm storage facilities. These loans can be used for storage buildings and drying equipment for wheat, corn, oats, barley, grain, sorghum, rye, soybeans, flaxseed, rice, dry edible beans, peanuts, sunflower seeds, and high-moisture forage. Up to 85 percent of the eligible cost of structures and equipment can be financed with up to 8 years allowed the individual farmer to repay the loan. At this time the total outstanding balance of all storage loans to an individual cannot exceed $50,000.

The demand for and the cost of these on-the-farm storage facilities are up. Many commercial elevators remain full from last year's bumper crop, causing farmers to look for alternative storage space. Those farmers who have access to commercial space feel they cannot depend on the transportation network to move their crops when needed. These farmers fear the crops they have worked so very hard to produce will be left lying on the ground to spoil unless they have reliable storage space on their farms.

Like everything else, the cost of drying equipment and the construction of storage buildings has increased. Many farmers who have outstanding loans and feel they could use more space cannot build additional storage since another loan would push them over the present loan ceiling.

Mr. President, the current $50,000 ceiling on these loans is inadequate to meet the increased cost and demand. I urge my colleagues to recognize the need to increase this ceiling and to support this bill.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3417

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the last proviso of the second sentence of section 4(h) of the Commodity Credt Corporation Charter Act (15 U.S.C. 714b(h)) is amended by striking out "$50,000" each time such figure appears and inserting in lieu thereof "$100,000".

SEC. 2. The amendment made by the first section shall be effective only with respect to the fiscal years beginning October 1, 1978, and ending September 30, 1981.●

By Mr. JACKSON (for himself, Mr. MAGNUSON, Mr. CHURCH, Mr. MARK O. HATFIELD, Mr. PACKWOOD, and Mr. MCCLURE):

S. 3418. A bill to assist the electrical consumers of the Pacific Northwest through use of the Federal Columbia River Power System to achieve cost-effective energy conservation, to encourage the development of renewable energy resources, to establish a representative regional power planning process, to assure the region of an efficient and adequate power supply, and for other purposes; to the Committee on Energy and Natural Resources.

PACIFIC NORTHWEST ELECTRIC POWER PLANNING AND CONSERVATION ACT

● Mr. JACKSON. Mr. President, today, on behalf of myself and Mr. MAGNUSON, Mr. CHURCH, Mr. MARK O. HATFIELD, Mr. PACKWOOD, and Mr. MCCLURE, I introduce a new proposal for a comprehensive

Pacific Northwest region electric power program.

As my colleagues will recall, on September 9, 1977, I introduced S. 2080, the Pacific Northwest Electric Power Supply and Conservation Act at the request of a consortium of Northwestern regional utilities. During the intervening year, field hearings have been held by the Senate Committee on Energy and Natural Resources in the State of Washington, Oregon, Idaho, and Montana, and the House Interior and Insular Affairs Committee has also held field hearings on a companion measure. An impressive record has been compiled containing the views and expressing the concerns of interested parties throughout the Pacific Northwest. There has been continued discussion of the legislation in the region and the debate was intense. Clearly, the energy future of the Pacific Northwest is of singular importance to the area and the concerns and suggestions expressed by citizens, business, and the utilities have been carefully reviewed and have been given consideration in the preparation of the new proposal which I introduce today.

This new bill, based upon the plan originally proposed, reflects the addition of constructive suggestions offered during the field hearings and the ongoing dialog taking place in the Pacific Northwest today. This substitute bill would implement the best thinking as to how to solve the power planning problems and needs in the Pacific Northwest and reflects the long experience and knowledge of many individuals and entities familiar with the unique energy resource base of the region.

As I have stated before, we in the Pacific Northwest are proud of the highly efficient utility system which we have developed with the cooperation of Federal, State, and local government, public and private utilities, and all of the citizens of the region. Working to solve our problems together has been the key to our success. I believe that the bill I introduce today exemplifies and perpetuates the spirit of cooperation which has so much distinguished our efforts in the past.

As is evidenced by the support shown by my distinguished colleagues from the Pacific Northwest who have joined in cosponsoring this measure; the spirit of cooperation in solving regional needs knows no state boundaries or political differences and is as strong now as ever.

I ask unanimous consent that the text of the bill be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3418

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Pacific Northwest Electric Power Planning and Conservation Act".

FINDINGS

SEC. 2. The Congress finds that—

(a) The Federal Columbia River Power System offers a unique opportunity to encourage policies of conservation and efficiency in the use of electric power within the Pacific Northwest region and to demonstrate the effectiveness of such policies to the Nation at large.

(b) The participation and consultation of the States, local communities, ratepayers, and the public at large are essential in development of regional plans and programs related to energy conservation, renewable resources, and other generating resources and orderly planning of the Federal Columbia River Power System.

(c) The ratepayers of the Pacific Northwest should continue to pay all costs necessary to produce, transmit, and conserve electric power to meet the region's electric power requirements, including the amortization of the Federal investment in the Federal Columbia River Power System.

DEFINITIONS

SEC. 3. As used in this Act—

(a) "Administrator" means the Administrator, Bonneville Power Administration.

(b) "Conservation" means any appropriate improvements in the power system or investment which increases the efficiency of energy production or use.

(c) A conservation measure or a renewable, waste heat or cogeneration resource application is "cost effective" if it results in costs to the Administrator no greater than the cost of the least cost feasible alternative resource, waste heat or cogeneration or resources that the Administrator determines is or can be available for acquisition, and if it provides comparable power benefits, giving full recognition to prospective cost escalations and future availability of fuels.

(d) "Electric power" means electric peaking capacity or electric energy or both.

(e) "Federal base system resources" means the Federal Columbia River Power System hydroelectric projects which on the effective date of this Act are in operation or are scheduled for operation on or before June 30, 1983, electric power resources acquired by the Administrator under long-term contracts which are in force on the effective date of this Act, and new resources acquired by the Administrator to replace reductions in capability of the foregoing resources.

(f) "New resources" means all electric power resources acquired by the Administrator, except resources which are Federal base system resources or resources acquired at average cost from the investor-owned utilities pursuant to section 5(b)(2) of this Act.

(g) "Pacific Northwest, region, or regional", means

(1) the region consisting of the States of Oregon, Washington, and Idaho, the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming as are within the Columbia River drainage basin; and

(2) any contiguous areas, not in excess of seventy-five airline miles from said region, which are a part of the service area of a distribution cooperative served by the Administrator on the effective date of this Act which has a distribution system from which it serves both within and without said region.

(h) "Renewable resources" means a renewable source of energy, including, but not limited to, solar, wind, hydro, geothermal, and biomass, which is used for electrical generation or which will reduce the electrical requirements of a consumer by direct application.

(i) "Residential use or load" means all usual residential, apartment, seasonal dwelling, and farm building, electrical loads or uses, and not to exceed a total of one hundred horsepower of farm irrigation and pumping loads for any farm.

(j) "Resources" means electric power, facilities that produce electric power, planned electric power capability of generating facilities whether operating or operable, electric power conserved, and measures to conserve electric power.

REGIONAL PARTICIPATION

SEC. 4. (a) The Administrator shall establish a Bonneville Consumers' Council and a Bonneville Utilities' Council.

(1) The Bonneville Consumers' Council shall be composed of two persons from each congressional district in the States of Washington, Oregon, and Idaho, and the State of Montana west of the Continental Divide, who shall be appointed by the Governors of the State in which each such congressional district is located within ninety days of notification by the Administrator of a vacancy on the Bonneville Consumers' Council. One such person appointed to the Bonneville Consumer's Council from each district shall be an elected official of a local government within such district, and the other person shall be appointed from the general public with a view to diversity of backgrounds and interests.

(2) The Bonneville Utilities' Council shall be comprised of eighteen representatives of Pacific Northwest electric utilities to be selected by these utilities and not more than three representatives of the direct service industrial customers to be selected by them, such selections to be under rules established by the Administrator.

(3) The Administrator shall establish terms and other conditions of service for members of both Councils, and shall fill vacancies on the Councils in the absence of appointments by a Governor or failure of utilities to select persons.

(b) In order to further insure widespread and representative public involvement in formulation of regional power programs and policies, the Administrator shall establish and maintain comprehensive programs designed to inform the Pacific Northwest public of major regional electric power issues and to obtain public views and reactions concerning those issues.

(c) The Administrator shall prepare a regional power planning and conservation program to carry out the purposes of this Act. Such program shall be developed in consultation with the Governors of the States of Idaho, Montana, Oregon, and Washington, the Bonneville Consumers' Council and the Bonneville Utilities' Council and with general public involvement programs. The regional power planning and conservation program shall include a twenty-year regional load/resource forecast, proposed conservation programs, proposed renewable, waste, cogeneration and other resources, acquisitions, proposed major transmission system additions and such other program proposals as the Administrator deems appropriate. Such program or any part thereof, may be revised from time to time as the Administrator deems appropriate after consultation with the Governors, the Councils and public involvement as provided in this section.

SALE OF POWER

SEC. 5. (a) The Administrator shall offer to sell electric power to each Pacific Northwest utility, at rates established pursuant to section 7, to meet its firm power load in the region which is in excess of such utility's resources committed to such load, subject to the provisions of subsection (b)(2) of this section: *Provided,* That the Administrator determines that he has or can acquire adequate resources to meet such requirements.

(b) Additionally, (1) the Administrator is authorized to sell electric power to regional Federal agencies, and (2) if the Administrator acquires electric power either from a Pacific Northwest utility at the average cost of resources then available to that utility, or from other resources at a cost equal to or less than the average cost of resources then available to that utility, then the Administrator shall offer to sell to such utility for resale to meet the load of its residential customers in the region an equivalent amount

of electric power: *Provided,* That such sale shall be limited to an amount not to exceed 50 per centum of each such utility's residential loads in the year beginning July 1, 1979, and increasing such percentage in equal annual increments to 100 per centum of such load in the year beginning July 1, 1984. Such electric power shall be sold at rates established pursuant to section 7.

(c) The Administrator is authorized to sell to direct-service industrial customers electric power to meet their load requirements so long as such sales provide a portion of the planning and operating reserves for the Federal Columbia River Power System. The Administrator shall offer to those direct-service industrial customers receiving electric power from the Federal Columbia River Power System on the effective date of this act new long-term power sales contracts effectuating the purposes of this section. Such offer shall expire one year from the date it is tendered by the Administrator. Such electric power shall be sold at rates established pursuant to section 7.

(d) The Administrator is further authorized to sell or otherwise dispose of electric power that is surplus to his obligations incurred pursuant to subsections (a), (b), and (c) of this section in accordance with other statutes related to disposition of power from the Federal Columbia River Power System. Such electric power shall be sold at rates established pursuant to section 7.

RESOURCE ACQUISITION

SEC. 6. (a) The Administrator shall conserve electric power through implementation of measures the Administrator determines are feasible and cost-effective including, but not limited to programs for financing residential insulation, increased system efficiency and waste energy recovery. The Administrator shall develop conservation proposals and programs which assist the region's electric power consumers to make efficient use of energy. In addition, he shall assist the promotion of conservation by and among regional consumers by providing technical or financial asssistance, and by cooperating with his customers and governmental authorities to encourage voluntary conservation and to devise effective mechanisms for establishing, enforcing, and achieving compliance with mandatory conservation standards.

(b) In the event that the Administrator determines conservation will be insufficient to meet the electric power obligations incurred under section 5, the Administrator shall acquire additional resources from Federal or non-Federal entities to meet the remainder of such obligations. Such acquisition shall be obtained from waste heat, cogeneration or renewable resources the Administrator determines are feasible and cost-effective.

(c) If resources in addition to such resources are needed, then the Administrator shall acquire additional electric power resources giving priority to high efficiency resources, such as combined cycle and magneto-hydrodynamic generation, which he determines to be feasible and cost-effective. All such resources acquired by the Administrator:

(1) shall be consistent with the provisions of the power program for the Pacific Northwest developed pursuant to section 4; and

(2) shall be constructed and operated in a manner to provide efficient, economic, and reliable service.

(d) The Administrator is hereby authorized to construct and operate generating facilities, with the exception of constructing hydroelectric resources, utilizing renewable resources; and to construct such other generating resources as he determines are necessary to assure transmission system reliability.

(e) To the extent conservation or acquisition of resources under this Act require direct arrangements with the ultimate consumers of electric power, the Administrator shall make maximum practicable use of existing institutions able to supply credit to such consumers.

(f) The Administrator is authorized to enter into agreements with sponsors of resources which may be proposed for acquisition by the Administrator to fund or secure debt incurred in the investigation and initial development of such resources.

(g) Prior to the execution of any contract for the acquisition of major resources pursuant to subsection (c) of this section, the Administrator shall have reviewed the proposed acquisitions with the Governors of Idaho, Montana, Oregon, and Washington, the Bonneville Consumers' Council and the Bonneville Utilities' Council pursuant to section 4; and he shall submit any comments or recommendations received from the Governors and the councils along with the proposed contracts and evidence of compliance with the National Environmental Policy Act of 1969, to the Senate Energy and Natural Resources Committee and to the House Interior Committee for review. Thereafter, the Administrator shall publish notice of his intention to acquire such resources in the Federal Register. No such contract shall be executed by the Administrator until ninety days after the date of submittal to the Congress pursuant to this subsection and no financial commitment shall be incurred under this authority until it has been noted in the Administrator's budget submittal made pursuant to section 11 of Public Law 93–454.

(h) The Administrator, at the request and expense of a Pacific Northwest customer, shall acquire, to the extent practicable, any electric power which is required by such customer to replace electric power curtailed or interrupted by the Administrator: *Provided,* That such customer may elect to acquire independently replacement power under terms and conditions as prescribed by the Administrator.

RATE DIRECTIVES

SEC. 7. (a) The Administrator shall establish and periodically modify rates for the sale and disposition of electric power to recover, in accordance with sound business principles. the costs associated with the acquisition, conservation, and transmission of electric power including the amortization of the Federal investment in the Federal Columbia River Power System over as reasonable period of years and the other costs and expenses incurred by the Administrator pursuant to law. In addition, prior to July 1, 1982, such rates shall recover revenues in amounts that the Administrator determines are necessary to provide all or a portion of the initial funding for conservation programs to be implemented pursuant to section 6(a). Such rates shall become effective upon confirmation and approval by the Federal Energy Regulatory Commission and shall be established in accordance with sections 9 and 10 of Public Law 93–454 and the provisions of this Act on the finding that such rates (1) are sufficient to assure repayment of the Federal investment after first meeting the Administrator's other costs; (2) are based upon the Administrator's total costs of service, including contingencies and initial conservation funding; and (3) insofar as transmission rates are concerned, equitably allocate the costs of the Federal transmission system between Federal and non-Federal uses.

(b) The Administrator shall establish a rate or rates applicable to the electric power sold for the general requirements of public body. cooperative and Federal agency customers, and to the electric power sold under section 5(b)(2) for the requirements of residential customers in the region. Such rate or rates shall recover the costs of that portion of the Federal base system resources needed until such requirements exceed the Federal base system resources. Thereafter, such rate or rates also shall recover the costs of additional electric power as needed, first from the electric power purchased by the Administrator under section 5(b)(2) and then from new resources.

General requirements as used in this section shall be that portion of a public body's, cooperative's, or Federal agency's directly served electric power load in excess of its own resources that are dedicated to meet such load and exclusive of any large new industrial load whose service is contracted for after October 1, 1978.

(c) The rate or rates applicable to direct-service industrial customers shall be established at a level which the Administrator determines is equitable in relation to the rates charged by the region's electric utilities to their major industrial customers, taking into account the value of power system reserves made available to the Administrator through his rights to curtail or interrupt service to such direct-service industrial customers; the comparative size and character of the loads served; the relative costs of electric capacity, energy, transmission, and related delivery facilities provided, and other service provisions, all as related to the delivery of power to such customers: *Provided,* That prior to July 1, 1984, the rate or rates applicable to direct-service industrial customers shall be established to recover the costs incurred by the Administrator pursuant to section 5(b)(2) and not recovered through rates applicable for other classes of power sold by the Administrator; and such rate or rates shall be established at a level no lower than the weighted average wholesale power costs to the investor owned utilities from their own resource costs and purchases from the Administrator pursuant to section 5(b)(2) for their residential loads in the region as determined by the Administrator: *Provided further,* That for the period prior to July 1, 1981, such rate or rates may be in the form of a surcharge on rates then applicable to direct-service industrial customers.

(d) In establishing rate schedules of general application, the Administrator may establish a uniform rate or rates for sale of capacity.

(e) Rates for all other firm power sold by the Administrator shall be based upon the cost of the portions of Federal base system resources and additional resources, including new resources, which the Administrator determines are required to support such sales.

(f) The Administrator shall allocate to power rates, as he may determine appropriate, all other costs and benefits including, but not limited to, conservation, uncontrollable events, reserves, operating services, and the sale of excess electric power.

AMENDMENTS TO EXISTING LEGISLATION

SEC. 8. (a) Section 11(b) of Public Law 93–454 is amended by adding a new subparagraph (12) as follows:

"(12) making such payments as shall be required to carry out the purposes of the Pacific Northwest Electric Power Planning, and Conservation Act.".

(b) Public Law 93–454 is amended by striking subsection 13 (a) and (b) and substituting the following new subsections:

"SEC. 13(a) The Administrator is authorized to issue and sell to the Secretary of the Treasury from time to time in the name of, and on behalf of the Bonneville Power Administration bonds, notes, and other evidences of indebtedness (in this Act collectively referred to as 'bonds') to assist in financing the constructing, acquisition, and replacement of the transmission system, to implement the Administrator's authority pursuant to the Pacific Northwest Electric Power and Planning Act, and to issue and sell bonds to refund such bonds. Such bonds

shall be in such forms and denominations, bear such maturities, and be subject to such terms and conditions as may be prescribed by the Secretary of the Treasury taking into account terms and conditions prevailing in the market for similar bonds, the useful life of the facilities for which the bonds are issued, and financing practices of the utility industry. Refunding provisions may be prescribed by the Administrator. Such bonds shall bear interest at a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities, plus an amount in the judgment of the Secretary of the Treasury to provide for a rate comparable to the rates prevailing in the market for similar bonds issued by Government corporations not to exceed the interest rate which would be applied to such bonds if they were purchased by the Federal Financing Bank. The aggregate principal amount of any such Bonds outstanding at any one time shall not exceed $1,250,000,000 plus the principal amount of any bonds outstanding which shall have been issued to finance or assist in financing the Administrator's implementation of the purposes set forth in the Pacific Northwest Electric Power Planning, and Conservation Act.

"(b) The principal of, premiums, if any, and on such bond shall be payable solely from the Administrator's net proceeds as hereinafter defined. 'Net proceeds' shall mean for the purposes of this section the remainder of the Administrator's gross receipts from all sources after first deducting trust funds and the costs listed in section 11(b)(2) through 11(b)(7), 11(b)(11), and 11(b)(12), and shall include reserve or other funds created from such receipts.".

(c) Public Law 88–552 is amended by striking subsection 1(b) and inserting a new subsection (b) as follows:

"(b) Pacific Northwest means (1) the region consisting of the States of Oregon, Washington, and Idaho, the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming as are within the Columbia River drainage basin and (2) any contiguous areas, not in excess of seventy-five airline miles from said region, which are a part of the service area of a distribution cooperative served by the Administrator on the effective date of this Act which has a distribution system from which it serves both within and without said region.".

(d) Public Law 88–552 is amended by adding a new section 10 as follows:

"SEC. 10. All references in sections 1, 2, 3, 5, and 7 of this Act to 'plants', 'energy', 'peaking capacity', and 'generating facilities' shall be applicable to all types of generation and not solely to hydroelectric generation.".

ADMINISTRATIVE SECTIONS

SEC. 9. (a) In carrying out the provisions of this Act, the Administrator is authorized to enter into such contracts, agreements, and arrangements, including the amendment, modification, adjustment, or cancellation thereof and the compromise or final settlement of any claim arising thereunder, and to make such expenditures, upon such terms and conditions and in such manner as he may deem necessary.

(b) Except as specifically provided herein, the authority and duties of the Secretary of Energy and the Administrator shall not be affected by this Act.

(c) The Bonneville Consumers' Council and the Bonneville Utilities' Council shall not be subject to the provisions of the Federal Advisory Committee Act, and any action of a member of such Council related to an action of such Council shall not be deemed to be a violation of Federal or State antitrust laws.

(d) No later than March 1, 1979, the Administrator shall offer to enter into power sales and purchase contracts to be effective July 1, 1979, with utilities pursuant to section 5(b)(2).

(e) For the purpose of enabling the Administrator to acquire resources from State and local governmental units at a cost no greater than the costs which would be applicable in the absence of such acquisition, the debt obligations described in section 103(a)(1) of title 26 of the United States Code shall not be affected by any contract or agreement regarding the Administrator's acquisition of resources constructed by a State or local governmental unit and for which the Administrator determines at the time the commitment for such acquisition is made will not be utilized over the life of the project in whole or in major part by a person who is not an exempt person, as defined in section 103(c)(3) of title 26 of the United States Code.

(f) No provision of chapter 2C of title 15 of the United States Code shall apply to or be deemed to include any "person" or "company" (as defined in 15 U.S.C. 79(a)(1) and (2)) organized and operated primarily for the purpose of financing, leasing, constructing, owning, managing, or operating part of an interest in, or all of, facilities used for the generation of electricity (together with associated transmission and other facilities), 75 per centum or more of the power from which, or from the part or interest so financed, leased, constructed, owned, managed, or operated, is or will be sold to the Administrator under section 6.●

● Mr. MARK O. HATFIELD. Mr. President, I am pleased to join with the Senator from Washington (Mr. JACKSON) as a cosponsor of the Pacific Northwest Electric Power Planning and Conservation Act. I believe this legislation will prove to be the most significant bill affecting the Northwest to be considered in the remaining years of this century.

In the past few years, we have had ample opportunity to view the important relationship between energy supply and our way of life in this country. The economic well-being of the Nation, our relationships with other countries, the lifestyles we as individuals live, are all related to the supply of energy resources. The oil embargo of 1973 and the drastic cost increases of foreign oil have indicated very clearly to us that we can no longer take energy for granted as a cheap resource which will always be available at a low social and economic cost. For well over a year, the Congress of the United States has been considering and debating the President's national energy plan.

The Pacific Northwest has been fortunate to have renewable hydroelectric resources at our disposal, but this picture is changing. The likelihood of significant new baseload generation from the construction of large dams is small. We must now reexamine our options for the future, which include more aggressive conservation programs, low-head hydroelectric generation, and development of alternative resources which have not received adequate attention in the past. Each of these options, which are not mutually exclusive, raises questions of financing, impact upon the environment, and cost to consumers. Allocation to and uses of the various types of power generated is one of the most controversial of the issues but one which must be resolved in a timely fashion.

In November of 1976, I called for a regional approach to these issues. As I indicated at that time, the Pacific Northwest is one region, tied together by one transmission system. The legislation being introduced today continues the regional approach to Northwest energy problems and treats the current issues in a fair and equitable manner. It recognizes the importance of conservation and development of alternative energy resources. It treats residential users of electricity fairly, no matter which utility serves them. It provides for improved planning so that the region can make rational choices to insure adequate supplies of electrical energy.

Mr. President, it is my belief that this legislation is another indication of the ability of the Pacific Northwest to work together as a region. I urge my colleagues in the Senate to join us in support of this legislation.●

By Mr. CULVER (for himself, Mr. CLARK, Mr. MCGOVERN, Mr. METZENBAUM, and Mrs. HUMPHREY):

S. 3419. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income a portion of payments made under certain Federal and State cost-sharing programs the primary purpose of which is conservation of soil and water resources, environmental protection or restoration, forest enhancement, or the provision of wildlife habitat; to the Committee on Finance.

● Mr. CULVER. Mr. President, I am introducing today legislation to exempt from Federal income taxation Federal and State cost-sharing payments for soil and water conservation, environmental protection, and the provision of wildlife habitat.

The U.S. Department of Agriculture currently administers a variety of programs under which it pays part of the cost of implementing measures to enhance natural resource and wildlife protection. Several States, including my own State of Iowa, provide funds for similar purposes. The basis of public support for these programs is that they yield broad societal benefits beyond those which accrue to individual landowners.

For example, it is clearly in our economic and environmental interest that cropland be adequately protected from soil erosion. This soil is the foundation of our food production capacity. Without it, food costs would soar and our very ability to provide food for ourselves would be jeopardized. Yet, soil conserving measures are often too expensive for the individual landowner, and the return on investment is usually delayed for many years. In the high competitve world of food production, farmers rarely can make these investments in conservation with any hope of recovering their costs through the prices received for their products. Our cost-sharing programs are designed to overcome these financial barriers to good conservation and environmental protection by providing financial incentives to install effective soil conservation measures.

Under current tax law, however, Federal and State cost-sharing payments are considered gross income to the farmer or landowner and subsequently,

for tax purposes, are treated as earnings. Such a practice is a disincentive for sound soil conservation and environmental protection.

Mr. President, this is a clear case of diametrically opposed public policies. We attempt, on the one hand, to encourage a necessary public investment through financial assistance to private citizens. On the other hand, we discourage them from undertaking the conservation effort by imposing a tax penalty.

To make matters worse, this penalty falls unevenly on different kinds of conservation measures. The Internal Revenue Service (IRS) defines expenditures on certain measures as "deductible expenditures." Others are classified as expenditures on "depreciable assets." These distinctions are based largely on the type of material used to build a conservation structure and on the expected life of the measure, not on its purpose or function. For example, expenditures on a dam or water diversion structure built entirely with dirt are classified as deductible expenses. If a structure is built with concrete or wood, it would be classified as a depreciable asset. Investments in soil conservation projects classified as deductible expenditures do not result in a higher tax burden for a farmer. The increased gross income from the Government payment is offset by an equivalent deduction.

In the case of expenditures on measures classified as depreciable assets, however, only a portion of the increased gross income may be deducted that tax year. The farmer receiving assistance from the Government for building these structures must include in his gross income for that year the total amount of money received from the Government. If he can recover, in the first year, through annual allowances for depreciation, only 10 percent of that public assistance, he will have to pay taxes on the other 90 percent and wait until future years to recover those taxes.

These cost-sharing payments are not income supplements. Though the farmer will benefit from the financial assistance he receives for his conservation practices, the public will benefit, too, from the funds which the farmer spends himself on the project. The relative shares paid by the farmer and by the Government are based largely on the distribution of benefits from the work performed. This cannot be determined with total precision, of course, but reasonable estimates can be negotiated by local program representatives and the farmers themselves as is provided under these programs.

In selecting conservation measures, farmers are understandably influenced by tax considerations under the existing policies when they should be concentrating on the most cost-effective methods of conservation. The possibility of having to pay income taxes on the Government's share of the cost of certain conservation measures destroys the kind of balanced consideration of alternatives that is necessary if we are to get the most for our money.

This balance has been lacking since the inception of the agricultural conservation program (ACP) during the Dust Bowl days of the 1930's. Since then, over $15 billion has been invested in soil conservation under the ACP. One can drive almost anywhere in this country and see the results of this investment. Few public outlays have returned as great a dividend to the Nation. This return could have been substantially greater if we had not discouraged the use of these funds in perhaps more effective applications as a result of an irrational tax policy.

The legislation I am introducing today would simply exclude from the recipient's gross annual income the cost-sharing assistance he receives from the Government for measures whose primary purpose is soil and water conservation, environmental protection, forest enhancement, or the provision of wildlife habitat. The Federal programs affected by this exclusion are the water bank program, the emergency conservation measures program, the agricultural conservation program, the Great Plains conservation program, the resource conservation and development program, the rural clean water program, the forestry incentives program, and the rural abandoned mine program.

Payments made under these programs represent a national investment to enhance and secure a better future for the entire Nation, farmers and consumers alike. This bill would take us one step closer to even more effective soil conservation and environmental protection. At a time when we are losing annually over 2 billion tons of valuable topsoil to erosion, we should not have a tax policy which discourages sound conservation practices.

It is time to resolve this contradiction in policies by eliminating a tax which is both inequitable and self-defeating.

I ask unanimous consent the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3419

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CERTAIN PAYMENTS NOT INCLUDED IN GROSS INCOME.

(a) In General.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by redesignating section 124 as 125 and by inserting immediately after section 123 the following new section:

"SEC. 124. COST-SHARING PAYMENTS.

"(a) GENERAL RULE.—Gross income does not include the excludible portion of cost-sharing payments received under the following programs:

"(1) The Water Bank Program authorized by the Water Bank Act (16 U.S.C. 1301 et seq.).

"(2) The Emergency Conservation Measures Program authorized by title IV of the Agricultural Credit Act of 1978.

"(3) The Agricultural Conservation Program authorized by the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590a).

"(4) The Great Plains Conservation Program authorized by section 16 of the Soil Conservation and Domestic Policy Act (16 U.S.C. 590p(b)).

"(5) The Resource Conservation and Development Program authorized by the Bankhead-Jones Farm Tenant Act and by the Soil Conservation and Domestic Allotment Act (7 U.S.C. 1010; 16 U.S.C. 590a et seq.).

"(6) The Rural Clean Water Program authorized by section 208(j) of the Federal Water Pollution Control Act (33 U.S.C. 1288 (j)).

"(7) The Forestry Incentives Program authorized by section 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103).

"(8) The Rural Abandoned Mine Program authorized by section 406 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1236).

"(9) Any State program under which payments are made to individuals primarily for the purpose of conserving soil, protecting or restoring the environment, improving forests, or providing a habitat for wildlife.

"(b) EXCLUDIBLE PORTION.—For purposes of this section, the term 'excludible portion' means that portion (or all) of a payment under any program described in subsection (a) which is determined by the Secretary of Agriculture to be made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife.".

(b) Clerical Amendment.—The table of sections for such part is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 124. Certain cost-sharing payments.

"Sec. 125. Cross references to other acts.".

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall apply with respect to taxable years beginning after the date of enactment of this Act.●

By Mr. HATHAWAY:

S. 3420. A bill to amend the Internal Revenue Code of 1954 to reduce individual and corporate income tax reductions and for other purposes; to the Committee on Finance.

REVENUE ACT OF 1978

● Mr. HATHAWAY. Mr. President, today, I am pleased to introduce the Revenue Act of 1978. I intend that this legislation be carefully considered by the Finance Committee during markup of this year's tax bill.

On August 4, the Ways and Means Committee reported H.R. 13511. The bill contains a tax reduction of approximately $16.5 billion. The bill contains numerous provisions which are outlined in the Wall Street Journal of July 28. I ask unanimous consent that this article be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WAYS AND MEANS PANEL APPROVES $16 BILLION TAX CUT, INCLUDING CAPITAL-GAINS RELIEF CARTER VOWED TO VETO

(By John Pierson)

WASHINGTON.—The House Ways and Means Committee approved a $16 billion tax cut that includes $1.8 billion of relief for capital gains, which President Carter has threatened to veto.

The bill goes next to the House floor, where Republicans will try to make the tax cut larger and liberal Democrats will try to aim the reductions more at low- and middle-income taxpayers. After that, it goes to the Senate and then to a House-Senate conference.

Approved last night by a vote of 25 to 12 is a bill that stands most of Mr. Carter's tax

"reform" programs on its head. In drafting the measure over the past three months, the Ways and Means Committee rejected practically all the President's plans for closing tax "loopholes" and agreed instead to take capital gains out of the 15% minimum tax, which Congress enacted in 1969 to try to make sure that all high-income persons paid at least some tax.

In a last-minute switch, however, the committee voted to subject capital gains to a new 10% alternative minimum tax, which would have to be paid only if it exceeded a taxpayer's regular tax liability.

Thirteen Democrats joined 12 Republicans in voting for the bill, while 12 Democrats opposed it.

It's expected that the bill will go to the House floor before the House quits town Aug. 18 for its Labor Day recess.

The bill contains:

Individual tax cuts of $10.5 billion next year, achieved mainly through adjusted tax brackets, rate cuts, a higher exemption and a higher standard deduction.

Business cuts of $3.8 billion, mainly through lower corporate rates, higher exemption from the top rate and a more-generous investment credit.

Capital gains relief of $1.8 billion, chiefly by eliminating gains as an item of tax preference subject to the 15% minimum tax and the 50% maximum tax, "indexing" gains for inflation, and allowing homeowners to escape tax, once in a lifetime, on up to $100,000 of gain from sale of a home.

Homeowner tax relief was added yesterday in an effort to make the capital gains section less vulnerable to liberal complaints that the provision would benefit only the rich. Mr. Carter says that removing capital gains from the minimum tax would provide "huge tax windfalls for millionaires and only two bits for the average American." Fear of liberals' criticism was also behind the new alternative minimum tax on capital gains.

Here is a summary of the bill. Except where indicated, the changes would all take place starting next Jan. 1.

TAX CUTS

Individuals: The tax brackets would be raised about 6 percent. For example, under current law a married couple with taxable income, after deductions, of between $23,200 and $27,200 owes the federal government 32 cents of every dollar of income within that bracket. Under the committee bill, the couple would have to have between $24,600 and $28,840 of taxable income before being subect to the 32-percent rate. In addition, there would be actual rate cuts for certain brackets.

The zero bracket amount, which used to be called the standard deduction, would be increased to $2,300 from $2,200 for single persons and to $3,400 from $3,200 for married couples.

The personal exemption for each taxpayer and dependent would be raised to $1,000 from $750. Meanwhile, the general tax credit, which equals the greater of $35 for each exemption or 2 percent of the first $9,000 of taxable income, would expire at the end of this year under the bill.

Corporations: The corporate rates would be lowered and more income exempted from the top rate.

The rate on the first $25,000 of taxable corporate income would be cut to 17 percent from 20 percent and the rate on the second $25,000 to 20 percent from 22 percent. Two new brackets would be created, with the third $25,000 of corporate income taxed at 30 percent and the fourth $25,000 taxed at 49 percent.

Taxable corporate income exceeding $100,000 would be subject to a 46-percent rate. Currently the top rate is 48 percent.

Capital gains: Existing law imposes a 15-percent minimum tax on certain kinds of income or deductions to which Congress has given preferred tax treatment, including the half of capital gains that isn't subject to the regular income tax. What's more, the excluded half of capital gains, along with other preferences, reduces the amount of earned income eligible for the 50-percent maximum tax.

The committee agreed to delete capital gains from the list of preferences—for individuals, corporations, estates and trusts—under both the minimum and maximum taxes. This would have the effect of reducing the top rate on capital gains to 35 percent from 49 percent.

But the excluded half of capital gains, minus a $10,000 exemption, would become subject to a new 10-percent alternative minimum tax. The alternative minimum tax would be paid only if it exceeded the individuals regular tax liability. Gain from the sale of a principal residence wouldn't be subject to the alternative minimum tax, however.

The existing 15-percent minimum tax would continue to apply to all items of tax preference other than capital gains.

It also voted to eliminate any tax—either the regular or minimum tax—on the part of capital gains that's caused by inflation. This would be done by increasing the cost basis of three kinds of capital assets—corporate stock, real estate, and plant and equipment—with increases in the consumer price index. "Indexing" would start Jan. 1, 1980.

Thus, the basis of an asset sold in 1980 would be increased by the same percent as consumer prices rose between the third quarter of 1978 and the third quarter of 1979. For assets sold in 1981, the basis would be increased by the rise in the index between the third quarters of 1979 and 1980, and so on. There wouldn't be any adjustment for inflation that occurred prior to the third quarter of 1978.

For example, if consumer prices rose 24 percent, someone who bought stock in 1980 for $50,000 and sold it in 1985 for $100,000 would have a cost basis of $62,500—$50,000, plus 25 percent of $50,000—and would be taxed on a gain of $37,500, instead of $50,000.

But the Ways and Means panel also agreed to repeal the "alternative" capital-gains rate for individuals, a provision that allows them to have the first $50,000 of long-term gains taxed at 25 percent rather than at rates as high as 35 percent.

Homeowners: The bill provides some additional capital-gains relief for homeowners. Current law gives two tax breaks on the sale of personal residences.

A person of any age who buys a new home within 18 months of selling one doesn't pay tax on his gain, so long as the new home costs at least as much as the old one sells for. If the new one costs less than he gets for the old one, he pays tax on the difference. Further, someone over 65 years old who sells his home and doesn't "roll over" the proceeds into a new one can escape tax on some of his gain.

The bill would repeal the over-65 rule and retain the rollover rule. But anyone of any age could, once in his lifetime, escape tax completely on up to $100,000 of gain from a home sale. To qualify for this tax break, he would have to have lived in the house for at least two years. This change would be effective for homes sold starting today, July 28, 1978.

Investment credit: Currently at 10 percent, the investment credit for outlays on machinery and equipment is due to drop back to 7 percent in 1981. The Ways and Means bill would make it permanent at 10 percent and extend it to rehabilitation of structure, including industrial office buildings, retail buildings and warehouses. It also would make permanent the $100,000 credit limit on used property, due to drop to $50,000 in 1981.

Currently, investment credits are allowed to offset all tax liability up to $25,000 but only 50 percent of amounts of more than $25,000. The bill would raise that to 90 percent over four years, at the rate of 10 percentage points a year.

Pollution control: A taxpayer required to install pollution-control equipment in his plant currently is permitted to amortize the cost over five years rather than depreciating it over its useful life. But equipment amortized under this special rule is allowed only 5 percent investment credit. The committee agreed to provide the full 10 percent credit in such cases.

Jobs credit: The existing jobs tax credit for new hiring, up to $2,100 per worker, would be allowed to expire at the end of this year. In its place, the Ways and Means Committee voted a more generous credit, up to $3,000 the first year of employment and up to $1,000 the second year, but limited it to hard-to-employ persons. These would include welfare recipients, certain handicapped persons and Vietnam veterans eligible for food stamps.

Industrial bonds: Current law permits state or local governments to issue tax-exempt bonds, without any dollar limit, to finance construction of certain private business facilities. In addition, they can issue up to $5 million of industrial-development bonds to buy land or build a wide variety of facilities. Under the bill, this "small-issues" limit would be raised to $10 million.

Low-income housing: The committee agreed to extend through 1981 a provision, due to expire at the end of this year, that provides five-year amortization where someone rehabilitates housing to rent to low-income persons.

Working poor: The bill would make permanent the earned-income credit, which is due to expire at the end of this year. The credit equals 10 percent of the first $4,000 of income and a diminishing percentage of income between $4,000 and $8,000. Also, taxpayers would be allowed to figure their credit from tables without doing any arithmetic.

TAX REVISION

Gas taxes: As one of its few revenue raising tax "reforms," the committee voted to repeal the deduction for state and local taxes on gasoline, diesel and other motor fuels, except when they're used in business.

Political gifts: The bill would also repeal the existing deduction for political contributions of up to $100 a year, or $200 on a joint return. But the existing tax credit, which equals half of a taxpayer's political contributions up to a maximum credit of $25, or $50 on a joint return, would be retained.

Medical expenses: The deduction for medical and dental expenses would be simplified and tightened a bit. The committee agreed to repeal the separate deduction for half of insurance premiums up to $150, as well as the rule that limits deductions for drug costs to those that exceed 1 percent of income. Also, only insulin and prescription drugs would remain eligible for a deduction.

Thus, under the Ways and Means Committee's bill, the full amount of medical and hospital-insurance premiums, the costs of prescription drugs and nonprescription insulin and other qualifying expenses would be deductible to the extent they exceed 3 percent of income.

Unemployment benefits: Current law doesn't tax unemployment compensation. The bill would retain the exclusion for low-income persons but phase it out at middle and upper-income levels. A single person would have to include unemployment benefits in his income equal to half the amount of his income over $20,000. For married couples, the exclusion would start disappearing at $25,000 of adjusted gross income.

"At Risk" Rule: Under current law many

high-bracket taxpayers "shelter" their regular income by investing in activities that generate deductions. These deductions can be increased, without additional risk to the taxpayer, if his investment includes proceeds from a loan he isn't personally liable to repay. The 1976 Tax Reform Act tried to curb use of "nonrecourse" loans by limiting deductions to the investor's cash outlay plus repayable loans. But this "at risk" rule applies only to certain activities—movies, farming, equipment leasing or oil and gas drilling—unless they're carried out through a partnership.

The Ways and Means bill would extend the at-risk restrictions to all investments except real estate. It would extend it to closely held corporations, where five or fewer persons own more than 50 percent of the stock. In addition, the government could "recapture" previously taken deductions where the investor withdraws proceeds from a repayable loan.

Audits: To crack down further on tax shelters, the bill would impose a new civil penalty against a partnership that failed to file a tax return or filed one late. Also, the government would have four years, instead of three, to assess additional tax for items passed through from partnerships to partners. But this provision would apply only to large syndicated partnerships, those subject to the registration and reporting requirements of the Securities and Exchange Commission.

Farms: The bill would permanently broaden the family corporation exception in rules that require large farming corporations to use accrual accounting rather than cash accounting and to capitalize expenses incurred during the preproductive period instead of deducting them immediately. It would also ease the accrual-accounting rule relating to inventories of growing crops. It would give farmers, florists and nurseries that currently are using accrual accounting, even though they don't have to, until 1981 to change to cash accounting.

Deferred Pay: The Treasury has issued a controversial proposal to tax employe payments into certain deferred-compensation plans run by state and local governments and private employers. These plans are nonqualified, which means they don't meet rules of qualified plans and don't receive the same tax benefits.

The bill would permit a continuation of these nonqualified plans, with certain limits. Employes and independent contractors performing services for state or local governments could defer tax on an amount equal to the lesser of $7,500 a year, or 33⅓ percent of their compensation. Where lesser amounts were deferred, a limited catch-up would be available during the three years before retirement.

Private nonqualified plans would be made subject to the law as it existed on Feb. 1 this year, just before the Treasury issued its proposed regulations.

Finally, the bill would make it clear that employers would have to follow the same rule in taking deductions for the deferred compensation of independent contractors as for employes. The rule: Deductions can't be taken until the employer starts paying out the deferred compensation.

Small business: The bill would increase to 15 from 10 the maximum number of shareholders a corporation may have while still qualifying for special tax treatment under subchapter S of the tax code. It would treat a husband and wife who own subchapter S stock as one shareholder, regardless of how they hold the stock. It would allow shareholders to elect subchapter S status during the first 75 days of the current tax year, instead of 30 days, or at any time during the preceding tax year, instead of only the last 30 days.

Current law limits the amount of ordinary income that an individual taxpayer may offset with capital losses. An exception is provided for owners of small corporations. Thus, a capital loss on stock sustained by an individual is treated as an ordinary loss up to a maximum of $25,000 a year, or $50,000 on a joint return. But a corporation can't issue more than $500,000 of stock that is eligible for this special treatment.

The bill would raise the loss limitation to $50,000, or $100,000 on a joint return, and permit the issuance of up to $1 million of eligible stock.

Under current law, a taxpayer is allowed to increase an asset's first-year depreciation by an additional 20%. This "bonus" depreciation is limited to the first $10,000 of asset cost, $20,000 on a joint return. The bill would raise it to 25% of the first $20,000, or $40,000 on a joint return. But this special depreciation rule would be limited to taxpayers with $1 million or less of depreciable assets. Currently, there isn't any such limit.

Mr. HATHAWAY. Mr. President, the bill which I am introducing has similarities with H.R. 13511 and also some significant differences. The bill provides modifications to the tax system which will result in an estimated net revenue loss of $19 billion.

Present law (percent)	Single taxpayers	Proposed bill (percent)
19	$5,000	19
29	15,000	26
34	20,000	33
45	30,000	45

Present law (percent)	Married filing jointly	Proposed bill (percent)
15	$5,000	15
22	15,000	22
28	20,000	26
36	30,000	33

The current personal exemption of $750 is repealed. The general tax credit, which currently is the greater of $35 per exemption or 2 percent of the first $9,000 of annual earnings (maximum $180), is repealed. A tax credit of $275 is permitted for each personal exemption.

There is currently an exclusion from capital gains tax, a portion of gain on the sale of a primary residence for an individual over age 65. The exclusion currently applies in proportion to an adjusted sales price of $35,000. The qualifying age would be reduced to 55 and the adjusted sales price limit removed for sale of a taxpayer's primary residence. The residence must be occupied by the taxpayer for 3 of 5 years prior to the sale.

The list of items of tax preferences will be modified so that any capital gain on the sale of a principal residence will not be considered as a capital gain item of preference. This will eliminate the tax burden which could otherwise be imposed on inflation gains resulting from the sale of a residence if the proceeds are not reinvested in another home or excluded from income under the previously discussed provision.

The bill would also modify the interrelation of the minimum and maximum taxes. Under present law, personal service income subject to the maximum tax is reduced by items of tax preference, primarily capital gains. This is referred to as the "maxitax poison"; this offset would be repealed.

The bill provides a 50-percent tax credit for the first $1,000 of State or local real estate on the taxpayer's primary residence. The deduction for taxes paid would be reduced for taxes which are taken into account for the tax credit. This change will provide relief for hard-pressed low- and middle-income taxpayers while encouraging local governments to shift their tax bases away from property taxes toward progressive revenue measures, such as the income tax.

Current law provides for a refundable earned income credit for low-income taxpayers. The credit is 10 percent of the taxpayer's first $4,000 of annual earnings. The credit is refundable but it is phased out as income levels rise so that no credit is available at $8,000 of income. The bill would raise the earnings base to $6,000 and phase it out by $12,000. The credit would be taken into account using an advanced withholding approach.

Furthermore, the current law requires the taxpayer to maintain a household within the United States. This requirement has discriminated particularly against junior U.S. military personnel and their families serving overseas. The depreciation of the dollar has caused extraordinary hardship for those serving in Germany and Japan. The bill would repeal the U.S. household requirement.

In order to provide an incentive for individual investors in equity capital needs of small and medium businesses, a 10-percent credit would be allowed for the first $7,500 of cash purchase in new stock issues of a business with net equity less than $25 million. The credit is designed to infuse new funds and return investors to the capital market.

Current law provides that tax on the gain arising from the sale of a personal residence can be deferred if reinvested in a new residence within 18 months of the date of sale. The time period would be lengthened to 24 months by the bill.

To complement these tax measures for individuals, the bill contains several tax changes for corporations, particularly smaller businesses. One, previously discussed is the tax credit for investment in equity capital of small and medium-sized firms.

The bill modifies the corporate tax rates and surtax exemption. The changes are designed to provide tax relief for smaller firms and to adjust the surtax exemption for the effects of inflation. A comparison of existing and proposed law is as follows:

Tax Rates

[In percent]

Taxable income	Present	Proposed
$0–$25,000	20	20
$25–50,000	22	20
$50–150,000	48	20
Over 150,000	48	48

The 10-percent investment tax credit would be made permanent. In addition, the $100,000 limitation on used property

eligible for the credit would also be made permanent.

Under current law, the investment credit is limited to the first $25,000 of the tax liability plus 50 percent of the liability in excess of the $25,000. The credit is nonrefundable; however, any credit in excess of this limitation may be carried back 3 years to offset tax liability and then forward for 7 years. The bill would make the tax refundable for the first $25,000; it would raise the overall limitation to 90 percent of tax liability. The bill would repeal the carryback of excess credits but continue current law for carry forwards to future years.

The investment tax credit, which is presently available only for tangible personal property (and certain other tangible property) would be extended to buildings and structures if the buildings are rehabilitated. This is designed to encourage renovation of inner-city buildings. Furthermore, structures, buildings, and other tangible property qualifying for the credit would be expanded to include retailing and wholesaling activities as well as manufacturing activities.

The credit would also be expanded to permit 6⅔ percent tax credit rather than 5 percent for pollution control facilities. Qualified research and development expenditures will also qualify for the credit. Expenses which are currently deducted will qualify for 3⅓ percent credit; expenses which are amortized over 60 months will qualify for a 6⅔-percent credit. These changes in the investment tax credit should be most beneficial to new, small, highly innovative firms.

The bill also provides a number of technical modifications to assist small businesses.

First, the subchapter S, tax option corporation, rules would be expanded to allow 15 rather than 10 shareholders. In addition, stock owned by a husband and wife (or their estates) will be treated as one shareholder. Second, a grantor or current income trust would be an eligible shareholder.

The rules concerning election of subchapter S status are simplified. Further, a change is included to allow a subchapter S shareholder to carry over any net operating loss of the company which cannot be utilized in the current year.

Present law allows taxpayers to claim an additional depreciation allowance for up to $10,000 of euipment. The additional depreciation is 20 percent of the basis in the asset for the first year it is depreciated. The bill raises the percentage to 25 percent and the basis to $20,000. However, the additional depreciation can only be claimed if the aggregate adjusted basis of the depreciable property is less than $1,000,000. This restriction will target the benefits toward small businesses.

Losses on qualified small business stock may be deducted against ordinary income instead of as a capital loss. Under present law the loss deducted in any year cannot exceed $25,000 ($50,000 for joint returns). This is raised to $50,000 per individual or $100,000 for husband and wife. The definition of a small business corporation would be modified to allow capitalization of up to $5,000,000 instead of $1 million under current law.

Finally, the bill authorizes a tax impact to be made by the Department of the Treasury and Council of Economic Advisors. The study is to evaluate the incidence of taxation by income level and type of tax. It also authorizes an analysis of the shifting of various payroll and corporate taxes.

Mr. President, I believe that this tax package provides an important alternative to the various measures now being discussed in Congress.

It provides tax rate reductions across the board. Although these cuts are weighed toward the lower and middle-income taxpayers, all levels receive these benefits.

In addition, revisions are made to the earned income tax credit. Special consideration is given for the capital gains resulting from the sale of a personal residence where the proceeds are not reinvested.

Small and medium-sized businesses would benefit from the increase in the surtax exemption and corresponding rate reductions. The liberalization of the business depreciation partial refundability of the investment credit and the technical changes in subchapter S and small business stock rules will be of assistance to the development of small businesses.

Larger corporations should also benefit from the expansion of the investment credit to rehabilitation of buildings, the liberation for research, development and pollution control expenditures. In addition, the increased limitation for the amount of credit offsetting tax will be of a significant assist to capital formation and investment.

The incentive tax credit for investment in small business equity issues will assist individuals, businesses and the capital markets.

Mr. President. In order to evaluate this bill in comparison with the Ways and Means Committee, I ask that a comparative table of the two bills be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Tax analysts—Major provisions of Hathaway bill compared with present law and H.R. 13511

Present law	H.R. 13511	H.R. ———
Tax rates: single 14–70%; married, joint 14–70%	Revised	Revised
Bracket widening: None	6%	None
Std. deduction: single $2,200	$2,300	No Change
married, joint $3,200	$3,400	No Change
Personal exemption: $750	$1,000	Repealed

Mr. HATHAWAY. Mr. President, I also ask unanimous consent that the text of my bill and a tax burden table be printed in the RECORD.

There being no objection, the bill and table were ordered to be printed in the RECORD, as follows:

S. 3420

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SHORT TITLES, ETC.

Sec. 101. Short title: Table of contents.
(a) SHORT TITLE.—This Act may be cited as the "Revenue Act of 1978".
(b) TABLE OF CONTENTS.—
TITLE I—SHORT TITLE, ETC.
Sec. 101. Short title; table of contents.
Sec. 102. Amendment of 1954 Code.
Sec. 103. Effective date.
TITLE II—TAX TREATMENT OF INDIVIDUALS
SUBTITLE A—RATES AND CREDITS
Sec. 201. Reduction of tax rates.
Sec. 202. Personal exemption tax credit.
Sec. 203. Technical, clerical and conforming amendments.
Sec. 204. Application of certain changes in the case of fiscal year taxpayers.
SUBTITLE B—TAXATION OF CAPITAL GAINS OF NONCORPORATE TAXPAYERS
Sec. 211. Revision of exclusion on gain from sale of personal residence.
Sec. 212. Structural amendments to the minimum and maximum taxes.
SUBTITLE C—MISCELLANEOUS PROVISIONS AFFECTING INDIVIDUAL INCOME TAX
Sec. 221. Real estate property tax credit on personal residence.
Sec. 222. Revision of earned income tax credit.
Sec. 223. Small business investment incentive credit.
Sec. 224. Period for reinvestment of gain on sale of personal residence.
TITLE III—TAX TREATMENT OF BUSINESS
SUBTITLE A—CORPORATE SURTAX EXEMPTION
Sec. 301. Increase corporate surtax exemption.
SUBTITLE B—INVESTMENT CREDIT
Sec. 311. Investment credit made permanent.
Sec. 312. Investment credit made partially refundable and tax liability limitation increased to 90 percent.
Sec. 313. Certain buildings and structural components.
Sec. 314. Certain pollution control facilities and research expenditures.

TITLE IV—TAX STUDY
Sec. 401. Tax impact study authorized.

SEC. 102. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954. In this Act, a reference to the "Code" is a reference to the Internal Revenue Code of 1954.

SEC. 103. EFFECTIVE DATE.

Except as otherwise provided by this Act, the amendments made by this Act apply with respect to taxable years beginning after December 31, 1978.

TITLE II—TAX TREATMENTS OF INDIVIDUALS

SUBTITLE A—TAX REDUCTION AND EXTENSIONS

SEC. 201. RATE CUTS IN CERTAIN BRACKETS.

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

If the amount of taxable income is—		Then as tax before credit—	
Over—	But not over—	Enter—	Of excess over—
$3,200	$4,200	0 plus 14 percent	$3,200.
$4,200	$5,200	$140 plus 15 percent	$4,200.
$5,200	$6,200	$290 plus 16 percent	$5,200.
$6,200	$7,200	$450 plus 17 percent	$6,200.
$7,200	$11,200	$620 plus 19 percent	$7,200.
$11,200	$15,200	$1,380 plus 22 percent	$11,200.
$15,200	$19,200	$2,260 plus 24 percent	$15,200.
$19,200	$23,200	$3,220 plus 26 percent	$19,200.
$23,200	$27,200	$4,260 plus 29 percent	$23,200.
$27,200	$31,200	$5,420 plus 33 percent	$27,200.
$31,200	$35,200	$6,740 plus 37 percent	$31,200.
$35,200	$39,200	$8,220 plus 41 percent	$35,200.
$39,200	$43,200	$9,860 plus 45 percent	$39,200.
$43,200	$47,200	$11,660 plus 48 percent	$43,200.
$47,200	$55,200	$13,580 plus 50 percent	$47,200.
$55,200	$67,200	$17,580 plus 53 percent	$55,200.
$67,200	$79,200	$23,940 plus 55 percent	$67,200.
$79,200	$91,200	$30,540 plus 58 percent	$79,200.
$91,200	$103,200	$37,500 plus 60 percent	$91,200.
$103,200	$123,200	$44,700 plus 62 percent	$103,200.
$123,200	$143,200	$57,100 plus 64 percent	$123,200.
$143,200	$163,200	$69,900 plus 66 percent	$143,200.
$163,200	$183,200	$83,100 plus 68 percent	$163,200.
$183,200	$203,200	$96,700 plus 69 percent	$183,200.
$203,200		$110,500 plus 70 percent	$203,200.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

If the amount of taxable income is—		Then as tax before credit—	
Over—	But not over—	Enter—	Of excess over—
$2,200	$3,200	0 plus 14 percent	$2,200.
$3,200	$4,200	$140 plus 15 percent	$3,200.
$4,200	$6,200	$300 plus 18 percent	$4,200.
$6,200	$8,200	$660 plus 19 percent	$6,200.
$8,200	$10,200	$1,040 plus 21 percent	$8,200.
$10,200	$12,200	$1,460 plus 22 percent	$10,200.
$12,200	$14,200	$1,900 plus 24 percent	$12,200.
$14,200	$16,200	$2,380 plus 25 percent	$14,200.
$16,200	$18,200	$2,880 plus 28 percent	$16,200.
$18,200	$20,200	$3,440 plus 30 percent	$18,200.
$20,200	$22,200	$4,040 plus 32 percent	$20,200.
$22,200	$24,200	$4,680 plus 35 percent	$22,200.
$24,200	$26,200	$5,380 plus 36 percent	$24,200.
$26,200	$28,200	$6,100 plus 38 percent	$26,200.
$28,200	$30,200	$6,860 plus 41 percent	$28,200.
$30,200	$34,200	$7,680 plus 42 percent	$30,200.
$34,200	$38,200	$9,360 plus 45 percent	$34,200.
$38,200	$40,200	$11,160 plus 48 percent	$38,200.
$40,200	$42,200	$12,120 plus 51 percent	$40,200.
$42,200	$46,200	$13,140 plus 52 percent	$42,200.
$46,200	$52,200	$15,227 plus 55 percent	$46,200.
$52,200	$54,200	$18,520 plus 56 percent	$52,200.
$54,200	$66,200	$19,640 plus 58 percent	$54,200.
$66,200	$72,200	$26,600 plus 59 percent	$66,200.
$72,200	$78,200	$30,140 plus 61 percent	$72,200.
$78,200	$82,200	$33,800 plus 62 percent	$78,200.
$82,200	$90,200	$36,280 plus 63 percent	$82,200.
$90,200	$102,200	$41,320 plus 64 percent	$90,200.
$102,200	$122,200	$49,000 plus 66 percent	$102,200.
$122,200	$142,200	$62,200 plus 67 percent	$122,200.
$142,200	$162,200	$75,600 plus 68 percent	$142,200.
$162,200	$182,200	$89,200 plus 69 percent	$162,200.
$182,200		$103,000 plus 70 percent	$182,200.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

If the amount of taxable income is—		Then as tax before credit—	
Over—	But not over—	Enter—	Of excess over—
$2,200	$2,700	0 plus 14 percent	$2,200.
$2,700	$3,200	$70 plus 15 percent	$2,700.
$3,200	$3,700	$145 plus 16 percent	$3,200.
$3,700	$4,200	$225 plus 17 percent	$3,700.
$4,200	$6,200	$310 plus 19 percent	$4,200.
$6,200	$8,200	$690 plus 20 percent	$6,200.
$8,200	$10,200	$1,090 plus 22 percent	$8,200.
$10,200	$12,200	$1,530 plus 23 percent	$10,200.
$12,200	$14,200	$1,990 plus 25 percent	$12,200.
$14,200	$16,200	$2,490 plus 26 percent	$14,200.
$16,200	$18,200	$3,010 plus 29 percent	$16,200.
$18,200	$20,200	$3,590 plus 33 percent	$18,200.
$20,200	$22,200	$4,250 plus 36 percent	$20,200.
$22,200	$24,200	$4,970 plus 38 percent	$22,200.
$24,200	$28,200	$5,730 plus 40 percent	$24,200.
$28,200	$34,200	$7,330 plus 45 percent	$28,200.
$34,200	$40,200	$10,030 plus 50 percent	$34,200.
$40,200	$46,200	$13,030 plus 55 percent	$40,200.
$46,200	$52,200	$16,330 plus 60 percent	$46,200.
$52,200	$62,200	$19,930 plus 62 percent	$52,200.
$62,200	$72,200	$26,130 plus 64 percent	$62,200.
$72,200	$82,200	$32,530 plus 66 percent	$72,200.
$82,200	$92,200	$39,130 plus 68 percent	$82,200.
$92,200	$102,200	$45,930 plus 69 percent	$92,200.
$102,200		$52,830 plus 70 percent	$102,200.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

If the amount of taxable income is—		Then as tax before credit—	
Over—	But not over—	Enter—	Of excess over—
$1,600	$2,100	$0 plus 14 percent	$1,600.
$2,100	$2,600	$70 plus 15 percent	$2,100.
$2,600	$3,100	$145 plus 16 percent	$2,600.
$3,100	$3,600	$225 plus 17 percent	$3,100.
$3,600	$5,600	$310 plus 19 percent	$3,600.
$5,600	$7,600	$690 plus 22 percent	$5,600.
$7,600	$9,600	$1,130 plus 24 percent	$7,600.
$9,600	$11,600	$1,610 plus 26 percent	$9,600.
$11,600	$13,600	$2,130 plus 29 percent	$11,600.
$13,600	$15,600	$2,710 plus 33 percent	$13,600.
$15,600	$17,600	$3,870 plus 37 percent	$15,600.
$17,600	$19,600	$4,110 plus 41 percent	$17,600.
$19,600	$21,600	$4,930 plus 45 percent	$19,600.
$21,600	$23,600	$5,830 plus 48 percent	$21,600.
$23,600	$27,600	$6,790 plus 50 percent	$23,600.
$27,600	$32,600	$8,790 plus 53 percent	$27,600.
$32,600	$39,600	$11,970 plus 55 percent	$32,600.
$39,600	$45,600	$15,270 plus 58 percent	$39,600.
$45,600	$51,600	$18,750 plus 60 percent	$45,600.
$51,600	$61,600	$22,350 plus 62 percent	$51,600.
$61,600	$71,600	$28,550 plus 64 percent	$61,600.
$71,600	$81,600	$34,950 plus 66 percent	$71,600.
$81,600	$91,600	$41,550 plus 68 percent	$81,600.
$91,600	$101,600	$48,350 plus 69 percent	$91,600.
$101,600		$55,250 plus 70 percent	$101,600.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

If the taxable income is—	The tax is—	
Less than $500	14 percent	
$500 to $1,000	$70 plus 15 percent	$500
$1,000 to $1,500	$145 plus 16 percent	1,000
$1,500 to $2,000	$225 plus 17 percent	1,500
$2,000 to $4,000	$310 plus 19 percent	2,000
$4,000 to $6,000	$690 plus 20 percent	4,000
$6,000 to $8,000	$1,090 plus 22 percent	6,000
$8,000 to $10,000	$1,530 plus 23 percent	8,000
$10,000 to $12,000	$1,990 plus 25 percent	10,000
$12,000 to $14,000	$2,490 plus 26 percent	12,000
$14,000 to $16,000	$3,010 plus 29 percent	14,000
$16,000 to $18,000	$3,590 plus 33 percent	16,000
$18,000 to $20,000	$4,250 plus 36 percent	18,000
$20,000 to $22,000	$4,970 plus 38 percent	20,000
$22,000 to $26,000	$5,730 plus 40 percent	22,000
$26,000 to $32,000	$7,330 plus 45 percent	26,000
$32,000 to $38,000	$10,030 plus 50 percent	32,000
$38,000 to $44,000	$13,030 plus 55 percent	38,000
$44,000 to $50,000	$16,330 plus 60 percent	44,000
$50,000 to $60,000	$19,930 plus 62 percent	50,000
$60,000 to $70,000	$26,130 plus 64 percent	60,000
$70,000 to $80,000	$32,530 plus 66 percent	70,000
$80,000 to $90,000	$39,130 plus 78 percent	80,000
$90,000 to $100,000	$45,930 plus 69 percent	90,000
$100,000	$52,830 plus 70 percent	100,000

(b) FILING REQUIREMENTS.—Paragraph (1) of section 6012(a) (relating to persons required to make returns of income) is amended—

(1) by striking out "$2,950" and inserting in lieu thereof "$3,900"

(2) by striking out "$3,950" and inserting in lieu thereof "$5,100"

(3) by striking out "$4,700" and inserting in lieu thereof "$6,700"

(c) COLLECTION OF INCOME TAX AT SOURCE ON WAGES.—

(1) Section 3402(a) (relating to requirement of withholding income tax at source) is amended to read as follows:

"(a) REQUIREMENT OF WITHHOLDING.—Except as otherwise provided in this section, every employer making payment of wages shall deduct and withhold upon such wages a tax determined (1) by ascertaining an amount in accordance with tables prescribed by the Secretary, and (2) by reducing such amounts by the employee's aggregate withholding allowance prorated to the payroll period. The tables so prescribed shall apply with respect to wages paid during the period prescribed for such tables and shall be in such form, and provide for such amounts to be deducted and withheld, as the Secretary determines to be most appropriate to carry out the purposes of this chapter and to reflect the provisions of chapter 1 applicable to the period. The aggregate withholding allowance shall be equal to an amount calculated in accordance with regulations prescribed by the Secretary under this section, taking into account the total number of withholding exemptions claimed and any other reduction in withholding to which an employee is entitled under this section or the regulations thereunder. The amount of each withholding exemption shall be equal to the amount of one personal credit provided in section 42."

(2) Section 3402(b) (relating to the percentage method of withholding) is amended—

(A) by striking out paragraph (1), and

(B) by revising paragraph (4) to read as follows:

"(4) In any case in which the period, or the time described in paragraph (3), in respect of any wages is less than one week, the Secretary, under regulations prescribed by him, may authorize an employer to compute the tax to be deducted and withheld as if the aggregate of the wages paid to the employee during the calendar week were paid for a weekly payroll period."

(3) Paragraph (1)(G) of section 3402(f) (relating to withholding exemptions) is amended by inserting "(or more than one exemption if so prescribed by the Secretary)" immediately after "one exemption".

(4) Section 3402(i) (relating to additional withholding) is amended by striking out "employer and employee agree (in such form as the Secretary may by regulations prescribe) to" and inserting in lieu thereof "employee requests (in such form as the Secretary may by regulations prescribe)".

(5) Section 3402(m) (relating to withholding allowances based on itemized deductions) is amended as follows:

(A) Paragraph (1) is amended to read as follows:

"(1) GENERAL RULE.—An employee shall be entitled to additional withholding allowances or additional reduction in withholding under this subsection with respect to a payment of wages in accordance with regulations prescribed by the Secretary. In determining the number of additional withholding allowances or the amount of additional reduction in withholding under this subsection, the employee may take into account—

"(A) the excess of his estimated itemized deductions over his zero bracket amount (as defined in section 63(d)),

"(B) such tax credits to which he is entitled as specified in the regulations prescribed by the Secretary, and

"(C) such additional items as specified in the regulations prescribed by the Secretary."

(B) Paragraph (4) is amended to read as follows:

"(4) AUTHORITY TO PRESCRIBE TABLES.—The Secretary may prescribe tables pursuant to which employees shall determine the number of withholding allowances or the amount of reduced withholding to which they are entitled under this subsection.".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1978.

(2) WITHHOLDING AMENDMENTS.—The amendments made by subsection (c) shall apply to remuneration paid after December 31, 1978.

SEC. 202. PERSONAL CREDITS.

(a) GENERAL RULE.—Section 42 (relating to the general tax credit) is amended to read as follows:

"SEC. 42. PERSONAL CREDITS.

"(a) ALLOWANCE OF CREDITS.—In the case of an individual there shall be allowed as a credit against the tax imposed by section 1 or a tax imposed in lieu of the tax imposed by section 1 the sum of the credits provided in subsections (b), (c), (d), and (e).

"(b) TAXPAYER AND SPOUSE.—A credit of $275 for the taxpayer; and an additional credit of $275 for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not dependent of another taxpayer.

"(c) ADDITIONAL CREDIT FOR TAXPAYER OR SPOUSE AGED 65 OR MORE.—

(1) FOR TAXPAYER.—An additional credit of $275 for the taxpayer if he has attained the age of 65 before the close of his taxable year.

"(2) FOR SPOUSE.—An additional credit of $275 for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse has attained the age of 65 before the close of such taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer.

"(d) ADDITIONAL CREDIT FOR BLINDNESS OF TAXPAYER OR SPOUSE.—

"(1) FOR TAXPAYER.—An additional credit of $275 for the taxpayer if he is behind at the close of his taxable year.

"(2) FOR SPOUSE.—An additional credit of $275 for the spouse of the taxpayer if a separate return is made by the taxpayer, and if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. For purposes of this paragraph, the determination of whether the spouse is blind shall be made as of the close of the taxable year of the taxpayer; except that if the spouse dies during such taxable year such determination shall be made as of the time of such death.

"(3) BLINDNESS DEFINED.—For purposes of this subsection, an individual is blind only if his central visual acuity does not exceed 20/200 in the better eye with correcting lenses, or if his visual acuity is greater than 20/200 but is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees.

"(e) ADDITIONAL CREDIT FOR DEPENDENTS.—

"(1) IN GENERAL.—A credit for $275 for each dependent (as defined in section 7702)—

"(A) whose gross income for the calendar year in which the taxable year of the taxpayer begins is less than $275, or

"(B) who is a child of the taxpayer and who (i) has not attained the age of 19 at the close of the calendar year in which the taxable year of the taxpayer begins, or (ii) is a student.

"(2) CREDIT DENIED IN CASE OF CERTAIN MARRIED DEPENDENTS.—No credit shall be allowed under this subsection for any dependent who has made a joint return with his spouse under section 6013 for the taxable year beginning in the calendar year in which the taxable year of the taxpayer begins.

"(3) CHILD DEFINED.—For purposes of paragraph (1)(B), the term 'child' means an individual who (within the meaning of section 7702) is a son, stepson, daughter, or stepdaughter of the taxpayer.

"(4) STUDENT DEFINED.—For purposes of paragraph (1)(B)(ii), the term 'student' means an individual who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins—

"(A) is a full-time student at an educational organization described in section 170(b)(1)(A)(ii); or

"(B) is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational organization described in section 170(b)(1)(A)(ii) or of a State or political subdivision of a State.

(b) TERMINATION OF DEDUCTIONS FOR PERSONAL EXEMPTIONS.—

(1) Part V (except section 152) of subchapter B of chapter 1 is repealed.

(2) Section 152 (dependent defined) is renumbered as section 7702 and (as renumbered) is transferred from chapter 1 and inserted in chapter 79 (definitions) after section 7701. Such section is further amended—

(A) by striking out "this subtitle," in subsection (a) and inserting in lieu thereof "subtitle A,"; and

(B) by adding at the end thereof the following: "(f) CROSS REFERENCES.—

"(1) For definitions of 'husband' and 'wife' as used in subsection (b)(4), see section 7701(a)(17).

"(2) For determination of material status, see section 7703."

(3) Section 143 (determination of marital status) is renumbered as section 7703 and (as renumbered) is transferred from chapter 1 and inserted in chapter 79 after 7702. Such section is further amended by striking out "part V" each place it appears and inserting in lieu thereof "any provision referring to this section".

SEC. 203. TECHNICAL, CLERICAL, AND CONFORMING AMENDMENTS

(a) TRANSFER OF DEFINITION OF DEPENDENT TO DEFINITION SECTION OF CODE.—Each

of the following is amended by striking out "section 152" each place it appears therein and inserting in lieu thereof "section 7702":

(1) Section 2(a)(1)(B).
(2) Section 2(b)(3)(B).
(3) Section 44A(f)(6)(A).
(4) Section 50B(c)(5).
(5) Section 105.
(6) Section 120(d)(4).
(7) Section 7703(b)(1).
(8) Section 170(g).
(9) Section 213(a)(1).
(10) Section 6334(d)(1)(B)(ii).
(11) Section 7701(a)(17).

(b) TRANSFER OF RULES REGARDING MARITAL STATUS.—Each of the following is amended by striking out "section 143" each place it appears therein and inserting in lieu thereof "section 7703":

(1) Section 2(c).
(2) Section 37(d)(2).
(3) Section 43(d).
(4) Section 63(h).
(5) Section 105(d)(4).
(6) Section 219(c)(2).
(7) Section 220(c)(3).
(8) Section 879(c)(3).
(9) Section 1304(c)(4).
(10) Section 3402(f)(1)(G).
(11) Section 6362(f)(5).
(12) Section 6428(g).

(c) PERSONAL CREDITS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by striking out the item relating to section 42 and inserting in lieu thereof the following item:

"Sec. 42. Personal credits."

(2) Section 2 (relating to definitions and special rules) is amended as follows:

(A) Subsection (a)(1)(B) is amended by striking out "deduction for the taxable year under section 151" and inserting in lieu thereof "credit for the taxable year under section 42".

(B) Subsection (b)(1) is amended by striking out "deduction" each place it appears and inserting in lieu thereof "credit", and by striking out "section 151" each place it appears and inserting in lieu thereof "section 42".

(3) Section 3 (relating to tax tables for individuals) is amended—

(A) by striking out "tax table" in subsection (a)(1) each place it appears and inserting in lieu thereof "taxable";

(B) by revising subsection (a)(3) to read as follows:

"(3) CERTAIN TAXPAYERS WITH LARGE NUMBER OF PERSONAL CREDITS.—The Secretary may exclude from the application of this section taxpayers in any tax rate category having more than the number of personal credits for that category determined by the Secretary.";

(C) by striking out subsection (a)(4); and

(D) by revising subsection (d) to read as follows:

"(d) TAXABLE INCOME.—For purposes of this section, the taxable income shall be determined under section 63."

(4) Section 43 (relating to the earned income credit) is amended—

(A) by striking out "section 151(e)(1)(B) (relating to additional exemptions for dependents)" in subsection (c)(1)(A)(i) and inserting in lieu thereof section 42(e)(1)(B) (relating to additional credits for dependents)", and

(B) by striking out "deductions under section 151" in subsection (c)(1)(A)(ii) and inserting in lieu thereof "credit under section 42".

(5) Section 44A (relating to expenses for household and dependent care services necessary for gainful employment) is amended—

(A) by striking out "section 151(e)" in subsection (c)(1)(A) and inserting in lieu thereof "section 42(e)",

(B) by striking out "section 151(e)(3)" in subsection (f)(5)(A) and inserting in lieu thereof "section 42(e)(3)" and

(C) by striking out "deduction under section 151(e) (relating to deduction for personal exemptions for dependents)" in subsection (f)(6)(B) and inserting in lieu thereof "credit under section 42(e) (relating to personal credits for dependents)".

(6) Section 57(b)(1) (relating to the computation of adjusted itemized deductions for minimum tax) is amended by striking out subparagraph (B) and by redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively.

(7) Section 63 (relating to the definition of taxable income) is amended—

(A) by amending subsection (b)(1) to read as follows:

"(1) reduced by the excess itemized deductions, and",

(B) by striking out "deduction under section 151(e) in subsections (e)(1)(D) and inserting in lieu thereof "credit under section 151(e)" in subsection (e)(1)(D) and inserting in lieu thereof "credit under section 42(e)",

(C) by amending subsection (f) to read as follows:

"(f) ITEMIZED DEDUCTIONS.—For purposes of this subtitle, the term 'itemized deductions' means the deductions allowable by this chapter other than the deductions allowable in arriving at adjusted gross income."

(8) Section 172(d)(3) (relating to modifications in the calculation of net operating loss) is repealed.

(9) Section 441(f)(2)(iii) (relating to period for computation of taxable income) is amended by striking out ", but only the adjusted amount of the deductions for personal exemptions as described in section 443(c)".

(10) Section 443 (relating to returns for a period of less than 12 months) is amended—

(A) by striking out ", but only the adjusted amount of the deductions for personal exemptions" in subsection (b)(1), and

(B) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) ADJUSTMENT IN PERSONAL CREDITS.—In the case of a taxpayer other than a corporation, if a return is made for a short period by reason of subsection (a)(1) and if the tax is not computed under subsection (b)(2), then the credits allowed by section 42 shall be reduced to amounts which bear the same ratio to the full credits as the number of months in the short period bears to 12."

(11) Section 642(b) (relating to deduction for personal exemption for estates and trusts) is amended to read as follows:

"(b) DEDUCTION IN LIEU OF PERSONAL CREDITS.—An estate shall be allowed a deduction of $600. A trust which, under its governing instrument, is required to distribute all of its income currently shall be allowed a deduction of $300. All other trusts shall be allowed a deduction of $100. The deductions allowed by this subsection shall be in lieu of the credits allowed under section 42 (relating to personal credits)."

(12) Section 643(a)(2) (relating to deduction for personal exemption in computing distributable net income) is amended to read as follows:

"(2) DEDUCTION IN LIEU OF PERSONAL CREDIT.—No deduction shall be taken under section 642(b) (relating to deduction in lieu of personal credit)."

(13) Section 703(a)(2) (relating to the computation of taxable income of a partnership) is amended by striking out subparagraph (A) and redesignating subparagraphs (B), (C), (D), (E), and (F) as subparagraphs (A), (B), (C), (D), and (E), respectively.

(14) Section 873(b) (relating to deductions allowed to nonresident alien individuals) is amended by striking out paragraph (3).

(15) Section 874 (relating to allowance of deductions and credits for nonresident aliens) is amended—

(A) by inserting after the first sentence of subsection (a) the following new sentence: "However, only one personal credit under section 42 shall be allowed to a nonresident alien individual who is not a resident of a contiguous country or is not a national of the United States.", and

(B) by revising subsection (b) to read as follows:

"(b) TAX WITHHELD AT SOURCE.—The benefit of the personal credits under section 42 may, in the discretion of the Secretary, and under regulations prescribed by the Secretary, be received by a nonresident alien individual entitled thereto, by filing a claim therefor with the withholding agent."

(16) Section 891 (relating to doubling of rates of tax on citizens and corporations of certain foreign countries) is amended by striking out "under section 151 and".

(17) Section 904(b)(1) (relating to computation of taxable income for purposes of limitation on foreign tax credit) is amended to read as follows:

"(1) DEDUCTION IN LIEU OF PERSONAL CREDITS.—For purposes of subsection (a), the taxable income in the case of an estate or trust shall be computed without any deduction under section 642(b) (relating to deduction in lieu of personal credits)."

(18) Section 911(a) (relating to earned income from sources without the United States) is amended by striking out "(other than those allowed by section 151, relating to personal exemptions)".

(19) Section 931(e) (relating to income from sources within possessions of the United States) is amended to read as follows:

"(e) PERSONAL CREDIT.—A citizen of the United States entitled to the benefits of this section shall be allowed only one personal credit under section 42."

(20) Section 933 (relating to income from sources within Puerto Rico) is amended by striking out "(other than the deduction under section 151, relating to personal exemptions)" in paragraph (1) and by striking out "(other than the deduction for personal exemptions under section 151)" in paragraph (2).

(21) Section 1211(b)(3) (relating to computation of taxable income for purposes of the limitation on capital losses) is amended to read as follows:

"(3) COMPUTATION OF TAXABLE INCOME.—For purposes of paragraph (1), taxable income shall be computed without regard to gains or losses from sales or exchanges of capital assets and without regard to any deduction in lieu of the credits provided in section 42 (relating to personal credits)."

(22) Section 1302(b)(3) (relating to transitional rule for determining base period income) is amended to read as follows:

"(3) TRANSITIONAL RULES FOR DETERMINING BASE PERIOD INCOME.—The base period income (determined under paragraph (2))—

"(A) for any taxable year beginning before January 1, 1977, shall be increased by the amount of the taxpayer's zero bracket amount for the computation year, and

"(B) for any taxable year beginning before January 1, 1978, shall be increased by an amount equal to the number of the taxpayer's personal credits under section 42 for the computation year multiplied by $750."

(23) Section 1402(a) (relating to net earnings of self-employment) is amended by striking out paragraph (7).

(24) Section 1451(d) (relating to benefit of personal exemptions for purposes of withholding on tax-free covenant bonds) is amended by striking out "deduction for personal exemptions provided in section 151" and inserting in lieu thereof "personal credits provided in section 42".

(25) Section 3402(f)(1) (relating to withholding exemptions) is amended—

(A) by striking out "an exemption under section 151(c)(1)" in subparagraph (B) and inserting in lieu thereof "a credit under section 42(c)(1)",

(B) by striking out "an exemption under section 151(d)(1)" in subparagraph (C) and inserting in lieu thereof "a credit under section 42(d)(1)", and

(C) by striking out "an exemption under section 151(e)" in subparagraph (E) and inserting in lieu thereof "a credit under section 42(e)".

(26) Section 3402(m)(2)(A) (relating to withholding allowances based upon itemized deductions) is amended by striking out "other than the deductions referred to in section 151 and ".

(27) Section 6049(b)(2)(C) (relating to the definition of interest for purposes of the information reporting requirement) is amended by striking out "exemptions" and inserting in lieu thereof "credits".

(28) Section 6654(d)(4) (relating to the imposition of an addition to tax for underpayment of estimated tax by an individual) is amended by striking out "exemptions under section 151" and inserting in lieu thereof "credits under section 42".

SEC. 204. APPLICATION OF CERTAIN CHANGES IN THE CASE OF FISCAL YEAR TAXPAYERS.

Section 21 (relating to effects of changes in rate of tax) is amended by adding at the end thereof the following new subsection:

"(f) CHANGES MADE BY REVENUE ACT OF 1978.—In applying subsection (a) to a taxable year which is not a calendar year—

"(1) the amendments made by sections 101, 102, and 301 of the Revenue Act of 1978 (and no other amendments made by such Act), and

"(2) the expiration of section 42 (relating to general tax credit),

shall be treated as a change in a rate of tax."

Subtitle B—Taxation on Capital Gains of Noncorporate Taxpayers

SEC. 211. REVISION OF EXCLUSION ON GAIN FROM SALE OR EXCHANGE OF RESIDENCE OF INDIVIDUAL WHO HAS ATTAINED AGE 55.—The heading and Subsections (a) and (b) of Section 121 (relating to gain from the sale or exchange of residence) are amended to read as follows:

"SEC. 121. Gain from Sale or Exchange of Residence of Individual Who Has Attained Age 55.

"(a) GENERAL RULE.—At the election of the taxpayer, gross income does not include gain from the sale or exchange of property if—

"(1) the taxpayer has attained the age of 55 before the date of such sale or exchange, and

"(2) during the 5-year period ending on the date of the sale or exchange, such property has been owned and used by the taxpayer as his principal residence for periods aggregating 3 years or more.

"(b) APPLICATION TO ONLY ONE SALE OR EXCHANGE.—Subsection (a) shall not apply to any sale or exchange by the taxpayer if an election by the taxpayer or his spouse under subsection (a) with respect to any other sale or exchange is in effect."

SEC. 212. STRUCTURAL AMENDMENTS TO THE MINIMUM AND MAXIMUM TAXES.

(a) CAPITAL GAIN FROM SALE OF PRINCIPAL RESIDENCE NOT TO BE ITEM OF TAX PREFERENCE.—Section 57(a)(9) (relating to capital gains) is amended by adding at the end thereof the following new subparagraph—

"(D) PRINCIPAL RESIDENCE.—For purposes of subparagraph (A), in determining net capital gain, the gain (if any) from the sale or exchange of property used by the taxpayer as his principal residence (within meaning of section 1034) shall not be taken into account."

(b) TAX PREFERENCES NOT TO AFFECT MAXIMUM TAX.—Paragraph (2) of section 1348(b) is amended to read as follows:

"(2) Personal service taxable income.—The personal service taxable income of an individual is the amount which bears the same ratio (but not in excess of 100 percent) to his taxable income as his personal service net income bears to his adjusted gross income. For purposes of this paragraph the term "personal service net income" means personal service income reduced by any deductions allowable under section 62 which are properly allocable to or chargeable against such earned income.

Subtitle C—Miscellaneous Provisions Affecting Individual Income Tax

SEC. 221. CREDIT FOR REAL PROPERTY TAXES ON PERSONAL RESIDENCE.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. CREDIT FOR REAL PROPERTY TAXES ON PERSONAL RESIDENCE.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed, as a credit against the tax imposed by this chapter for the taxable year, an amount equal to 50 percent of the State and local real property taxes paid or accrued within such taxable year with respect to property used by such individual as his principal residence (within the meaning of section 1034) as does not exceed $1,000.

"(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by section 1, or the amount of the tax imposed in lieu of the tax imposed by section 1, for the taxable year. In determining the credits allowed under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment in certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates to public office),

"(6) section 44A (relating to expenses for household and dependent care services necessary for gainful employment), and

"(7) section 44B (relating to employment of certain new employees)

the tax imposed by this chapter shall (before any other reductions) be reduced by the credit allowed by this section.

"(c) CREDIT DENIED IN CERTAIN CASES.—No credit shall be allowable under this section—

"(1) for taxes described in section 164(c), or

"(2) to any estate or trust or any nonresident alien individual.

"(d) TENANT-STOCKHOLDER IN A COOPERATIVE HOUSING CORPORATION.—For purposes of this section, references to property used by the taxpayer shall include stock held by a tenant-stockholder (as defined in section 216) in a cooperative housing corporation if the taxpayer used as his principal residence the house or apartment which he was entitled to occupy as such stockholder.

"(e) ACCRUAL OF REAL PROPERTY TAXES.—If the credit allowable under this section is computed for a taxpayer who computes taxable income under an accrual method of accounting, the amount allowable shall be determined in a manner consistent with subsection (c) and (d) of section 461 (relating to accrual of real property taxes).

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) CLERICAL AMENDMENTS.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44B the following new item:

"Sec. 44C. Credit for Real Property Taxes Taxes on Personal Residence."

(2) COORDINATION WITH OTHER CREDITS.—

(A) Section 904(g) (relating to foreign tax credit) is amended to read as follows:

"(g) COORDINATION WITH OTHER CREDITS.—In the case of an individual, for purposes of subsection (a), the tax against which the credit is taken is such tax reduced by the amount of the credit (if any) for the taxable year allowable under section 37 (relating to credit for the elderly) and section 44C (relating to credit for real property taxes on personal residence)."

(B) Section 37(c)(2) (relating to credit for elderly) is amended by striking out the period and inserting in lieu thereof "reduced by the credit allowable under section 44C (relating to credit for real property taxes on personal residence).".

(C) Section 46(a)(4) (relating to investment tax credit) is amended by—

(i) striking out "and" at the end of subparagraph (A),

(ii) striking out the period at the end of subparagraph (B) and inserting in lieu thereof ", and", and

(iii) adding immediately after subparagraph (B) the following new subparagraph:

"(C) section 44C (relating to credit for real property taxes on personal residence)."

(D) Section 41(b)(2) (relating to contributions to candidates for public office) is amended by striking out "and section 38 (relating to investment in certain depreciable property)." and inserting in lieu thereof "section 38 (relating to investment in certain depreciable property), and section 44C (relating to credit for real property taxes on personal residence).".

(E) Section 44A(b) (relating to expenses for household and dependent care services necessary for gainful employment) is amended by—

(i) striking out "and" at the end of paragraph (6),

(ii) striking out the period in paragraph (7) and inserting in lieu thereof ", and", and

(iii) adding at the end thereof the following new paragraph:

"(8) section 44C (relating to credit for real property taxes on personal residence.)"

(F) Section 50A(b)(3) (relating to credit for expenses of work incentive programs) is amended by—

(i) striking out the "and" at the end of subparagraph (c),

(ii) striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and", and

(iii) adding immediately after subparagraph (D) the following new subparagraph:

"(E) section 44C (relating to credit for real property taxes on personal residence)."

(G) Section 53(a) (relating to credit for employment of certain new employees) is amended by—

(i) striking out "and" at the end of paragraph (6),

(ii) striking out the period at the end of paragraph (7) and inserting in lieu thereof ", and", and

(iii) adding immediately after paragraph (7) the following new paragraph:

"(8) section 44C (relating to credit for real property taxes on personal residence)."

(3) MINIMUM TAX.—Section 56(c) (defining regular tax deduction) is amended by striking out "and" at the end of paragraph (8), by striking out the period at the end of paragraph (9) and inserting in lieu thereof ", and", and by adding at the end thereof the following new paragraph:

"(10) section 44C (relating to credit for real property taxes on personal residence.)"

(4) CONFORMING AMENDMENTS.—

(A) Section 164 (relating to deduction for taxes) is amended by redesignating subsection (f) as subsection (g) and inserting immediately after subsection (e) the following new subsection:

"(f) NO DEDUCTION FOR AMOUNT ALLOWABLE AS CREDIT.—No deduction shall be allowed under this section with respect to the amount of any State and local real property taxes allowable as a credit under section 44C (relating to credit for real property taxes on personal residence)."

(B) Section 216 (relating to deduction of taxes, interest, and business depreciation by cooperative housing corporation tenant-stockholder) is amended by adding at the end thereof the following new subsection:

"(d) NO DEDUCTION FOR AMOUNT ALLOWABLE AS CREDIT.—No deduction shall be allowed under this section with respect to the amount of any State and local real property taxes allowable as a credit under section 44C (relating to credit for real property taxes on personal residence)."

(C) Section 1016(a)(1) (relating to adjustments to basis) is amended by striking out "for which deductions" and inserting in lieu thereof "for which deductions or credits".

(D) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C".

SEC. 22. EARNED INCOME TAX CREDIT.

(a) REVISION OF THE LIMITATION.—Subsection (b) of section 43 (relating to earned income credit) is amended to read as follows:

"(b) LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(1) $600, over

"(2) 10 percent of so much of the adjusted gross income (or, if greater, the earned income) or the taxpayer for the taxable year as exceeds $6,000."

(b) AMOUNT OF CREDIT TO BE DETERMINED UNDER TABLE.—Section 43 is amended by adding at the end thereof the following new subsection:

"(f) AMOUNT OF CREDIT TO BE DETERMINED UNDER TABLES.—

"(1) IN GENERAL.—The amount of the credit allowed by this section shall be determined under tables prescribed by the Secretary.

"(2) REQUIREMENTS FOR TABLES.—The tables prescribed under paragraph (1) shall reflect the provision of subsections (a) and (b) and shall have income brackets of not greater than $50 each—

"(A) for earned income between 0 and $12,000, and

"(B) for adjusted gross income between $6,000 and $12,000."

(c) EXCLUDABLE EARNED INCOME TAKEN INTO ACCOUNT.—Subparagraph (B) of section 43(c)(2) (defining earned income) is amended by striking out clause (i) and by redesignating clauses (ii), (iii), and (iv) as clauses (i), (ii), and (iii), respectively.

(d) DEFINITION OF ELIGIBLE INDIVIDUAL.—Paragraph (1) of section 43(c) (defining eligible individual) is amended to read as follows:

"(1) ELIGIBLE INDIVIDUAL.—

"(A) IN GENERAL.—The term 'eligible individual' means an individual who, for the taxable year—

"(i) is married (within the meaning of section 143) and is entitled to a deduction under section 151 for a child (within the meaning of section 151(e)(3)),

"(ii) is a surviving spouse (as determined under section 2(a)), or

"(iii) is a head of a household (as determined under subsection (b) of section 2 without regard to subparagraphs (A)(ii) and (B) of paragraph (1) of such subsection).

"(B) CHILD MUST RESIDE WITH TAXPAYER IN THE UNITED STATES.—An individual shall be treated as satisfying clause (i) of subparagraph (A) only if the child has the same principal place of abode as the individual.

"(C) INDIVIDUAL ENTITLED TO EXCLUDE INCOME UNDER SECTION 911 NOT ELIGIBLE INDIVIDUAL.—The term 'eligible individual' does not include an individual who, for the taxable year, is entitled to exclude any amount from gross income under section 911 (relating to earned income from sources without the United States) or section 931 (relating to income from sources within the possessions of the United States)."

(d) ADVANCE PAYMENTS.—Section 43 (relating to earned income credit) is amended by adding at the end thereof, the following new section

"(f) COORDINATION WITH ADVANCE PAYMENTS OF EARNED INCOME CREDIT.—

(1) IN GENERAL.— If any payment is made to the individual by an employer under section 3507 during any calendar year, then the tax imposed by this chapter for the individual's last taxable year beginning in such calendar year shall be increased by the aggregate amount of such payments.

(2) SPECIAL RULE.—Any increase in tax under paragraph (1) shall not be treated as tax imposed by this chapter for purposes of determining the amount of any credit allowable under this subpart."

(e) ADVANCE PAYMENT OF EARNED INCOME CREDIT.—

(1) IN GENERAL.—Chapter 25 of such Code (general provisions relating to employment taxes) is amended by adding at the end thereof the following new section:

"§ 3507. Advance Payment of Earned Income Credit.

"(a) GENERAL RULE.—Except as otherwise provided in this section, every employer making payment of wages to an employee with respect to whom an earned income eligibility certificate is in effect shall, at the time of paying such wages, make an additional payment to such employee equal to such employee's earned income advance amount.

"(b) EARNED INCOME ELIGIBILITY CERTIFICATE.—For purposes of this title, an earned income eligibility certificate is a statement furnished by an employee to the employer which certifies—

"(1) that the employee will be eligible to receive the credit provided by section 43 for the taxable year,

"(2) that the employee does not have an earned income eligibility certificate in effect for the calendar year with respect to the payment of wages by another employer, and

"(3) whether or not the employee's spouse has an earned income eligibility certificate in effect.

For purposes of this section, a certificate shall be treated as being in effect with respect to a spouse if such a certificate will be in effect on the first status determination date following the date on which the employee furnishes the statement in question.

"(c) EARNED INCOME ADVANCE AMOUNT.—

"(1) In general.—For purposes of this title, the term 'earned income advance amount' means, with respect to any payroll period, the amount determined—

"(A) on the basis of the employee's wages from the employer for such period, and

"(B) in accordance with tables prescribed by the Secretary.

"(2) ADVANCE AMOUNT TABLES.—The tables referred to in paragraph (1)(B)—

"(A) shall be similar in form to the tables prescribed under section 3402 and, to the maximum extent feasible, shall be coordinated with such tables, and

"(B) if the employee is not married, or if no earned income eligibility certificate is in effect with respect to the spouse of the employee, shall treat the credit provided by section 43 as if it were a credit—

"(i) of 10 percent of the first $6,000 and earned income, which

"(ii) phases out between $6,000 and $11.000 of earned income, or

"(C) if an earned income eligibility certificate is in effect with respect to the spouse of the employee, shall treat the credit provided by section 43 as if it were a credit—

"(i) of 10 percent of the first $3,000 of earned income, which

"(ii) phases out between $3,000 and $6,000 of earned income.

"(d) PAYMENTS TO BE TREATED AS PAYMENTS OF WITHHOLDING AND FICA TAXES.—

"(1) IN GENERAL.—For purposes of this title, payments made by an employer under subsection (a) to his employees for any payroll period—

"(A) shall not be treated as the payment of compensation, and

"(B) shall be treated as made—

"(i) first out of amounts required to be deducted and withheld for the payroll period under section 3401 (relating to wage withholding), and

"(ii) next out of amounts required to be deducted for the payroll period under section 3102 (relating to FICA employee taxes), and

"(iii) then out of amounts of the taxes imposed for the payroll period under section 3111 (relating to FICA employer taxes),

as if the employer had paid to the Secretary, on the day on which the wages are paid to the employees, an amount equal to such payments.

"(2) ADVANCE PAYMENTS EXCEED TAXES DUE.—In the case of any employer, if for any payroll period the aggregate amount of earned income advance payments exceeds the sum of the amounts referred to in paragraph (1)(B), each such advance payment shall be reduced by an amount which bears the same ratio to such excess as such advance payment bears to the aggregate amount of all such advance payments.

"(3) EMPLOYER MAY MAKE FULL ADVANCE PAYMENTS.—The Secretary shall prescribe regulations under which an employer may elect (in lieu of any application of paragraph (2))—

"(A) to pay in full all earned income advance amounts, and

"(B) to have additional amounts paid by reason of this paragraph treated as the advance payment of taxes imposed by this title.

"(4) FAILURE TO MAKE ADVANCE PAYMENTS.—For purposes of this title (including penalties), failure to make any advance payment under this section at the time provided therefor shall be treated as the failure at such time to deduct and withhold under chapter 24 an amount equal to the amount of such advance payment.

"(e) FURNISHING AND TAKING EFFECT OF CERTIFICATES.—For purposes of this section.—

"(1) WHEN CERTIFICATE TAKES EFFECT.—

"(A) FIRST CERTIFICATE FURNISHED.—An earned income eligibility certificate furnished the employer in cases in which no previous such certificate had been in effect for the calendar year shall take effect as of the beginning of the first payroll period ending, or the first payment of wages made without regard to a payroll period, on or after the date on which such certificate is so furnished (or if later, the first day of the calendar year for which furnished).

"(B) LATER CERTIFICATE.—An earned income eligibility certificate furnished the employer in cases in which a previous such certificate had been in effect for the calendar year shall take effect with respect to the first payment of wages made on or after the first status determination date which occurs at least 30 days after the date on which such certificate is so furnished, except that at the election of the employer such certificate may be made effective with respect to any payment of wages made on or after the date on which such certificate is so furnished.

For purposes of this subparagraph, the term 'status determination date' means January 1, May 1, July 1, and October 1 of each year.

"(2) PERIOD DURING WHICH CERTIFICATE REMAINS IN EFFECT.—An earned income eligibility certificate which takes effect under this section for any calendar year shall continue in effect with respect to the employee during such calendar year until revoked by the employee or until another such certificate takes effect under this section.

"(3) CHANGE OF STATUS.—

"(A) REQUIREMENT TO REVOKE OR FURNISH NEW CERTIFICATE.—If, after an employee has furnished an earned income eligibility certificate under this section, there has been a change of circumstances which has the effect of—

"(i) making the employee ineligible for the credit provided by section 43 for the taxable year, or

"(ii) causing an earned income eligibility certificate to be in effect with respect to the spouse of the employee,

the employee shall, within 10 days after such change in circumstances, furnish the employer with a revocation of such certificate or with a new certificate (as the case may be). Such a revocation (or such a new certificate) shall take effect under the rules provided by paragraph (1)(B) for a later certificate and shall be made in such form as the Secretary shall by regulations prescribe.

"(B) CERTIFICATE NO LONGER IN EFFECT.—If, after an employee has furnished an earned income eligibility certificate under this section which certifies that such a certificate is in effect with respect to the spouse of the employee, such a certificate is no longer in effect with respect to such spouse, then the employee may furnish the employer with a new earned income eligibility certificate.

"(4) FORM AND CONTENTS OF CERTIFICATE.—Earned income eligibility certificates shall be in such form and contain such other information as the Secretary may by regulations prescribe.

"(5) TAXABLE YEAR DEFINED.—The term 'taxable year' means the last taxable year of the employee under subtitle A beginning in the calendar year in which the wages are paid."

(2) CLERICAL AMENDMENT.—The table of sections for chapter 25 of such Code is amended by adding at the end thereof the following new item:

"SEC. 3507. Advance payment of earned income credit."

(f) INFORMATION SHOWN ON W-2.—The first sentence of section 6051(a) of such Code (relating to receipts for employees) is amended—

(1) by striking out "and" at the end of paragraph (5),

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof ", and", and

(3) by adding at the end thereof the following new paragraph:

"(7) the total amount paid to the employee under section 3507 (relating to advance payment of earned income credit)."

(g) ADJUSTMENT OF TRANSFERS TO SOCIAL SECURITY TRUST FUNDS.—There shall be transferred not less frequently than monthly from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, and the Federal Hospital Insurance Trust Fund such sums as may be necessary to insure that there will be no reduction in the balance in any such Trust Fund by reason of section 3507 of the Internal Revenue Code of 1954 (relating to advance payment of earned income credit). Transfers under the preceding sentence shall be based on estimates with appropriate reconciliations.

(h) REQUIREMENT OF RETURN.—Subsection (a) of section 6012 of such Code (relating to persons required to make returns of income) is amended by adding at the end thereof the following new paragraph:

"(8) Every individual who receives payments during the calendar year in which the taxable year begins under section 3507 (relating to advance payment of earned income credit)."

(i) CROSS REFERENCE.—Section 6302 (relating to mode or time of collection) is amended by adding at the end thereof the following new subsection:

"(d) CROSS REFERENCE.—

"For treatment of payment of earned income advance amounts as payment of withholding and FICA taxes, see section 3507(d)."

(j) EARNED INCOME CREDIT MADE PERMANENT.—Subsection (b) of section 209 of the Tax Reduction Act of 1975 is amended by striking out ", and before January 1, 1979".

(k) DISREGARD OF EARNED INCOME TAX CREDIT AND ADVANCE PAYMENTS THEREOF.—Any refund of Federal income taxes made to any individual by reason of section 43 of the Internal Revenue Code of 1954 (relating to earned income tax credit) and any advance payment of such credit made to such individual under section 3507 of such Code—

(1) shall not be treated as income for the purpose of any tax imposed by any State (or the District of Columbia), and

(2) shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual or any other individual for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program or under any State or local program financed in whole or in part with Federal funds.

(l) EFFECTIVE DATE.—

(1) The amendments made by subsections (a), (c), (g) and (h) shall apply to taxable years beginning after December 31, 1978.

(2) The amendments made by subsections (b), (d), (e), (f) and (k) shall apply to remuneration paid after December 31, 1978.

(3) The amendment made by subsection (i) and (j) shall take effect on the date of the enactment of this Act.

SEC. 223. SMALL BUSINESS INVESTMENT INCENTIVE TAX CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. INVESTMENT IN ORIGINAL ISSUE STOCK OF SMALL- OR MEDIUM-SIZED CORPORATIONS.

"(a) GENERAL RULE.—In the case of an individual who is a citizen or resident of the United States there is allowed, as a credit against the tax imposed by this chapter for the taxable year, an amount equal to 10 percent of the adjusted basis (within the meaning of section 1011) of the taxpayer for incentive stock (as defined in subsection (c)) acquired for money during the taxable year.

"(b) LIMITATIONS.—

"(1) CREDIT NOT ALLOWED TO CERTAIN DEPENDENTS.—No credit is allowable under subsection (a) to an individual with respect to whom a personal exemption deduction is allowable for the taxable year to another taxpayer under section 151(e).

(2) CREDIT NOT TO EXCEED $750.—The credit allowed by subsection (a) for any taxable year shall not exceed $750 ($1,500 in the case of a joint return).

"(3) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this part having a lower number or letter designation than this section, other than the credits allowable by sections 31 and 39.

"(4) CERTAIN TAXES NOT CONSIDERED TAXES IMPOSED BY THIS CHAPTER.—For purposes of this section, any tax imposed for the taxable year by section 56 (relating to minimum tax for tax preferences), section 72(m)(5)(B) (relating to 10 percent tax on premature distributions to owner-employees), section 402(e) (relating to tax on lump sum distributions), section 408(f) (relating to additional tax on income from certain retirement accounts), section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding company tax), or section 1378 (relating to tax on certain capital gains of subchapter S corporations), and any additional tax imposed for the taxable year by section 1351(d)(1) (relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by this chapter for such year.

"(c) DEFINITION OF INCENTIVE STOCK.—

"(1) IN GENERAL.—For purposes of this section, the term 'incentive stock' means original issue common or preferred stock registered under section 12 of the Securities Exchange Act of 1934 offered in an unrestricted offer to the public—

"(A) which is issued by a domestic corporation the equity capital (within the meaning of the last sentence of section 1244(c)(2)) of which does not exceed $25,000,000 immediately before such offering, and

"(B) which is part of an issue of stock the aggregate sale price of which does not exceed $25,000,000.

"(2) CONTROLLED CORPORATIONS.—In the case of a corporation which is a member of a controlled group of corporations (as defined in section 1563(a)(1)), the equity capital of all members of the controlled group shall be treated, for purposes of paragraph (1)(A) this subsection, as the equity capital of the issuing corporation.

"(3) STOCK ACQUIRED MORE THAN 180 DAYS AFTER ISSUANCE; STOCK ACQUIRED BY UNDERWRITER.—No stock shall be treated as incentive stock for purposes of this section if it is first purchased more than 180 days after the date on which it is issued. No acquisition of stock by an underwriter in the ordinary course of his trade or business as an underwriter, whether or not guaranteed, shall be treated as an acquisition for purposes of subsection (a).

"(4) CERTAIN REDEMPTIONS AND REFINANCING ISSUES NOT TREATED AS INCENTIVE STOCK.—An issue of stock which, but for this paragraph, would be treated as incentive stock under this section shall not be treated as incentive stock if, within 180 days before the date of issuance, the issuing corporation (or any other corporation which is a member of the same controlled group of corporations, within the meaning of section 1563, as the issuing corporation) has acquired stock (including acquisition by way of redemption) of the issuing corporation or of any other member of the controlled group with an aggregate purchase price in excess of 10 percent of the aggregate sale price of the issue of incentive stock.

"(5) INVESTMENT COMPANY STOCK NOT TREATED AS INCENTIVE STOCK.—Stock issued by an investment company shall not be treated as incentive stock. For purposes of this paragraph—

"(A) a corporation shall be treated as an investment company if the corporation has gross receipts for the taxable year in which the stock is issued more than 20 percent of which consist of passive investment income (as defined in section 1372(e)(5)(C)), and

"(B) in the case of a corporation which is a member of a controlled group of corporations within the meaning of section 1563(a), subparagraph (A) shall be applied—

"(i) first, to the issuing corporation by itself, and

"(ii) then, by treating the gross receipts and passive investment income of the con-

trolled group as the gross receipts and passive investment income of the issuing corporation.

"(d) DISPOSITION OF INCENTIVE STOCK BEFORE IT IS HELD FOR MORE THAN 12 MONTHS.—

"(1) DISPOSITION BEFORE FILING RETURN FOR TAXABLE YEAR OF ACQUISITION.—No credit is allowable under subsection (a) with respect to incentive stock acquired during a taxable year which is not held by the taxpayer on the date established by law for filing a return of tax for that taxable year, if, as of that date, the taxpayer has disposed of the stock after holding it for less than 12 months and 1 day.

"(2) OTHER PREMATURE DISPOSITIONS.—If during any taxable year incentive stock is disposed of by the taxpayer before the stock has been held by the taxpayer for more than 12 months, then the tax under this chapter for the taxable year shall be increased by the amount of the credit claimed by the taxpayer for any preceding taxable year with respect to the acquisition of such stock.

"(3) EXCEPTIONS.—Paragraphs (1) and (2) of this subsection shall not apply in the case of the disposition by bequest or gift unless—

"(A) the bequest or gift is deductible under section 170 (determined without regard to the limitations contained in subsection (b)), 2055, or 2522, or

"(B) the recipient disposes of the stock before the stock has been held for more than 12 months (including any periods of time during which the stock was held by the original purchasers).".

(b) CLERICAL AMENDMENT.—The table of sections for such subpart is amended by inserting immediately after the item relating to section 44B the following new item:

"Sec. 44C. Investment in original issue stock of small- or medium-sized corporations.".

(c) CONFORMING AMENDMENTS.—Subsection (b) of section 6069 of such Code (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C".

(d) CREDIT NOT ALLOWED TO ESTATES AND TRUSTS.—Subsection (a) of section 642 of such Code (relating to special rules for credits against tax for estates and trusts) is amended by adding at the end thereof the following new paragraph:

"(3) INVESTMENT IN INCENTIVE STOCK.—An estate or trust shall not be allowed the credit against tax for investment in incentive stock provided by section 44C.".

(e) EFFECTIVE DATE.—The amendments made by this Act shall apply with respect to taxable years beginning after December 31, 1978, and ending before January 1, 1984.

SEC. 224. PERIOD FOR REINVESTMENT OF GAIN ON SALE OF PERSONAL RESIDENCE.

(a) GENERAL RULE—Subsection (a) of section 1034 (relating to sale or exchange of residence) is amended by striking out "18 months" and inserting in lieu thereof "24 months."

(b) TECHNICAL AMENDMENT—Subsections (c), (d) and (h) of section 1034 are amended by striking out "18 months" each place it appears and inserting in lieu thereof "24 months."

TITLE III—TAX TREATMENT OF BUSINESS

SUBTITLE A—CORPORATE TAX RATE

SEC. 301. REDUCTIONS IN CORPORATE TAX RATES.

(a) NORMAL TAX.—Subsection (b) of section 11 of the Internal Revenue Code of 1954 (relating to normal tax on corporations) is amended to read as follows:

"(b) NORMAL TAX.—The normal tax for a taxable year is equal to 20 percent of so much of the taxable income as does not exceed $150,000.".

(b) Subsection (d) of section 11 of such Code (relating to surtax exemption) is amended by striking out all that precedes "except that" and inserting in lieu thereof the following:

"(d) SURTAX EXEMPTION.—For purposes of this subtitle, the surtax exemption for any taxable year is $150,000;".

(c) (1) Paragraph (7) of section 12 of such Code (relating to cross references relating to tax on corporations) is amended by striking out "$50,000" and inserting in lieu thereof "$150,000".

(2) Subsection (f) of section 21 of such Code (relating to effect of changes in rates during a taxable year) is amended to read as follows:

"(f) CHANGE IN SURTAX EXEMPTION.—In applying subsection (a) to a taxable year of a taxpayer which is not a calendar year, the change made by section 2 of the Corporate Tax Reduction Act of 1977 in the surtax exemption shall be treated as a change in a rate of tax.".

(3) Paragraph (1) of section 821(a) of such Code (relating to tax on mutual insurance companies to which part II applies) is amended to read as follows:

"(1) NORMAL TAX.—A normal tax for a taxable year equal to—

"(A) 20 percent of so much of the mutual insurance company taxable income as does not exceed $150,000,

or 44 percent of the amount by which such taxable income exceeds $6,000, whichever is lesser; plus".

(4) Subparagraph (A) of section 821(c)(1) of such Code (relating to alternative tax for certain small companies) is amended to read as follows:

"(A) NORMAL TAX.—A normal tax for a taxable year equal to—

"(i) 20 percent of so much of the taxable investment income as does not exceed $150,000,

or 44 percent of the amount by which such taxable income exceeds $3,000, whichever is lesser; plus".

SUBTITLE B—INVESTMENT CREDIT

SEC. 311. 10-PERCENT INVESTMENT TAX CREDIT AND $100,000 LIMITATION ON USED PROPERTY MADE PERMANENT.

(10) 10-PERCENT INVESTMENT TAX CREDIT.—Paragraph (2) of section 46(a) (relating to amount of credit for current taxable year) is amended—

(1) by striking out ", and before January 1, 1981" in clauses (i) and (iii) of subparagraph (D),

(2) by striking out ", and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981" in clause (ii) of subparagraph (D), and

(3) by adding at the end thereof the following new subparagraph:

"(E) SPECIAL RULE FOR SUBPARAGRAPH (B).—For purposes of applying subparagraph (B), subparagraph (D) shall be applied—

"(i) by inserting 'and before January 1, 1981,' after '1975,' the second place it appears in clause (i) and where it appears in clause (iii), and

"(ii) by inserting 'and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981,' after '1975,' in clause (ii)."

(b) $100,000 LIMITATION ON USED PROPERTY.—Paragraph (2) of section 301(c) of the Tax Reduction Act of 1975 (relating to effective date for increase of dollar limitation on used property) is amended by striking out ", and before January 1, 1981".

SEC. 312. INVESTMENT CREDIT MADE PARTIALLY REFUNDABLE AND TAX LIABILITY INCREASED TO 90 PERCENT.

(1) IN GENERAL.—Paragraph (3) of section 46(a) (limitation based on amount of tax) is amended to read as follows:

"(3) LIMITATION.—Notwithstanding paragraph (1), the credit allowed by section 38 for the taxable year shall not exceed the greater of—

"(A) $25,000, or

"(B) 90 percent of the liability for tax for the taxable year."

(2) CONFORMING AMENDMENTS.—

(A) Section 6401(b) (relating to credits treated as overpayments) is amended by striking out "and 43" each place it appears and inserting in lieu thereof "43 and 38 to the extent allowable under section 40(a)(3)(A)".

(B) Paragraphs (7), (8), and (9) of section 46(a) are hereby repealed.

(b) Elimination of Carryback of Unused Credits.—

(1) IN GENERAL.—Subsection (b) of section 46 (carryover of unused credits) is amended to read as follows:

"(b) CARRYOVER OF UNUSED CREDITS.—

"(1) IN GENERAL.—If the sum of the amount of the investment credit carryovers to the taxable year under subsection (a)(1)(A) plus the amount determined under subsection (a)(1)(B) for the taxable year exceeds the amount of the limitation imposed by subsection (a)(3) for such taxable year (hereinafter in this subsection referred to as the "unusued credit year"), such excess attributable to the amount determined under subsection (a)(1)(B) shall be an investment credit carryover to each of the 7 taxable years following the unused credit year, and, subject to the limitations imposed by paragraphs (2) and (3), shall be taken into account under the provisions of subsection (a)(1) in the manner provided in such subsection. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 7 taxable years and then to each of the other 6 taxable years to the extent, because of the limitations imposed by paragraphs (2) and (3), such unused credit may not be taken into account under subsection (a)(1) for a prior taxable year.

"(2) LIMITATION ON CARRYOVERS.—The amount of the unused credit which may be taken into account under subsection (a)(1)(A) for any succeeding taxable year shall not exceed the amount by which the limitation imposed by subsection (a)(3) for such taxable year exceeds the sum of the amounts which, by reason of this subsection, are carried to such taxable year and are attributable to taxable years preceding the unused credit year."

(2) CONFORMING AMENDMENT.—Paragraph (1) of section 46(a) (relating to order of investment tax credit) is amended to read as follows:

"(a) GENERAL RULE.—

"(1) FIRST-IN-FIRST-OUT RULE.—The amount of the credit allowed by section 38 for the taxable year shall be an amount equal to the sum of—

"(A) the investment credit carryovers carried to such taxable year, plus

"(B) the amount of the credit determined under paragraph (2) for such taxable year."

(c) EFFECTIVE DATE.

The amendments made by this section apply to—

(A) property to which subsection (d) (qualified progress expenditures) of section 46 of the Internal Revenue Code of 1954 does not apply, but only if—

(i) acquired by the taxpayer after December 31, 1978, or

(ii) constructed, reconstructed, or erected after December 31, 1977, but only to the extent of the basis thereof attributable to the construction, reconstruction, or erection after December 31, 1978, and

(B) property to which such subsection (d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of such section 46) with respect to qualified progress expenditures made after December 31, 1978.

SEC. 313. CERTAIN BUILDINGS AND STRUCTURAL COMPONENTS OF BUILDINGS.

(a) Allowance of Investment Credit for Rehabilitated Buildings and Structural Components.—Subsection (a) of section 48 (relating to definition of section 38 property) is amended by adding at the end thereof the following new paragraph:

"(10) Rehabilitated buildings and structural components.—Notwithstanding the words '(other than a building and its structural components)' in subparagraph (B) of paragraph (1), a building or its structural components shall be treated as section 38 property to the extent of so much of the qualified investment (as determined under subsections (c) and (d) of section 46) in the building or its structural components as is attributable to qualified rehabilitation expenditures paid or incurred with respect to such building or structural component. For purposes of this paragraph, the term 'qualified rehabilitation expenditures' means amounts—

"(A) chargeable to capital account,

"(B) paid or incurred for property or for additions or improvements to property (or related facilities) with a useful life of 5 years or more in connection with the rehabilitation of a building or structural component which is at least 10 years old, which, in the aggregate, exceed 25 percent of the adjusted basis of the property or structural component (determined without regard to such amounts).",

(b) Section 38 Property to Include Property Used in Retail and Wholesale Business.—Clause (i) of section 48(a)(1)(B) is amended by inserting "retailing, wholesaling," after "manufacturing,".

(c) Effective Date.—The amendments made by subsection (a) shall apply with respect to—

(1) property to which section 46(d) of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1978, but only to the extent of the basis thereof attributable to qualified rehabilitation expenditures (as defined in section 46(a)(10) of such Code) attributable to construction, reconstruction, or erection after such date,

(2) property to which section 46(d) of such Code does not apply, acquired by the taxpayer after such date, and

(3) property to which section 46(d) of such Code applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46 of such Code) attributable to qualified rehabilitation expenditures (as so defined) with respect to qualified progress expenditures made after such date.

SEC. 314. CERTAIN POLLUTION CONTROL FACILITIES AND RESEARCH EXPENDITURES.

(a) INCREASE IN QUALIFIED INVESTMENT FOR POLLUTION CONTROL FACILITIES.—Paragraph (5) of section 46(c) (relating to qualified investment) is amended by striking out "50 percent" and inserting in lieu thereof "66⅔ percent".

(b) QUALIFIED INVESTMENT FOR RESEARCH EXPENDITURES.—Section 46(c) (relating to qualified investment) is amended by inserting immediately after paragraph (5), the following new paragraph:

"(6) Applicable percentage in the case of research and development expenditures.—Notwithstanding paragraph (2), in the case of expenditures—

(A) with respect to which an election under section 174(b) applies, 66⅔ percent shall be the applicable percentage for purposes of applying paragraph (1).

(B) with respect to which section 174(a) applies, 33⅓ percent shall be the applicable percentage for purposes of applying paragraph (1)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to expenditures made in taxable years beginning after December 31, 1978.

Subtitle C—Miscellaneous Provisions Affecting Small Business Income Tax.

SEC. 321. CHANGES IN SUBCHAPTER S RULES.

(a) NUMBER OF SHAREHOLDERS.

(1) In general. Subsection (a)(1) of section 1371 (relating to the definition of small business corporation) is amended to read as follows:

"(1) have more than 15 shareholders;".

(2) REPEAL OF SECTION 1371(e).—Section 1371

(e) (relating to special shareholder rules) is repealed.

(b) STOCK OWNED BY HUSBAND AND WIFE.—Section 1371(c) (relating to stock owned by husband and wife) is amended to read as follows:

"(c) STOCK OWNED BY HUSBAND AND WIFE.—For purposes of subsection (a)(1), all stock which is held by a husband (or his estate) and wife (or her estate) shall be treated as owned by one shareholder."

(c) CERTAIN TRUSTS PERMITTED AS SHAREHOLDERS.—

(1) Section 1371(f) (relating to certain trusts permitted as shareholders) is amended to read as follows:

(e) CERTAIN TRUSTS PERMITTED AS SHAREHOLDERS.—

For purposes of subsection (a), the following trusts may be shareholders:

"(1) A trust all of which is treated as owned by the grantor (who is an individual citizen or resident of the United States) under subpart E of part I of subchapter J,

"(2) A trust to which section 651(a) applies, In the case of a trust described in paragraph (2), each beneficiary of the trust (and not the trust) having a present interest in the trust income shall, for purposes of subsection (a)(1), be treated as a shareholder."

(2) Paragraph (2) of section 1371(a) is amended by striking out "subsection (f)" and inserting in lieu thereof "subsection (e)".

(3) Subsection (b) of section 643 (definitions that apply to certain estates and trusts) is amended to read as follows:

"(b) INCOME.—For purposes of this subpart and subparts B, C, and D, the term 'income', when not preceded by the words 'taxable', 'distributable net', 'undistributed net', or 'gross', means the sum of—

"(1) the amount of income of the estate or trust for the taxable year determined under the terms of the governing instrument and applicable local law without regard to amounts described in paragraph (2), and

"(2) any amounts distributed to the estate or trust as a dividend by an electing small business corporation (including any amounts treated as so distributed under section 1372(b)).

For purposes of paragraph (1), items of gross income constituting extraordinary dividends or taxable stock dividends which the fiduciary, acting in good faith, determines to be allocable to corpus under the terms of the governing instrument and applicable local law shall not be considered income."

(d) CONSENT TO ELECTION.—Section 1372(a) (relating to eligibility for election) is amended to read as follows:

"(a) ELIGIBILITY.—Except as provided in subsection (f) any small business corporation may elect, in accordance with the provisions of this section, not to be subject to the taxes imposed by this chapter. Such election shall be valid only if all persons who are shareholders in such corporation on the day on which the election is made, consent to the election."

(e) TIME FOR ELECTION.—Section 1372(c) (relating to where and how election is made) is amended to read as follows:

"(c) WHERE AND HOW MADE.—An election under subsection (a) may be made by a small business corporation for any taxable year at any time during the first two months of such taxable year, or at any time during the taxable year preceding the taxable year for which it is to be effective. Such election shall be made in such manner as the Secretary prescribes by regulations."

(f) TERMINATION OF ELECTION.—Subsection (e) of section 1372 is amended as follows:

(1) NEW SHAREHOLDER.—Subparagraph (C) is paragraph (1) is amended to read as follows:

"(C) Any termination of an election under subparagraph (A) by reason of the affirmative refusal of any person to consent to such election shall be effective as follows:

"(i) If the person became a shareholder before the close of the first taxable year of the corporation for which such election was made, the termination shall be effective for such taxable year and for all succeeding taxable years of the corporation.

"(ii) If the person became a shareholder after the close of such first taxable year, the termination shall be effective for the taxable year which (by reason of subsection (g)) begins on the date on which such person became a shareholder and for all succeeding taxable years of the corporation."

(2) REVOCATION.—Paragraph (2) is amended to read as follows:

"(2) REVOCATION.—

"(A) An election under subsection (a) made by a small business corporation may be revoked by it at any time after the close of the first taxable year for which the election is effective.

"(B) Such election may be revoked only if all persons who are shareholders in the corporation on the day on which the revocation is filed consent to the revocation.

"(C) A revocation takes effect on the date filed with the Secretary or on such later date within the taxable year (determined without regard to the revocation) as may be specified in the revocation and shall be effective for the taxable year which (by reason of subsection (g)) begins on its effective date and all succeeding taxable years of the corporation.

"(D) A revocation under this paragraph shall be made in such manner as the Secretary shall prescribe by regulations."

(3) CEASES TO BE SMALL BUSINESS CORPORATION.—Paragraph (3) is amended to read as follows:

"(3) CEASES TO BE SMALL BUSINESS CORPORATION.—An election under subsection (a) made by a small business corporation shall terminate if at any time—

"(A) after the first day of the first taxable year of the corporation for which the election is effective, if such election is made on or before such first day, or

"(B) after the day on which the election is made, if such election is made after such first day, the corporation ceases to be a small business corporation (as defined in section 1371(a)). Such termination shall be effective for the taxable year which (by reason of subsection (g)) begins on the date on which the corporation ceases to be a small business corporation and for all succeeding taxable years of the corporation."

(g) ELECTION FOLLOWING TERMINATION.—Section 1372(f) (relating to election after termination) is amended to read as follows:

"(f) ELECTION AFTER TERMINATION.—

"(1) IN GENERAL.—If—

"(A) a small business corporation has made an election under subsection (a), and

"(B) such election has been terminated or revoked under subsection (e) for the first taxable year for which the election was to have applied or for any succeeding taxable year,

then such corporation (and any successor corporation) shall not be eligible to make

an election under subsection (a) for any taxable year before its fifth taxable year which begins after the first taxable year for which such termination or revocation is effective, unless the Secretary consents to such election.

"(2) INADVERTENT TERMINATION.—If—

"(A) an election made by a corporation terminates under subsection (e) (3), (4), or (5),

"(B) the corporation files a timely return as an electing small business corporation for the first taxable year ending after the election terminates and for one or more succeeding taxable years, and

"(C) the Secretary consents,

then the return for each succeeding taxable year shall be treated as a timely election, until the corporation again becomes an electing small business corporation.

"(3) FAILURE TO TAKE EFFECT.—If—

"(A) an election made by a corporation fails to take effect for any reason,

"(B) the corporation files a timely return as an electing small business corporation for the taxable year in which the election was to take effect and for one or more succeeding taxable years, and

"(C) the Secretary consents,

then the return for each succeeding taxable year shall be treated as a timely election, until the corporation becomes an electing small business corporation.

"(4) TIME OF ELECTION.—In applying subsection (e)(1)(A), an election under paragraph (2) or (3) shall be treated as made on the first day of the taxable year."

(h) TERMINATION OF SUBCHAPTER S ELECTION DURING THE TAXABLE YEAR.—Section 1372 (relating to election by small business corporation) is amended by adding at the end thereof the following new subsection:

"(h) TERMINATION DURING THE TAXABLE YEAR.—A corporation's taxable year shall terminate on the day before the date on which a termination of an election under subsection (e) (1) or (2) becomes effective."

(i) NET OPERATING LOSS CARRYOVER.—Section 1374(c) (relating to determination of shareholder's portion) is amended by adding at the end thereof the following new paragraph:

"(3) CARRYOVER OF EXCESS.—If a shareholder's portion of the net operating loss of an electing small business corporation for any taxable year (determined by applying this paragraph for each preceding taxable year beginning after 1978) is limited by paragraph (2), the unused amount shall be added to (and be treated as a part of) the shareholder's portion of the net operating loss of the electing small business corporation for the succeeding taxable year (whether or not there is a net operating loss for such year). If the corporation ceases to be an electing small business corporation, then (under regulations prescribed by the Secretary) subsection (b) shall apply as if the corporation were an electing small business corporation for a taxable year consisting of the 12 months beginning on the day of such cessation; but only with respect to the unused amount carried to such year.

SEC. 322. CHANGES IN ADDITIONAL FIRST-YEAR DEPRECIATION ALLOWANCE FOR SMALL BUSINESS.

(a) SECTION 179 PERCENTAGE INCREASED TO 25 PERCENT.—Subsection (a) of section 179 (relating to additional first-year depreciation allowance for small business) is amended by striking out "20 percent" and inserting in lieu thereof "25 percent".

(b) INCREASE IN DOLLAR LIMITATION.—

(1) The first sentence of section 179(b) is amended by striking out "$10,000" each place it appears and inserting in lieu thereof "$20,000".

(2) The second sentence of section 179(b) is amended by striking out "$20,000 in lieu of $10,000" and inserting in lieu thereof "$40,000 in lieu of $20,000".

(c) BENEFITS LIMITED TO SMALL BUSINESS.—

(1) IN GENERAL.—Section 179 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and by inserting after subsection (b) the following new subsection:

"(c) BENEFITS LIMITED TO SMALL BUSINESS.—

"(1) IN GENERAL.—This section shall not apply for the taxable year if (as of the first day of such year) the aggregate adjusted basis of the depreciable property of the taxpayer is $1,000,000 or more.

"(2) DEPRECIABLE PROPERTY DEFINED.—For purposes of this subsection, the term 'depreciable property' means property which is of a character subject to the allowance for depreciation provided by section 167."

(2) CONTROLLED GROUPS.—Paragraph (6) of subsection (e) (as redesignated by paragraph (1) of this subsection) of section 179 is amended—

(A) by striking out the heading and inserting in lieu thereof "(6) APPLICATION OF SUBSECTIONS (b) AND (c) IN THE CASE OF CONTROLLED GROUP.—"; and

(B) by striking out "For purposes of subsection (b)" and inserting in lieu thereof "For purposes of subsections (b) and (c)".

(3) CONFORMING AMENDMENT.—Subparagraph (A) of section 48(c)(3) is amended by striking out "section 179(d)(2)" and inserting in lieu thereof "section 179(e)(2)".

SEC. 323.—LOSSES ON SMALL BUSINESS STOCK.

(a) GENERAL RULE.—Subsection (a), (b), and (c) of section 1244 (losses on small business stock) are amended to read as follows:

"(a) GENERAL RULE.—In the case of any taxpayer loss on section 1244 stock issued to such taxpayer or to a partnership which would (but for this section) be treated as a loss from the sale or exchange of a capital asset shall, to the extent provided in this section, be treated as an ordinary loss.

"(b) LIMITATIONS.—

"(1) MAXIMUM AMOUNT FOR ANY TAXABLE YEAR.—The aggregate amount treated by the taxpayer by reason of this section as an ordinary loss for any taxable year shall not exceed—

"(A) $50,000 or

"(B) $100,000 in the case of a husband and wife filing a joint return for such year under section 6013.

"(2) REQUIREMENT AS TO GROSS RECEIPTS OF CORPORATION.—

"(A) Subsection (a) shall not apply in respect of a loss on section 1244 stock if (during the test period determined under paragraph (3)) 50 percent or more of the aggregate gross receipts of the issuing corporation are royalties, rents, dividends, interest, annuities, and gains from the sale or exchange of stock or securities.

"(B) For purposes of subparagraph (A), losses from the sale or exchange of stock or securities shall be taken into account only to the extent of gains therefrom.

"(C) This paragraph shall not apply to a corporation if (for the test period determined under paragraph (3)) the amount of the deductions allowed by this chapter (other than by sections 172, 243, 244, and 254) exceeds the amount of gross income.

"(3) TEST PERIOD.—The test period determined under this paragraph shall be equal to—

"(A) If the corporation has been in existence for 5 taxable years ending before the date the loss is sustained, the 5 most recent taxable years of the corporation ending before that date,

"(B) if the corporation has been in existence for more than 1 and less than 5 taxable years ending before the date the loss is sustained, all taxable years of the corporation ending before that date, or

"(C) if the corporation has not been in existence for one taxable year ending before the date the loss is sustained, the entire period the corporation has been in existence before that date.

"(c) SECTION 1244 STOCK.—For purposes of this section—

"(1) IN GENERAL.—The term 'section 1244 stock' means common stock issued by a domestic corporation during a taxable year if—

"(A) the stock was issued for money or other property (other than stock or securities), and

"(B) the amount of stock issued by the corporation before the beginning of the taxable year was less than $5,000,000.

"(2) LIMITATION.—The amount of section 1244 stock issued by a corporation during a taxable year shall not exceed—

"(A) $5,000,000, minus

"(B) the amount of stock issued by the corporation before the beginning of the taxable year.

"(3) SPECIAL RULE.—If the amount of common stock issued by a corporation during a taxable year exceeds the limitation determined under paragraph (2), then—

"(A) The corporation may designate any shares of common stock issued during the taxable year as section 1244 stock; provided that the amount of section 1244 stock so designated does not exceed the limitation determined under paragraph (2). If any share are designated, then shares that are not designated shall not be treated as section 1244 stock.

"(B) If no shares are designated under subparagraph (A), then a fraction of the shares issued to each person during the taxable year shall be section 1244 stock. The numerator of the fraction shall be equal to the limitation determined under paragraph (2). The denominator of the fraction shall be equal to the amount of common stock issued by the corporation during the taxable year.

"(4) AMOUNT.—For purposes of this section, the amount of stock issued by a corporation shall be equal to the amount of money plus the fair market value of property received in exchange for the stock.

"(5) SALE OF PRORATED STOCK.—If a shareholder sells common stock in a corporation, and if a fraction of such stock was treated as section 1244 stock under paragraph (3)(B), then a corresponding fraction of the stock sold shall be treated as section 1244 stock.

"(6) FRACTIONAL SHARES.—A fractional share of stock shall in no event be treated as section 1244 stock."

(b) CONFORMING AMENDMENTS.—Paragraph (2) of subsection (d) of such section is amended—

(1) by striking out "(other than subparagraph (E) thereof)", and

(2) by striking out the last sentence and inserting in lieu thereof the following: "For purposes of subsections (b)(2) and (c)(2), a successor corporation in a reorganization described in section 368(a)(1)(F) shall be treated as the same corporation as its predecessor."

(c) EFFECTIVE DATE.—The amendments made by this section apply to stock issued in taxable years of the issuing corporation beginning after December 31, 1978.

SEC. 324. THREE-YEAR EXTENSION OF PROVISION FOR 60-MONTH DEPRECIATION OF EXPENDITURES TO REHABILITATE LOW-INCOME RENTAL HOUSING.

Subsection (k) of section 167 (relating to depreciation of expenditures to rehabilitate low-income rental housing) is amended by striking out "January 1, 1979" each place it appears and inserting in lieu thereof "January 1, 1982".

TITLE IV—TAX IMPACT STUDY

SEC. 401. A TAX IMPACT STUDY AUTHORIZED.

(a) The Secretary of the Treasury and the Council of Economic Advisers are authorized to study the impact of Federal, State, and local government taxation on the American economy, including, but not limited to, an analysis of—

(1) the distribution of the Federal, State and local government tax burden by income classes for income taxes imposed on or with respect to wages, salaries and other compensation, sales and excise taxes, property taxes, and other taxes, and

(2) the manner in which taxes imposed on income from, or with respect to the operations of, businesses affect the pricing of goods and services, the determination of wages, salaries, and other employee compensation, and the return on capital investment for holders of securities.

(b) The report required by the first section of this Act shall be submitted to the Congress by January 31, 1980. An interim report shall be submitted to the Congress by June 30, 1979.

(c) There are authorized to be appropriated, to the Secretary of the Treasury, and to the Council of Economic Advisers, such amounts as may be necessary to carry out the study required by the first section of this Act.

By Mr. WALLOP (for himself, Mr. BROOKE, Mr. BARTLETT, Mr. BELLMON, Mr. BENTSEN, Mr. CASE, Mr. DANFORTH, Mr. GARN, Mr. HATCH, Mr. PAUL G. HATFIELD, Mr. HAYAKAWA, Mr. HEINZ, Mr. INOUYE, Mr. JAVITS, Mr. LAXALT, Mr. LUGAR, Mr. MCCLURE, Mr. MCINTYRE, Mr. MATHIAS, Mr. PERCY, Mr. RIEGLE, Mr. SCHMITT, Mr. STAFFORD, and Mr. STEVENS):

S. 3422. A bill to establish a congressional award program for the purpose of recognizing excellence and leadership among young people; to the Committee on Governmental Affairs.

CONGRESSIONAL AWARD PROGRAM ACT

● Mr. WALLOP. Mr. President, on behalf of Senator BROOKE and 22 of our colleagues, I am introducing a bill to establish a congressional award program. The congressional award is a program which seeks to give national recognition to the creativity, achievements, and leadership of young people of America and to create a real avenue of communication between the young and Members of the Congress and Government.

Mr. President, there is a certain disquiet in the country about the goals and direction of young people. At the moment there are few clear objectives into which they can channel their creative energies. President Lincoln noted—

A child is a person who is going to carry on what you have started. He is going to sit where you are sitting and when you are gone attend to those things which you think are important. You may adopt all the policies you please, but how they are carried out depends on him. He will assume control of your cities, states, and nations. He is going to move in and take over your churches, schools, universities, and corporations. The fate of the country is in his hands.

Congress should recognize a responsibility: We have an opportunity, through the establishment of a congressional award program, to elevate and encourage the pursuit of excellence and to focus the creative energies of America's young people on positive ends.

Mr. President, the congressional award program will offer the young people of America an opportunity and a challenge to new endeavors and achievement. It will provide a defined avenue of direct personal contact between Government and people, particularly young people. The award would accomplish these goals with the help and cooperation of the older generation through the step-by-step fulfillment of the requirements and thus achieve an interaction between the young and not so young that is all too uncommon in this country.

Young people would participate in the program voluntarily; they will not belong to it as members of an organization. They can earn their awards by themselves, through organizations, or within the setting of their lives, be it industry, school, or Armed Forces. An important feature of the award is the contribution made by adults who may or may not be connected with the organizations helping the program, and who as members of the community with particular talents are prepared to pass on their knowledge and creative spirit to the young. Understanding between generations is enhanced by a shared endeavor which provides a common ground.

A congressional award may be earned by anyone between the ages of 14 and 23 who successfully completes all three sections of any of the three award levels: Bronze, silver, and gold. The qualifying standards are defined in terms of proficiency, perseverance, or sustained effort. Participants are assessed on the use which they make of their individual creativity and aptitudes in the three defined areas: Public service, personal interests, and exploration, and not in competition with others. Successful completion in many cases may depend more on persistence than on "brains" or athletic prowess. A handicap should not deter anyone from taking part or prevent anyone from obtaining an award.

There are three awards which may be earned by participants of differing age and maturity. There is no necessity to progress from one to the other, and thus either the bronze, silver, or gold award program may be entered directly. The bronze award is for individuals in the 14 to 16 age range and is a time to discover what their capabilities in the three areas are and what new goals they can achieve. The silver award, for those above 16, has as its goal, achievement of a higher level of proficiency in public service, personal interests, and exploration, as well as increased time requirements. The gold award, for those above 19, requires one to take the major role in planning the goals of any area with less supervision and direction. The goals are in part perseverance and the pursuit of excellence, however that may be defined for the activity. Considerable is expected, both in the time demands and levels of endeavor. It is the culmination of the award program.

For each level of the congressional award, those taking part would have to meet requirements of three sections. In brief they are public service, personal interests, and exploration. Each of the three sections prescribes a different kind of activity. While the choice of activities within a section may vary, the names of the sections are the same for the bronze, silver, and gold.

The public service section involves practical community service after preliminary training or more specialized training in the more sophisticated fields. The aim is to encourage young people to develop compassion and a sense of responsibility in order to contribute in a creative manner to their community. As members of the community they have responsibilities and opportunities to offer help that is needed. Examples of public service could include such activities as lifesaving, youth service, disaster relief, or care of animals.

The aim of the exploration section is to foster the spirit of adventure and self-discovery that spans the history of our country. The cultivation of this aspect of everyone's life and its meaning in the American culture cannot be emphasized enough. After training, journeys are planned and undertaken by one of the many modes of travel.

The purpose of the personal interests section is to stimulate young people to discover and develop interests of a creative and rewarding nature. It is hoped that this experience, as well as those of the other two sections, will have a lifetime effect. For all awards special provisions will be made for handicapped young people.

Some comparable perspective may perhaps be of value. A number of ideas for this award program have been developed from observation of the Duke of Edinburgh's Award program in Great Britain. It was formulated by the individual who founded the Outward Bound schools. From its beginning 21 years ago, it has grown in 45 countries and has attracted over 1 million young people worldwide. There is no question that their particular program has been efficient and successful without depending on large government support. In England a high percentage of those achieving the Duke of Edinburgh's Award feel it had a substantial part in shaping their lives and helping them reach their life's objectives.

The congressional award is nonetheless wholly American. Dr. Frank Arlinghaus, Jr., the chairman of the committee for the establishment and promotion of the congressional award, has assembled a group of dedicated individuals as well as political, financial, and administrative support. Thirty-two Members of the House have cosponsored bills introduced by Representative JAMES HOWARD to establish the award program. Nationwide, some 32 Governors, 25 mayors, and 40 to 50 National, State, and local organizations have indicated their support or interest in the past year.

The award will require no Federal appropriation. A Congressional Award Foundation has been established as an IRS-approved public foundation in association with the National Heritage Foundation and the fundraising campaign to attract voluntary donations to support the program has already been successful. An 18-month pilot program has already been planned in rigorous detail by the Minnesota Outward Bound School and is ready to go. Congress will neither create nor be obligated to any bureaucracy, and need only appoint a board to oversee the program's operations.

Mr. President, the congressional award will recognize the creative endeavors and achievements of the young people of America, while at the same time bringing the younger and older generations together to achieve that very end. The award will enhance the following ideals with the dimension of national recognition: To value by appreciation, to cultivate by leadership, and to preserve by commitment. The program does not merely intend to pass out awards. The continuance of these ideals and endeavors in young people is valuable and essential to the future of our country. These goals and endeavors are significant, whether in a family, schools, youth organization, business, or government. They affect any community, large or small. An award is the result of involvement by both the young and not-so-young. It is this endeavor, this excellence, this creativity, which will be shared with the congressional and government leaders as they meet with the participants in the context of the award program. As Alfred Lord Tennyson noted, "What we are, we are, and if we shall ever be any better, the time to begin is now."

Mr. President, I hope that the Senate has the opportunity to consider this legislation before the end of the 95th Congress. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3422

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Congressional Award Program Act".

ESTABLISHMENT OF THE CONGRESSIONAL AWARD

SEC. 2. There is hereby established a program to be known as the Congressional Award. The Congressional Award shall be administered by a Congressional Award Board (hereinafter referred to as the "Board") and a Director (hereinafter referred to as the "Director").

CONGRESSIONAL AWARD MEDALS

SEC. 3. (a) There are established three Congressional Award Medals, to be designated gold, silver, and bronze awards. The medals shall be of such design and materials as the Board may prescribe.

(b) The Director shall arrange for the presentation of the awards, including participation by Members of Congress and opportunities for the exchange of information and views among award recipients and Members of Congress and the executive branch.

FUNCTIONS

SEC. 4. The Board is authorized to—

(1) initiate and administer in the Untied States and its territories a program open to young people aged fourteen through twenty-three (with exceptions to be made by the Board) designed to promote youthful initiative, achievement, and excellence in the areas of expedition fitness, personal creative development, and public service;

(2) set the standards of achievement required for young people to qualify as recipients of the gold, silver, and bronze Congressional Award Medals;

(3) establish procedures for the selection of individuals to be awarded the Congressional Award Medals, and designate the recipients of such medals;

(4) delineate the role, if any, of State directors in administering the Congressional Award;

(5) arrange appropriate ceremonies at the State and national levels for the presentation of the Congressional Award; and

(6) establish such policies and programs for the Congressional Award as may be appropriate to carry out the provisions of this Act.

(b) The Board shall prepare and submit an annual report to the Congress before January 31st of each year summarizing the activities of the Congressional Award and making appropriate recommendations. Minority views and recommendations, if any, of members of the Executive Committee of the Board shall be included in such reports.

MEMBERS OF THE BOARD

SEC. 5. (a) The Board shall consist of fifteen members, to be appointed by a Commission consisting of the majority and minority leaders of the Senate, and the Speaker and the minority leader of the House of Representatives.

(b) The Commission shall appoint individuals to the Board who are active in one of the fields of concern of the Congressional Award. The Commission shall, in making appointments to the Board, consider any recommendation submitted by the Committee for the Establishment and Promotion of the Congressional Award or by the members of the Board then in office.

(c) Members of the Board shall serve for a term of five years, except that seven of the members first appointed shall serve for a term of three years and eight of the Members first appointed shall serve for a term of five years, as designated by the Commission at the time of appointment. Members of the Board, except members whose terms are designated by the Commission at the time of appointment, may serve until their successors are appointed. Any individual chosen to fill a vacancy on the Board shall be appointed only for the unexpired term of such vacancy. A vacancy on the Board shall not impair its power to function.

(d) The Board shall establish an Executive Committee and may delegate to such Committee or the Director such powers and functions as the Board deems appropriate.

(e) The Board shall meet annually on June 15, unless, prior to May 1 of any year, the Chairman has set a date for the annual meeting for a day in June in that year other than the fifteenth. The Board shall meet at such other times as the Chairman may determine. The Chairman shall call a meeting whenever one-third of the Board requests a meeting in writing. Each member shall be given notice of the call of any meeting by registered mail or certified mail mailed to his last known address of record not less than fifteen days prior to such meeting.

(f) A majority of the members of the Board shall constitute a quorum.

(g) The Chairman and the Vice Chairman of the Board shall be elected at the annual meetings of the Board occurring in even-numbered years. The Vice Chairman shall perform the duties of the Chairman in his absence. In case a vacancy occurs in the Chairmanship or Vice Chairmanship, the Board shall elect a member to fill such vacancy at the next meeting of the Board following the date on which the vacancy occurred.

(h) The Board is authorized to appoint from among its members or otherwise such committees as may be necessary and to assign to such committees such functions as may be appropriate to assist the Board in carrying out the provisions of this Act.

DIRECTOR OF THE CONGRESSIONAL AWARD

SEC. 6. (a) The Director of the Congressional Award (referred to in this Act as the "Director") shall be appointed by a two-thirds vote of the Board. The Director shall serve for a term of five years unless removed by a two-thirds vote of the Board.

(b) The Director may from time to time authorize any State director appointed pursuant to section 7 or any other officer or em-

ployee of the Congressional Award to perform any of the functions of the Director, including functions delegated to him by the Board, except that the Director may not redelegate policymaking functions delegated to him by the Board.

(c) The Director shall, in consultation with the Board—

(1) formulate programs to carry out the policies of the Congressional Award; and

(2) establish such divisions within the Congressional Award as may be appropriate.

(d) The Director shall be an ex-officio member of the Board.

STATE AWARD DIRECTORS

SEC. 7. State award directors (referred to in this Act as a "State director") may be appointed for each State and territory or groups of States and territories of the United States by a two-thirds vote of the Board. The Board shall make such appointments from lists of candidates submitted to the Board by the Director. The Director shall compile such lists from recommendations solicited from a representative number of public and private youth organizations within such State or group of States. Members of the Board may make nominations for State award directors.

ADMINISTRATIVE PROVISIONS

SEC. 8. The Board shall have the authority, within the limits of available resources and donated funds, to take such action as may be necessary to carry out the provisions of this Act, including the authority—

(1) to prescribe such rules and regulations as may be necessary concerning the operations, organization, and personnel of the Congressional Award;

(2) to seek funds and resources only from institutions and sources other than the Government;

(3) to make such expenditures as may be necessary for administering the provisions of this Act;

(4) to enter into contracts or other arrangements, or modifications thereof, for the carrying out of such activities as may be necessary to carry out the purposes of this Act, except that no contract may be entered into for an amount in excess of the amounts available to the Board in any fiscal year;

(5) to acquire by purchase, lease, loan, or gift, and to hold and dispose of by grant, sale, lease, or loan property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act;

(6) to receive and use funds donated from any source, if such funds are donated without restriction or without restriction other than that the funds donated be used in furtherance of one or more purposes among the purposes of the Congressional Award; and

(7) to accept and utilize the services of voluntary and uncompensated personnel.

EMPLOYMENT OF PERSONNEL

SEC. 9. (a) The Director shall, in accordance with such policies as the Board shall from time to time prescribe, appoint such other personnel as may be necessary to carry out the provisions of this Act, and may compensate such personnel from the donated funds of the Congressional Award.

(b) The Director shall not engage in any other business, vocation, or employment while serving as Director. Neither the Director nor any other personnel of the Congressional Award may hold any office in, or act in any capacity for, any organization, agency, or institution with which the Congressional Award enters into any contract or other arrangement under this Act, except with the approval of the Board.

(c) A person holding any other office in any branch of the Government may serve as a member of a committee created by the Board, but shall not receive remuneration for services as a member of such Committee during any period for which he receives compensation for such other office of the Government.●

By Mr. BROOKE:

S. 3423. A bill to amend the Disaster Relief Act of 1974 and the Small Business Act to increase disaster relief assistance, and for other purposes; to the Committee on Environment and Public Works and the Select Committee on Small Business, jointly, by unanimous consent.

DISASTER RELIEF AMENDMENTS OF 1978

● Mr. BROOKE. Mr. President, I am today introducing a measure to provide more and better Federal disaster relief assistance to Massachusetts residents who were adversely affected by last winter's severe snowstorm.

Few New Englanders will ever forget the Great Blizzard of February 6 and 7 of 1978 and the widespread destruction which it caused. From Salisbury to Marshfield, all along the coastline of Massachusetts, thousands of people suffered substantial financial losses to their homes, their businesses, and their personal possessions.

Beaches and seawalls in Manchester, Beverly, and Swampscott were battered beyond recognition. The famous Bearskin Neck and the landmark Motif No. 1 in Rockport were greatly disfigured. Over 2,000 individuals, many of them were from Revere, were forced to temporarily evacuate their homes because of the severe flooding caused by the storm. In Gloucester, the damage of the 2-day storm was estimated at nearly $28 million. And Federal troops and snow removal equipment were flown in from bases as far away as North Carolina and Georgia to Logan Airport to help in the recovery operations.

I flew to Massachusetts immediately after the storm to survey and assess the situation. Many homes were completely destroyed and others were severely damaged. It was obvious to anyone who personally witnessed the scene that the homes needed extensive repair work and that some degree of financial relief to their owners would be necessary.

Both the Small Business Administration (SBA) and the Federal Disaster Assistance Administration (FDAA) did provide assistance to many of the unfortunate victims of the Great Blizzard of 1978, but, as many of my constituents have indicated to me since that time, the Federal assistance has not been sufficient to meet the existing need. Indeed, on May 3, I received a petition with nearly 500 signatures requesting the reinstatement of the "forgiveness" clause for eliminating the first $5,000 on SBA disaster relief loans. And the Massachusetts House of Representatives has passed a resolution urging that the "forgiveness" clause be reinstated to further assist individuals who suffered home and property damage on February 6 and 7.

Consequently, late last month, during a visit to the town of Hull, one of the communities adversely affected by the storm, I announced that I was preparing comprehensive legislation to assure that adequate Federal disaster relief assistance would be given to my Massachusetts constituents. The legislation, which I am introducing today, includes provisions to reinstate the "forgiveness" clause for the first $5,000 on an SBA disaster relief loan, to improve the FDAA's existing $5,000 grant program, and to revise the Federal aid program for municipalities which need disaster relief.

The bill directs the Small Business Administration to cancel the first $5,000 on the principal amount of each disaster relief loan provided to the victims of the Great Blizzard of 1978 upon the presentation of proof of loss or damage or injury and upon the submission of a bona fide estimate of the cost for repairing, rehabilitating or replacing personal property. I am confident that these two qualifications will preclude any abuse of this provision and will direct assistance only to those individuals who truly deserve it.

My legislation also amends section 408 of the 1974 Disaster Relief Act by greatly broadening eligibility for direct grants to States for financial assistance not in excess of $5,000 to individuals adversely affected by a major disaster. Presently, section 408 restricts aid only to those individuals who "are unable to meet such expenses or needs through assistance under other provisions of the act, or from other means." This measure would eliminate the existing language and allow individuals to seek aid regardless of income level. However, an individual applying for both the grant and the "forgiveness" clause cannot receive Federal assistance in excess of $5,000.

My bill further amends section 408 by changing the Federal share in the grant program from 75 to 80 percent, thus increasing the likelihood that the States will provide grants to a greater number of individuals.

Third, this legislation would change section 414 of the 1974 act concerning aid to municipalities. At the present time, a town or city can receive Federal aid amounting to 25 percent of the municipality's annual operating budget for disaster relief. If, at the end of 3 fiscal years, the municipality if unable to raise revenues sufficient to meet its present operating budget, the disaster loan can be canceled by the Federal Government. Under my bill, the amount of Federal aid would be increased to 30 percent of the annual operating budget, and the period of time before the repayment of the loan can be canceled would be shortened to 2 fiscal years.

The provisions to amend section 404 and section 414 would be retroactive to January 1, 1978, thus assuring that Massachusetts residents and municipalities affected by the winter's storm could apply under the new programs.

In addition to these legislative initiatives, I have written to Commissioner James M. Stone of the insurance division of the Commonwealth of Massachusetts and recommended that public hearings be held to ascertain whether or not insurance settlement claims related to last winter's storms were undertaken and settled in an equitable manner.

I am confident that together these measures will provide a balanced program of comprehensive Federal assistance to Massachusetts residents pres-

ently faced with burdensome loans or presently unable to secure adequate financial aid. On past occasions, we have implemented the "forgiveness" clause to assist people in need. I strongly believe that the severity of the Great Blizzard of 1978 mandates that we reinstate the clause at this time.

Mr. President, it is my fervent hope that this bill will assure sufficient Federal relief to all of the victims of the Great Blizzard in Massachusetts. And, thus I urge my colleagues in the Senate to support and expeditiously pass this important and necessary legislation.

Mr. President, I ask unanimous consent that the bill and the letter to the Massachusetts Insurance Division be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 3423

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Disaster Relief Amendments of 1978".

SEC. 2. Section 7(b) of the Small Business Act is amended by adding at the end thereof the following:

"With respect to a loan made in connection with the snow storms in Massachusetts on February 6 or 7, 1978, the Administration shall, upon presentation of proof of loss or damage or injury and a bona fide estimate of the cost of repair, rehabilitation, or replacement, cancel $5,000 of the principal amount of the loan, except that the total amount so cancelled plus the amount of any grant under section 408 of the Disaster Relief Act may not exceed $5,000.".

SEC. 3. (a) Section 408 of the Disaster Relief Act of 1974 is amended—

(1) by striking out "necessary" in the first sentence of subsection (a);

(2) by striking out "in those cases where such individuals or families are unable to meet such expenses or needs through assistance under other provisions of this Act, or from other means" in the first sentence of subsection (a);

(3) by striking out "75" in the first sentence of subsection (b) and inserting in lieu thereof "80"; and

(4) by striking out "25" in the first and second sentences of subsection (b) and inserting in lieu thereof "20".

(b) Section 414 of the Disaster Relief Act of 1974 is amended by striking out "25" and inserting in lieu thereof "30" and by striking out "three" and inserting in lieu thereof "two".

(c) The amendments made by subsections (a) and (b) take effect on January 1, 1978.

U.S. SENATE,
Washington, D.C., August 15, 1978.

Mr. JAMES M. STONE
Commissioner, Insurance Division, The Commonwealth of Massachusetts, Boston, Mass.

DEAR COMMISSIONER STONE: During my recent visits to those shoreline communities in Massachusetts adversely affected by last February's severe snow storms, I have repeatedly heard allegations that insurance claim settlements were either inequitable or inadequate to meet the costs of repairing damages.

I know that you share my concern about this situation and that the Insurance Division has been doing everything possible to review documented complaints. However, the complaints persist and, since homeowner policies are regulated by the State, I feel the Commonwealth has a further responsibility toward reviewing this entire matter for the benefit of the people who have filed claims and for those insurance companies facing these allegations.

Therefore, I strongly recommend that you initiate public hearings to determine whether these allegations are valid. I believe that it is extremely important for us to insure that the homeowners receive just settlement for the claims they filed after the Great Blizzard of February 6 and 7. And, I look forward to providing you and your office with whatever assistance I can to make certain that individuals who have criticized the settlement procedure are heard by the Commonwealth.

With best wishes, I am

Sincerely,

EDWARD W. BROOKE.●

By Mr. CRANSTON:

S. 3424. A bill to amend section 8 of Public Law 93–223 to permit California to continue cash payments to SSI recipients in lieu of food stamps; to the Committee on Finance.

CALIFORNIA SSI/FOOD STAMP PROBLEM

● Mr. CRANSTON. Mr. President, I am introducing today a measure dealing with a problem which has recently developed in California regarding the supplemental security income—SSI—program in that State. This bill is identical to one introduced last Wednesday in the House by my good friend from California, Mr. CORMAN, H.R. 13814, which was today ordered favorably reported by the House Ways and Means Committee.

BACKGROUND

When the SSI program began in 1974, California included in its State supplementary cash payment an amount equal to the bonus value of food stamps that SSI recipients in the State generally would have been eligible to receive. In other words, the State provided SSI recipients with an additional amount of cash generally equivalent to the average value of, and in place of, food stamps, and in this sense "cashed-out" food stamps for SSI recipients. Pursuant to section 401 of the law establishing the SSI program, Public Law 92–603, California was able to maintain this "cash-out" status as long as the Federal Government was contributing to the cost of the State supplementary payment under the "hold-harmless" provision of section 401.

In 1976, as a result of increases in the Federal SSI benefit level, California would have lost the "cash-out" status allowed under the provisions of Federal law then in effect. At that time, at the request of the State of California, Congress enacted legislation—Public Law 94–379—that allowed California to continue its "cash-out" status as long as it met two conditions beginning June 1976, and for every month thereafter, the State had to first, pass through to SSI recipients any cost-of-living increases provided in the Federal SSI benefits and second, provide a yearly cost-of-living increase in the State supplementary payment. California has continued to meet these two conditions up to this time, and has, in effect, continued to "cash-out" food stamp benefits for SSI recipients.

Beginning in September 1978, however, Mr. President, California will cease to meet the second of these statutory conditions because the State suspended, as of September 1, 1978, the cost-of-living increase in its SSI supplementary payments. The State will thus lose its "cash-out" status and most noninstitutionalized, single, aged or disabled SSI recipients will be eligible for the minimum stamp allotment of $10 per month. Couples and most single, blind SSI recipients will not qualify for food stamps because the level of their SSI payments exceed the income limits under the food stamp program. Institutionalized SSI recipients will not qualify for food stamps because they do not constitute an eligible household under the provisions of the food stamp law.

TEMPORARY MEASURE

At this time, Mr. President, California has reached an oral agreement with the Department of Agriculture under which, at least until December 1978, food stamps will be distributed to eligible SSI recipients under a demonstration project system that will greatly simplify food stamp eligibility determination and distribution procedures. The State estimates that during these 4 months approximately 90 percent of the noninstitutionalized, single, aged, and disabled individuals who would be entitled to $10 a month in food stamps will participate in the program. According to the State, the estimated annual cost under the demonstration project system is $51 million for food stamp benefits and $6 million for administration.

CONVERSION TO REGULAR SYSTEM; ADMINISTRATIVE COSTS OUTWEIGH BENEFITS

The State advises that, as of January 1, 1979, it will have to begin converting from the demonstration project to the regular food stamp eligibility determination and distribution procedures. SSI recipients will then have to make application for food stamps at the local welfare offices and pick up the stamps at designated locations. After conversion to the regular food stamp system, the State estimates that participation in the program will drop to 42 percent and, on an annual basis, that $25 million will be paid in food stamps benefits with administrative costs increased to approximately $75 million. In other words, the taxpayers will be expending $3 in administrative costs for every dollar in benefits that go to recipients. Of the total costs, the Federal Government will pay all the costs of the benefits and one-half of the administrative costs, with the State paying the other half.

PURPOSE OF LEGISLATION

The object of the measure I am introducing today is to avoid this patently wasteful result by amending section 8(d) of Public Law 93–233 to provide that SSI recipients in California who would be eligible for food stamps will receive an amount in cash equivalent to the value of their food stamp entitlement. Under this legislation, if requested by the State of California, the Secretary of Health, Education, and Welfare, would, during fiscal year 1979, make an additional monthly cash payment of $10—the minimum food stamp allotment for an eligible one person household—to eligible recipients. This additional payment would be included in or with the indi-

vidual's SSI check. These SSI recipients would receive this cash payment during fiscal year 1979 in place of the food stamps they would otherwise be entitled to receive.

The amendment would allow California to resume "cash-out" status beginning with the first month in which the additional payments in lieu of food stamps provided under this bill are actually made by the Secretary of HEW. These additional payments would end at the end of fiscal year 1979 or sooner with the first month California comes back into compliance with the two conditions contained in Public Law 94–379. Thus, if California resumes including cost-of-living increases in its supplementary payments before the end of fiscal year 1979, including amounts necessary to reflect all increases in the cost of living which have occurred since June 1976, the special $10 payments would cease and the State could continue its "cash-out" status under the provisions of current law. The amendment also specifies that the requirements of paragraph (2) of section 8(d) will be considered to have been met when California does make the required cost-of-living increases. This provision makes clear that, when California does resume making annual cost-of-living increases in its State supplementary SSI payment, the State will be considered to have satisfied the requirement of paragraph (2) of section 8(d) of Public Law 94–379 that such increases have been paid for all months since June 1976.

COSTS OF PROPOSED LEGISLATION

It is estimated that the total annual costs under this proposed legislation—benefits plus administrative costs—will be approximately $60 million in fiscal year 1979, or about the same as the annualized cost of the food stamp demonstration project system scheduled to begin on September 1, 1978. The benefit costs under the proposed legislation will be somewhat higher, but the administrative costs should be less. This, however, will be $40 million less than the total estimated costs after conversion, as required by law, to the regular food stamp program after January 1, 1979.

Under the regular food stamp program, Mr. President, the State estimates that it will cost about $75 million to administer $25 million worth of food stamp benefits, and the total fiscal year 1979 cost to the Federal Government will exceed $60 million. Under this proposed legislation, approximately $60 million in benefits will be provided to eligible SSI recipients with negligible administrative costs since the additional payments will be made along with regular SSI checks. Twice as many individuals will receive benefits during fiscal year 1979 under this legislation at essentially the same cost to the Federal Government. Thus, this money will go into direct cash benefits, rather than administrative costs.

Mr. President, I have been informed that this legislation will affect only the State of California, but I think that everyone of us shares an interest in seeing that funds—Federal, State, or local—intended to help the needy are expended in the most cost-effective and efficient manner. This legislation is designed to serve that purpose.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3424

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 8(d) of Public Law 93–233 is amended by adding at the end thereof the following new sentences: "For purposes of this subsection, if the State requests the Secretary to make the finding specified in the first sentence of this subsection and to make an additional cash payment under title XVI in lieu of food stamps, in the amount and the manner described below, to every individual in the State who does not have an eligible spouse and who receives a supplementary payment pursuant to an agreement under section 1616(a) of the Act (other than an individual who (i) receives such a supplementary payment at a level prescribed by the State by reason of his or her residence in an institution, or other living arrangement in which board and care are provided, or (ii) receives payments pursuant to section 212 of Public Law 93–66 at a level in excess of the level applicable to such individual as established by the State under such agreement), the Secretary shall make such payments if he finds that the conditions of paragraph (1) have been met (and for this purpose the conditions of paragraph (1) shall be considered to have been met to the extent that they involve amounts payable under the law referred to in paragraph (1)(B) notwithstanding the suspension in 1978 of the cost-of-living increase in State supplementary payments under such law) for months beginning with the first month in which, as determined by the Secretary, such additional cash payment can be made, and ending with the month before the first subsequent month for which the conditions of paragraph (1) are met without regard to this sentence (and the requirements of paragraph (2) shall also be considered to have been met, effective on the first day of such first subsequent month, for purposes of applying the first sentence of this subsection to that month and succeeding months). For purposes of the preceding sentence, the amount of an additional cash payment under title XVI in lieu of food stamps shall equal the cash value of the minimum allotment specified by section 8(a) of the Food Stamp Act of 1977 for one-person households, and such additional cash payment shall be appropriately included in or with the check issued to such individual in payment of his supplementary security income benefit (or supplementary payment under such section 1616(a))."

(b) The amendments made by subsection (a) of this section shall be effective only for the period beginning October 1, 1978, and ending September 30, 1979.●

ADDITIONAL COSPONSORS

S. 2856

At the request of Mr. MORGAN, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 2856, the Uniformed Services Survivor Benefit Plan Amendments Act of 1978.

S. 2867

At the request of Mr. GOLDWATER, the Senator from Alabama (Mrs. ALLEN) was added as a cosponsor of S. 2867, a bill to remove residency requirements and acreage limitations applicable to land subject to reclamation law.

S. 2920

At the request of Mr. HOLLINGS, the Senator from Arkansas (Mr. HODGES) was added as a cosponsor of S. 2920, a bill to amend the Trade Act of 1974.

S. 3289

At the request of Mr. ROTH, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 3289, a bill to amend the Internal Revenue Code of 1954 to clarify the application of the investment tax credit to certain enclosures or structures used for the housing, raising, or feeding of poultry or their produce.

S. 3373

At the request of Mr. MCINTYRE, the Senator from New Hampshire (Mr. DURKIN), the Senator from Indiana (Mr. BAYH), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Idaho (Mr. MCCLURE), the Senator from California (Mr. CRANSTON), the Senator from Texas (Mr. BENTSEN), the Senator from North Dakota (Mr. BURDICK), the Senator from Nevada (Mr. CANNON), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of S. 3373, a bill to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with international world friendship events or troops on foreign soil meetings, on a reimbursable basis.

S. 3414

At the request of Mr. WALLOP, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 3414, to amend the Internal Revenue Code of 1954 to provide that nonresident aliens are taxable on gain from the sale or exchange of farming property and undeveloped real property at capital gains rates.

AMENDMENTS SUBMITTED FOR PRINTING

TARIFF TREATMENT WITH RESPECT TO FILM, STRIPS, SHEETS, AND PLATES OF CERTAIN PLASTICS OR RUBBER—H.R. 5285

AMENDMENT NO. 3478

(Ordered to be printed and to lie on the table.)

Mr. NELSON (for himself, Mr. KENNEDY, Mr. JAVITS, Mr. ANDERSON, Mr. CRANSTON, Mr. EAGLETON, Mr. HASKELL, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. PELL, Mr. RIBICOFF, Mr. RIEGLE, and Mr. WILLIAMS) submitted an amendment intended to be proposed by them, jointly, to H.R. 5285, an act to amend the tariff schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber.

HOSPITAL COST CONTAINMENT

● Mr. NELSON. Mr. President, I am today submitting, on behalf of myself and Senators KENNEDY, JAVITS, ABOUREZK, ANDERSON, CRANSTON, EAGLETON, HASKELL, HATHAWAY, MOYNIHAN, PELL, RIBICOFF, RIEGLE, and WILLIAMS, a hospital cost containment amendment to H.R. 5285, a tariff measure that includes the Senate

Finance Committee-reported medicare and medicaid reimbursement amendments collectively referred to as the Talmadge bill (S. 1470).

Specifically, the amendment is to section 2 of the Talmadge bill, which sets up a new reimbursement mechanism to control certain limited routine hospital costs under medicare and medicaid. The amendment is a compromise between the limited approach of S. 1470 and the administration/Human Resources Committee cost containment bill, S. 1391, which would enact immediate mandatory controls on all hospital inpatient revenues.

In summary, the amendment would expand upon the Talmadge bill approach in a number of ways designed to improve cost savings and make sure that cost containment efforts will equitably affect all costs and all payors. However, it would not put into effect immediate controls, as the administration bill would. Instead, this amendment recognizes that the hospital industry currently is undertaking a voluntary effort to hold cost increases down. To the extent that the voluntary effort succeeds, there would be no imposition of controls broader than those on medicare and medicaid costs, currently contemplated under the Talmadge bill. Only if the voluntary effort fails on a nationwide basis, either in 1978 or in subsequent years, would the amendment put into effect standby controls to curb inflation in ancillary costs and in charges to other hospital payors. Individual States would be exempted from the controls if they met the voluntary national goal.

In other words, the amendment centers not so much around permanent immediate controls but around the industry's own voluntary effort, backed up by controls in the event voluntary efforts are not successful.

Here's how the amendment would work:

Total community hospital expenses nationwide increased by about 15.6 percent in 1977 to $53 billion. The voluntary goal is to lower that rate of increase by: 2 percent in 1978 (the goal would be to limit the increase to about 13.6 percent in 1978); 4 percent in 1979 through 1982 (the goal would be an increase of about 11.6 percent in those years). The goal could not be less than 1½ times the implicit price deflator of the GNP.

These goals refer to total nationwide expenses. For example, the 1978 goal would be determined as follows: 1977 expenditures equals $53 billion; 1978 maximum increase times 1.136; and 1978 goal, $60.2 billion.

Few major economic and social issues have been more widely discussed and debated by the 95th Congress than hospital cost containment.

At the very beginning of this session, the administration called our attention to the severe inflationary pressures generated by enormous annual increases in hospital costs—then rising at a national rate in excess of 16 percent annually.

President Carter sent up a major piece of legislation early in 1977. The legislation was referred to four different congressional committees: Finance and Human Resources in the Senate, and Commerce and Ways and Means in the House. The legislation also, at one time or another, has been the concern of a number of other committees, including the House and Senate Budget Committees, as well as a large number of public and private health care interest groups on both sides of this issue.

The administration bill has not passed the Congress because of heavy lobbying against it by the hospital industry. The total 5-year savings to the U.S. economy from the administration approach is estimated to be $55 to $60 billion. Despite this fact—or perhaps because of it—a tremendous lobbying effort has been mounted by the hospital industry against the legislation. Of the four committees to which it was referred, only one—the Senate Human Resources Committee—has reported legislation similar to the administration bill (S. 1391). Cost containment legislation has been bottled up in the House Ways and Means Committee, and was weakened by the House Commerce Committee.

The fourth committee to which cost containment legislation was referred—Senate Finance—approved only a limited approach, setting up a new mechanism to control only routine, per diem, hospital costs (the so-called hotel-type costs), about 50 percent of all costs, under only medicare and medicaid, about 40 percent of all payors for hospital care. The Finance Committee approach, while it contains certain desirable elements of reimbursement reform (such as basing reimbursement on a new system of classifying hospitals), would basically save only about $500 million over the next 5 years, or 100 times less than the Human Resources Committee-reported bill, and 60 times less than this compromise.

Moreover, because the Finance Committee bill controls only routine costs under only medicare and medicaid, the likely effect will be no net savings to the overall economy, since hospitals will still be able, one way or another, to redistribute costs to ancillary services, or to nongovernmental payors, such as Blue Cross, insurance companies, and private, self-paying patients.

The Talmadge bill contains a provision prohibiting hospitals from increasing charges to other third-party payors as a way of offsetting reductions from controls on medicare and medicaid reimbursement rates. This prohibition is designed to address the problem that other payors will bear the brunt of a medicare/medicaid-only restriction. However, the prohibition is likely to be largely ineffective because there is no reasonable way to test whether shifts in charges are due to limits in "routine" costs. For example, hospitals change their charges for a variety of reasons. A hospital may have charges in excess of costs by 5 percent one year, 15 percent the next, and 8 percent the next. If they raise charges up to an excess of 15 percent again in the year after application of the limit, how can we demonstrate that it is due to the limit? Although the changes can be measured, whether those changes were solely due to the limits on "routine" costs cannot easily be determined. Gross violations may be subject to detection, but that does not solve the problem of the subtle shifts in charges by each hospital.

This would not be a problem under this amendment, which covers all payors.

The Finance Committee rejected efforts to broaden the Talmadge bill to cover all costs and all payors. This middle-ground compromise—which would generate 100 times more savings than the Talmadge bill (S. 1470)—was rejected by a vote of 11 to 7.

Accordingly, as I indicated at the time of that vote, I am introducing an amendment today for consideration, and I intend to offer it at the appropriate time during the debate on H.R. 5285.

I should note that the Senate may also have an opportunity to vote on the Human Resources Committee bill. I voted for that legislation in committee, and I will continue to support it on the floor. But I want to be certain that the Senate also has before it a compromise approach, which will result in significant and meaningful savings.

I am convinced, Mr. President, that the economy needs—and that the health care consumer desires—these meaningful savings.

Consumers are concerned about hospital cost inflation, as evident in the mail we receive. Numerous editorials have appeared in newspapers throughout America concerned with the lack of Congressional activity to control hospital costs. The Milwaukee Journal, in an editorial July 20, 1978, noted Congress willingness "to give the green light to inflation" by "cravenly yielding to pressure from special interests and totally ignoring the public interest." Similar editorials have appeared in the Columbus (Ohio) Dispatch, the Atlanta Constitution, the Bennington (Vermont) Banner, the Arkansas Gazette, the Oklahoman, and others. I ask unanimous consent that a number of these editorials be printed in the RECORD at the conclusion of my remarks.

Supporters of the thrust of this amendment include: the health insurance industry, including Blue Cross, Blue Shield, Aetna, and Connecticut General; the National Governors' Association; the National Conference of State Legislatures; the National Association of Counties; and many professional and social organizations. I ask that letters from several of these organizations also be printed in the RECORD.

I also ask unanimous consent that a summary and section-by-section analysis of the amendment, tables showing the increase in hospital costs in recent years, the estimated future savings under various cost containment amendments, and the text of the amendment itself be printed in the RECORD.

There being no objection, the amendment and material were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3478

Page 3, line 3 is amended by striking out "Section 2(a)(1)" and by inserting in lieu thereof "(a)(2)" and by inserting before such line the following:

"Section 2(a)(1) The amendments to the Social Security Act included in this section provide a more equitable basis for reimburs-

ing hospitals for routine operating costs under titles XVIII and XIX, establish a Health Facilities Cost Commission to develop a more equitable basis for reimbursing hospitals for all costs covered by titles XVIII and XIX, set voluntary goals for hospital cost containment and impose standby increase limits on total inpatient reimbursement in the event that the voluntary goals are not met. The amendments to the Internal Revenue Code included in this section extend the standby increase limits to all payers by imposing excise taxes on hospital charges and reimbursements in excess of such limits."

Page 3, line 6 is amended by striking out "(2)" and inserting in lieu thereof "(3)".

Page 3, line 5 is amended by striking out "subsection (bb)" and inserting in lieu thereof "subsection (bb), (cc), (dd), and (ee)".

Page 3, line 10 is amended by striking out "subsection (bb)" and inserting in lieu thereof "subsection (bb), (cc), (dd), and (ee)".

Page 6, line 6 is amended by striking out the words "only one-half of" and inserting after the word "shall" the word "not."

Page 9, line 22 is amended by striking out the word "and" and by inserting after such line the following:

"and, under either division I or division II, not exceeding (on a per diem basis) the hospital's actual routine operating costs in its immediately preceding accounting year (or, with respect to the first accounting starting on or after July 1, 1979, an amount that the Secretary estimates would equal the hospital's routine operating costs in such preceding accounting year had routine operating costs in such preceding year represented the same proportion of the hospital's total routine cost as the Secretary finds in the subject year) increased by a rate equal to 150 percent of the rate of increase in the index established pursuant to subparagraph (4)(A) in the same period, subject to modification for the rate of increase in the regular wages granted to nonsupervisory employees under paragraph (dd)(5) of this section, and"

Page 10, line 7 is amended by adding after the word "costs" the following:

"but not exceeding (on a per diem basis) the hospital's routine operating costs in its immediately preceding accounting year (or, with respect to the first accounting year starting on or after July 1, 1979, an amount that the Secretary estimates would equal the hospital's routine operating costs in such preceding accounting year had routine operating costs in such preceding year represented the same proportion of the hospital's total routine costs as the Secretary finds in the subject year) increased by a rate equal to 150 percent of the rate of increase in the index established pursuant to subparagraph (4)(A) in the same period, subject to modification for the rate of increase in the regular wages granted to nonsupervisory employees under paragraph (dd)(5) of this section,"

Page 10, line 4 is amended by striking out the word "or" and inserting after "(b)" the following:

"200 percent of the amount due in incentive payments to employees of the hospital under a plan established prior to the start of the hospital's accounting year and designed to encourage efficiency and economy, or (c)"

Page 18, line 10 is amended by redesignating subsection "(c)" as paragraph "(c)(1)".

Page 18, line 15 is amended by striking out the words "criteria established by section 1861(bb)" and inserting in lieu thereof the words "implementation of subsections 1861 (bb) through (ee)".

Page 18, line 20 is amended by striking out the words "and the Congress".

Page 19 is amended by inserting after line 4 the following new paragraph:

"(c)(2) The Secretary may adopt for purposes of reimbursement under titles XVIII and XIX of the Social Security Act measures recommended by the Commission and put such measures into effect in lieu of section 1861(v), (bb) or (dd) of title XVIII of the Social Security Act starting at least sixty days after the Secretary notifies the Congress of his intent to adopt such measures."

Page 20, line 18 is amended by striking out "(bb)" and inserting in lieu thereof "(bb), (cc), (dd) and (ee)".

Page 20 is amended by inserting after line 19 the following new sections (f) and (g):

"(f) Title XVIII of the Act as amended by subsection (b) of this section is further amended by adding after subsection (bb) as added to such title by such subsection (b) the following new subsections:

'VOLUNTARY GOALS FOR HOSPITAL COST CONTAINMENT

'(cc) (1) If the Secretary finds, after consultation with the Health Facilities Cost Commission, that hospitals in the United States have failed to voluntarily reduce the rate of increase in their total expenses (other than expenses arising from increases in the average hourly regular wage rate for nonsupervisory employees) consistent with the goals established in paragraph (2) of this subsection, the standby increase limits on total inpatient reimbursement per admission provided in subsection (dd) shall go into effect. However, the hospitals located in a State shall be exempt from such limits if the Secretary finds that the hospitals in that particular State have held the rate of increase in expenses (other than expenses arising from increases in the average hourly regular wage rate for nonsupervisory employees) to a level at or below the maximum allowable rate specified under paragraph (2) of this subsection for hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States. For purposes of the preceding sentence the term "State" includes the District of Columbia and the Commonwealth of Puerto Rico and the term "United States" means all the States and all the possessions of the United States.

'(2) the maximum allowable rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States for calendar year—

'(A) 1978, is equal to 2 percentage points less than the rate of increase in such hospital expenses for 1977, and

'(B) 1979, 1980, 1981, and 1982 is equal to 4 percentage points less than the rate of increase in such hospital expenses for 1977, except that such maximum allowable rate of increase for a calendar year may not be less than one and one-half times the rate of increase in the implicit price deflator of the gross national product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business for such calendar year.

'(3)(A) Each hospital shall provide the Secretary—

'(i) not later than December 31, 1978, with such data with respect to the hospital's expenses for each calendar quarter of 1976 and 1977 and for the first three calendar quarters of 1978 as the Secretary determines to be necessary to compute and monitor the maximum allowable rates of increases in hospital expenses for calendar years under paragraph (2), and

'(ii) not later than 60 days after the end of each calendar quarter which ends after September 30, 1978, with such data with respect to the hospital's expenses during the calendar quarter as the Secretary determines to be necessary to monitor hospitals' compliance with the maximum allowable rate of increase in hospital expenses under paragraph (2).

'The Secretary may prescribe the form and manner in which these data must be provided.

'(B) In determining reasonable costs for purposes of this Act—

'(i) data on hospital expenses reported under paragraph (1) for any period shall be used instead of the hospital cost data otherwise reported for purposes of this Act to the extent that this would result in lower reimbursement to the hospital, and

'(ii) in the case of a hospital failing to provide in full the information required under paragraph (A) for any period, the hospital's expenses (other than expenses arising from increases in average hourly wage rates for nonsupervisory employees) for any accounting year (ending after December 31, 1977) may not be taken into account to the extent such expenses exceed such expenses in the hosiptal's immediately preceding accounting year by a percentage greater than the maximum allowable rate of increase in total hospital expenses specified under paragraph (2) for the latest calendar year any part of which is included in the accounting year in question.

'(4)(A) The Secretary shall monitor the data received under subparagraph (3)(A) and shall report at least quarterly to the appropriate committees of Congress on progress in meeting the maximum allowable rate of increase in hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for each year.

'(B) Not later than 90 days after the first day of each calendar year after 1978, the Secretary shall determine (on the basis of data received from hospitals that have provided data under subparagraph (A) in a form and manner acceptable to the Secretary for all calendar quarters of 1976, 1977, 1978 and, in the specified time, for all subsequent calendar quarters) and announce whether or not the rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for the preceding calendar year has exceeded the maximum allowable rate of increase in such hospital expenses for the year, as specified under paragraph (2).

'(5) For purposes of this subsection:

'(A) The term "rates of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees)" means, for a calendar year, the percentage by which the total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for the calendar year exceed such hospital expenses for the previous calendar year.

'(B) The term "total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees)" means, for a calendar year, the total expenses, excluding expenses arising from increases in the average hourly wage rates for nonsupervisory employees (as defined in clause (dd)(5)(D)(iii) of this section), of hospitals (as defined in subparagraph (C)) in the calendar year, as such expenses are defined by the Secretary.

'(C) The term "hospital" means a hospital (other than a psychiatric hospital or tuberculosis hospital, as defined in subsections (f) and (g), respectively, of this section or a hospital that derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under this title, from one or more health maintenance organizations as defined in section 1301(a) of the Public Health Services Act) which has an agreement in effect under section 1866 of title XVIII of the Social Security Act during all calendar quarters elapsing after calendar year 1975 and which has had 4,000 or more admissions during all full accounting years elapsing after calendar year 1977.

'STANDBY INCREASE LIMITS ON TOTAL INPATIENT REIMBURSEMENT'

'(dd)(1) If the Secretary finds, after consultation with the Health Facilities Cost Commission, that hospitals have failed in calendar year 1978 or any subsequent calendar year to voluntarily reduce the rate of increase in their expenses consistent with the goals established in paragraph (2) of subsection (cc), average inpatient costs otherwise reimbursable per inpatient admission shall, in the case of a hospital (other than a psychiatric hospital or a tuberculosis hospital, as defined in subsections (f) and (g) respectively of this section or a hospital that derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under this title, from one or more health maintenance organizations, as defined in section 1301(a) of the Public Health Service Act) with 4,000 or more admissions in its last preceding full accounting year, be deemed unreasonable and shall not be reimbursable for purposes of this title or for purposes of title XIX of this Act in hospital accounting years any part of which occur after such calendar year and also after June 30, 1979, to the extent that such costs exceed average costs per inpatient admission reimbursable under such titles in the hospital's immediately preceding accounting year by the sum of the following percentages as adjusted by paragraphs (3), (4), and (5) of this subsection:

'(A) The highest rate by which routine operating costs could have increased in the subject accounting year without being subject to disallowance under subsection (bb) multiplied by the ratio of routine operating costs to total inpatient costs in such prior accounting year;

'(B) The rate by which general wage levels in the hospital's geographic area increased during the latest 2-year period for which data are available multiplied by the ratio of the labor costs not included in routine operating costs to total inpatient hospital costs in the prior accounting year; and

'(C) The rate of increase the Secretary finds appropriate (based on such index composed of weighted components of available national indicators of price changes in the general economy as the Secretary finds appropriate for the purpose) multiplied by the ratio of nonlabor inpatient costs not included in routine operating costs to total inpatient costs in the prior accounting year.

'(2)(A) For purposes of paragraph (1) of this subsection, the Secretary shall deem the proportions of total inpatient costs represented by routine operating costs and the labor and nonlabor components of all other costs in accounting years starting prior to July 1, 1979, to be equal to the proportions of total inpatient costs represented by such components of costs

'(i) as he finds in the succeeding accounting year of a hospital, where such succeeding accounting year starts on or after July 1, 1979 or

'(ii) as he estimates for all hospitals in the same category as a hospital for purposes of paragraph (3) of subsection (bb) of this section on the basis of available data, where the succeeding accounting year starts prior to July 1, 1979.

'(B) Where less than the full accounting year of a hospital occurs in a period subject to paragraph (1) of this subsection, the Secretary shall impose any disallowance of reimbursement otherwise required under such paragraph (1) only in the proportion that the number of days in such accounting year occurring in such period bears to the total number of days in that accounting year.

'(C) Where less than the full accounting year of a hospital occurs after July 1, 1979, the Secretary shall, for purposes of subparagraph (1)(A), deem the highest rate by which routine operating costs could have increased in such accounting year without being subject to disallowance under subsection (bb) to be such rate as it would be determined if such accounting year began on July 1, 1979, except that the Secretary shall determine the percentage increase in costs under subparagraph (bb)(4)(A) in a manner appropriate to the actual accounting year of the hospital.

'(3) The sum of the percentages determined under paragraph (1) of this subsection shall be reduced by the product of:

'(A) the number of percentage points (or fraction thereof) by which the increase in a particular hospital's total expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in a calendar year specified in paragraph (1), as reported for purposes of subsection (cc), exceeded the maximum allowable rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States set forth in paragraph (2) of such subsection, and

'(B) the percentage of such hospital's total expenses that do not arise from the regular wages of nonsupervisory employees.

'(4) The sum of the percentages determined under paragraph (1) of this subsection and reduced where required under paragraph (3) of this subsection shall be adjusted in accordance with a formula established by the Secretary to take into account the estimated impact of changes in the total number of inpatient admissions experienced by a hospital in a subject accounting year, as compared to the total number of admissions such hospital experienced in its immediately preceding accounting year. Such formula shall be designed to adjust the percentage limitation on increases in average inpatient costs otherwise reimbursable per inpatient admission applicable to a hospital under this section for any substantial increase or decrease in total inpatient cost per admission that the Secretary estimates (based on data available to him) would generally result from increases or decreases in total admissions taking into account the size of the hospital, its occupancy rate, and such other factors as the Secretary deems appropriate.

'(5)(A) The Secretary shall modify, for each hospital, in accordance with subparagraph (2) of this paragraph, the increase limits otherwise established under this subsection and the limitation (to 150 percent of the rate of increase in the economic index established pursuant to subparagraph (4)(A) of subsection (bb) of this section), otherwise established under subparagraphs (4)(B)(i) and (4)(B)(ii) of subsection (bb) of this section to allow the hospital a pass-through of any increase in the rate of regular wages granted in the accounting year to its nonsupervisory employees.

'(B) The hospital shall promptly provide the data necessary for the required calculation, in accordance with regulations of the Secretary. A hospital that fails to supply the data required shall be presumed to have granted no increase in the rate of regular wages to its nonsupervisory employees in any accounting year for which it has failed to supply the required data.

'(C) Such modified limits for an accounting year shall be calculated as follows:

The modified limit applicable to a hospital's accounting year is equal to the sum of—

'(i) the product of—

'(I) The percentage by which the average hourly regular wage rate for nonsupervisory employees for the accounting year exceeds the average hourly regular wage rate for nonsupervisory employees for the preceding accounting year, and

'(II) the percentage of costs for inpatient hospital services attributable to regular wages paid to nonsupervisory employees in the preceding accounting year; and

'(ii) the increase limit, otherwise applicable to the hospital for that accounting year, multiplied by the percentage of costs attributable to all expenses other than regular wages paid to nonsupervisory employees in the preceding accounting year.

'(D) For purposes of this subsection:

'(i) The term "regular wages" means wages paid to an employee at the regular rate at which he is employed (within the meaning of section 7 of the Fair Labor Standards Act of 1938), but does not include overtime wages or shift differentials.

'(ii) The term "nonsupervisory employee" means an individual who is employed by a hospital and who is not a supervisor or a physician, as determined under regulations prescribed by the Secretary.

'(iii) The term "average hourly regular wage rate for nonsupervisory employees" means, with respect to a hospital for an accounting year—

'(I) The total amount of regular wages incurred by the hospital during the accounting year for work of the hospital's nonsupervisory employees, divided by—

'(II) the total number of nonsupervisory employee hours of work for which such regular wages were paid.

'(6) The Secretary shall issue such regulations as he deems necessary and appropriate in applying the provisions of this section including:

'(A) Such exceptions and exemptions as he determines are warranted,

'(B) Such definitions of the terms used in this subsection as he finds necessary to carry out its intent, and

'(C) Such safeguards against attempts to avoid the intent of these provisions as he finds appropriate.

'EXEMPTIONS

'(ee)(1) At the request of the Governor (or other chief executive) of any State, the Secretary may exclude from the application of subsection (dd) of this section hospitals physically located in such State, if—

'(A) The Secretary finds that such State has in operation as of the date of such a request a program capable to containing hospital costs for inpatient hospital services in the State which covers at least 90 percentum of the hospitals in the State, which would otherwise be covered under subsection (dd) of this section;

'(B) The Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program, and has applied for at least one year prior to the date of such request to at least half of those revenues (excluding revenues received under this title;

'(C) The Governor (or chief executive) certifies, and the Secretary determines, that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not exceed (i) the increase that the Secretary estimates would be permitted if subsection 1861(dd) (including the pass-through of any increase in the rate of regular wages paid to nonsupervisory employees) applied to the hospitals in the State, nor (ii) be less than the increase in the GNP deflator applicable to that fiscal period; and

'(D) the Governor (or chief executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of total revenue which (notwithstanding paragraph (C)) may occur.

'(2) A hospital or group of hospitals may be excluded from the application of subsection 1861(dd) if the Secretary determines that:

'(A) such exclusion is necessary to facilitate or continue an experiment or demon-

stration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act, and

'(B) such experiment or such demonstration is not inconsistent with the purposes of such subsection 1861(dd).

'(3)(A) Any State may submit to the Secretary a plan for a hospital cost containment program for approval. The Secretary shall approve such a program and exemption from the application of subsection 1861(dd) hositals physically located in such State if the Secretary determines that such program—

'(i) designates an identifiable unit of State government which has the authority to supervise the administration of the program;

'(ii) provides for a methodology to assure that the aggregate rate of increase in revenues for inpatient hospital services over the previous year for all hospitals in the State will not exceed the increase that the Secretary estimates would be permitted if subsection 1861(dd) (including the passthrough of any increase in the rate or regular wages paid to nonsupervisory employees) applied to hospitals in the State nor be less than the increase in the GNP deflator applicable to that fiscal period. Such methodology may include alternative methods for classifying hospitals, for establishing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system, in order to stimulate hospitals through positive (or negative) financial incentives to use their facilities and personnel more efficiently without adversely affecting the quality of services;

'(iii) includes a methodology for the recovery of any excess of total revenues which (notwithstanding clause (ii)) may occur;

'(iv) provides for sanctions and enforcement procedures adequate to insure compliance with the program;

'(v) provides for uniform definition of all costs;

'(vi) provides for the evaluation of standards of institutional performance;

'(vii) provides protection against inhibition of increases in the rate of regular wages granted to nonsupervisory employees comparable in effect to the protection against such inhibition provided under paragraph (5) of subsection (dd) of this section;

'(viii) provides for compliance with such other criteria as the Secretary deems necessary to accomplish the purposes of subsection (dd).

'(B) The Secretary may make grants to any State which has an approved program pursuant to subparagraph (A) to assist such State in the implementation of its program. For the purposes of this subsection, there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1979, and such sums shall remain available until expended.

'(C) The Secretary shall promulgate regulations to implement this subsection prior to May 1, 1979.

'(4)(A) The Secretary shall review annually any program, experiment, or demonstration that has received an exemption pursuant to this subsection to determine whether such program, experiment, or demonstration is in compliance with such subsection and the regulations promulgated thereunder. The Secretary may revoke, after notice and an opportunity for a hearing on the record, any such exemption if he determines that such exemption is no longer justified because the conditions for such exemption are no longer being met.

'(B) Upon revocation of an exemption awarded under this subsection each hospital that would otherwise be subject to subsection (dd) will be subject to the limits established under such subsection.

'(5) Where the Secretary has granted an exemption under this subsection he shall reimburse the State, District, or Commonwealth operating the qualifying hospital cost or revenue containment program for the portion of the administrative expenses of such qualifying program that he deems equitable considering the proportions of hospital costs reimbursable under this title and shall treat as administrative expenses incurred in the operation of a plan established under title XIX of this Act the portion of the administrative expenses of such qualifying program that he deems equitable considering the proportion of hospital costs reimbursable under a plan established under title XIX of this Act.

'(g) Chapter 36 of the Internal Revenue Code of 1954 (relating to certain other excise taxes) is amended by adding at the end thereof the following new subchapter:

'Subchapter F—Taxes on Certain Excess Reimbursement and Charges for Inpatient Hospital Services'

'SEC. 4495. IMPOSITION OF TAXES

'(a) Taxes on Excess Reimbursement—

'(1) Tax on Hospital.—If a covered hospital has excess reimbursement with respect to a private cost payer for an accounting year, there is hereby imposed on the covered hospital a tax equal to 150 percent of the amount of excess reimbursement from the private cost payer to the covered hospital for the accounting year.

'(2) Tax on Private Cost Payer.—If a covered hospital has excess reimbursement with respect to a private cost payer for an accounting year, there is hereby imposed on the private cost payer a tax equal to 150 percent of the amount of excess reimbursement from the private cost payer to the covered hospital for the accounting year.

'(b) Tax on Excess Hospital Charges.—If a covered hospital has excess charges for an accounting year, there is hereby imposed on the covered hospital a tax equal to 150 percent of the amount of excess charges of the covered hospital for the accounting year.

'(c) Payment of Taxes.—

'(1) Tax on Excess Reimbursement.—Any tax imposed by paragraph (1) or (2) of subsection (a), with respect to excess reimbursement payable to a covered hospital by a private cost payer in an accounting year, shall be paid not later than 30 days after the date the Secretary of Health, Education, and Welfare notifies the Secretary—

'(A) of the excess reimbursement, and

'(B) of the amount of taxes which are due from the covered hospital and the private cost payer under paragraph (1) or (2) respectively, of subsection (a).

'(2) Tax on Excess Charges.—

'(A) In General.—Any tax imposed by subsection (b) with respect to any covered hospital for any accounting year shall be paid not later than 30 days after the date the Secretary of Health, Education, and Welfare notifies the Secretary—

'(i) of the excess charges, and

'(ii) of the amount of taxes that are due from the covered hospital under subsection (b).

'(B) Deferral.—If the Secretary of Health, Education, and Welfare certifies to the Secretary that a covered hospital has established an approved escrow account and certifies the amount deposited into the account, then an equal amount of any tax imposed on the covered hospital by subsection (b) shall be deferred. Such deferral shall continue so long as such amount remains in such account.

'(C) Abatement.—If the Secretary of Health, Education, and Welfare certifies to the Secretary that a covered hospital has withdrawn an amount from an approved escrow account of the hospital in accordance with the terms of the account, then an equal amount of any tax imposed on the covered hospital by subsection (b) shall be abated.

'(D) Withdrawals from Approved Escrow Account.—Amounts deposited into an approved escrow account shall be treated as withdrawn from the account in the order in which they were deposited into the account.

'(d) Definitions.—For purposes of this section—

'(1) Covered Hospital.—The term 'covered hospital' means, for an accounting year of a hospital, a hospital which is subject, under subsection 1861(dd) of the Social Security Act, to a limit on its increases in reimbursement for the accounting year.

'(2) Private Cost Payer.—The term 'private cost payer' means any organization which (A) meets the definition contained in section 1842(f)(1) of the Social Security Act, and (B) reimburses a covered hospital for inpatient hospital services on a basis related to the hospital's costs in furnishing those services or on any other basis other than charges imposed by such hospital. An organization shall not be considered to be a cost payer with respect to its payment to a hospital of another payer's coinsurance or deductible amounts.

'(3) Excess Reimbursement.—A covered hospital has excess reimbursement with respect to a private cost payer for an accounting year if the Secretary of Health, Education, and Welfare determines that reimbursement per inpatient admission to the covered hospital for inpatient hospital services covered by the private cost payer for the hospital's accounting year exceeds such reimbursement in the hospital's immediately preceding accounting year by a percentage greater than the increase in reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under limitations imposed by subsection 1861(dd) of the Social Security Act.

'(4) Excess Charges.—A covered hospital has excess charges for an accounting year if the Secretary of Health, Education, and Welfare determines that average inpatient charges per admission made by the hospital in the hospital's accounting year, exceeds such charges in the hospital's immediately preceding accounting year by a percentage greater than the average in reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under the limitations imposed by section 1861(dd) of the Social Security Act.

'(5) Amount of Excess Reimbursement.—The amount of excess reimbursement from a private cost payer to a covered hospital for an accounting year shall be determined by the Secretary of Health Education, and Welfare and shall be equal to the amount by which such reimbursement per admission to the covered hospital for inpatient hospital services covered by the private cost payer for the hospital's accounting year, exceeds such reimbursement in the hospital's immediately preceding accounting year by a percentage greater than the increase in reimbursement per admission permitted for title XVIII of the Social Security Act under limitations imposed by section 1861(dd) of the Social Security Act.

'(6) Amount of Excess Charges.—The amount of excess charges of a covered hospital for an accounting year shall be determined by the Secretary of Health, Education, and Welfare and shall be equal in amount to the product of—

"(A) the amount by which the amount of average inpatient charges per admission for inpatient services made by the hospital in

the hospital's accounting year, exceeds such charges in its immediately preceding accounting year by a percentage greater than the increase in average reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under the limitations imposed by section 1861(dd) of the Social Security Act, and

'(B) the percentage of inpatient charges in the accounting year which are attributable to patients other than those for which the responsibility for payment has been assumed by a private cost payer (as defined in paragraph (2)) or a program established under title V, XVIII, or XIX of the Social Security Act.

'(7) Approved Escrow Account.—The term 'approved escrow account' means an escrow account—

'(A) which is established and maintained by a covered hospital in a manner approved by the Secretary of Health, Education, and Welfare, and

'(B) from which funds may be withdrawn by the hospital only in an amount which is not greater than an amount which, if added to inpatient charges in an accounting year, would not constitute excess charges.

SUMMARY OF NELSON AMENDMENT TO H.R. 5285

NELSON AMENDMENT

The proposed amendment is intended as a compromise between the mandatory, immediate Federal controls contained in the Human Resources Committee-reported bill, and the limited Medicare/Medicaid, routine cost, approach in H.R. 5285. Current estimates are that this amendment would save between $30 and $35 billion over the next five years, as opposed to $50 to $60 billion for the Administration/Human Resources bill and less than $500 million for the current Talmadge bill approach. Basically, the amendment expands upon rather than substitutes for the Talmadge bill cost controls and consists of three major parts:

1. The amendment would not alter the general approach of the Talmadge bill for revising reimbursement for routine costs under Medicare/Medicaid. Hospitals would be classified, average rates would be determined, and limits would be set for such costs under the amended program just as they would under Section 2, except that several minor modifications to Section 2 are included which would result in increased cost savings under the Talmadge approach (see items 5 through 8 in Section-by-Section Analysis).

2. In addition, the amendment would statutorily recognize that the hospital industry itself may be able to bring overall hospital cost increases under control through voluntary efforts. The amendment adds a new subsection to Title XVIII of the Social Security Act which sets out the voluntary goals, as proposed by the industry. Those goals apply to hospitals in the aggregate, rather than individually, and they call for cost increases (other than those arising from increases in the average hourly wage rates for nonsupervisory employees) to be held to 2 percent less in 1978 and 4 percent less in 1979 through 1982 than the rate by which such expenses increased in 1977. However, in order not to unfairly penalize hospitals for increases in inflation for which they aren't responsible, in no case would the goals need to be less than one and one-half times the increase in the GNP deflator.

The role of the new Health Facilities Cost Commission created by the Talmadge bill would be expanded, and it would be charged with oversight of the voluntary effort, and with determining whether it has succeeded.

3. If, in any year, the national voluntary effort fails to meet its announced goals, standby, mandatory controls would go into effect for the following year under the proposed amendment (except that if the voluntary effort fails for 1978, such controls would take effect July 1, 1979). Even if the national voluntary effort fails, however, hospitals would be exempt from controls in any State which meets the national goals, or which has in effect a State cost containment program at least as comprehensive and effective as the Federal program.

The standby controls would involve limitations applicable to all costs and all payors. They would limit the allowable rate of increase for all hospitals with more than 4,000 annual admissions to a percentage derived from the increase in routine costs allowable under the Talmadge bill, the increase in general wages in the hospital's area, and a "market basket" index of increases in a number of goods and services normally purchased by hospitals.

Increases beyond the limits would not be paid by medicare and Medicaid, for either ancillary or routine costs. With regard to private payors, any excess paid by such payors following the imposition of controls would be required to be held in escrow until returned to payors in the form of rate reductions.

The percentage limitation would be subject to adjustment to take into account excessive increases in the prior year, changes in the volume of admissions, and a mandatory "pass-through" of increases in the wage rates of nonsupervisory employees. The Secretary would be authorized to issue appropriate regulations to define terms, provide exceptions and guard against attempts to avoid the intent of the limits.

NELSON AMENDMENT TO H.R. 5285

SECTION-BY-SECTION ANALYSIS

Section 1. This section of the Nelson amendment adds a new preamble which sets forth the broadened purposes of the hospital cost containment provisions of H.R. 5285, as amended by this proposal. Those purposes include setting Medicare and Medicaid limits on routine operating costs, recognizing the hospital industry's voluntary goals for limiting the rate of increase in hospital expenses, and putting in place standby controls for all inpatient costs for all payors if the voluntary goals are not met.

Sections 2 through 4. These sections include clarifying and technical amendments to H.R. 5285.

Sections 5 through 8. These sections include several cost-effective modifications to the routine cost limitations proposed in H R. 5285, as follows:

Section 5 modifies the Talmadge bill provision which requires that only one-half of hospital costs in excess of the limits be disregarded in determining the average routine operating costs upon which future limits would be based. The proposed amendment would disregard the full amount of such excess current costs in determining future target limits. This would prevent hospital costs found to be unreasonable in the year in which they were incurred from increasing the level of costs found reasonable in future years.

Sections 6 and 7 amend the section which permits a hospital with routine operating costs below the 115 percent limit established by the section to increase such costs to the limit without penalty. The proposed amendment would restrict the increase allowed in any year to one and one-half times the rate of increase in the index of the cost of goods and services used in setting the limits, subject to "pass-through" of increases in the wage rates of nonsupervisory employees. This change would prevent reimbursement for increases at levels not justified by changes in the economy.

Section 8 modifies the provision permitting hospitals below their target rates to receive incentive payments. The proposed amendment would require that half of such incentive payments go to hospital employees. Such a change would give hospital employees a stake in containing costs that would be particularly meaningful in the large nonprofit segment of the hospital industry.

Sections 9 through 12. These sections would modify the provisions in H.R. 5285 establishing a Health Facilities Cost Commission, as follows:

Section 9 is a technical amendment.

Section 10 would require the Health Facilities Cost Commission established to direct particular attention to new subsection 1861 (cc), (dd), and (ee) added by this amendment.

Section 11 would modify the requirement that the Health Facilities Cost Commission report to the Congress, as well as to the Secretary of HEW. The proposed amendment would have the Commission report only to the Secretary of HEW.

Section 12 would alter the requirement in H.R. 5285 that the Health Facilities Cost Commission functions in a purely advisory capacity. The proposed amendment allows the Secretary to implement their recommendations for Medicare and Medicaid reimbursement after providing Congress with at least 60 days advance notification.

Section 13. This section would insure that the new cost containment provisions in this bill apply to Medicaid as well as Medicare.

Section 14. The proposed amendment adds new subsections "(cc)", "(dd)" and "(ee)" to section 1861 of the Social Security Act and a new subchapter "F" to Chapter 36 of the Internal Revenue Code. In general, the new subsection (cc) embodies voluntary goals for limiting the increases in hospital expenses (other than expenses arising from increases in the average hourly wage rate for nonsupervisory employees). The new subsection (dd) embodies standby limits on increases in total inpatient reimbursement per admission for Medicare and Medicaid. The new subsection (ee) provides exemption from these standby controls in consideration of State plans of comparable effect and to facilitate experiments. The new subchapter "(F)" of Chapter 36 of the Internal Revenue Code extends the standby limits on increases in total reimbursement per admission to non-Government payers by imposing excise taxes on hospitals and non-Government cost payers where the increase in their charges or reimbursements exceed the increase allowed by the limits.

The voluntary goals set forth in subsection (cc) are that expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) be held, in the case of hospitals with 4,000 or more admissions annually, to 2 percent less in 1978 and 4 percent less in 1979 through 1982 than the rate by which such expenses increased in 1977. However, in no case could the goal be less than 1½ times the increase in the GNP deflator. Hospitals in a State would be subject to the standby limits in subsection (dd) only if the goal was breached on a national basis and if the national goal was breached by hospitals in that State.

The subsection requires quarterly reports by hospitals of their expenses for purposes of monitoring the goals and reimbursement penalties for hospitals that fail to do so.

The new subsection (dd) embodies standby limits on increases in total inpatient reimbursement applicable to hospitals with 4,000 or more admissions annually. In the event that the standby limits go into effect, increases in reimbursement per inpatient admissions under Medicare and Medicaid would be limited to a percentage derived from the increase in routine operating costs allowable under the new subsection (bb), the increase in general wages in the hospital's area in the latest two year period for which data are available and a "market basket" index of other cost increases. The percentage limitation would be subject to adjustment to take into account excessive increases in the prior year, changes in the volume of admissions, and a "pass-through" of increases in the average wage rates of nonsupervisory employees up to the prevailing rates for comparable work in the hospital's area. The Secretary would be authorized to issue appropriate regulations to define terms, provide exceptions and guard against attempts to avoid the intent of the limits.

The new subsection (ee) provides for the exemption from the standby limits under subsection (dd) the hospitals in a State that, along with certain other requirements, can reasonably be expected to meet the objectives of that subsection (including protection for nonsupervisory workers) under a program established by that State. The subsection also provides an appropriate share of the support of such State programs from Medicare and Medicaid. The new subsection would authorize grants ($10 million would be appropriated in the first fiscal year) for start-up of State programs and would also allow exemptions to facilitate experiments.

The new subchapter "F" of Chapter 36 of the Internal Revenue Code would define costs reimburse to hospitals by non-Government payers or charges imposed by hospitals as excessive where they increase at rates beyond those allowed in the case of Medicare and Medicaid under the standby limits provided under subsection (dd) of the Social Security Act. Excessive reimbursements by a non-Government cost payer would be subject to an excise tax of 150 percent of the excess levied on both the hospital and the payer. Excessive charges would be subject to an excise tax of 150 percent of the excess levied on the hospital, unless the excess were held in escrow pending the occurrence of charges below the limits in the same amount.

COMPARISON OF ESTIMATED SAVINGS UNDER VARIOUS HOSPITAL COST CONTAINMENT PLANS

		Estimated savings				
				Senator Nelson's amendment		
	Hospital revenues under current law (billions)	Administration bill, if effective Jan. 1, 1979 (billions)	Senator Kennedy's bill, if effective Oct. 1, 1978 (billions)	Voluntary program (billions)	If voluntary program fails in 1979, standby program effective in 1980 (billions)	Sec. 2 of Senator Talmadge's bill (millions)
1978	$54.5	----------	----------	−$0.4	−$0.4	----------
1979	63.0	−$2.2	−$2.8	−2.0	−1.7	----------
1980	72.7	−5.2	−6.4	−4.0	−3.4	−$6
1981	83.5	−9.9	−10.7	−6.3	−6.7	−70
1982	95.2	−15.9	−16.5	−8.4	−9.5	−122
1983	107.6	−22.6	−23.2	−10.2	−12.3	−175
Total	476.5	−55.8	−59.6	−31.3	−34.0	−373
Total for medicare and Federal medicaid	178.9	−18.7	−29.0	−11.5	−11.6	−373

Note: Estimate of Senator Kennedy's bill done by the Congressional Budget Office; the estimate ndicates a relatively higher savings under medicare and medicaid because the CBO projected higher current law growth rates for the Federal programs, resulting in greater savings upon application of the limit.

NATIONAL GOVERNORS' ASSOCIATION,
Washington, D.C., August 9, 1978.

Hon. GAYLORD NELSON,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR NELSON: At our 1977 annual meeting the National Governor's Association adopted a policy position which "urges the enactment of a strong national statute that establishes a joint federal and state government cost containment program." The Governors continue to be concerned with the alarming increase in medical care costs.

I understand that you will propose an amendment to the Medicare-Medicaid Administrative and Reimbursement Reform Act (S 1470) which would improve the ability of the state and federal governments to contain the increase in hospital costs. I understand further that your amendment would exempt from federal controls those hospitals providing services in states which establish effective cost containment programs. This amendment is consistent with NGA policy, and I would encourage its adoption.

I thank you for your continuing attention to this issue, and I look forward to working with you to see it resolved in the most equitable and effective manner.

Sincerely,

GOV. J. JOSEPH GARRAHY,
Chairman,
Subcommittee on Health Policy.

NATIONAL CONFERENCE OF STATE LEGISLATURES,
Washington, D.C., August 10, 1978.

Hon. GAYLORD NELSON,
Russell Senate Office Building, U.S. Senate,
Washington, D.C.

DEAR SENATOR NELSON: While The National Conference of State Legislatures believes that administrative and reimbursement reform in Medicare and Medicaid, as suggested in S1470, are critical, we also believe that containing the rate of increase in hospital costs ought to be an immediate national priority. For this reason, our organization fully supports your amendment to S1470 to establish a national, voluntary hospital cost containment program to be followed by a mandatory control program in the event the voluntary effort fails. We would suggest that if mandatory controls are necessary, they should be implemented on a state-by-state basis according to each state's performance with respect to the voluntary goals.

We further support your amendment designed to extend the reimbursement methodology to be utilized under the mandatory program to all payors and not be limited to Medicare and Medicaid.

We believe that S1470 provides adequate assurances that states which are operating effective cost containment programs would be able to continue to administer their own

systems if the mandatory program takes effect. It is our conviction that state cost containment programs have been operating very effectively and should not be preempted by federal law.

Finally, we would suggest that an appropriate role of the federal government ought to be one of providing financial incentives to encourage many other states to experiment with alternative hospital cost containment programs.

As you know, the NCSL is the official representative of the Nation's 7,600 State legislators.

Thank you very much for your assistance.

Sincerely yours,

JASON BOE,
President, NCSL,
President, Oregon Senate.

NATIONAL ASSOCIATION OF COUNTIES,
Washington, D.C., August 9, 1978.

Hon. GAYLORD NELSON,
Subcommittee on Health and Scientific Research, Committee on Human Resources, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR NELSON: The National Association of Counties strongly supports the approach to hospital cost containment proposed by Senator Talmadge (S. 1470). We support with equal vigor the amendments you have proposed to expand and strengthen the bill by recognizing the voluntary effort, but extending standby mandatory controls to all hospital costs.

NACo has supported effective cost containment legislation because counties bear a significant share of escalating health costs. Counties contribute 10 percent of the national Medicaid bill, and are themselves providers of last resort to unsponsored patients. Skyrocketting health costs have forced counties to increase the proportion of scarce property tax dollars they allocate to health care, thus reducing their ability to maintain or expand other esesntial services.

For these reasons, NACo commends and thanks you for your leadership in developing a realistic, viable proposal for hospital cost containment. We stand in firm support of S. 1470 and the strengthening amendments you propose.

Sincerely,

TERRANCE L. PITTS,
Chairman, NACo Health and Education Policy Steering Committee, and Supervisor, Milwaukee County, Wis.

[From the Milwaukee Journal]

KEEPING THE LID OFF HOSPITAL COSTS

If you worry about inflation, very likely you realize that hospital expenses are just about the most inflated thing in the entire American economy. Last year they rose 16 percent continuing a trend of more than two decades.

So the Carter administration had good reason to make hospital cost control the centerpiece of its campaign against inflation. And the House Commerce Committee had no valid reason for what it did to the cost control bill the other day.

Cravenly yielding to pressure from special interests, and totally ignoring the public interest, the committee made a wreckage of the measure. No longer is there any provision for clamping a lid on hospital expenses at any time, no matter how rapidly they may rise.

All that's left is a meaningless statement asking hospital officials and doctors voluntarily to hold back a bit on hospital costs. That is not a piece of legislation; it's merely a platitude.

Even before the Commerce Committee's devastating blow, the bill had been weakened. Compromisers had decided to give hospitals a two year trial period to see if they could shave two percentage points a year off the cost acceleration rate.

The compromise at least would have granted the President eventual standby power to impose a ceiling on cost increases if voluntary restraints failed. But that authority was distressingly ripped out by the Commerce Committee.

Why? Because that's the way the hospital industry, the American Medical Association and certain hospital employe unions wanted it. In order to placate those groups, committee members were willing to give the green light to inflation. (The AMA and labor are big donors to congressional campaigns.)

Unfortunately, the lawmakers may be able to get away with such action, because so many voters are insulated from the direct impact of rising hospital expenses. Third party payers—insurance, Medicare and Medicaid—pick up much of the tab.

Yet the financial burden weighs on the whole economy, affecting taxes and the price of virtually everything on the market. President Carter estimated that his bill would lop $30 billion from that burden in the next five years.

The sooner Americans fully realize that runaway hospital costs are taking money out of their pockets—third party payers notwithstanding—the less likely congressmen will be to keep taking their cue from lobbyists.

[From the Los Angeles Times, July 28, 1978]

CUTTING HOSPITAL COSTS

President Carter's proposal for mandatory cost controls on hospital charges has been rejected by the House Commerce Committee, the action apparently killed all chances this year to impose federal restraints in this major area of health care. The feeling in Congress, based on earlier experience with price controls, is that ceiling on charges wouldn't work. The trouble is that the voluntarism in curbing hospital fees that Congress is inclined to support isn't likely to work either.

The Administration's move to limit the rate of annual increase in hospital charges was a well-intentioned response to a severe inflationary problem. Hospital costs have been rising at more than double the general rate of inflation. An average hospital stay that in 1965 cost $350 today costs $1,300. By 1983 the cost is expected to hit $2,600.

There is no single cause for the inflation in hospital costs. The sources of the problem are manifold, which is one reason why putting an arbitrary ceiling on cost increases, without reference to other considerations, probably would not be too effective. Among the causes are these:

An excess of hospital beds. The Department of Health, Education and Welfare estimates that of the nation's 947,000 hospital beds, 200,000 are unfilled at any given time, of those, 100,000 are not needed at all.

An abundance of expensive equipment. Hospitals in the same area often acquire the same complex and costly diagnostic and therapeutic equipment, whether or not need justifies the investment. HEW Secretary Joseph A. Califano Jr. notes, for example, that in Southern California hospitals alone there are enough computerized brain and body scanners—at $500,000 a copy and up—to satisfy the health care needs of all the Western states. Where such equipment is available there is a tendency to use it, however marginal the benefit to the patient may be. Bills go up accordingly.

Defensive medicine. The rise in malpractice claims against doctors has prompted them to order more X rays, laboratory tests and other procedures than would normally be indicated, simply to protect themselves against possible liability. In an American Medical Assn. poll last year, 76% of physicians conceded that they practice such defensive medicine. The extra costs add significantly to hospital and general medical bills.

Lack of consumer choice. Doctors determine if patients should go to hospitals and doctors determine what happens to them once they are there. The patient has little if any say in the selection of hospitals, which in any case are not price-competitive, and little say—elective surgery is an exception—about what tests or treatment will be given. This lack of consumer say-so removes a major incentive for controlling costs.

Insurance. This is possibly the paramount cause for unnecessary utilization of hospital services and for the absence of incentives to hold down costs. About 90 percent of the typical hospital bill is paid for by third parties, whether by government or private insurers. The availability of insurance along with certain conditions of coverage are acknowledged by doctors and hospital administrators to encourage excessive demand. In some cases insurance, in effect, forces patients into hospitals for tests or treatment that could just as satisfactorily be performed on an out-patient basis. Similarly, services are demanded of hospital emergency rooms by patients who do not have medical emergencies at all, because of assured reimbursement. The prevalence of insurance is seen by many as a disincentive to resisting higher costs, by either patients or hospitals.

The threat of government intervention to limit hospital fee increases has been enough to prompt private hospitals to take voluntary action to hold down price increases, the goal being a 2 percent a year reduction for the next two years in the rate of increase. This modest effort does not really go to the roots of the problem, though, nor even if fully successful would it bring hospital price inflation under control.

Stronger approaches are going to be needed to deal with such inflationary considerations as hospital overcapacity, investment in duplicative equipment and services, and the absence of incentives in insurance programs to hold down costs. Hospital charges are the largest single component in the nation's health care bill, which this year is expected to total $200 billion, and the most inflationary item in that bill. Voluntary efforts to bring that inflation under control—by health-care providers, insurers and consumers—certainly must be encouraged. But if those efforts don't work, then the federal government may well have to take vigorous action on its own, out of budgetary need for itself and economic good sence for the country.

[From the Scranton (Pa.) Times, July 24, 1978]

CARTER HOSPITAL COST CONTAINMENT KILLED

A proposal of President Carter to put some sort of lid on rapidly rising hospital care costs has been gutted by the House Commerce Committee. Its 22–21 vote to eliminate even the threat of controls on the hospital industry makes a sham of the cost-containment effort. Earlier, the committee had approved standby instead of mandatory controls, but even this watered-down version fell by the wayside.

The measure was no socialistic scheme to have the federal government run the hospitals, as some critics had maintained. Two state governments—Maryland and Connecticut—have pioneered hospital review commissions with excellent results. Maryland achieved a savings for private hospital patients of some $55 million in the first two years of its state review program. Connecticut experienced savings of more than $30 million.

President Carter has estimated that if his proposal had gone into effect last October as planned, "our country would already have saved $2 billion in hospital costs by now."

What the Carter proposal was aimed at was containing costs by requiring hospitals to justify expenditures and planned improvements and higher rates with the goal of holding the rate of increase in hospital costs to 9 per cent. In contrast, the nation's hospital bill rose 15.6 per cent last year to $53 billion. In opposing the bill, representatives of the hospitals and the American Medical Association claimed that their voluntary efforts had held the rise in hospital costs to 12.7 per cent during the first four months of this year.

It is under the voluntary program that hospital costs have skyrocketed. The problem had grown beyond the capacity of the hospital industry to handle and it became clear that the public interest demanded a review and containment program be adopted. But for now, the House Commerce Committee has left the situation in the hands of those who let it get so badly out of kilter.

[From the Oklahoman, July 23, 1978]

HEALTH PLAN DEEPER INTO LIMBO

National health insurance was thrust deeper into the limbo it has long occupied when the House Commerce Committee wrecked President Carter's proposed lid on hospital costs.

Watered down to eliminate the threat of mandatory controls, the legislation which emerged from the committee would create a toothless national commission to monitor a hoped-for voluntary effort by hospitals and physicians to hold down cost increases.

The committee's action is described as a major setback for the administration. That is its ostensible effect, but it also enables Carter to blame Congress for a further indefinite delay in the implementation of what had been one of his foremost campaign promises.

For a decade or more, an assumption widely expressed in Congress and elsewhere was that some form of national health insurance was inevitable, and that it wouldn't be long coming. Congressional leaders presumably in a position to judge the prospects have long been saying that national health insurance was just around the corner.

Prospects for congressional action were thought to have improved materially in April 1974 when Wilbur Mills, then the powerful chairman of the House Ways and Means Committee, and Sen. Edward Kennedy, D-Mass., unveiled a proposal not radically different in concept from a plan the Nixon administration was supporting at that time.

The 93rd Congress closed with expressions of confidence that a prospective influx of newly elected House liberals would help break a stalemate on national health insurance which dated back to the Truman presidency.

The 94th Congress convened in January, 1975, with renewed calls for action on the subject. Oklahoma's Carl Albert, then speaker of the House, told the opening session of the new Congress he had "assured the chairmen of the appropriate committees" that national health insurance would be "one of the first bills—if not the first"—to come before the House. Rep. Al Ullman, D-Ore., who became chairman of the Ways and Means Committee after the spectacular fall from grace of Wilbur Mills, said he hoped his committee could draft a bill as early as the summer of 1975.

The summer of 1978 has arrived, and national health insurance remains as elusive as ever. President Carter said early in 1977 that his administration would complete that year its plan for phasing in a comprehensive health care system covering all Americans.

He said he had a "timetable and a phased approach" that would begin with an initiative toward the control of hopsital costs. A year ago last April, he proposed to Congress a "cap" of 9 percent on hospital cost increases in 1978, with smaller boosts to be permitted in subsequent years.

It has long been apparent that any federal effort to guarantee health services for the entire country would begin with an attempt to limit costs, since no insurance program—public or private—can function long without some inkling of the liabilities it is assuming.

The already troubled Social Security system is in no position to shoulder the mind-boggling costs, and the horrendous deficits in the general budget make it even less promising as a source of financing. Thus national health insurance is likely to remain a will-o-the-wisp until the government is able to get a handle on cost.

[From the Providence Journal, July 21, 1978]

TO THE HOSPITALS: PLEASE CUT YOUR COSTS . . . THANKS

While it may be premature to sound the death knell of the administration's hospital cost containment plan, the House Commerce Committee this week so weakened the measure that the chances of restoring it as a major anti-inflation weapon in the government's arsenal seem almost nil.

By a one-vote margin, the committee excised all references to mandatory limits on hospital cost increases, which last year reached an average 16 percent. Instead of setting a ceiling of from 9 to 11 percent on annual growth as proposed, the committee would merely encourage the nation's hospitals to curb their spending by two percent a year and offer the states a financial incentive to develop their own cost containment programs.

In effect, the powerful medical lobby which trained its biggest guns on Congress over the last year, has virtually won the day. It argued that a curb on spending would threaten the quality of health care, unfairly discriminate against some hospitals whose fiscal pressures are greater than others', and put the burden of wage controls on hospital workers alone.

The administration position has been that a forced cutback of hospital spending from the present rate, which is more than double the average national rate of inflation, to something in the area of half again as much as the inflation rate would save $56 billion over five years. A later plan would have allowed hospitals to adopt voluntary restraints but if that failed would have imposed mandatory controls.

Now it appears all thought of government sanctions has been abandoned in favor of voluntarism, a concept that is universally desirable but all too often totally ineffective. Inflation is widely deemed Public Enemy No. 1 in this country, yet when it comes to a modest clampdown on a highly inflationary service industry which operates for the most part on a non-profit basis, Congress beats a hasty retreat.

Clearly, the issue has created few sparks among the voters. Since most hospital bills are paid by health insurance carriers and government health programs, the average citizen is divorced from the crisis and if asked might well view economizing measures as inappropriate to the health field.

From the congressional point of view, hospital cost containment gives nothing tangible and takes something away, raising a political red flag particularly in an election year. Put another way, Congress appears ready to foresake a major effort to control inflation on the grounds that protecting one's political skin is the first order of business.

Asking hospitals to cut costs voluntarily—a nice idea—is like urging smokers to give up cigarettes because they cause cancer. One in a thousand times it might work but it can't be counted on.

[From the Arkansas Gazette, July 21, 1978]

FAILURE ON HOSPITAL COSTS

Americans have almost no weapon left to employ against soaring health care costs, specifically hospital costs, now that the House Commerce Committee has succumbed to the medical lobby and killed President Carter's plan to put a ceiling on hospital bills.

The fact, of course, is that the patient in this country stands at the mercy of an industry that has put a great deal more emphasis on resisting any kind of cost controls than on efforts to keep its cost even within shooting distance of the nation's general rate of inflation. Between 1976 and 1977, for the most recent example, hospital costs rose about 16 percent.

The hospitals have been pleading throughout their lobbying against the Carter proposal that they should be given a chance first to reduce costs on their own. This has been a fairly reasonable proposition. It makes little difference whether the reductions come through federal regulation or voluntary measures just as long as a swift result is forthcoming. Voluntary measures, for that matter, would be better.

But what the House Commerce Committee has done, by substituting a bill asking hospitals to reduce their cost increases, is remove Mr. Carter's threat of federal controls if the hospitals don't respond or if they fail in voluntary efforts.

Some hospitals will make a strong effort. There is evidence that a good many hospitals in Arkansas, for one state, are engaged in a good faith attempt in recent months, although there is no way to measure the degree of success at this point. Too many other hospitals care not one whit about holding down the cost to the patient, which they do not distinguish from the insurance company, for accounting purposes. Unfortunately, it is the patient and not an insuror who is held responsible by the same hospitals for the total cost, which is plenty. Patients pay insurance premiums, in any case. Certainly the fear of hospitalization these days is as much for personal financial reasons as any other.

HEW Secretary Joseph Califano calls the substitute bill, introduced by Representative James T. Broyhill of North Carolina, "a sham," as well as "an affront to the American people and the administration's attempt to combat inflation, our nation's No. 1 domestic problem."

There is a slim chance, we suppose that the House Ways and Means Committee will report out a bill with threat of mandatory control and thus save the day, but there is little realistic hope that such reason will prevail.

The Broyhill bill, besides asking hospitals to cut their cost increases by—percent in 1978 and 2 percent in 1979 makes a fumbling attempt to shunt responsibility to the states. It would provide for federal aid to states to establish their own hospital cost control plans. The health care lobby, by all odds, has far greater influence at the state level in most states than it does even at the national level. In other words, the United States will be a lot better off not having the substitute bill offered by Broyhill, if only because it won't be out the federal expense of maintaining a state-by-state facade on hospital cost controls.

Loss of the threat of mandatory controls represents not only a major failure of Congress to enact anti-inflationary measures offered by the President but also diminished hope that health care costs of any nature can be brought down to reasonable scale.

[From the Bennington Banner, July 21, 1978]

HOSPITALS OUT OF CONTROL

The first sign of seriousness in Jimmy Carter's campaign against inflation was his decision to try to throttle one of the real

engines of inflation in the economy, hospital costs that have been going up an average 16 percent a year. The president's effort was well-researched, pursued with political muscle, and doomed to failure, which came Tuesday morning in a meeting room of the House Commerce Committee.

Dwight Eisenhower left Washington warning the nation presciently about the military-industrial complex. When Jimmy Carter goes, his swan song should contain a Cassandra note about the equally monolithic medical-industrial complex. The white jackets have beaten him, and in doing so have placed in question not only his inflation-control program but all hopes for comprehensive national health insurance as well.

The goal of the Carter hospital-cost-control proposal was to bring the rate of cost increases in hospital care down to 9 percent a year through the use of mandatory controls. The proposal drew heavily on the experience of Massachusetts, Connecticut and a few other states that have been able to achieve this through review boards on equipment and facility investment and hospital utilization.

Nine percent would still have permitted hospitals to increase spending at a rate substantially above the prevailing inflation rate in the economy, but it would have been a start. Still, the American Hospital Association and the American Medical Association wouldn't hear of it. A compromise that would have given the hospitals a period of time to lower costs voluntarily before mandatory controls would be instituted was not even good enough for the medical lobby.

What they finally permitted was a toothless and gumless creature that merely encourages hospitals—with no threat of controls in the event of failure—to lower their costs by a less-than-whopping 2 percent. At that point, if it is reached, hospitals will still be raising their costs at a rate precisely double the overall inflation rate in the economy.

The medical-industrial complex can get away with this for three reasons: The AHA and the AMA are among the biggest spenders when it comes to campaign contributions, with the AMA the perennial leader; hospital boards are often manned by local leaders from other fields, who make effective lobbyists with congressmen, and—perhaps most important—the public by and large doesn't feel the bite of rising hospital rates directly because insurance companies and government cover so much of the cost.

Indirectly, of course, the public gets hit in myriad ways. Higher hospital rates are reflected in higher taxes and in higher prices for virtually everything that is sold—auto manufacturers, for example, spend more on medical insurance for their employees than they do for steel. But by the time the costs have been passed along to the consumer, the heavy hand of the hospitals is no longer visible—off in a congressman's pocket, most likely.

[From the Chicago Sun-Times, July 21, 1978]

A KNIFE JOB ON HEALTH-CARE COSTS

"Hmm," the chief physician mumbles, "something serious here. I'll write out a prescription, and you start taking the pills."

A second opinion: "Maybe we can be a little more cautious," another doctor says. "If it doesn't clear up in a while, we'll prescribe something then."

And then the third opinion, the blockbuster: "I'm going to put this medicine over there on the bedside table. Look at it briefly three times a day, Please?"

The players in this little farce are, respectively: President Carter, who wanted a 9 percent lid on hospital cost increases (growth hit 16 percent last year); Rep. Dan Rostenkowski (D-Ill.), who wanted to make the controls voluntary, but with some enforcement power if goals weren't met; and the House Commerce Committee, which absolutely gutted Carter's plan this week.

By bowing 22 to 21 to the hospital lobby and making cost-containment a request rather than a requirement, the committee imposed a $56-billion tax on Americans who get sick. That's the computation of Health, Education and Welfare Sec. Joseph T. Califano Jr. of the estimated savings in the Carter plan over the next five years.

One culprit in the defeat is Rep. Marty Russo (D-Ill.), who, incredibly, argued that implementation costs would have been greater than the savings the bill would bring.

Foes of the stricter measures pointed to slight taperings in soaring health-cost rates. Unfortunately, they fail to point out that many hospitals, scared stiff of mandatory controls, have deferred expensive capital improvement plans, making them look better on the balance sheets but leaving open the option for later building booms.

Hospital costs have risen 1,000 percent in a generation. They threaten further spurts. Yet hospital bigwigs rumble, and Congress quivers. Our diagnosis: lobbyitis.

[From the Atlanta Constitution, July 20, 1978]

HOSPITAL PRICES

The lobbyists have won again. And the people lose again.

So, if you're sick and going to the hospital, dig deep in your pockets, mortgage your house, cash in your life insurance policy, withdraw your life savings, ask the bank for a signature loan. Do that and perhaps you'll have enough money to pay your hospital expenses if your illness isn't too severe and you don't stay in the hospital for more than just a few days. Or at least you'll have enough to pay for what your health insurance doesn't cover.

The House Commerce Committee Tuesday voted against a Carter administration bill which would have eased sharply rising hospital prices by placing a lid of 9 percent on increases the first year. The bills rose about 16 percent between 1976 and 1977, continuing annual big jumps in hospital prices.

But the members of the committee voted 15–12 to support a substitute bill asking hospitals to cut their cost increases by only 2 percent in 1978 and 1979, and also removed Carters' threat of federal controls if the voluntary attempt fails.

Lobbyists for the American Hospital Association and the American Medical Association got to the committee members—and the committee voted for them, not the American people they're supposed to be representing.

But time is going to run out on the hospital and medical groups who won't agree to brake their price increases as strongly and quickly as possible. During the committee debate, for example, Rep. Paul Rogers, D-Fla., who had supported Carter's bill, displayed a hospital bill for more than $23,000 and said: "Ten days. Ten days in a hospital. The man died. And here's his bill for more than $2,300 a day! People out there are screaming for help. And we're not listening."

The committee members and the hospital and medical groups aren't listening this time—but the screaming isn't going to go away. It's going to get louder and louder and stronger and stronger. And the longer they resist reasonable price controls, the more they're going to lose in the end.

[From the Columbus Dispatch, July 20, 1978]

HOSPITAL CARE COSTS CONTINUING PROBLEM

Proponents of the Carter administration's hospital cost containment plan understandably feel dissatisfied with a U.S. House Commerce Committee decision to deny mandatory controls. Even so, the action should serve as additional warning to the health industry to remain alert to a stern economic reality.

Hospital costs account for 40 percent of the $140 billion spent each year for health care in the U.S. and are rising at double the national inflation rate. They jumped by 15.6 percent last year alone. The original Carter proposal called for a 9 percent annual increase ceiling to be followed by a decline of 2 percent a year. Proponents of the plan contend absence of mandatory controls amounts to a $56 billion "tax" on the American people over a five-year span.

The U.S. health industry, including hospitals, doctors and insurers, is well aware of the economics involved. They say their voluntary efforts to curb costs now are reducing the rate of increase by more than 2 percentage points. What is bothersome is that they are talking merely about reducing the rate of cost increases. Actually, reducing the cost is still another matter, one which may not be solved until the whole problem of inflation can be unraveled by all segments of the economy, the federal government included.

Health industry officials are aware of another reality. While the House Commerce Committee may have taken the teeth out of mandatory controls, the House Ways and Means Committee may restore that bite—or it can be put in place if the measure reaches the whole House.

More is involved in this debate than just the cost of hospitalization. If hospital administrators, doctors and insurers cannot contain the alarming explosion of health care costs, inevitably Congress will move in with mandatory regulations. That will mean but one thing—another giant step toward nationalization. The handwriting is blazing indelibly on the wall.●

DISTRICT OF COLUMBIA REPRESENTATION—HOUSE JOINT RESOLUTION 554

AMENDMENT NO. 3479

(Ordered to be printed and to lie on the table.)

Mr. MELCHER submitted an amendment intended to be proposed by him to House Joint Resolution 554, proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

NOTICES OF HEARINGS

SUBCOMMITTEE ON EAST ASIAN AND PACIFIC AFFAIRS

● Mr. SPARKMAN. Mr. President, the Subcommittee on East Asian and Pacific Affairs of the Committee on Foreign Relations will hold a hearing on the "Current Situation in Indochina" with particular reference to regional political developments, the Cambodian-Vietnamese conflict, refugee problems, and the human rights violations in Cambodia (S. Res. 323 and S. Res. 469). The hearing is scheduled for 10 a.m. on Monday, August 21, in room 4221 of the Dirksen Senate Office Building.●

COMMITTEE ON ENERGY AND NATURAL RESOURCES

● Mr. JACKSON. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Committee on Energy and Natural Resources.

The hearings are scheduled for August 24 and 25, beginning at 8 a.m. in room 3110 of the Dirksen Senate Office Building. Testimony is invited regarding

S. 3418, the Pacific Northwest Electric Power Planning Act.

For further information regarding the hearings, you may wish to contact Mr. Joel Merkel at 224–3234. Those wishing to testify or who wish to submit a written statement for the record should write to the Senate Committee on Energy and Natural Resources, room 3106 Dirksen Senate Office Building, Washington, D.C. 20510.●

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND FEDERAL SERVICES

● Mr. GLENN. Mr. President, I wish to announce that the Subcommittee on Energy, Nuclear Proliferation and Federal Services will conduct a hearing Monday morning, August 21, on S. 3411 and S. 3412.

S. 3411 would exempt General Accounting Office employees from laws administered by the Civil Service Commission regarding appointments, position classification, and certain other personnel actions. S. 3412 deals with the retirement and survivor benefits of Comptrollers General. My introductory comments on both bills appear on pages 26141–26142 of the August 15 CONGRESSIONAL RECORD.

The hearing will begin at 8:30 in room 3302, Dirksen Senate Office Building. The witnesses will be Comptroller General Elmer Staats and Civil Service Commission Vice Chairman Jule M. Sugarman. Persons desiring additional information or wishing to submit statements should call Vic Reinemer or Anne Boni of my subcommittee staff at 224–1474.●

COMMITTEE ON THE JUDICIARY

● Mr. ROBERT C. BYRD. Mr. President, for the Senator from Mississippi (Mr. EASTLAND) and on behalf of the Committee on the Judiciary, I wish to give notice that a public hearing has been scheduled for Friday, August 25, 1978, at 9:30 a.m., in room 2228 Dirksen Senate Office Building, on the following nominations.

Theodore McMillian, of Missouri, to be U.S. circuit judge for the eighth circuit vice William H. Webster, resigned.

Harold A. Baker, of Illinois, to be U.S. district judge for the eastern district of Illinois vice Henry S. Wise, retired.

Mariana R. Pfaelzer, of California, to be U.S. district judge for the central district of California vice Francis C. Whelan, retired.

Any persons desiring to offer testimony in regard to these nominations shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.●

SUBCOMMITTEE ON THE CONSTITUTION

● Mr. BAYH. Mr. President, I would like to announce that the Subcommittee on the Constitution will hold another day of hearings on the legislation concerning the implications of the Zurcher versus Stanford Daily decision on August 22, 1978, at 9 a.m., in room 5110, Dirksen Senate Office Building.

Anyone wishing to submit testimony for the hearing record should send his or her statement to, or contact Kevin O. Faley, Subcommittee on the Constitution, 102–B Russell Senate Office Building, Washington, D.C. 20510.●

ADDITIONAL STATEMENTS

A NEW ERA FOR THE NAVY

● Mr. HART. Mr. President, this year's defense debate focused heavily on the question of whether to build another large, nuclear-powered aircraft carrier. The expense of this ship—over $2 billion—and questions about its effectiveness and survivability have made it the center of congressional and press attention. Its proponents, concentrated in the uniformed Navy and the House of Representatives, seems to have won. (As a result, a Presidential veto is a real possibility.)

However, the approval of a large carrier by the Congress is the wrong issue to focus on the bill. It is certainly of small significance so far as the future of the Navy is concerned. The Senate and the House agree that this is the last such ship the United States is likely to build. Its significance is at best historical—like the last horse cavalry unit and the last steam locomotive, it is the last nuclear supercarrier. It marks the end of an era.

More important, however, is that this year's defense bill also marks the beginning of another era. Besides the last supercarrier, it also includes the first light carrier—a 19,000-ton ship, converted from an amphibious ship, designed for vertical take-off (V/STOL) aircraft. These smaller carriers can give us what the supercarriers cannot: enough ships. At about $700 million for a new (construction) light carrier, we can afford three for the cost of each supercarrier. If we abandon the costly and largely ineffective big carrier escort ships, that ratio doubles: We can send out six or seven small carriers for the cost of one supercarrier and its escorts.

In this bill, Congress has finally resolved the carrier dilemma—for this year and for years to come. Like too many of our defense decisions, the option before Congress has always been the big carrier—or nothing. The importance of this bill is that it provides us and the Navy with an alternative—the light carrier—while insuring the adequacy of our "traditional model" naval forces as we move toward the new concept.

This bill, then, contains the last of the old and the first of the new. We seem to have turned the corner away from dependence on a few vulnerable giants toward smaller aircraft carriers we can afford in the numbers we need.

There are four elements in the bill which move us strongly in the direction of the new concept, new technology Navy built around light carriers and vertical takeoff aircraft.

Conversion of one LPH amphibious ship to the first light carrier, putting it to sea in 1 or 2 years.

Long-lead funding for a sixth LHA to make up for the loss in amphibious life caused by the LPH conversion. When this LHA enters service, a second LPH can be converted to light carrier.

Initial R. & D. money to develop the Navy's first vertical takeoff aircraft. This naval version of the Marine's Advanced Harrier V/STOL will be in service by 1985, 12 years earlier than the Navy's original plans.

$25 million for continued design work on a new construction light carrier.

Resolving the carrier problem will also give Congress a chance to focus on other serious naval questions. The issue crying most loudly for attention is submarines. Many submariners say, and some surface sailors quietly agree, that there are today only two types of ships: submarines and targets. Even if this is a slight exaggeration, the submarine is clearly one of the most effective ships we can build. Unfortunately, as in the case of the supercarrier, the Navy has almost priced itself out of the market. The nuclear-powered attack submarines we now build cost over $400 million each.

As with the carriers, if we are to have enough ships, each must be cheaper. The Senate laid the basis for less expensive submarines in this year's report. It required from the Navy a study "of lower cost, lower capability nuclear propelled submarines and the use of nonnuclear submarines for some missions." A modern nonnuclear submarine, which may actually be more effective in some missions than a nuclear boat, costs only about one-third as much. The Congress may have to fund the construction of such submarines even without a Navy request for them, if we are to have a submarine force of adequate size.

Another problems area is surface ships: cruisers, destroyers, and frigates. Unlike submarines and carriers, we are building surface ships in ample numbers. But, unlike submarines, these ships do not appear very effective. They are slower than the Soviet submarines they are supposed to combat; the submarines almost always find them before they find the subs; and they carry few effective weapons. Yet even a frigate now costs more than a modern conventional sub and half as much as the latest model nuclear submarine.

The continued construction of these ships seems more a testimonial to the entrenched power of the surface ship "union" within the Navy than to logical analysis. If the Navy cannot overcome its internal lobbies, the Congress must. When funds for potentially effective new ships and aircraft are in short supply, it is hard to justify cruisers and destroyers which seem useful mainly as stage props for making movies of World War II.

Thus, the real significance of Congress action was not approving the last big carrier, but paving the way toward a new technology, new concept Navy. To a greater degree than any other recent budget, this year's is oriented toward the future, not the past.

To veto this bill, therefore, because it contains funds for a final nuclear-powered carrier is to ignore the other elements of the bill which will move us toward a new-concept, new-technology Navy. I strongly urge President Carter not to take this action, but rather to support the positive steps the bill takes.●

MIDDLE EAST POLICY

● Mr. BROOKE. Mr. President, on July 26, the Senate, in acting upon the security assistance bill, passed an

amendment stating in clear terms that a strong Israel is fundamental to any successful U.S. policy in the Middle East. I had the privilege of sponsoring that amendment, even though I, unfortunately, had to leave Washington before the vote was taken on it late in the evening.

As we look forward to the Camp David meeting between Prime Minister Begin and President Sadat, it is well to keep in mind the specific points of policy outlined in our amendment that passed by an 87-to-0 vote. First, we stipulated that a lasting, I repeat, lasting settlement of the Arab-Israeli conflict is vital to our interests. We do not want and will not be a party to an imposed settlement that would only be a counterfeit substitute for true peace.

Second, we stated that a strong and secure Israel, which means the maintenance of effective Israeli military capabilities, is fundamental to our goals regarding the Middle East. What this means to me is that we will not, we cannot, take any action that will lessen Israel's capacity either to deter aggression or effectively defend herself should another conflict break out despite all efforts to avoid such an event. Concretely, we state in the amendment that the United States should be responsive to Israeli requests for additional advanced aircraft needed to maintain her defense capacities.

Third, we called for the support by moderate Arab States of direct face-to-face negotiations between Israel and Egypt and, ultimately, between Israel and other Arab States. Hopefully, the Camp David meeting represents such negotiations and the indication that Jordan is supportive of the meeting is a sign that, perhaps, King Hussein and other Arab moderates may decide that the process initiated by President Sadat's trip to Jerusalem has merit.

Fourth, we stated in emphatic terms our commitment to the concept of secure, recognized and defensible borders between Israel and her neighbors, as being integral to any effort to discourage future hostilities. There must be no backing away from this commitment, for it is the essence of the future territorial viability of Israel in the Middle East.

Fifth, we stated our firm belief that fully normalized relations between Israel and its Arab neighbors, meaning trade, travel, tourism, communications and diplomatic relations, would be vital components of any bona fide peace settlement.

Finally, we clearly acknowledged that the correct limited role for the United States is to promote direct fact-to-face negotiations between Israel and the moderate Arab States. Too often in the recent past some in our country have evidenced a desire to impose a settlement. They failed to recognize a fundamental truth regarding the Middle East; namely, that only a settlement reached directly and freely between Israel and her Arab neighbors would have sufficient resiliency to withstand the pressures likely to be extant in the Middle East for many years to come.

Mr. President, the administration would be well advised to adhere closely to the policy recommendations contained in the Senate amendment as it prepares for the Camp David meeting. It should be particularly sensitive to the need for resistance on its part to the temptation to interject freely its views into the discussions. It must avoid encouraging the Arabs to negotiate with Israel only through the United States. Israel and Egypt must engage directly in meaningful bargaining if viable agreements are to evolve eventually from the negotiating process. If Camp David leads to such bargaining, it can be a success.●

"MEDI-GAP INSURANCE"

● Mr. CHURCH. Mr. President, private health insurance designed to supplement medicare—policies which typically fill in the deductible and coinsurance gaps in medicare's hospitalization and outpatient services benefits, as well as hospital indemnity, dread disease, and nursing home policies—is a large and growing insurance business. It will expand as long as this Nation's retired population continues to grow and as long as medicare's protection against high health care costs falls short of basic needs.

The Social Security Administration estimates that 63 percent of the population over the age of 65 had some private health insurance to cover hospital expenses in 1975. Additionally, 55 percent had some form of private health insurance for physician and surgical services.

But these policies, estimated to cost older Americans up to $1 billion a year in premiums, only pay for 5 percent of all health expenditures by the elderly. Medicare pays for only 35 percent of all health expenditures by the elderly when the cost-sharing amounts beneficiaries pay out of pocket for medicare protection are deducted.

Senator LAWTON CHILES, a member of the Special Committee on Aging, chaired excellent and productive hearings on May 16 and June 29 to explore reports that many older Americans are being taken advantage of by some unscrupulous and unethical private health insurance salesmen.

The hearings confirmed that medicare beneficiaries often do buy inappropriate or too much private health insurance.

First, there is wide misunderstanding of what benefits to expect from medicare. Not only is medicare information inadequate, but beneficiaries often have only inadequate information or exaggerated claims to go by when seeking additional protection through private health insurance.

Second, some individual insurance agents can and do take advantage of this confusion to sell unnecessary policies.

I shall submit for the RECORD an article which appeared in Idaho's Valley News on July 26 based on warnings issued by a number of Idaho's better business bureaus. Many better business bureaus play a very important role in consumer education.

I also shall submit for the RECORD an article which appeared in the August, 1978 edition of Senior Citizen News, a publication of the National Council of Senior Citizens, and a syndicated column by Jane Bryant Quinn which has appeared in a number of newspapers across the country. These articles, based on testimony taken during the committee's hearings, are among many which have alerted older Americans to things to look for when purchasing health insurance to supplement medicare.

Senator CHILES has performed an important service by reopening Senate scrutiny of Medi-Gap issues and by focusing on consumer confusion as a major element in the overall problem.

The material follows:

[From the Valley News, July 26, 1978]

ELDERLY WARNED OF INSURANCE CON

The Better Business Bureau in Boise has been forewarned by the Northwest Better Business Bureaus that an age old con game that makes its living off of the elderly has begun to blossom again.

The subject is supplemental old age insurance sold door-to-door to senior citizens. All of these types of salesmen peddle worthless or practically worthless insurance to the elderly, praising it as valuable supplemental programs to consumer's existing coverage or the Medicare benefits.

The truth is that it has very little coverage, as the extremely low premium prices would lead one to believe. Quite often, treatment in nursing homes, convalescent centers and veterans' hospitals are not covered. Yet, verbal communications by these salesmen tell people just the opposite.

Another trick is the waiting period involved before the insurance takes effect. For example, one may have to be in the hospital from one to two weeks before coverage applies.

Still another problem is strict and-or ridiculous pre-existing condition clauses that may go back two years. A joking conclusion may be a toothache of several years ago causing heart trouble today. Some strict clauses have been known to go almost that far.

One of the saddest results of this scheme, besides the loss of income for the buyer and poor coverage, is the false sense of security that it creates. Poorly covered individuals may not seek additional help, thinking that their future problems are over when they are not.

In order to prevent this problem from occuring, 1) know your needs; 2) go over your existing policies and coverage with your present insurance agent; 3) be sure the firm is licensed to sell in Idaho; 4) realize that the cost of insurance closely parallels the coverage you get; 5) be sure the company and-or agent's firm is established locally; and 6) contact the BBB if you are at all suspicious.

[From the Senior Citizens News, Aug. 1978]

SENATE INVESTIGATES "MEDI-GAP" POLICY SALES

Unscrupulous door-to-door salesmen who use scare tactics to sell "Medi-Gap" policies have come under Congressional scrutiny.

The Senate Special Committee on Aging has received examples of elderly persons who have purchased thousands of dollars in needless and often worthless policies.

Senator Lawton Chiles (D.-Fla.) is conducting the Committee hearings. He said at a recent session:

"What we're dealing with here is a national problem."

Federal Trade Commissioner Elizabeth Hanford Dole told the Committee on June 29 that the FTC is developing plans for a broad-based Federal-State examination of the supplemental Medicare insurance business.

The most detailed description of questionable or illegal sales tactics was provided by Texas District Attorney Wiley Cheatham and Postal Inspector C. L. Woodard at the recent hearing. They teamed up with a Postal Inspection investigation that revealed widespread defrauding of elderly persons in southern Texas. Usually such cases are referred to U.S. attorneys, but State investigations were under way and some indictments had been returned in State court.

Sixteen individuals were indicted in Mr. Cheatham's district, and all were ultimately convicted.

Woodard and Cheatham described the following examples of fraudulent and deceptive tactics used by salesmen in obtaining money from aged citizens:

Salesmen claiming to be there to collect on accident and health premiums due on existing policies, while actually soliciting new business.

Salesmen claiming to represent the victim's accident and health companies.

Unlicensed agents soliciting insurance sales to be "fronted" by licensed agents.

Licensed and unlicensed agents claiming to represent companies that were familiar to the aged victims, and tricking them into signing new applications for insurance with other companies.

Salesmen's representations such as "no waiting periods," "this policy will pay everything"—or—"Everything that Medicare does not pay," "this is a paid-up hospitalization policy," and "you will start getting $— per month back on this paid-up policy."

Salesmen claiming that they were there to help the aged victims with their social security while actually soliciting new insurance business.

The use of familiar sounding and appealing agency trade styles such as the American Agency, Senior Citizens Agency and First Continental Agency to induce aged people to listen to sales pitches.

Falsification of applications for new Accident & Health policies.

"Elderly people tend to be concerned with their health and their need for extra hospitalization, which is generally motivated by a desire to remain independent and be able to financially survive an expensive illness," Woodard said.

Chiles, in his opening statement, said that since the start of hearings in May:

"Sales agents have described company directives requiring them to sell new policies on every service visit, to write new policies rather than renew current ones, and to delete medical histories on new policy forms.

"We've also had reports of companies routinely denying claims when they first come in—taking the better than average chance that the elderly policy-holder will not challenge their judgment and resubmit a claim.

Relatives have written who were outraged when they discovered an elderly parent with many insurance policies and large accumulations of cancelled checks to insurance companies. One from Marathon, Florida said: 'Last spring, I learned that my 88-year-old aunt . . . whose income is less than $5,000 per year, had been sold more than $10,400 of health insurance in approximately a one-year period.' "

FTC Commissioner Doel said that more than half the people in this country aged 65 and over have private health insurance in addition to Medicare, and that Medicare paid only 38 percent of their health care costs.

Calling for Federal concern and action, Ms. Dole said:

"First, the Medicare supplement market is a byproduct of the Federal Medicare program. Supplemental insurance is confusing because Medicare's benefit structure is complicated.

"Second, there are arguments for a uniform approach to Medicare-supplement regulation, which Federal study could facilitate. Continuing variation in state standardization regulations carries the specter of insurers having to make different Medi-Gap policies in every state, with obvious increasing costs."

Ms. Dole said that an "impact evaluation" of existing state regulations of Medicare supplement insurance—possibly a cooperative federal/state effort with participation by the FTC, the National Association of Insurance Commissioners, and the Department of Health, Education, and Welfare—is under study at the FTC.

THE MEDICARE LEECHES

(By Jane Bryant Quinn)

NEW YORK.—Leeches have fattened on every government program ever invented, but it's hard to think of worse bloodsuckers than those that live on the Medicare program. In particular, I'm thinking of those insurance agents who sell the elderly all-but-worthless policies to fill the gaps in Medicare coverage.

There's nothing intrinsically wrong with certain forms of Medicare-gap insurance: Reasonable policies are sold by many well-known companies. But in the hands of unscrupulous salesmen, these policies turn to ashes. Among the abuses:

(1) Insurance agents tell the buyer that the policy "covers all the gaps in Medicare." In fact, no policy covers all the gaps. Most common among uncovered expenses are those for long-term nursing care, dental care and prescription drugs. Also there's no coverage for "excess" doctors' fees. (That's the difference between what a doctor actually charges and what Medicare deems a reasonable fee, and it can mount up).

(2) Medicare-gap policies are not all alike: They have different waiting periods, different benefits, and fill different gaps. A salesman may sell a vulnerable person one policy to cover one hole in Medicare, then come back next year with another policy for another gap. In most respects the two policies duplicate each other. Because the patient can't collect twice, he's paying good money for a very small additional benefit.

(3) The agent may revisit his victim once a year, each time with a "bigger and better" policy. This induces the trusting buyer to drop the old coverage and take on the new. The agent benefits, because he gets a big commission the first year a policy is in force, but the buyer is at risk. Medicare-gap policies have waiting periods, before the coverage goes into effect, either for general coverage or for specific illnesses. A person who switches policies may lose his coverage for certain serious illnesses, like cancer and heart disease, because of the need for a new waiting period.

(4) Selling coverage to a low-income person who qualifies for Medicaid. In this case, insurance coverage is worthless because Medicaid generally fills the Medicare gaps.

Examples of how these leeches make their living were heard in May and June in testimony before the Senate Special Committee on Aging. One man testified that his elderly mother had 17 Medicare-gap policies, on which she was spending 8 percent of her income.

A district attorney from Texas told how he, with the help of the U.S. Postal Inspector (acting under the mail-fraud law), got 16 indictments and some jail sentences for a team of agents who passed around a "goose list" of susceptible buyers.

Fraudulent activities might include lying about what the policy contains; pretending to "consolidate" a group of policies when, in fact, the agent is just selling the victim yet more duplicate coverage; and collecting a large lump-sum payment for "lifetime" coverage which doesn't, in fact, exist.

Insurance companies throw up their hands in horror when they hear these stories. But since the agents are independent contractors, the companies generally claim that there's nothing they can do. A good company, however, can and will police these thefts.

Companies that don't are, in my book, equally responsible for the fraud. Insurance commissioner Harold Wilde of Wisconsin testified that, in a state investigation, he found stacks of complaints about agents in the files of some insurance companies, with no action taken.

Seven states—Wisconsin, California, Illinois, Oregon, Washington, New Mexico and Colorado—have recently passed some form of legislation to try to control abuses in the sale of Medicare-gap insurance. But they're only as good as the enforcement, and this kind of fraud is hard to uncover.

The most vulnerable are people who live alone, with no friends nearby to advise them. If you or your parent has been taken, complain to your state insurance commissioner (get the phone number from the information operator in your state capital). Sometimes he can help you get restitution. Also, send your story to Sen. Lawton Chiles, Senate Special Committee on Aging, U.S. Senate, Washington, D.C. 20510. That Committee is investigating these abuses, and needs information on what's happening.●

THE LESSONS OF SHABA

● Mr. McGOVERN. Mr. President, a number of weeks have passed since the public debate over the administration's assertions about the Cuban role in last May's invasion of Zaire by Katangan rebels. Perhaps we can begin a somewhat more sober evaluation of that episode to see what lessons it might hold.

In some quarters my challenge to the administration on this issue was treated as an act of disloyalty—as an indication that I might find President Castro to be more trustworthy than our President. Of course, that totally missed the point—and I found the fact that the point was so widely missed to be distressing in itself. Certainly we should be able to recall, such a short time after Vietnam, that conjecture can easily be transformed into hard intelligence as it is filtered up through the bureaucracy. Whether deliberately or unwittingly, it is quite possible for a President to report "facts" that are not true.

The Gulf of Tonkin incident was, of course, a prominent example. In that case we granted what was taken to be sweeping authority for war in response to an incident which may never have happened. Anyone who questioned President Johnson at the time probably would have been tarred as an apologist for the Vietnamese Communists. I had hoped that we had become more mature since—that we had come to recognize not only a congressional right but a compulsory congressional obligation to question the President closely on such matters.

In any event, that was my purpose in the case of the Shaba invasion. The President was claiming a significantly heightened Cuban role in Africa—one that might have been cited to justify a more direct American role. Until this case, the only reports on Cuban activities in Africa involved cases where they either were present by government invitation or, in the case of Angola, had

gone to the aid of the MPLA after another outside power—South Africa in that case—had already intervened to support other parties in the civil war. But now the President was insisting that Cuba had actually supported an invasion of Zaire by Katangan rebels based in Angola, thereby adding an entirely new and bolder dimension to Cuba's Africa role. I do not contend that Cuba is incapable of such activity, or even that Mr. Castro is always reliable. But since it could have resulted in calls for a more aggressive American response—perhaps military action—I thought it was important that the President have a thoroughly documented case for his allegations about what the Cubans were doing.

Although the matter is no longer in the news, it has yet to be finally resolved. The Senate Intelligence Committee is following up on its own inquiry. It is noteworthy that the senior intelligence official of the Department of Defense, Adm. Daniel Murphy, has stated that the episode is an example of the "limitations of intelligence in making a political point," and that the administration still does not have "what the press would term hard, conclusive, publicly available proof of Cuban involvement."

We should also keep in mind that the evidentiary question is important at two levels. Certainly it is pertinent to examine all evidence that has since been mustered on what the Cubans might have done. And it should be weighed in light of other complicating factors. For example, it is undisputed that the Cubans and Katangans were, indeed, fighting on the same side in Angola in 1975, in support of the MPLA. Perhaps some of the evidence actually dates from that joint enterprise. To what extent are we relying on documentation amassed by President Mobotu, a far from disinterested party who had not been trustworthy on the same question in the past? What does it signify that in the weeks since the May invasion the Angolan Government which Cuba supports has moved to disarm Katangans and to establish normal relations with Zaire? That conduct seems to contradict the notion that Angola and Cuba support Katangan aspirations.

But as we examine these questions, it is also crucial to sort out the evidence according to the time it became available to the President. Specifically, setting aside subsequent gleanings, how well documented was President Carter's charge on May 25 that Cuba had trained and equipped the Katangans for the invasion of Zaire? Whether or not he was later proved right—and that is still an open question—was the President well advised to speak so confidently then, or would it have been more prudent to wait for better and more complete information?

I have a suspicion that dating from this controversy, President Carter is operating on a more rigorous standard of proof on matters of this kind. If so, the skepticism some of us expressed at the time, and the subsequent inquiries by the Senate Foreign Relations and Intelligence Committees and the House International Affairs Committee, will have served the major part of their purpose. The other part will be to reinforce again our determination in the Congress to assert a continuing, direct responsibility on crucial foreign policy issues, especially those that could involve us in war.

Mr. President, earlier in my statement I quoted Adm. Daniel J. Murphy's evaluation of this issue. His statement was excerpted in an excellent summation of the entire controversy which appeared July 11th in the New York Times under the byline of Richard Burt. That account—entitled "Lessons of Shaba: Carter Risked Serious Credibility Gap"—deserves the attention of every Member of the Congress, and I therefore ask that it be printed in the RECORD.

The article follows:

LESSON OF SHABA: CARTER RISKED SERIOUS "CREDIBILITY GAP"

(By Richard Burt)

WASHINGTON, July 10.—On May 25, when President Carter accused Cuba of having backed the attack by Kantangans on Zaire's southern province of Shaba, some intelligence officials doubted that the Administration had conclusive evidence to support the allegation.

Most of the officials, interviewed in recent weeks, agreed that subsequent information on the attack, which began May 11, tended to substantiate Mr. Carter's statement. But at least one high official continued to question the assertion, and others acknowledged that the initial intelligence on the nature and extent of Cuban involvement was inconclusive when the Government made the matter public.

Accordingly, while intelligence specialists are now satisfied that Mr. Carter was correct in asserting that Cuba was deeply involved in training and supplying the invaders, several say in private that the White House narrowly missed coming out of the affair with a serious credibility gap.

LIMITATIONS IN POLITICAL ARENA

The Defense Department's senior intelligence official, Adm. Daniel J. Murphy, hinted at this when he said in a speech that the incursion was "an example of the limitations of intelligence in making a political point." In little-noticed remarks to the National Military Intelligence Association, Admiral Murphy also said that the Administration still lacked "what the press would term hard, conclusive, publicly available evidence or proof of Cuban involvement."

Several experts see in the whole affair a series of troubling questions concerning the Administration's use, and possible abuse, of intelligence in conducting foreign policy. The questions include these:

Did the Director of Central Intelligence, Adm. Stansfield Turner, in an attempt to respond to the White House's policy needs, exercise proper caution in assessing early reports of Cuban involvement?

Were Mr. Carter's advisers, intent on drawing the line against Soviet and Cuban advances in the region, too eager to make political capital out of the Central Intelligence Agency's findings?

Why did the White House choose to engage in an open dispute with President Fidel Castro over the issue of Cuban involvement when it was unwilling or unable to make evidence public to support its case?

These questions have set off intense debate in intelligence circles, and Congressional aides report that Senator Birch Bayh, chairman of the Senate Intelligence Committee, has ordered an investigation of the Administration's performance in the affair.

WHITE HOUSE-C.I.A. STRAINS

At the same time the episode is said to have created deep strains between the White House and the C.I.A., with intelligence officials arguing that Presidential aides, in an effort to back up Mr. Carter's contentions, put pressure on the agency to divulge classified information that could have jeopardized sensitive sources. White House officials, for their part, complain that at the outset the agency exaggerated the Cuban role and was unable to provide the President with hard proof with which to back up his statement.

Intelligence information has often played a vital role in efforts by American administrators to build support for controversial foreign policy decisions. In 1962, for example, President John F. Kennedy used photographic evidence to justify his naval blockade of Cuba. Two years later President Lyndon B. Johnson, in an effort to gain Congressional support for escalating the war in Vietnam, said that an intercepted radio message proved that North Vietnamese gunboats had attacked two American warships in the Gulf of Tonkin.

RISK IN STRONG ALLEGATIONS

With regard to Shaba, the officials pointed to two factors that, they said, made it risky for the Administration to make strong allegations concerning Cuban involvement. The first is that Zaire and Angola, where the incursion originated, are classified as intelligence-deprived areas, meaning that before and during the incursion intelligence specialists never had a clear picture of what was going on. The officials said that in May few American reconnaissance satellites and listening devices were focused on the region and that intelligence reports were based almost exclusively on data gathered from African diplomats, agents from other nations and prisoners taken by French and Belgian paratroopers who moved into Shaba in response to the attack.

"What we had," an analyst recalled, "was just a steady accumulation of evidence, some of it contradictory, that built up through the first week of June. What we lacked was any single piece of intelligence to convince the skeptics."

The second factor posing problems for the Administration was the confusing and fast-shifting situation in southeastern Zaire, the scene of almost two decades of constant insurgency. The Katangans, exiled to Angola after the civil war in the former Belgian Congo in the early 1960's, were equipped and trained by Cuban advisers in late 1975 to take a part in the postindependence conflict in Angola that led to the formation of Agostinho Neto's Marxist Government. Although Dr. Neto's victory increased the difficulty of Western intelligence collection in Angola, American analysts believed they had evidence that Cuba continued to provide training and support for the Katangans and helped them carry out their first invasion of Shaba, in March 1977.

Despite this the Central Intelligence Agency is said to have been cautious in interagency discussions in specifying the extent of Cuban responsibility for the 1977 attack, and the White House did not make it an issue in relations with Havana.

SHABA NOT MENTIONED IN CRITICISM

When some 5,000 Katangans swept into Shaba early in May and quickly seized the mining center of Kolwezi, it appeared at first that the Administration had again decided to play down the possible Cuban role despite continuing reports that Cuban advisers had maintained their close links with the invading force. On May 14 Mr. Carter sharply criticized Cuba for obstructing the "peaceful settlement of disputes," but he did not refer to the Shaba attack.

On May 16, officials said, the State Department sent a message to President Castro asking support in ending the fighting and facilitating a Katangan withdrawal. At the same time the department spokesman, Hodding Carter 3d, told reporters that information concerning Cuban involvement was sketchy.

The following day Mr. Castro called in the chief American diplomat in Havana, Lyle F. Lane, and denied any role in the invasion, saying that he knew of plans for the attack a month or so in advance and tried unsuccessfully to stop it.

As the Administration moved to airlift French and Belgian forces into Zaire to repel the invaders, however, the issue of Cuban involvement suddenly loomed larger. According to officials, a decisive moment came during a meeting at the White House on May 19, when an interagency working group organizing the American airlift under the chairmanship of the deputy national security adviser, David L. Aaron, was told by C.I.A. officials that Cuba had played a vital role in facilitating the incursion.

C.I.A. CONFIDENCE A SURPRISE

"We all thought that Cuba was somehow involved in the affair," a participant related, "but some people seemed surprised that the C.I.A. seemed so sure of its information."

Immediately after the meeting Mr. Aaron upon discussing the issue with other White House officials, including the Presidential press secretary, Jody Powell, is said to have instructed the State Department to inform reporters of the C.I.A. finding. At the State Department's noon press briefing that day, Tom Reston, a spokesman, announced that "it is now our understanding that the insurgents in Shaba Province have been trained recently by Cubans." Later in the day Secretary of State Cyrus R. Vance, in a background briefing, said that he was not aware of Cuban involvement but that his press aide may have seen more recent information.

The State Department statement led to immediate denials by Cuban officials and expressions of skepticism by Senator George McGovern, Democrat of South Dakota. Administration spokesmen continued to contend that Cuba had played a direct role in supporting the attack, and on May 23 Mr. Reston told reporters that new information confirmed the Administration's case.

On May 24 Mr. Aaron, Mr. Powell, Hamilton Jordan, Mr. Carter's assistant, and the Deputy Secretary of State, Warren M. Christopher, drafted a statement on the Cuban role for Mr. Carter. At a news conference in Chicago the next day he reiterated the charge that Cuba had trained and equipped the Katangans and asserted that it had done nothing to restrain the attack

THE CASE COULD GO EITHER WAY

In retrospect, intelligence specialists acknowledge that they were troubled by those statements. One official with close access to information available to the White House at the time said: "After looking at it, I realized it was possible to make the case either way. The guy who was briefing the President had a big load on his shoulders." An official in another agency charged with evaluating the information commented, "The President was probably right, but the evidence just wasn't there to back him up."

Asked why the Administration went out on a limb late in May, some officials said it reflected the inevitable White House tendency to shape intelligence to fit policy. "The Cuban thing came along just at the right time," one explained. Referring to Mr. Carter's national security adviser, he went on, "The President was in trouble in the polls for not standing up to Moscow and Havana while Brzezinski and others were getting increasingly upset by events in Africa."

Others also argued that top intelligence aides, particularly Admiral Turner, were perhaps too eager to provide political ammunition for the White House. Admiral Turner is known in the Government as ambitious and keenly interested in policy matters. Earlier in May he had evidently cooperated with White House officials in pursuing the possibility of resuming American aid to covert anti-Marxist groups in Angola.

Still other officials suggested, however, that Admiral Turner, lacking great experience in intelligence questions, might not have recognized what one specialist called "the grayness of these types of cases." ●

S. 2388—SELF-IMPROVEMENT INCENTIVE LEGISLATION

● Mr. MATHIAS. Mr. President, America has always been the land of opportunity, and we have an underlying faith in the rewards of hard work. Given equal opportunity, men and women with initiative can rise through the ranks to head a union, run a company or lead the country. All it takes is skill and determination.

Throughout my career, I have supported measures that would both assure equality of opportunity and encourage people to improve themselves. By acquiring new skills, people improve the quality of their own and their children's lives and make the country a better place in the process.

For these reasons, Mr. President, I am pleased to join Senator PACKWOOD and Senator JAVITS as cosponsor of S. 2388, a bill that would exclude from the worker's taxable income the money their companies spend to educate and train them for new, more highly skilled jobs.

Currently, the value of the educational assistance workers receive from their companies for activities related to their present jobs is tax-free. This bill will help workers keep pace with the increasingly sophisticated technology of the American economy. As a concomitant to monetary incentives Congress is considering this year to spur investment and capital formation, I think we should also encourage the formation of a large pool of skilled workers. This is the other side of the coin that we must be aware of in our efforts to stimulate the economy.

With the passage of this bill, we will remove an anomaly from the law and will help less skilled workers move up the ladder of self-improvement.

The new opportunities presented by this bill greatly outweighs the slight revenue losses that we expect. In fact, the bill is a wonderful investment in productivity and worker job satisfaction. I urge all my colleagues to support it.●

BRAZIL'S USE OF ALCOHOL FUELS

● Mr. BAYH. Mr. President, as my colleagues know, I am a firm believer in the potential of alcohol fuels. I am confident that a relatively small investment now can have enormous payoffs—leading to increased energy savings, a reduction of our oil imports, and an improvement in the balance of trade.

Ours is not the only country desiring to reduce the amount of imported oil it consumes. Brazil, which has few oil reserves, has made a commitment to seek out new sources of energy which can be produced within her borders—including alcohol from sugar and manioc root. The Brazilian Government is investing millions of dollars in the use of alcohol as a motor fuel—both in blends and in pure form. It is estimated that Brazil's oil imports could be halved if gasoline were replaced with alcohol—which can be produced from domestic, renewable resources.

The United States, like Brazil, has a variety of domestic resources which can produce alcohol for use as a fuel. And, like Brazil, we also have a need to find alternative fuels which will improve our energy efficiency and reduce our imports. It is my fervent hope that we can learn something from the Brazilian Government's efforts in this area. There are some people, Mr. President, who claim that alcohol fuels cannot work. I dispute that claim. Alcohol fuels work in Brazil, and they will work in the United States, if given the chance. I intend to continue to work to see that they get that chance.

Mr. President, I ask that an article from the Wall Street Journal of July 12, 1978, on the Brazilians' use of alcohol fuels, be printed in the RECORD.

The article follows:

[From the Wall Street Journal, July 12, 1978]

BRAZIL SPENDS MILLIONS TO PUT ALCOHOL IN CARS TO SAVE ON OIL IMPORTS

(By Everett G. Martin)

SAO PAULO, BRAZIL.—There are 500 Volkswagen Beetles being driven by telephone repairmen around this city that are spreading the Brazilian government's energy message: Driving and alcohol can be mixed.

The alcohol, of course, isn't in the repairmen but in the tanks of their cars. It is 190-proof grain alcohol distilled from sugar cane. And the performance of the experimental cars is so encouraging that the government is plunging ahead with a multibillion-dollar program that it hopes will turn all the cars in the country into alcoholics by the end of the century.

Not only sugar cane but also a staple root crop called manioc (better known in the U.S. in a granular form called tapioca), as well as some more exotic plants, is being considered as raw material for the alcohol program. The distilleries that will be needed to turn these plants into alcohol could number as many as 320, which would involve an investment of as much as $1.6 billion by the early 1980s.

But Brazil apparently isn't disturbed by the size of this investment, any more than it is by the billions it is spending or planning to spend on developing hydroelectric power or a huge nuclear program. The reason is that Brazil is oil poor: Its reserves would be sufficient to supply the country for just two years at the present rate of consumption of 950,000 barrels a day.

A CRIPPLING PAYMENT

Brazil's oil-import bill now is running at over $4 billion a year, or 34.6 percent of the country's export income, an amount that is crippling the nation's growth rate. Thus, the prospect of being able to replace gasoline with a renewable fuel, alcohol, is spurring the Brazillians into some pioneering technology. "We'll be turning solar energy into liquid energy," one research scientist says.

The U.S., which is growing ever more dependent on imported oil (34 percent of U.S. export income now goes to pay for the oil bill), is closely watching Brazil's alcohol program. A number of Midwestern states are busily promoting the use of gasohol, a 10 percent mixture of alcohol with gasoline. The alcohol would be distilled from grain grown on idle farm land. A few gasoline stations in the Midwest will be pumping gasohol this summer. (See story on page 39.)

Here in Brazil, the oil bill has increased 11-fold in five years and has sharply deflated

the country's economic growth. Before the first oil-price increase by the Organization of Petroleum Exporting Countries, Brazil's economy was averaging an annual growth rate of 11 percent, and the country was able to use its foreign exchange to import machinery and technology. But last year's growth rate was barely more than the population increase of 3.8 percent a year. With half the population of 115 million under the age of 20, Brazil can't afford many more years like that before the job shortages bring social unrest.

There seems little hope of cutting down on oil imports through increased domestic production. In 1970, domestic output met 35 percent of Brazil's oil needs, but declining fields and rising needs reduced that figure to 18 percent last year. Petrobras, the national oil company, plans to drill 507 wells in the next five years at a cost of $1.3 billion. And the Brazilians have swallowed their national pride and have awarded offshore-exploration contracts to foreign oil companies. British Petroleum already has started drilling.

NUCLEAR CONTROVERSY

The oil is needed not only for gasoline but also for running electricity-generating plants. That is why the Brazilians have embarked on their controversial nuclear program, which involves buying eight large reactors from West Germany by 1990 and training thousands of technicians. Much to Washington's dismay, the Germans also will supply a reprocessing plant to extract plutonium—the stuff of weaponry—from the spent nuclear fuel, thus saving Brazil on its nuclear-fuel bill.

Hydroelectric power, which now provides 21 percent of the country's energy needs, will continue to play an important role. By 1985, installed capacity in the southeast region near the industrial centers will have reached 35,000 megawatts. There is considerable potential in the Amazon Basin, but this vast region is far from major cities.

If these ambitious plans are met, the nation's oil imports will be sharply reduced. But the imports could be halved just by replacing gasoline with alcohol. The Brazilians believe that if they can produce enough alcohol to meet expected gasoline consumption of 7.9 million gallons in the mid–1980's, nearly a million new jobs could be created on farms—to grow the sugar cane or manioc—and in the distilleries. They also say that they can produce all of the needed machinery themselves.

Ironically, it is the high cost of imported oil that has made the alcohol program possible. In order to discourage consumption, the Brazilian government has imposed taxes that bring the cost of a gallon of gasoline to $1.64. This high cost makes alcohol a competitive fuel, even though it costs twice as much to produce as Middle East oil. Researchers believe that alcohol could be retailed for about $1.30 a gallon.

Actually, some Brazilians are old hands at using alcohol distilled from sugar cane in their cars. In some parts of the country it has been mixed with gasoline since the 1930s, and it was widely used during World War II. Over the years the amount of sugar cane diverted to alcohol production has fluctuated with the international price of sugar. At present, about 208 million gallons of alcohol a year are being produced.

The alcohol that is produced from the sugar cane is technically known as ethanol. The sugar ferments, and this mixture then travels through three heating towers to remove excess water and to reduce it to 95% alcohol.

Manioc is another promising source of ethanol, although the distilling technology is still being developed. One problem is that the plant is as much as 40 percent starch and thus can't be fermented without the introduction of an enzyme to turn the starch into sugar.

Sugar cane has an advantage over manioc in that the stalks can be used as a fuel, called bagasse, to supply the heat in the distilleries; manioc would require an outside heat source. On the other hand, sugar cane is a seasonal crop that needs careful cultivation and the use of fertilizers; manioc is a hardy plant that will grow in the poorest ground. Indeed, scientists say it would be an ideal crop for the 250 million acres of dry, nutrient-poor land in an area of central Brazil known as the Cerrados.

There had been fears until fairly recently that manioc would require so much energy to turn it into ethanol that it would consume more energy in the distilling process than would be provided by the ethanol. But Prof. Jose Goldemberg, head of the Institute of Physics at the University of Sao Paulo, now believes that the energy return will be 1.4 times the energy input. Ethanol from sugar cane yields 2.5 times the energy input, he says.

The first manioc distillery will begin operating this year, and Prof. Goldemberg is hoping that it will indicate the possibility of cost reductions. "We really haven't started serious research on improving distilling methods. I'm certain that new developments will bring costs down," he says.

The building of 170 sugar-cane distilleries has been approved by the government. Each distillery will cost an average of $1.5 million. Private investors will put up the distilleries with 80 percent government loans at a 17 percent annual interest rate (that compares with the present Brazilian inflation rate of 40 percent). The government also will provide 100 percent financing at 7 percent interest to develop new sugar-cane farms.

Then there's the problem of getting the ethanol from the distillery and into the car. Recent experiments have shown that the average automobile engine can run on a mixture of up to 20 percent ethanol and 80 percent gasoline without any modification. Cars in Sao Paulo are running on a 15 percent ethanol mixture and in Rio de Janeiro on a 10 percent mixture. The only noticeable difference, according to cabdrivers, is that spark plugs have to be cleaned more often.

Says Antonio Licio, a technical adviser to the minister of agriculture: "We originally intended to produce enough alcohol to provide a 20 percent mixture for all cars. But now mixing is only the first stage. We are going to go all the way."

The man who will be largely responsible for this is Urbano Stumpf, a scientist at the Aerospace Research Center at San Jose dos Campos, an hour's drive from Sao Paulo. It was Mr. Stumpf who in 1975 first persuaded the president of Brazil, Ernesto Geisel, to drive a car that had been modified to burn pure alcohol. President Geisel, who once headed Petrobras, was immediately impressed and committed the government to the support of the alcohol program.

Mr. Stumpf says that it costs about $350 to convert the Volkswagen Beetle engine to burn pure alcohol. His research complex also is working on the conversion of other engines sent in by manufacturers that will ultimately want to produce ethanol-burning engines.

First, Mr. Stumpf says, the compression ratio has to be increased, then the ignition timing has to be changed, and the blend of air and fuel in the carburetor has to be made richer. The alcohol has to be preheated before it enters the combustion chamber because it vaporizes at a higher temperature than gasoline. Mr. Stumpf does this by enclosing the intake manifold in a metal jacket through which he feeds hot water or hot air from the engine cooling system.

Alcohol-burning engines are like diesel engines in that they are harder to start in cold weather. So Mr. Stumpf has borrowed from the diesel and has installed a small electric heater that vaporizes alcohol within seconds after the ignition has been switched on.

Mr. Stumpf is enthusiastic when laymen visit his project. To indicate the lower levels of pollutants emitted by his modified alcohol engine, he asks each visitor to breathe deeply from the exhaust pipe. "Smells sweet, doesn't it?" he asks. "We could drive this car in California without any (pollution-control) changes."

Certainly, the alcohol engine has a lot of pep: It can go from a standing start in fourth gear without any knocking and can accelerate up steep hills without so much as a cough. That's because the ethanol has an octane rating of about 120, compared with 73 for regular gasoline in Brazil and with about 90 for regular unleaded in the U.S.

Mr. Stumpf also is looking at the possibility of using alcohol for diesel engines. This is particularly vital for Brazil because nearly three-fourths of the country's goods are hauled by truck. But although alcohol has already proved successful when mixed with 50% diesel oil, Mr. Stumpf believes that peanut oil might make a better fuel.

Other scientists in Brazil are looking at even more exotic replacements for petroleum. One is the babasu palm that grows wild in the Amazon Basin and that produces a nut yielding vegetable oil, animal feed and alcohol. Another potential source is the marmeleiro, a plant that grows wild in northeast Brazil.●

WHITE HOUSE OFFICE AND EXECUTIVE PERSONNEL

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 11003.

The PRESIDING OFFICER (Mr. MELCHER) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 11003) to clarify the authority for employment of personnel in the White House Office and the Executive Residence at the White House, to clarify the authority for employment of personnel by the President to meet unanticipated needs, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. ROBERT C. BYRD. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. RIBICOFF, Mr. CHILES, Mr. SASSER, Mr. PERCY, and Mr. STEVENS conferees on the part of the Senate.

BILL HELD AT DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that H.R. 12772 be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROOSEVELT'S FOUR FREEDOMS REMIND US OF THE NEED TO RATIFY THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, often in the history of the Congress the President of the United States has addressed the Members. One of the most inspiring and most memorable speeches ever delivered to the Congress was on January 6, 1941, when Franklin Roosevelt delivered his state of the Union address. In the midst of the Second World War, Mr. Roosevelt spoke of the future and the preconditions for peace and security. It was to the Congress that Roosevelt first spoke of his famous "four freedoms." I quote:

> In the future, which we seek to make secure, we look forward to a world founded upon four essential human freedoms. The first is freedom of speech and expression—everywhere in the world. The second is freedom of every person to worship God in his own way—everywhere in the world. The third is freedom from want . . . everywhere in the world. The fourth is freedom from fear . . . anywhere in the world.

Has Roosevelt's future arrived? Has the United States worked to secure the four freedoms "everywhere in the world?"

What about freedom of speech? Can any citizen of the world speak openly without reprisal? The recent trial of Anatoly Scharansky sadly reveals that criticism is not tolerated by many of the world's governments.

And freedom of religion? Are the world's people free to worship God as they choose? The anti-Catholic campaigns in North Vietnam and Cambodia are poignant reminders that this important freedom is often thwarted.

The third of Mr. Roosevelt's freedoms was freedom from want. Does every person enjoy adequate food, housing, and shelter? Again we must answer no. Droughts in Africa have caused massive starvation in recent years. Even in our own country, we find children who are malnourished and desperately impoverished.

And what of the fourth freedom? Freedom from fear. Sadly, even this most fundamental of freedoms is not yet guaranteed. Far too many of the world's citizens fear for their lives. In Uganda, Cambodia, South Africa, and Nicaragua, we have seen the unconscionable murder of thousands of people simply because of their race, ethnicity, national origin, or religious beliefs. Are not their friends, neighbors, and compatriots afraid of a like fate?

Mr. President, Roosevelt's speech was a call to action. The United States must actively work to secure the four freedoms. They underlie our human rights policy, and they must be reflected in our actions.

This Senate can help to establish one of Mr. Roosevelt's freedoms—freedom from fear. Mr. President, I am speaking of the Genocide Convention. By defining and punishing the crime of genocide under international law, the treaty would let the world know that the heinous crime of genocide would no longer be tolerated. Everywhere in the world people would feel more safe and more secure.

Mr. President, the ratification of the Genocide Convention is a small but important step toward creating the world that Roosevelt envisioned, a world in which the four freedoms are secure.

TRANSCRIPT OF APPEARANCE BY SENATOR ROBERT C. BYRD ON "MEET THE PRESS"

Mr. ROBERT C. BYRD. Mr. President, on Sunday, August 13, 1978, I appeared on "Meet the Press."

The moderator was Mr. Bill Monroe and the panelists included Mr. Albert Hunt of the Wall Street Journal, Mr. Carl T. Rowan of the Chicago Sun-Times, and Mr. Robert Abernethy of NBC News.

Mr. President, I ask unanimous consent that the transcript of "Meet the Press" be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

MEET THE PRESS

Mr. MONROE. Our guest today on MEET THE PRESS is Senator Robert Byrd of West Virginia, Democratic leader of the Senate. Senator Byrd has been a member of the Senate for twenty years and Majority Leader since January of last year.

Senator Byrd, you have said that there is still a chance for passage of the bill to deregulate gas prices but some of the Senators who are members of the conference committee can't even agree on language to bring to the Senate floor and if the bill gets to the floor it may be filibustered. Would you not be willing to say that the odds at this time are against passage of that bill?

Senator BYRD. I don't think I would want to get into the making of odds. I think the important thing to remember is that this is an issue that has been around for thirty years. The Congress has spent the last 14 months in dealing with this complex, controversial, and perplexing issue and I believe that the Conferees are still meeting. As long as they are meeting there is still hope. It deals with a problem that will not go away, and I just think it would be ridiculous for the Senate and the House to have spent 14 months in the last two years in a futile effort to deal with a problem that will not go away, one that is of vital importance to the people of this country, vital importance to the economy, vital importance to the security of the nation, and one which is watched with great interest by world leaders who will feel if we are unable to deal with this problem that we are willing to stay with the status quo on energy.

Mr. MONROE. Senator, another important part, some people call it the most important part, of President Carter's energy program is the proposed equalization tax on crude oil. Most people in Washington are saying that that is dead. Is it not time now for you to concede that that is dead?

Senator BYRD. The conference has been meeting from time to time and talking. From the beginning, it was expected that that bill would be last and that settlement on the issue would not come until after the natural gas compromise was reached. There are other aspects to that bill which are important in dealing with the energy problem. For example, there are tax credits. So that particular issue, COET, is not the only part of the bill. There are other parts that could be beneficial in dealing with the energy problem.

I think the important thing is that we especially get the nautral gas compromise and then we will get the other two measures that have already been agreed upon, and, hopefully, at least part of the fifth bill to which you have alluded.

Mr. MONROE. Have you not just said in effect right now, Senator, that the crude oil equalization tax is dead?

Senator BYRD. I have not. I have said that action on that bill is being delayed until action can be completed on the natural gas bill.

Mr. MONROE. What are the prospects for the tuition tax credit which the Senate will be considering next week?

Senator BYRD. The vote will be very close. As of now I think it would be too close for me to call.

Mr. MONROE. What about its being a budget-busting factor, Senator, revving up inflation and the deficit?

Senator BYRD. Either proposal will have an impact on the budget—either the tuition tax credit or the grants approach, which the Administration supports. Either will have an impact on the budget.

Mr. HUNT. Senator, as you know, the House last week passed a $16.3 billion tax cut which the Carter Administration charges is tilted too much to upper income taxpayers and investors, but the Chairman of the Senate Finance Committee, Senator Russell Long, has indicated that he wants to liberalize capital gains taxes even further. Where do you stand in that dispute and specifically could you give us some idea as to the size and shape of the tax cut bill likely to emerge from the Senate?

Senator BYRD. I think that the bill that finally emerges will involve a moderate tax cut somewhere in the ballpark of that which was included in the first concurrent budget resolution; to-wit, 15–16 billion dollars, perhaps up to 18, possibly even 20, which the Finance Chairman is talking about.

I think there will be a capital gains reduction. I would hope that the Senate would orient the thrust of the cut a little more to the lower income stratum, but there is no question but that the middle income stratum is going to have a tax cut, so I should think that whatever emerges will be largely in the direction of the middle income group and in the ballpark of 15 to 20 billion dollars.

Mr. HUNT. On capital gains specifically, would you like the Senate to go even further than the House did in cutting capital gains taxes, or do you go along with the Carter Administration, and do you want to cut back on that liberalization?

Senator BYRD. I think somewhere in the 35 percent range is all right. I would particularly favor the one-time, one hundred thousand dollar exclusion, but I think that it is vitally important that the middle-class, which pays the bills of government, is given some relief. I think that the action by the House is a recognition of the fact that there is going to have to be some relief given to the middle-income people.

Mr. HUNT. Senator, one of the common refrains, both on Capitol Hill and in the White House, is that a number of congressmen don't take the President very seriously. Some of your colleagues, they say Mr. Carter is weak and indecisive. Having railed against this tax bill for months, do you think he could then sign it without losing further credibility?

Senator BYRD. Well, I don't think he has said he would not sign a bill with a capital gains cut. I haven't understood him to say that.

Mr. HUNT. But he opposed the type of bill the House passed this week.

Senator BYRD. Well, the bill has not passed yet. It hasn't even been reported to the Senate floor by the Senate Finance Committee, and it will be changed in the Senate and, as I say, I hope it will be oriented more to the lower income groups, but I also want to see it oriented toward the middle-income tax groups.

Mr. ROWAN. Senator, one of the things the President objects to strenuously is fiddling around with the minimum tax, which has

been the only tax to get some money out of a great many millionnaires and multimillionaires.

Are you in favor of reducing or wiping out the minimum tax?

Senator BYRD. No.

Mr. ROWAN. Do you think you can get out of the Congress a bill that does not reduce the minimum tax?

Senator BYRD. I think so.

Mr. ROWAN. Do you think that you will get out of the Senate a bill that Mr. Carter can accept, or when you get through will it be more obnoxious to him than what they are doing in the House?

Senator BYRD. Well, I don't know how obnoxious the bill is to Mr. Carter that has passed the House, but, as I say, it has only gone half way. It still has the other half of the ballpark to cover, and I have no doubt that the Senate will leave its imprint on the bill. I would hope, as I have said, that we direct it more to the lower income, but I think we have just got to take into consideration the fact that the middle-income groups are entitled to some consideration in the tax cuts and I would hope that whatever finally emerges is in the direction of that middle-class group, because if we don't give the middle-class group some cuts pretty soon, they are going to be poor too.

Mr. ROWAN. Now, a great many middle-class people are interested in where you stand on this tuition tax credit. Will you support or oppose the proposal to give tax credits to people for parochial and private schools and at the elementary and secondary level?

Senator BYRD. I have supported tuition tax credits for college—at the college level. I personally believe that we ought to get some experience in dealing with that before we proceed to deal with elementary and secondary tax credits. This is not to say I am against them. I have an open mind, but at least we ought to see what the experience is, in my judgment, in connection with college tuition tax credit, which I have supported in the past.

Mr. ABERNETHY. Senator, an NBC Associated Press poll this past week showed that although most people trust the President personally, only 26 percent think he is doing a good or excellent job. This is down from more than 60 percent in March of last year.

Two questions on that: What job rating would you give the President and why do you think the President's overall poll jo rating is so low?

Senator BYRD. I am not too concerned with polls. If it were the night before the election in 1980, I would be concerned, but polls shift and change, and I don't think that the polls reflect the record that the President, in cooperation with Congress, is making, and I think that once the President has an opponent—I have no doubt that the President will run again; I hope he will run again—and if he does, once he gets an opponent, then we will see what the opponent stands for; we can compare that with what the President's record is, and the President has come down hard on some very complex issues that have been around a long time. I think he must be given credit for that. Once we begin to compare records and positions between two actual candidates, then we will be able to perhaps put a little more confidence in what the polls say.

As for my own personal feeling about his job rating, I think it is good. I don't think that the polls focus on the record. In my judgment, the record is good. He has sent to the Congress a good many initiatives. Some of them have been sent too soon, perhaps not well thought out, but, nevertheless, he is to be given credit for trying. And he has been successful, with the support of the Congress, in getting an economic stimulus package through, which has improved the economic growth, and lowered the unemployment rate. We have gotten through a comprehensive farm program that has benefited the farmer. His international initiatives have been very good, and on all these the Congress has supported him, and when all of this record is laid out—and in a campaign the record is going to be viewed—the record is going to be brought out—it is not brought out in the polls—when the record is viewed, I think that the polls will be different.

Mr. ABERNETHY. Do I gather from what you just said that you think that poll rating is unfair, that the President deserves now a better judgment than he has been getting?

Senator BYRD. I am not saying the poll ratings are unfair. I think they are distortions. I don't think they take into account the record on which the President's accomplishments will be based, and on which the judgments of him as a candidate in 1980 will be based.

Mr. ABERNETHY. This past week, at the White House, you told the President and others you hoped there would not develop between the White House and Congress what you termed "us versus them ridiculocity," each side criticizing the other.

How serious do you feel the danger of that kind of split was and still is?

Senator BYRD. I don't think the danger is great at this point, but I think it is well for us to avoid getting into that kind of "them against us" mentality. I don't think the President can again run against Congress, and I think that the people expect a Democratic President and a Democratic Congress to work together to deal with the problems that confront the nation. If the people feel that a Democratic President and a Democratic Congress can't work together, then they are going to seek an alternative. I don't think this is the time for finger-pointing, and I don't think that such criticism of the Congress is justified. It just won't wash. Look at the record that the Congress has given to the President. It took guts for Senators to stand up and vote for the Panama Canal treaty. It took guts for the Senators to stand up and vote for the Middle East arms sales package. It took guts for the Senators to stand up and vote for the lifting of the embargo on arms to Turkey. So the Senate, and the House have given the President some very important victories—not only in the international field but also on domestic issues. And this, I think, is what we should be talking about: working together, cooperating. Of course, there will be a little criticism now and then. I expect the President to offer some criticism from time to time, the Vice President, and we may return it. But over all, such criticism is not justified.

Mr. MONROE. Senator Byrd, George Meany, of the AFL-CIO, has said several times that he will not restrain wages in order to help out on inflation. Considerable friction has developed between him and President Carter. Do you feel that Mr. Meany has been unnecessarily uncooperative about inflation?

Senator BYRD. Well, I think Mr. Meany has indicated, also, that he would appoint a committee to work with Secretary Marshall in dealing with various issues, including that of inflation, but I think if we are going to get a handle on inflation, I think that labor and industry, management, and government, are going to have to form a consensus and do what we can to restrain ourselves in connection with wage increases, price increases, and governmental spending.

Mr. MONROE. Do you feel Mr. Meany has been adequately cooperative?

Senator BYRD. I think he has.

Mr. MONROE. Let me ask you one other question about inflation, from a Senate point of view. You have called inflation the number one problem. Recently, the Senate passed a $10 billion public works bill, which, according to one estimate, would require the hiring of 2,300 more Federal employees. Many people, including President Carter—he characterized it yesterday—consider this bill a pork barrel bill. Isn't that an example of the Senate revying up inflation on spending that helps politics?

Senator BYRD. Let's look at it this way. That public works projects bill has in it a lot of projects that are calculated to prevent floods in various parts of the country. We have had more than our share of flooding in southern West Virginia. On the other hand, the bill has in it projects that will provide for irrigation in areas that are afflicted with drouth. And so what is called pork barrel to one person may be another person's livelihood, or even another person's life. I think it is wrong to look at that bill and say that the Congress is being irresponsible in dealing with inflation.

Don't forget that the Congress, in passing its first concurrent budget resolution, came up with a deficit figure that was $10 billion below the deficit figure supplied by the administration in its budget. Also, the Congress, in that resolution, came up with a figure of $600 million less than the figure that the administration contemplated in outlays for the next fiscal year. And, finally, when the Congress comes in with its second and final concurrent budget resolution on the budget, there is every indication that it is going to even bring that budget figure down to possibly $8 billion below the $50.9 billion that was in the first concurrent budget resolution. This all indicates that the Congress is exercising fiscal restraint. That is the mood of the country, and I think that Congress has, quite some time ago, caught that mood.

Mr. MONROE. Does the Senate need 16-foot-high ceilings in its new multimillion-dollar office building?

Senator BYRD. No, absolutely not, and when the Congress makes a mistake, everybody knows about it, as they should. And that was a mistake, but the Senate has moved to correct that mistake by instituting a ceiling, I think, of something like $130 million on the building. There were figures being tossed around, estimates of $200 million, and so on. No, that building should not have those frills. They should not have been in it in the beginning. The mistake should not have been made in the first place, but there is no question, as there is no question about its being a mistake to have such frills, there is no question but that the Senate has moved to rectify that, and there is no question but that the Senate needs additional space.

Mr. HUNT. Senator, returning to the matter of White House congressional relations, both you and House Speaker O'Neill have frequently talked about the good personal relationship you have with President Carter, but the Speaker has also been quite critical recently of some of the top Carter aides, specifically Hamilton Jordan, Jody Powell and Gerald Rafstoon, suggesting they are politically insensitive. This is, I think, your sixth administration in Washington. How do you rate the White House staff and the people around the President?

Senator BYRD. I have no contacts with a good many of the people around the President. I can only answer your question with reference to the people that I have contact with. I have contacts with the President; I have contacts with the Vice President; I have contacts with Frank Moore, with Dan Tate who represents the President, with Bill Smith, who represents the Vice President, and these contacts have been good; the relationships have been good. The other people, I have no contacts with.

Mr. HUNT. Don't you find it rather odd that you don't have contacts with someone like Mr. Jordan, who is often called the chief aide to the President?

Senator BYRD. No.

Mr. HUNT. In previous administrations you didn't have contact with top officials in those administrations either?

Senator BYRD. As a usual thing, I may have had, I can't remember.

Mr. HUNT. Let me just switch back to energy for a second. If you don't get a natural gas agreement in the next couple of weeks, would you anticipate Congress coming back after the election to try to settle this issue?

Senator BYRD. I think that the energy problem is the top problem confronting this country. It underlies our economic problems; it underlies the strength of the dollar; it underlies our national security; it underlies our inflation problem.

We said at the beginning that it was our number one priority. I hope, and I continue to be confident, that we will get a conference report. As long as those conferees are meeting, there is hope, and I think that reason and patience are needed here and if, as you say, we don't get one before the recess, I still think we ought to get one after the recess. If we don't get one after the recess, if we get up to the November election, if there is any reasonable hope at that time for final success on that bill, we ought to come back after the election.

Mr. MONROE. We have a bit less than three minutes.

Mr. ROWAN. Out in the country people are asking a very simple question: Is President Carter capable of handling the job?

Now, you have seen a few Presidents around here. Is he capable of doing this job?

Senator BYRD. Yes, he is.

Again, I don't think that the attention is being focused on the record. I think that the President has provided initiatives which the Congress has supported and I think the record will show this.

Unemployment is down. Housing starts are up. Real income is up. The number of people who are employed is the highest ever—94.5 million people. We have passed a minimum wage bill. We shored up the Social Security System, which was about to collapse. We passed a major farm bill, and look at the international initiatives: NATO has been strengthened, the Turkish embargo has been lifted; there has been a new momentum in our movement toward normalization with the People's Republic of China. The Panama Canal Treaty has been passed, which improves our relations in South America. The President is going for the summit on the Middle East at Camp David. There is much to his credit that is overlooked, and I think that when one focuses on the record, he will say "Yes, he is competent. He has made mistakes, but he is getting good support from the Congress."

This is good for the American people.

Mr. MONROE. We have a bit less than one minute.

Mr. ABERNETHY. Senator, there are proposals in the works for a constitutional amendment that would require the government in any year to spend no more than it takes in except in times of national emergency. Would you favor that, or oppose it?

Senator BYRD. I would oppose it because I think it is absolutely impossible, infeasible, and unworkable. Who can foresee when there will be a war or a depression? If such an amendment is ever adopted in the Federal Government, we will be put into a straitjacket, and many areas will suffer, such as the area of national defense.

Mr. ABERNETHY. Do you feel pressure building up for such an amendment?

Senator BYRD. There is pressure building up; there is no question about that, but I think we have to be realistic and remember that the Federal Government cannot operate as state governments do, many of which are required to balance their budgets.

Mr. ABERNETHY. Do you expect the bill to extend the deadline for the ERA to pass, Senator?

Senator BYRD. Well, I don't know whether it will pass. I hope we will be able to give it a shot in the Senate.

Mr. MONROE. Thank you, Senator, for being with us today on Meet the Press.

(Next week: Senator Howard Baker (R. Tenn.)

THE CRUCIAL MIDDLE EAST

Mr. HATCH. Mr. President, I have watched with growing concern the advancements by the Soviet Union in the oil-rich states of the world. At the present time the nations in the Middle East provide a tremendous amount of the world's oil. It is for this reason that the Soviets have concentrated such an effort to strengthen their influence in this crucial region.

Who among us had any in-depth knowledge of the conflict that was brewing between Somalia and Ethiopia? Who could foresee this crisis, prior to the outbreak of hostilities? To the overwhelming majority of the American public, and to the Members of Congress alike, the Horn of Africa was just another place on the "Dark" Continent. Today this area is still one of the focal points in the struggle for geopolitical position. Its location makes it strategically vital to the control of oil flowing from the Middle East bound for markets in the West.

The Soviets made a tacit gamble by supporting Ethiopia, risking the loss of their naval base at Berbera. When President Siad Barre tossed them out of Somalia, the Soviets scrambled around searching for a new base. They approached the Maldives, and offered to lease one of the islands for a "fishing base." Fortunately for the West, the Government of the Maldives knew all too well what the Soviets intended to use the base for and refused this offer. While the Soviets were looking elsewhere the Government of Somalia was attempting to find some alternative source of aid in the West. The conflict with Ethiopia was not going well and they desperately needed aid to assist them in the war. The United States refused, and likewise the rest of our allies turned a deaf ear to the pleas from Somalia. Without some measure of support, it now appears that Somalia will be forced to return to Soviet hegemony.

With control of both Ethiopia and Somalia, the Soviets will effectively have gained control of the Eastern access to the Mediterranean. In one move they will have bottled up the flow of oil, and at the same time controlled a strategically important chokepoint.

Mr. President, at the present time there appears to be an even stronger effort on the part of the Soviet Union to increase this widening influence in the Middle East, witness the situation in Iraq. At the same time they have watched with interest the activity in the northwestern corner of Africa. In Morocco there is a limited civil war going on for control of the Spanish Sahara. Those fighting against the government label their rebellion as one of "liberation." This is the terminology that attracts the Soviet Union. It is an area and situation that behooves the nations of the West to keep a watchful eye upon.

It should be clear to all that if the Soviets should intervene, directly or indirectly, and bring this area under their sphere of influence, they would have succeeded in gaining control of both the Eastern and Western access to the Mediterranean Sea. The strategic and economic results of this are self-evident.

In the August 14 edition of the Christian Science Monitor, Mr. Constantine Menges writes about the rising Soviet influence in the oil-producing areas of the world and the possible impact this may have upon the alliances between the United States and nations dependent upon oil from the Middle East. Mr. Menges points out some of the subtle methods that could be used to bring about a dissolution of NATO and other U.S. alliances. The points that are made should be well taken by the Members of this body and others who are involved in the policymaking process.

When all of this information is taken into account along with the recently approved sale of the oil-drilling equipment and technology, certain questions are raised about the future ability of the Soviets to control the vast majority of the world's oil resources, through their own domestic production, or foreign influence.

Mr. President, I ask unanimous consent that the article by Mr. Menges be printed in the RECORD for the benefit of my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STOPPING A SOVIET OIL TAKEOVER

(By Constantine Menges)

The tide of history is moving against the survival of the democratic nations. Few Americans seem aware that several converging trends will pose a serious threat to their freedom in the early 1980s. Prudent action can still be taken.

Soviet military power has been growing for the last decade and has surpassed America's in both strategic and conventional forces. To accomplish Soviet objectives without risking open war, this military dominance will be used to intimidate the democracies. It may prevent us from acting effectively against communist support of violent insurrections aimed at gaining control of the Near Eastern oil countries by the early 1980s.

Once pro-Soviet governments were in control of the oil supplies, Europe and Japan could be pressured into a neutral accommodation with Moscow. That would leave the United States virtually alone by the late 1980s. These catastrophic events are possible but not inevitable. Prevention, however, requires that we give careful thought to how they might occur.

Communist success in Angola, Mozambique, and especially Ethiopia marks the beginning of this new stage of Soviet expansionism. As for Rhodesia, the democracies, especially the United States, have shown they lack the will and wisdom to provide effective support for the peaceful transition to majority rule.

It is highly probable that by sometime in 1979 the black-white moderate coalition will be defeated. That in turn could end any chance that the moderates in South Africa could unite to bring about majority rule with peace. As a result, Soviet guns and extremism among blacks and whites could lead to a bloody and brutal civil war in South Africa from 1979 to 1982. This would distract, divide, and demoralize the democratic nations where majority opinion will support neither white racism nor communist-organized black guerrillas.

During the next few years, Soviet-backed liberation movements could expand their net-

work and power in Saudi Arabia, Iran, and the other oil-rich mini-states of the Persian Gulf. Already Saudi Arabia is nearly encircled by countries that provide bases for this indirect warfare—Ethiopia, Marxist South Yemen, Iraq, and Oman where East Germans and Cubans are helping an active communist guerrilla force.

Iran is now surrounded on three sides by Russia and two pro-Soviet countries. Several large Islamic ethnic groups on both sides of these borders provide the ideal social environment for expanding the already important communist network in Iran. In the next few years terrorism and demonstrations could be used to isolate the Shah and wear down the present government. Lenin called this the phase of "prerevolutionary violence" when conservative religious groups, students, middle-class technocrats and others are stimulated into protest and therefore feel the lash of government repression. In 1981, Russia could start a full-scale guerrilla war. By 1983 this could result in victory for a communist movement that would proclaim itself "nationalist and neutral."

The new pro-Soviet oil governments would continue to sell oil to Europe and Japan—but with a catch. Prices would be cut for nations which get out of alliances with the U.S. And, there could be ruinous price increases for countries which stay with the United States. Economic forecasts show that this will be a period of world-wide oil shortages in any case, and American allies will be desperate for the Near East supplies.

The communist parties in France, Italy, Spain, Portugal, and perhaps Greece and Turkey will increase their domestic power because of their ability to negotiate "good deals" with the new pro-Soviet oil governments. After that there are any number of subtle and cunning diplomatic strategies that the Soviet Union could use to coax West Germany and Japan into a disarmed neutrality that would appear economically attractive in the short run.

This would finish NATO. The United States would be nearly alone, perhaps hoping that a tacit alliance with communist China would ward off more devastating setbacks. But, that is similar to the way the democracies hoped for an alliance with Stalin as Nazi power grew. We should recall that after decades of fierce combat, Stalin and Hitler signed a friendship treaty in 1939. The democratic countries should not repeat the same mistake. We should use the divisions and rivalries among the communist states but not depend on these disputes for our security.

All of this could happen by the mid-1980s without one Soviet soldier or tank officially crossing an international border. To forestall such an ominous scenario, the democratic countries must:

Face up to the unpleasant facts of contemporary history. This means accepting the continuing need to contain communist power and compete with communist ideology.

Cooperate to strengthen each other economically and politically. They must also help friendly governments and moderate reform groups resist the extremists of the right and left.

Remain true to their fundamental values in the face of increasing Soviet success. This means safeguarding civil liberties and the rule of law. It should be kept in mind that the current foreign policy mistakes are being made by well-intentioned individuals who are still too caught up in the traumas of recent American politics to focus wisely on the future.

Maintain strategic and conventional military power equivalent to that of the Soviet Union. A sensible SALT agreement with effective verification can help accomplish this. But Moscow should not be permitted to repeat Hitler's tactic of using years of arms controls promises and negotiations to continue moving ahead of the West in ultimate military power.

Recognize and affirm the strengths deriving from the accomplishments of the democracies. They contribute most of the economic, scientific, and cultural dynamism of this planet. Despite problems still to be overcome, the democracies combine more personal liberty, better living conditions, and greater genuine equality of opportunity than any other approach to government.

CRITICAL DAYS FOR LABOR

Mr. HATCH. Mr. President, during many of the days on this floor when we debated the labor reform bill, I tried to make the point that organized labor is indeed in trouble in this country, not because of any shortcomings of the National Labor Relations Act, which I believe has served labor and management well for the past 43 years, but because the Washingtonian labor leaders have lost touch with their membership in so many ways.

In the fact of these difficulties, big labor appears to be continuing to play by the old rules of "threats of class warfare" because they failed to get their way, as was evident by their reaction to the Senate's action on the labor reform bill, instead of by reason, conciliation, and example. That tired old strategy will not work in this modern age and if pursued, may well further alienate the public toward organized labor as a necessary and influential institution in our society.

One of the best analyses I have seen as to labor's adversities appeared in a Chicago Tribune editorial of June 23, 1978, entitled, "Critical days for labor * * *". I ask unanimous consent that it be printed in the RECORD in its entirely for the information of all who are concerned about improving the status of labor's position on our national scene.

There being no objection, the editorial is ordered to be printed in the RECORD, as follows:

CRITICAL DAYS FOR LABOR . . .

American labor is facing a critical period in its history, but many of its leaders don't seem to realize it. They act as if they were still living in the palmy days when labor could virtually do no wrong: when it was a growing movement with public sympathy, when Congress was full of friends, and when it was fashionable to refer to businessmen as "economic royalists" or worse.

Yet today the unions are fighting a decline in membership, largely because of mechanization in the unionized factories and a shift of jobs to less unionized service industries and to government. Scandals in some unions have tarnished the image of labor as a whole. Polls show labor at or near the bottom of the list when it comes to public confidence, even below used car salesmen.

In their effort to reverse the decline in membership and to move into new areas, notably public service, the aging moguls of labor are generally doing their cause more harm than good. They assume that they still have the same clout as ever. They demand that Congress reform the labor laws so as to make it easier for them to organize workers in industries where they may not be welcome, and to restore to them the power over federal employees denied by the Hatch Act. They resist Civil Service reform. And when they fail, they blame everybody but themselves.

Douglas Fraser of the United Auto Workers, makes a big show of quitting President Carter's Labor-Management Group and denouncing a "one-sided class war" against labor. In the old days, this might have sent shivers down the spine of the bureaucracy and brought panicky officials rusing to make amends. Today it goes almost unnoticed.

About the only bureaucrat to show any panic is the secretary of labor, Ray Marshall, who shudders at the blunt criticisms of labor being uttered by Robert Strauss, the orchestrator of President Carter's war on inflation, and Barry Bosworth, director of the Council on Wage and Price Stability. Mr. Marshall says this kind of talk will anger labor leaders and make them difficult to deal with. Nonsense. What George Meany of the AFL–CIO and his colleagues need is a little more of the bluntness that they are so accustomed to showering on others.

Unions are seeking to organize public service workers by the same rough and tumble methods they used in private industry including the strike. Never mind that in most states strikes of public employes—or at least policemen and firemen—are illegal. Never mind that there are no "economic royalists" to squeeze blood out of. The blood is squeezed out of the taxpayers, who happen also to be the voters, and it is they who suffer when public workers go on strike, or contract the "blue flu," or indulge in "job actions."

No wonder the image of labor is suffering. No wonder voters flocked to support Proposition 13 in California and are clamoring for similar action elsewhere. They are sick of being pushed around and sick of unreasonable demands, whether it is the police sergeant in Mineola, N.Y., who has just won a salary of $25,000, or the postal workers who threatened (successfully, alas) to tie up the U.S. mail in order to retain the rare right never to be laid off.

The message that must be got through, to the union leaders is that times have changed and that successes must be won through reason and example, not through clout and compulsion. And if the message doesn't get through, labor will be inviting a measure of antagonism that will end up hurting both the labor movement and the country.

In the past, unions have achieved a great deal for the workers and for the country. There is still much that they can do. There are still working conditions that need to be improved or at least monitored. There is still the need for a means of communication through which the average worker can be heard in the corporate offices and in Congress.

But too many labor leaders act as if their only function is to sign up more members and bring in more dues to pay the often generous salaries they have given themselves. They must be awakened, in broader needs, including the need to relax the rigidities and the restraints that have helped prevent American industry from competing abroad, driven costs up and held productivity down, increased the trade deficit and decreased the value of the dollar, and that can ultimately jeopardize the free economy which all of us, including the unions, want to preserve.

COMMITTEE MEETINGS DURING SESSION OF THE SENATE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet during the session of the Senate tomorrow, August 17, to consider S. 2971, the Lobbying Disclosure Act, and H.R. 3229, the postal reform bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS TO 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR SCHMITT AND SENATOR JAVITS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes tomorrow morning Senator SCHMITT be recognized for 15 minutes and Senator JAVITS be recognized for 15 minutes.

The PESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF D.C. REPRESENTATION RESOLUTION TOMORROW

Mr. ROBERT C. BYRD. I ask unanimous consent that after the two orders for recognition of Senators on tomorrow, the Senate resume its consideration of the D.C. representation amendment.

Mr. STEVENS. Reserving the right to object, has the majority leader waived the leader's time tomorrow?

Mr. ROBERT C. BYRD. No, I did not waive it.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow.

The motion was agreed to; and at 6:45 p.m., the Senate recessed until tomorrow, Thursday, August 17, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 16, 1978:

INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the Representative and Alternative Representatives of the United States of America to the Twenty-second Session of the General Conference of the International Atomic Energy Agency:

Representative: Dale D. Myers, of Virginia.

Alternative Representatives:

Gerard C. Smith of the District of Columbia.

Roger Kirk, of the District of Columbia.

HOUSE OF REPRESENTATIVES—*Wednesday, August 16, 1978*

The House met at 10 a.m.

The Reverend Angelo Gavalas, pastor, Three Hierarchs Greek Orthodox Church, Brooklyn, N.Y., offered the following prayer:

Almighty Father, may we share in this prayer; for friends have all things in common.

We pray to be made beautiful in our souls. May we consider the wise man rich and the self-restrained man wealthy.

In grace, then, we invoke Your holy spirit upon our distinguished leaders that they may be reminded of the principles that make our country great—that their resolutions may assure all our people and the people of the world a nobler and better life.

We pray for the President of our country; for all civil authorities throughout the land; and for the faithful citizens who dwell in it.

An in one voice, we praise Your majestic name, our one God and Creator of all men, Father, Son, and Holy Spirit. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles.

On August 11, 1978:

H.R. 12138. An act to name a certain Federal building in Laguna Niguel, Calif., the "Chet Holifield Building."

On August 15, 1978:

H.R. 7581. An act to amend the Internal Revenue Code of 1954 with respect to the treatment of mutual or cooperative telephone company income from nonmember telephone companies, and for other purposes; and

H.R. 8336. An act to authorize the establishment of the Chattahoochee River National Recreation Area in the State or Georgia, and for other purposes.

FATHER ANGELO GAVALAS

(Ms. HOLTZMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. HOLTZMAN. Mr. Speaker, I am deeply pleased and honored that today's invocation has been given by my constituent, Father Angelo Gavalas.

Father Angelo, who for the past 17 years has served as the pastor at Three Hierarchs Church in Brooklyn, has devoted his life to the Greek Orthodox religion and the Greek-American community. In addition to his long and distinguished service at Three Hierarchs and 8 years as pastor at the Holy Trinity Church in Portland, Oreg., Father Angelo is national chairman of the Youth Commission of the Greek Archdiocese of North and South America and has served in that capacity for the last 10 years.

I know and share personally the great respect and affection in which Father Angelo is held by Brooklyn's spirited and dynamic Greek community and by all his neighbors as well.

Dedication is a tradition in Father Angelo's family. His father has been a priest for 56 years, and at age 82 still serves as a missionary among the Greek people in Texas.

Father Angelo was born in Nashua, N.H., and attended Holy Cross Theological School in Brookline, Mass., Colgate Divinity School in Rochester, N.Y., and St. Vladimir's Russian Orthodox Theological School in Yonkers. He is married and the father of three children.

Today is another cause for rejoicing. It is Father Angelo's birthday. We wish him many happy returns of the day.

I am proud to welcome to Washington my friend and constituent, Father Angelo Gavalas.

ADJOURNMENT FROM THURSDAY, AUGUST 17, 1978, TO WEDNESDAY, SEPTEMBER 6, 1978

Mr. WRIGHT. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 696) and ask for its immediate consideration; and pending that, Mr. Speaker, I ask unanimous consent that I may proceed for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Speaker, the purpose of this concurrent resolution is to permit adjournment for our August district work period. It is the adjournment recess of the House effective tomorrow. We shall adjourn to meet at noon on September 6, 1978.

The SPEAKER. The Clerk will report the concurrent resolution.

The Clerk read the concurrent resolution as follows:

H. CON. RES. 696

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Thursday, August 17, 1978, it stands adjourned until 12 o'clock meridian on Wednesday, September 6, 1978.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 13468, DISTRICT OF COLUMBIA APPROPRIATION BILL, 1979

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 13468) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

MAKING IN ORDER TOMORROW CONSIDERATION OF CONFERENCE REPORT ON H.R. 13468, DISTRICT OF COLUMBIA APPROPRIATION BILL, 1979

Mr. NATCHER. Mr. Speaker, I further ask unanimous consent that it may be in order tomorrow to consider the conference report on the bill (H.R. 13468) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

HOME-CARE POLICY FOR THE ELDERLY

(Mr. RYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYAN. Mr. Speaker, I want to commend Congressman CLAUDE PEPPER and the Select Committee on Aging for their recent hearings on the elderly. I am especially interested in the committee's concern for a detailed comprehensive effort to implement a home-care policy for the elderly.

We need to raise the level of awareness of the general population in respect to the state of the elderly in our country today. We as a nation are greatly concerned about "human rights" in other countries. How about the human rights of the elderly in our country? At least one-third of our elderly Americans are considered "very, very, poor." A large percentage of these people are in nursing homes. Perhaps even worse is the fact that half of the elderly in nursing homes receive treatment that is characterized as "substandard."

Many of our older Americans would be far better served in their own homes by people who care for them and love them. Unfortunately, 90 percent of our available public financing for long-term care is for institutionalized nursing care. Public support of long-term-care services in the home is minimal and fragmented among several programs. Studies and reports have shown that home care as an alternative to institutionalization would be more efficient and humane, and less costly.

The Select Committee on Aging is working hard to bring these facts to our attention. I applaud their efforts and take this time to urge my colleagues to think seriously about supporting home-care legislation for the elderly.

PROVIDING FOR ORDERLY SHIPMENT OF OFFICIAL RECORDS AND PAPERS OF MEMBERS

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 1297) to provide for the orderly shipment of official records and papers of Members of the House of Representatives, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1297

Resolved, That (a) effective upon the date of adoption of this resolution, notwithstanding any provision of law and until otherwise provided by law, the contingent fund of the House shall be available to pay the reasonable expenses of sending or transporting the official records and papers of any Member of the House of Representatives from the District of Columbia to any location designated by such Member in the district represented by the Member.

The Clerk of the House of Representatives is authorized and directed to provide for the most economical means of sending or transporting such documents to insure the orderly and timely delivery to the specified location. The Committee on House Administration shall have the authority to issue rules and regulations to carry out the provisions of this resolution.

SEC. 2. As used in this resolution—

(1) the term "Member" means a Representative, a Resident Commissioner in the House, and a Delegate to the House; and

(2) the term "official records and papers" means books, records, papers, and official files which could be sent as franked mail.

Mr. THOMPSON (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with, and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from New Jersey (Mr. THOMPSON).

Mr. THOMPSON. Mr. Speaker, House Resolution 1297 authorizes the Clerk of the House to provide the most economical means of sending or transporting the official records of a Member of the House of Representatives to the district he or she represents. This resolution further provides that the contingent fund of the House shall be available to pay the reasonable expenses incurred for such transportation.

There are many economical means of transporting such material other than through the mail. Current law however allows each Member of the Congress to send his or her official records to the district only by franked mail. This situation would be remedied by the adoption of House Resolution 1297.

For example, one current Member of Congress informed the committee that the cost of sending his official records to his district under the frank would be $820; a trucking company would charge $470; and a shipping company would charge $330. If the House utilized the most economical means of transporting the records, it would save the Government $490.

House Resolution 1297 will also make it easier for Members to ship their records, because it will enable them to use shipping services which do not impose strict limitations on the size and weight of parcels, as does the Postal Service in conjunction with the use of the frank.

The committee considered and rejected the use of the Members' official expenses allowances to pay the cost of transporting official records for two reasons. First, Members might continue to use the frank—for which there is a separate appropriation in the legislative branch appropriations bill—rather than reduce their official expense allowance. And second, retiring Members, who have the most substantial need to transport official records, do not have access to their official expense allowances once the Congress is over, even though the frank is available for such use for three months after the Member leaves office

The committee feels that the savings and benefits that will accrue to the House clearly warrant the adoption of House Resolution 1297.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CALL OF THE HOUSE

Mr. CHARLES H. WILSON of California. Mr. Speaker, I move a call of the House.

The SPEAKER. Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 706]

Ambro	Frey	Preyer
Archer	Fuqua	Quie
Armstrong	Garcia	Risenhoover
Breaux	Gibbons	Roe
Brown, Calif.	Hagedorn	Santini
Burke, Calif.	Harrington	Sarasin
Butler	Harsha	Sawyer
Cavanaugh	Heckler	Scheuer
Chappell	Huckaby	Seiberling
Chisholm	Ireland	Shipley
Cochran	Jenrette	Sisk
Conyers	Kasten	Spellman
Dellums	LaFalce	Staggers
Dent	Le Fante	Stokes
Devine	Lloyd, Tenn.	Teague
Dickinson	McDonald	Thone
Dingell	McKinney	Tucker
Drinan	Madigan	Udall
Edgar	Meeds	Van Deerlin
Edwards, Calif.	Metcalfe	Wilson, Tex.
Edwards, Okla.	Milford	Winn
Evans, Colo.	Miller, Calif.	Young, Alaska
Flowers	Moss	Young, Tex.
Ford, Mich.	O'Brien	
Fraser	Pepper	

The SPEAKER pro tempore (Mr. RICHMOND). On this rollcall 359 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

MAKING IN ORDER ON TODAY OR ANY DAY THEREAFTER CONSIDERATION OF CONFERENCE REPORT ON H.R. 12927, MILITARY CONSTRUCTION APPROPRIATION ACT, 1979

Mr. McKAY. Mr. Speaker, I ask unanimous consent that it be in order today or any day thereafter to consider the conference report on bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

REQUEST FOR CONSIDERATION OF S. 2543, PROVIDING BETTER PROCEDURES TO PREVENT MAILING OF FRAUDULENT SOLICITATIONS

Mr. CHARLES H. WILSON of California. Mr. Speaker, I call up the Senate bill (S. 2543) to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails, and ask unanimous consent for its immediate consideration in the House.

The SPEAKER pro tempore. The Chair will inform the gentleman from California (Mr. CHARLES H. WILSON) that a message from the Senate on the Senate bill has not yet been received, so the gentleman's request will have to be deferred until we receive a message from the Senate.

SECOND AND THIRD ANNUAL REPORTS OF THE U.S. NUCLEAR REGULATORY COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Interior and Insular Affairs and the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

Pursuant to the provisions of Section 307(c) of the Energy Reorganization Act of 1974, I transmit herewith the second and third Annual Reports of the United States Nuclear Regulatory Commission. Both reports cover events prior to my Administration.

JIMMY CARTER.

THE WHITE HOUSE, *August 16, 1978.*

SECOND CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1979

Mr. GIAIMO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 683), with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

The CHAIRMAN. When the Committee of the Whole House rose on Tuesday, August 15, 1978, the concurrent resolution had been considered as having been read and open to amendment at any point, and pending was an amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, the amendment which I offered changes the second budget resolution, as reported, to conform with floor action completed by the House since August 8, which was the day that we filed the budget resolution.

The largest change is in revenue. The amendment calls for $450 billion receipts in revenues, which is $3.2 billion higher than in the reported resolution.

The tax reduction approved by the House last week is estimated to lose less revenues than we anticipated in the budget resolution. It is estimated to lose $3.2 billion less than the revenue which we had assumed in the resolution. One of the reasons that could be argued was because the House did not provide a social security rollback. There could be other reasons. The fact remains that the tax bill which we passed in the House last week, as proposed by the Committee on Ways and Means, provided for a smaller tax cut than we had anticipated in the budget resolution and, therefore, we will have $3.2 billion in additional revenue which will be entered into the budget resolution, and that is what the amendment I am offering does. The effect of it would be to cut back our deficit from somewhere in the vicinity of $43 billion to somewhere in the vicinity of $40 billion. In addition, the major defense appropriation passed by the House provides $5 million less in outlays and $89 million less in budget authority than was committed in the budget resolution as reported. Accordingly, this amendment would reduce function 050 in those amounts. Most recently, the House completed action on the foreign aid assistance appropriation. Floor action reduced outlays by $19 million and budget authority by $175 million below the amounts carried in the resolution. This amendment then reduces function 150 by these amounts. The aggregates reduced by this amendment are as follows:

New budget authority would be $561,242,000,000; outlays would be $490,463,000,000; revenues would be $450,000,000,000 instead of $446,800,000,000 as originally anticipated in the resolution. The deficit would be $40,463,000,000.

This is a conforming amendment designed to bring our resolution up to date with our House action as done recently.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding.

Mr. Chairman, on page 25 of the committee report it is indicated that there is $1.6 billion in the resolution to cover such items as tuition tax credits. I take it that the gentleman's amendment would in no way affect that.

Mr. GIAIMO. Mr. Chairman, I want to set the gentleman's mind at ease. Tuition tax credit is covered in the resolution.

Mr. COUGHLIN. The amendment does not affect that at all?

Mr. GIAIMO. No.

Mr. COUGHLIN. I thank the gentleman.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

Mr. Chairman, let me ask the gentleman this question: What the gentleman is proposing to do here by this "conforming" amendment is to add $3.2 billion to revenues by reducing the tax cut we promised to the American people.

Let me ask the gentleman whether or not we could not accomplish the same deficit-reduction by reducing the Government spending by an equal amount of $3.2 billion, and let the people have the tax cut that was promised to them.

Mr. GIAIMO. Well, that is rather a convoluted, complex question the gentleman has asked me. Let me say that what we are doing here is to conform the revenue estimate in our budget with what the House voted last Thursday. The result of that will be that we pick up $3.2 billion in additional revenues. That is what we are suggesting, and that is what we are doing here. We do not affect the outlay side except in Defense and International Affairs functions, where there were some slight changes as a result of

the appropriations actions on two of those bills, defense and foreign aid.

Mr. LATTA. Well, I assume from what the gentleman has said, then, that we are in agreement as to what is being done and how the gentleman is attempting to do it. That is, that he is adding $3.2 billion in revenues because he proposes a reduction in the size of the tax cut. A lower deficit could be accomplished, however, by cutting back on Government spending.

Mr. GIAIMO. What could be accomplished?

Mr. LATTA. The reduction of $3.2 billion from the deficit.

Mr. GIAIMO. I think what the gentleman means is that we could reduce the deficit an equal amount by reducing expenditures.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

(By unanimous consent Mr. GIAIMO was allowed to proceed for 1 additional minute.)

Mr. LATTA. We could accomplish the same objective that the gentleman is attempting to accomplish here by reducing spending by an equal amount.

Mr. GIAIMO. If we reduce spending, this revenue figure would still be at the original figure we had. What we are doing here is revising the estimate of revenues for next year, based upon the action of the Ways and Means Committee and the House.

Mr. LATTA. All right. Had the Ways and Means Committee, though, given the American people this additional tax cut of $3.2 billion, we could have accomplished the same thing the gentleman is going to accomplish by his amendment, by reducing spending by this figure of $3.2 billion.

Mr. GIAIMO. I think the House and the Ways and Means Committee worked their wills on what the proper level of revenues should be last week. I think they took into consideration the need for a revenue reduction, and they made a substantial revenue reduction in the amount of $16.3 billion. I believe they took into consideration what the effect of a tax cut would be on inflation, what the effect would be on stimulus to the economy. I think they took all of these things into consideration, and I commend the House and the Ways and Means Committee for coming in with what I thought was a tax cut at the proper level.

AMENDMENT OFFERED BY MRS. HOLT TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mrs. HOLT. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mrs. HOLT to the amendment in the nature of a substitute offered by Mr. GIAIMO: Strike all after the words "Budget Act of 1974," and insert the following:

That for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $445,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $28,300,000,000;

(2) the appropriate level of total new budget authority is $539,000,000,000;

(3) the appropriate level of total budget outlays is $480,000,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $35,000,000,000; and

(5) the appropriate level of the public debt is $833,300,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $35,300,000,000.

SEC. 2. Pursuant to Section 310 of the Congressional Budget and Impoundment Control Act of 1974, the House Committee on Ways and Means and the Senate Committee on Finance shall promptly submit to the Committees on the Budget of their respective Houses reconciliation legislation to decrease Federal revenues by approximately $1.8 billion to a level consistent with the provisions of Section 1(1) of this resolution; and the Appropriations Committees of the House and the Senate shall promptly submit to the Committees on the Budget of their respective Houses reconciliation legislation to decrease budget authority by approximately $22.5 billion to a level consistent with Section 1(2) of this resolution; and the Committees on the Budget of both Houses shall report to its House a reconciliation bill or reconciliation resolution, or both, carrying out all such recommendations without substantive revision.

Mrs. HOLT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

Mrs. HOLT. Mr. Chairman, my amendment to the substitute is a package that includes a real tax cut and a real reduction in the gross rate of spending. It does not cut; it slows down the growth rate of government, and it is a real reduction in the growth rate of the budget authority. It also produces a lower deficit.

The second concurrent resolution on the 1979 budget as reported by a small majority of the committee is a hoax. Its proponents say it allows for tax reduction when, in fact, it promises tax increases. My amendment reduces taxes more than the expected increases.

They say they have reduced spending when, in fact, they have merely reestimated outlays without making any policy changes. The policy of the committee is the same as it has been—more and bigger programs. I invite my colleagues to examine the new budget authority provided by the committee's recommendation.

The budget authority is what we should be looking at. It is $561 billion, which is a leap of $57 billion, or 11.3 percent, from the new budget authority provided for the current year. The estimate of outlays produces a growth rate of almost 10 percent. That is the growth rate. However, it is budget authority—actual spending authority—that drives the growth of government. The huge increase in budget authority recommended by the committee is a springboard for rapid budget growth in the years ahead. That is where we should be looking.

The committee has recommended a phony tax reduction. It is not going to offset the large increase in social security taxes and the inflation taxes imposed on workers pushed into higher income tax brackets. The net effect of the committee's recommendation is a tax increase.

In committee, I offered this amendment as a substitute budget which would allow a substantial tax reduction of $28 billion for a full year and reduce the growth rate of Federal spending to approximately 7 percent in fiscal year 1979. This amendment lost by a margin of only one vote, which encourages me to bring it before the House today. The comments of my colleagues during debate on tax reform last week indicated that the reason we could not vote for a real tax cut that the people want, which everybody who came before our committee said we needed, was that we did not have a reduction in growth of Government.

The new budget authority provided by my substitute would be $539 billion, which is $35.2 billion, or 7 percent, higher than the budget authority for the current year. There are no cuts in any program—I emphasize that. I want to emphasize it again. There are no cuts in any program—only reduced growth rate.

Is there a Member of this House who will say that we cannot live with a $35 billion increase in budget authority in 1 year? If there is, I challenge him or her to step forward and explain why this sum would not be enough, or explain it to his or her constituents back home. I will bet there are not 50 Members in this House who could say that their constituents want more Government.

The budget authority provided by my substitute would be sufficient to continue existing Federal programs adjusted for inflation. The budget authority recommended by the committee is $22.4 billion more, which demonstrates the dimensions of the new and expanded programs sought by the committee. All of us, regardless of party affiliation, are hearing one powerful message from the people of this country: The burden of Government has become too great. The double plague of high inflation and heavy taxation is eroding earnings and savings, destroying the aspirations of the people and crippling the ability of people to make productive job-creating investments.

In Columbia, Mo., tne day before yesterday, the President was reported to have called for the Congress to curb inflation. Chairman MILLER asked us to do it when he came before our committee. We are hearing it from all sides—from the experts—that we not just reestimate how fast we can spend money, which is what has been done in the outlays in the committee budget, but slow down the growth.

I hope these "Hold The Line" buttons we see here today do not mean that we are not to reduce the growth rate of government. I do not want to hold the line there.

The perfecting amendment I have offered will start us moving in the right direction toward a balanced budget. I urge that it be supported.

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, the gentlewoman is telling us in her amendment to the committee amendment there are no actual cuts? There is nothing more than restraints in increases over fiscal year 1978.

The CHAIRMAN. The time of the gentlewoman from Maryland has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mrs. HOLT was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, if the gentlewoman will yield further, she is telling us there are no cuts in the 1978 level of expenditures?

That they are just less than the increases in the budget resolution; is that correct?

Mrs. HOLT. That is correct. There is more than a 7-percent increase over all we spent last year.

Mr. ROUSSELOT. A 7-percent increase?

Mrs. HOLT. Yes. So this would take care of inflation. We could do all of our current services. I believe that we have ample programs to provide for the very real needs of the people of this country.

Mr. ROUSSELOT. So the basic authorizations made by this Congress will be accommodated in the gentlewoman's amendment?

Mrs. HOLT. Absolutely.

Mr. ROUSSELOT. I compliment the gentlewoman for the thought that she has given to this matter. I too am sorry that this amendment did not pass in the Committee on the Budget. It only failed by one vote. I think the gentlewoman is to be complimented for her persistence in trying to help the 95 million American taxpayers.

Mr. RHODES. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Chairman, I too want to congratulate the gentlewoman from Maryland (Mrs. HOLT) on the presentation she has made in presenting the Holt amendment. The Holt amendment, as I am sure the gentlewoman will agree, is part of the Republican 5-year plan for a balanced budget by the end of fiscal year 1983.

Mrs. HOLT. That is correct.

Mr. RHODES. This is really the budget for the first year of that 5-year plan.

I am sure, also, that the gentlewoman will agree that the Holt amendment is just as much a part of the Republican program for fiscal sanity and responsibility as would the other parts in the Republican plan, such as the Kemp-Roth bill and the Steiger amendment.

Mrs. HOLT. That is true. We have got to make this first step. That is why I emphasize budget authority, because that is when we get into the out years.

Mr. RHODES. I agree with the gentlewoman and again congratulate her on her presentation.

Mr. LAGOMARSINO. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I would like to compliment the gentlewoman from Maryland (Mrs. HOLT) on her amendment and I think it is a very good, comprehensive statement that says it all. I do not know how anybody who has listened to this debate or looked at the facts can disagree with it.

The amendment would limit growth in Federal spending for 1979 to 7.4 percent above 1978, compared to 9.7 percent by the Budget Committee.

The amendment cuts taxes by $20 billion; $5 billion more than the committee.

It reduces the deficit to $35 billion, $8.7 billion below the Budget Committee.

A very important provision requires the House to set a total limit to Federal spending before deciding how much to spend for each individual program.

I would hope the amendment will be passed by a large majority.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman and members of the committee, I rise in opposition to the amendment offered by the gentlewoman from Maryland (Mrs. HOLT). I would like to make my opposition in terms of three perspectives.

At least one would be the mechanical perspective. One would be the substantive perspective, and the third would be the political perspective.

First, in terms of the mechanical perspective, I don't know what the gentlewoman plans for the rest of the year, and I do not know what the Republican side plans for the rest of the year, but I do know that if this amendment is agreed to, it will mean we will be in session until at least I would assume, mid-December.

What the gentlewoman requires in her amendment is reconciliation between her proposal and what has already been authorized and acted on by the Committee on Appropriations. In actuality, it goes further back than that. If we follow through on her amendment, we have to go back beyond the Committee on Appropriations, in some instances, all the way back to the authorizing committees.

So, in terms of the mechanics, if you support the amendment, let us be prepared to eat Christmas dinner here.

Mr. GIAIMO. Mr. Chairman, will the gentleman from Maryland (Mr. MITCHELL) yield?

Mr. MITCHELL of Maryland. Of course I yield to the chairman of the Committee on the Budget, the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I thank the gentleman for yielding.

I wonder if the gentleman will agree with my understanding that what the gentlewoman is proposing is instructing the Committee on Ways and Means to go and find additional tax reductions?

Mr. MITCHELL of Maryland. Precisely.

Mr. GIAIMO. And instructing the Committee on Appropriations to go and make additional reductions of $22½ billion in appropriations; is that the gentleman's understanding?

Mr. MITCHELL of Maryland. That is precisely correct.

May I just interject here to say that I do not think the Committee on Appropriations would make that kind of slash without going back to the authorizing committees. Therefore, I still insist that if this amendment passes, we will have Christmas dinner somewhere on Capitol Hill.

Mr. GIAIMO. If the gentleman will yield further, the gentleman mentioned the fact that we might well be here beyond November 7. The gentleman is making reference, I am sure, to Public Law 93-344 of the Budget Act, which says the following very clearly:

> Congress may not adjourn until action is completed. It shall not be in order in either the House or the Senate to consider any resolution providing for the adjournment sine die of either House unless action has been completed on the concurrent resolution on the budget required under subsection (a).

In other words, we would have to wait, if this amendment were to pass, until the two committees, the Committee on Ways and Means and the Committee on Appropriations, did specifically what the gentlewoman mandated; is that correct?

Mr. MITCHELL of Maryland. That is the law, and I do not think that the Holt Hit at the Hopeless should change the law. That is the law, precisely.

Mr. Chairman, we talked about the mechanical part of this situation. Let us talk about the substantive part.

We are hearing that there is no cut in any program, no change in any program. Yet, for the life of me, based upon my sixth-grade arithmetic, how do we reduce outlays by $10 billion without affecting some programs? How do we reduce budget authority by $225 billion? Those are the gentlewoman's figures.

The cuts are going to have to be made somewhere, and here is what could happen. I am not saying it would, but I am using these as illustrations of what could happen.

If we cut outlays by $10 billion, there would be no increase in the title IX ceiling. There would be cuts in CETA, in vocational help for older Americans and so forth. There could be no future relief for the States if we just cut out $10 billion in outlays, so in terms of substance, the amendment is wrong.

Let us look at the political implications of it. We have looked at the mechanics; we have looked at the substance. Let us look at the political implications.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. MITCHELL) has expired.

(By unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 3 additional minutes.)

Mr. MITCHELL of Maryland. I thank the chairman.

Mr. Chairman, one of the saddest things any legislative body can do is to propose legislation in terms of an appeal to those whom they represent, knowing full well that the legislation as proposed does not have any chance of becoming a reality. I think that is a cruel thing to do. It is great to make a promise, promise everyone everything. That is great. It is great to promise by saying, "We are going to give you a great big, fat tax cut, reduce Government spending at the same time, and no one is going to be hurt."

It is impossible to approve the Holt amendment because of problems based upon the mechanics, based upon the substance, and based upon the political considerations.

Mr. Chairman, I just do not want anybody deluding the taxpayers any more, deluding the American citizens. I am not suggesting that is the gentlewoman's intent. I am not questioning what the gentlewoman's intent is. I am simply saying that it ends up really deceiving people because it is a nonaccomplishable thing as of this date.

Mr. Chairman, I would strongly recommend that this amendment be voted down, primarily in an effort to regain credibility for this House. To propose an amendment like this cuts at the credibility of the House.

Therefore, Mr. Chairman, just before I yield to the gentlewoman from Maryland (Mrs. HOLT), I would ask that we vote down the Holt Hit at the Hopeless because it is a bad amendment.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Chairman, I really cannot believe I have heard what I have heard.

Is the gentleman saying that there is no way we are ever going to be able to stop this spiraling growth of government? Are we never going to be able to slow down the growth rate?

Mr. MITCHELL of Maryland. If the gentlewoman will let me reclaim my time, Mr. Chairman, I can answer the question.

I did not say any such thing, Mr. Chairman. The gentlewoman has apparently worked so hard on this amendment that she is hearing things which are not being said.

I did not say that we will never be able to reduce the deficit. In fact, indeed, this is what the Committee on the Budget has done. When this Committee on the Budget came into being some 4 years ago, we had a very, very high deficit of something like $66 billion. That was at a time when we had unemployment of 9 percent and unemployment of 7 percent. Despite that high unemployment, the Committee on the Budget, in a realistic, pragmatic fashion, has reduced the deficit.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I will yield in just 1 second. I know the gentlewoman is anxious, but hold on now.

We are now down to a point in this fourth budget resolution where we are talking about a deficit of about, when it is all figured out, $40 billion. That is $26 billion less than the deficit we had to cope with when we first came into being. My argument is, yes, we can reduce the deficit. We can reduce it, and that will automatically mean a reduction of Federal spending.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mrs. HOLT, and by unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 1 additional minute.)

Mr. MITCHELL of Maryland. I thank the gentlewoman. I am going to yield to her right now after I say we have reduced the deficit, and I think we can reduce Government spending, but let us do it in a rational, reasonable, pragmatic manner rather than in a kind of magical game where we play with figures and delude people.

I yield to the gentlewoman from Maryland.

Mrs. HOLT. I would like to make two points, as the gentleman has so graciously yielded to me. The Committee on the Budget is supposed to be the discipline on the rest of the House. This is the only way that we are going to do it. When the gentleman says that we cannot do this mechanically, then he is saying that the Budget Act is not properly drawn. The Budget Act provides adequately for this eventuality.

Mr. MITCHELL of Maryland. Let me retrieve my time. May I retrieve my time to respond? Again, the gentlewoman is not hearing properly. I did not say it could not be done because of the mechanics. What I suggested was, because of the mechanical difficulties, if we attempt to do it we will be around here singing Christmas carols together. We have got to go all the way back to the Appropriation Committees, all the way back to the authorizing committees, and that is the mechanical difficulty. It can be done, and I would be happy to share a Yuletide meal with the gentlewoman from Maryland.

Mr. REGULA. Mr. Chairman, will the gentleman yield for a question?

Mr. MITCHELL of Maryland. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

I am interested in his statement that he feels that we should look into the future and reduce budget costs and direct the Nation toward a balanced budget. Is that a correct interpretation of what the gentleman said.

Mr. MITCHELL of Maryland. That is correct.

Mr. REGULA. My question, then, is, Would the gentleman agree at least with a portion of that proposal that reduces budget authority from $561.5 billion to $539 billion, recognizing that that is the feature in the budget that triggers heavy outlays in future years? Does the gentleman not think this would be responsible from the standpoint of not committing ourselves to heavy expenditures in the future?

Mr. MITCHELL of Maryland. No, I could not agree to that kind of approach simply because that would include entitlement programs and other fixed obligations.

Please. please vote down the Holt amendment.

Mr. LATTA. Mr. Chairman. I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Republican amendment as presented by Mrs. HOLT of Maryland because I think what the big spenders in this Congress have been doing to our children and our grandchildren, and their children and their grandchildren is unconscionable. It is past time for this Congress to recognize this. I know that all of us have studied this budget from cover to cover, and we have picked out the pages dealing with outlays, revenues, and deficits, as I have, but just in case the Members missed pages 486 and 487, they might want to take a look at them. These pages graphically indicate what the big spenders have been doing to our children and our grandchildren while trying to take credit for every conceivable expenditure with their constituents. Yes, they have been getting reelected and reelected and reelected by telling them what they have been doing for them. I think it is high time to tell them what they have been doing to them in no uncertain terms.

Going back to 1958—and that is not very far back—we only had a national debt of $279.7 billion. We went along fairly well in compiling additional debt until we got to the 1970's. If the Members will just bear with me, here is how the national debt has grown since 1970:

Fiscal year:	National debt [In billions]
1970	$382.6
1971	409.5
1972	437.3
1973	468.4
1974	486.2
1975	544.1
1976	631.9
1977	709.1

You will note that the Budget Committee would have us go to $842 billion next year to pay for the excesses this Congress has authorized.

Every time we try to do something about it, they come down in the well and say, "You can't do this. You can't cut here and you can't cut there," and have no hesitancy in placing this added cost on the backs of our children.

Mr. Chairman, I think this practice is unconscionable. They ought to go home and beg their children's forgiveness for what they have been doing to them instead of patting themselves on the back.

Yes, I am supporting the Holt amendment. I supported and proposed an amendment in the committee which failed, naturally, because it made even greater reductions in spending. I think it is high time, if we want to dispense all these goodies all around this country and throughout the world, that we pay for them—pay for them by our earnings, not the earnings of our children and our grandchildren.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I will be happy to yield.

Mr. ROUSSELOT. In committee the gentleman and myself both supported the Holt concept and the Fisher concept. Nobody was cutting any of the functional categories in expenditures over 1978.

Mr. LATTA. The gentleman is absolutely right.

Mr. ROUSSELOT. We were merely restraining increases, so they are not cuts or slashes.

Mr. LATTA. No; they just want to keep adding on at a rate much greater than the rate of inflation.

Yes. Mr. Chairman. I rise in support of this amendment. We have before us an opportunity to make some fundamental changes in the way the Congress goes about fixing the limits in the national budget and a chance to send a loud and clear message to the people that the

spending ways of the Federal Government are about to change. We are proposing to place spending limits in the resolution before we go to the functional categories. In other words, we are going to determine the spending limitations beyond which we cannot go before we start distributing the goodies. This will make certain that we do not dispense more goodies than we are willing to pay for.

Is this not fair and proper? I think that is both fair and equitable, especially for our children.

There are two principal reasons the amendment offered on this side of the aisle by the gentlewoman from Maryland (Mrs. HOLT) deserves the support of the House. First, the budget totals, while not appearing significantly different from those proposed by the committee are, in fact, considerably different.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. LATTA) has expired.

(By unanimous consent, Mr. LATTA was allowed to proceed for 3 additional minutes.)

Mr. LATTA. Mr. Chairman, for example, outlays in the amendment before us are $10 billion below the committee mark, but still represent a growth of 7.4 percent over the current fiscal year.

As the gentleman from California (Mr. ROUSSELOT) just pointed out, no program is getting cut. What we are saying is that in these times of double digit inflation and concern over the growth of Government at all levels, Federal spending will grow no faster than the rate of inflation next year.

The committee's resolution on the other hand, allows spending to rise almost 10 percent on fiscal year 1978. The American people understand that Government spending must go up because of inflation, but in these times when the average family is losing purchasing power to inflation, they will find it hard to understand why Government outlays have to grow 30 percent faster than the Consumer Price Index. With the substitute amendment offered by the committee chairman, the real tax burden on the American worker will grow $10 billion plus next year, in spite of the tax bill we just passed. Yes. You heard correctly, a tax increase of $10 billion or more next year because of a combination of higher social security taxes and inflation, more than offsets the so-called tax cuts provided for in the resolution.

Contrast this with a $20 billion tax cut in the Republican amendment offered by the gentlewoman from Maryland (Mrs. HOLT), a $28 billion cut for the full calendar year 1979.

This substitute means that the people will receive a tax cut next year—a real one. So that is the second fundamental difference. The committee resolution allows taxes to rise by over $10 billion. The amendment on this side of the aisle will provide a net tax cut. For those of you who have heard the message from California and all the other States, this should be a very significant difference.

Finally, the Members will notice that our amendment has a deficit of $35 billion—and let me say that I do not want to support this particular part of the amendment. The deficit is far higher than it should be, in my humble judgment, but it is a vast improvement over the $61 billion deficit the President was proposing to us, and it is still $5 billion, or 14 percent, below the deficit recommended by the Committee on the Budget in its substitute amendment.

The second major reason I believe this amendment deserves your support is that it does budgeting in the right way. It sets revenue and spending policy first. That is the way every family, every business, every State, and every local government, with the possible exception of New York City, goes about it.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. LATTA) has expired.

(By unanimous consent, Mr. LATTA was allowed to proceed for 2 additional minutes.)

Mr. LATTA. Mr. Chairman, they decide how much they ought to collect in taxes the next year, and then they set a spending cap based on revenue projections. Only then do they start discussing how much they should spend on any given program. The Committee on the Budget goes about this backward. They go through the spending functions first and add up all the spending and reach the budget totals. As long as we prepare the congressional budget in this manner, we can expect little improvement over the old system which the Congressional Budget Act was intended to correct.

Let me say one other thing, Mr. Chairman. It will be very easy for those who oppose this amendment to stand up and ask: "Where are you going to cut?" That, I submit, is not the primary function of the Committee on the Budget. First, with a spending growth of over 7 percent, we are not cutting at all. Programs may not be getting every single dollar their supporters may have wanted, but it is hardly the same thing as a real cut, as some Members might state here on this floor.

Second, so long as the debate on the budget degenerates into arguments over funding for one program or another, we will never end up with budget totals which are as low as a substantial majority of this House wants.

Mr. Chairman, I would ask that the Members look at this amendment in another way. If you believe that a 7-percent increase is big enough, and that a tax cut which only offsets the higher taxes scheduled to impact on the taxpayer next year is warranted then you should vote for the amendment offered by the gentlewoman from Maryland (Mrs. HOLT). On the other hand, if you do not believe that there is at least $10 billion in waste, inefficiency, and unnecessary spending in a budget totaling $490 million, then you should vote against the amendment. It is as simple as that.

Mr. SIMON. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I would love to hear my two friends, the gentleman from Maryland, PARREN MITCHELL, and the gentlewoman from Maryland, MARJORIE HOLT, sing Christmas carols together, so it is with some reluctance that I rise in opposition to the gentlewoman's amendment.

We have to look at where we are. We are not starting the process. We are at the second budget resolution, and if we adopt this amendment, we will now go into the conference with the Senate not having any idea at all where we stand in any functional category.

Then what do we do? Where do we get this extra $10 billion in outlays?

If my memory is correct—and I would be pleased if the gentlewoman from Maryland (Mrs. HOLT) would correct me if I am wrong—the gentlewoman was not one of the 33 of us who tried to hold back on the increase for veterans. In that area we had a $1.4 billion increase. If my memory is correct, she was not one of those who tried to hold back on defense spending.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentlewoman from Maryland.

Mrs. HOLT. I thank the gentleman for yielding.

Mr. Chairman, the gentleman is absolutely correct. This is the point that I have tried to make. Each one of us has his own special interests. The Budget Committee, acting as a committee, should act on the aggregates. This is why I stressed the two steps. If we would deal with the amount of money that the American people want to hand over to the Federal Government to provide for the needs of the people, and then turn that back to the committees, and let them decide how much of this we are going to allocate to each function, this would relieve us all of the pressures that we have, to represent our special interests. That is precisely the point that I have tried to make. I think that that is what this Budget Act was set up for. I worked very hard to get is passed, because I thought it was going to be a discipline on all of us, to try to force us to live within our means. That is exactly what I am trying to do here. It distresses me to hear my colleagues say that, simply because we want to go home quickly, we cannot take the time to present a budget that is going to be satisfactory to the American people.

Mr. SIMON. My point is simply this—and the gentlewoman from Maryland has confirmed this—that we have problems with the $10 billion. I indicated earlier in the floor debate on the first budget resolution that I tend to agree with my colleague, the gentleman from California (Mr. BURGENER), that when we start off in committee we ought to be dealing with aggregates and then see where we go and see if we can fit these functions into the aggregates.

The fact is that if we accept the aggregates of the gentlewoman from Maryland the people who would get hurt would be those people who need the help the most. And let us not fool ourselves. There would be a scramble around this Capitol like we have never seen before. All of the special interests would be heard from except the people who need the help from the Federal Government the most.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, the gentleman mentioned defense and some of the other areas where the gentlewoman from Maryland did not desire to see reductions. I wonder if the gentlewoman from Maryland would support a pay cap for Federal employees, and I wonder if the gentlewoman from Maryland would support reductions in impact aid to education.

Mr. Chairman, it is all well and good to talk about the priorities and making cuts. It is always easier to cut the other people's programs, as long as our own pet programs are left intact. And that is the difficulty of putting together a budget

Mrs. HOLT. Mr. Chairman, if the gentleman will yield further, this is exactly the point I am making. I am not saying that I am absolutely free of representing the Committee on Armed Services, on which I serve, that I am not absolutely guiltless in trying to represent the interests of my district. I am saying that this would give us an opportunity to say that we want to hold the line on increasing it, that we have a budget this year, we know OMB and CBO have all estimated how much we can spend. We have demonstrated we cannot spend that. The agencies are unable to spend all of the money that we shovel out to them. So this is the point I am making.

If we had to make a decision to go with what we are spending this year, plus an amount for inflation, what would be wrong with that? I think the American people would cheer. I think we would see our dollar rally, I think we would see the stock market rally, I think we would see business confidence improve, which is the weakest point of our economy. We have to do something dramatic here in this Congress to demonstrate that we are not going to go on with this kind of spending.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 5 additional minutes.)

Mr. GIAIMO. Mr. Chairman, will the gentleman yield further?

Mr. SIMON. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, do I understand, then, the gentlewoman from Maryland (Mrs. HOLT) would support me in holding the pay cap on Federal employees and not to reduce the payments made to impact aid, school districts?

Mrs. HOLT. If the gentleman will yield, I am not committing myself to any spending, any action.

Mr. GIAIMO. Would the gentlewoman join with me?

Mrs. HOLT. I am offering this particular amendment to try to place a discipline on the gentleman and on me and on all of us, so that we will stop wasting the taxpayers' money.

Mr. GIAIMO. And the gentlewoman will join with me?

Mrs. HOLT. I will abide by the committee's decision.

Mr. SIMON. Mr. Chairman, if I may reclaim my time here, let me point out just one other problem. As we look at these figures, they look great. And it would be marvelous to get down to that deficit of $35 billion in this budget resolution, although, in fact, with the chairman's amendment we are down to $40 billion, and because of falloff I think we will be down to roughly $36 billion, in fact, in fiscal year 1979.

If the Members will check, they will notice in the Holt amendment that there is a tax cut of an additional $4.4 billion, and a dropoff of revenues of only $1.8 billion. It may be that you want to pretend that is going to happen. I do not think that too many people who look at a balance sheet and who look at the hard facts of life believe those kinds of things can happen.

We have to act with considerable caution before we accept those kinds of figures. Let me make one more point. I started to make a point before that I think is important. The gentlewoman from Maryland hit one extremely important point, and that is the condition of the economy of this Nation. In fact, if we try to make the appropriations fit into a cut-back of an additional $10 billion—and here is the No. 2 man on the Appropriations Committeee right here, and he knows what a problem that would be—in fact, all the powerful interests would start to work.

Where would we cut back? Would it be on defense? You know the answer on that. Would it be on veterans' programs? Well, we could not do that. Would it be on water projects? You know the answer on that. Where would we cut? Well, I know where we would cut and you know where. We would be cutting back on employment programs and other things that help to keep this economy going. I just do not believe that is in the best interests of this country.

If the gentlewoman were proposing functional cuts up and down the line, then we could make a guess at what we might do, but barring that, with simply these aggregates, we have to guess where we might cut those appropriations. I feel that pressures rather than the national interests would determine where we would make those cuts.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from California.

Mr. ROUSSELOT. First of all, the gentleman knows full well that included in the gentlewoman's amendment there are no cuts. It is a restraint on increases, so I think we should not talk about cuts, but how much do we restrain. The increase over last year——

Mr. SIMON. Since it is my time——

Mr. ROUSSELOT. Let me answer the question.

Mr. SIMON. It is my time, and I will yield to the gentleman again.

There are places where we can make cuts, and places where we cannot. We cannot cut back on interest payments; we cannot cut back on social security.

Mr. ROUSSELOT. But if we adopted the gentlewoman's amendment it would be a $10 billion lower deficit.

Mr. SIMON. Let us get to the places where we can cut back, and we have to recognize that reality.

Mr. ROUSSELOT. I was going to offer a solution for the gentleman on where would we find the allocation of the $10 billion.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(At the request of Mr. ROUSSELOT and by unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. No. 1, shortfalls. The Government itself says it cannot spend the appropriated dollars we give away. There will be a shortfall this year, as the gentleman well knows, since we have discussed that. They could even look for it in the executive branch, where they have not spent it. Those shortfalls have averaged anywhere from $12 billion to $17 billion a year. That is a lot of shortfall, or savings.

Second, there has been, according to the General Accounting Office, extensive surveys and investigations showing better than $25 billion worth of fraud and improperly expended expenditures—better than $25 billion. I can give the gentleman lots of places that this $10 billion could be found, and he and I have looked for those in the budget committee. I am saying to the gentleman that $10 billion can be easily allocated over all of the functional categories. There is plenty to go around.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Connecticut.

Mr. GIAIMO. I think what the gentleman from California is talking about is the fact there is shortfall in the budget, and that could absorb some of the cuts which the gentlewoman from Maryland makes. We should remind him, first of all, that his figure on shortfall is quite high. My recollection is that the shortfall for 1978 will be in the area of about $8 billion.

Second, let me tell the gentleman that a great deal of that shortfall is in the area of defense outlays, and that does not mean the funds will not be spent. It merely means that the time for expenditure has been pushed forward a year or so.

I believe there is about $4.5 billion of that shortfall which is attributable to the defense function, and I very much doubt that the ladies and gentlemen on the minority side would want to cut the defense item. The same way this year, there has been a shortfall already from the first budget resolution of about $2.5 billion in the area of defense. Do the Members want to take that $2.5 billion out? I would doubt very much this House would say we should cut defense by $2.5 billion because there is a delay in the outlays for defense. That money will be spent.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, my chairman knows the shortfalls this year will be anywhere up to $15 billion, so his comment about $8 billion is just not correct. We could find it right there. The fiscal year 1979 begins October 1, and the same thing could happen next year as this year. And we scratched hard in the Budget Committee to find out why those shortfalls occurred. Our committee is working and will continue to work on it.

I would try to answer the gentleman and help him understand where he could find the $10 billion less in expenditure that the gentlewoman from Maryland has offered. I know the gentleman agrees with me there are lots of places to find it.

Mr. SIMON. If I may respond to the gentleman, I happen to agree there are places to find substantial amounts of money. The difficulty is we cannot agree where we should cut and this amendment offers no directions. I fear the people who will get hurt are those who need the help the most.

Second, if I may respond briefly to the gentleman, what we do with these figures does not impact on the shortfall. There is a shortfall, and in fact we know as we talk about the $43 billion or $40 billion deficit it will be somewhat less than that, $36 billion probably, or less than that, but adopting this amendment or not adopting it has virtually no impact on that shortfall.

Mr. ROUSSELOT. If the gentleman will yield further, the gentleman also knows that Secretary Califano and others have told us and pleaded with us in the committee, with Califano requesting $7 billion less than Congress is talking about appropriating and he has pleaded for us not to give him that much money because he cannot spend it as fast as we are giving it to him. Many agencies have told us that. We have seen the GSA problem. There are many places.

Mr. CONABLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Holt amendment.

Mr. Chairman, we have spent a great deal of time talking about the expenditure side, and that is a worthy consideration for a Budget Committee, but I would like to talk about the revenue side because I think there are some very interesting things happening there.

I noted the gentleman from Maryland (Mr. MITCHELL) saying the Holt amendment amounted to deceiving people. I noted also the button on the chairman saying: "Hold The Line." I would like to suggest that we do not help our credibility by cooking the revenue figures, and that is what we are doing specifically with the inflation assumptions on which this second budget resolution is based. If Members smell something cooking here, it is not the heat of the debate that is causing it but the underlying figures which I think can be more damaging to the credibility of this committee and this House than anything else.

I know why we do this—because it permits us leeway when we go to conference with the Senate and we can change our inflation assumptions to compromise with them on the assumptions that they have taken and thus to reach an accommodation without making substantive changes that could be matters of contention between our two bodies. But it certainly damages the credibility of the total budget system if we do not have our basic discussion here undergirded by sound economics.

Now, what am I talking about on the revenue side? Let me explain.

The assumption on which the revenue figures are based is that the inflation rate for calendar year 1978 will be 6.9 percent and for calendar year 1979 will be 6.4 percent.

For the first 6 months of this year the rate of inflation has been 10.3 percent and for the last 3 months it has been 11.4 percent. In other words, inflation is not getting any better in this country and yet here we face a committee inflation assumption for the entire year of 6.9 percent.

Mr. Chairman, that would require an inflation rate for the remaining months of this year of about 3.5 percent. Do you think that is going to be achieved? No, of course it is not.

Therefore, we should not base our figures on this and we are damaging the credibility of the process if we do.

What is the effect of that on the revenue side? It is pretty impressive. By assuming a lower rate of inflation you get considerably less revenue. You get considerably less revenue because for each 1-percent increase in the rate ot inflation you get 1.4 percent of increase in Government revenue. That is the impact of inflation on the graduated income tax, and the personal income tax alone goes up by 1.7 percent for each percentage point of inflation.

Now, in looking at this proposal reference was made to the fact that we cut revenues by $1.8 billion. We cut revenues by considerably more than that because our figures are based on an inflation rate that would be considerably more realistic. I still think it is pretty conservative, but this year we assume an inflation rate of 8 percent for 1978, and that becomes the base on which the rate of inflation for 1979 is figured. We figure a rate of 7 percent for 1979. That means we will get substantial additional revenue. It means we will get substantial additional revenue. It means also we can afford a greater tax cut.

Of course, there may be some assumption as result of what the chairman said in offering the amendment to which the Holt amendment is a substitute. there may be some assumption that somehow the Senate is going to go along with the tax cut only on the level that was adopted as the Jones package enacted in the House last week. Judging from what I read in the press, tax cuts will go still higher in the Senate. It is their leaders' expectation not that they will accommodate immediately the Jones package: it is their expectation they are going to cut to the full extent of the revenue figures permitted by the first resolution on the budget.

So if we start acommodating our figures to the Jones package here we will be in a direct confrontation with the Senate on that issue. They have not acted, I admit, but are they willing to give away in the budget process the leeway they want in direct consideration of the proposed tax cut? Obviously not.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. CONABLE was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman yielding and appreciate the point the gentleman has made to answer some of the comments made by our distinguished colleague, the gentleman from Maryland (Mr. MITCHELL). His concern is that this amendment offered by the gentlewoman from Maryland (Mrs. HOLT) will not accommodate what the House has already done. First of all, on the basis of what the gentleman has said, who is the ranking minority member of the Committee on Ways and Means, we do not have a final tax bill. That still has to go to the Senate, then to conference. It may be clearly substantially different than this.

Mr. CONABLE. I hope it will be.

Mr. ROUSSELOT. We all do.

Second, this resolution will have to go to a conference with the Senate and the figures will be different. So we will have more than an adequate opportunity to accommodate the $10 billion.

Mr. CONABLE. Let me say, Mr. Chairman, that we do not have to wait until December to arrive at that accommodation as a matter of fact, the law says we must have accommodated by September 25.

Mr. ROUSSELOT. That is a week ahead of our proposed adjournment, then.

Mr. CONABLE. That is correct.

Mr. SIMON. Mr. Chairman, if the gentleman will yield, when you talk about the Jones amendment and the tax level we are talking about two specific figures and the House and Senate negotiates between those two proposals. When you talk about the Holt amendment, when we get into the educational opportunity function or the defense function, or any of these, the Senate will have a specific figure.

The House will have no specific figure from which we will negotiate, and that puts us in a very difficult posture.

Mr. CONABLE. Mr. Chairman, the issue here is, is the Committee on the Budget going to be a fiscal policy committee, or is it going to be engaged in genial arithmetic exercises of some sort, without relation to fiscal policy?

Mr. Chairman, I support the Holt amendment. I urge the members of the committee to support it. I would like to point out also that the Holt amendment accommodates a substantially larger cut than might be apparent from these figures because of the much more correct assumptions on the part of the Republicans with respect to the year's inflation.

Mr. DERRICK. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, none of us really believe in pipe dreams. I have worked very closely with the gentlewoman from Maryland (Mrs. HOLT) for almost 4 years on the Committee on the Budget. I commend her for the tremendous contribution she has made, we have made significant progress.

When the budget process started, we were looking at a deficit of $73 billion, the highest in the history of this country. Today, as we debate the second budget resolution, we are looking at a deficit somewhere in the neighborhood of $40 billion. We are also looking at a budget which has the lowest real growth in Federal spending in a decade, and we are also looking at a budget which meets, in my opinion, the basic needs of this country.

Therefore, Mr. Chairman, we have a great deal to be proud of, and a great deal to look forward to.

I would suggest that the gentlewoman and most of us here in this House understand that for us to think that we are going to cut outlays by $10 billion and revenues by some $20 billion and not end up with a substantial deficit is a pipe dream.

The only person I really know of who understood that best, perhaps, is the economist from California, who doodled on a napkin in Washington some years ago and came up with what is known as the Laffer curve.

I will not say that none of his peers—I will not make that absolute statement—but certainly Milton Friedman, the leading economist or spokesman for the minority, does not believe it. Most people understand that there is no such thing as a free lunch, and to vote for this amendment, in my opinion, says that we do believe there is a free lunch.

Mr. Chairman, I have been on the Committee on the Budget for 3 years. Starting with Secretary Simon I have questioned many distinguished witnesses, who have come before our committee. They all agreed that it is desirable to cut back on Federal spending. However, when asked specifically on where we should cut it back, no one is willing to identify specific programs.

However, Mr. Chairman, we are making headway. William Miller, Chairman of the Federal Reserve Board, in testimony before this Congress several weeks ago, indicated that he felt the fact that we had the budget deficit down in the $40 billion range, an improvement in the oil-import situation, were significant facts and would have very positive effects on the inflation rate.

Why not look at what we have done positively? One of the problems with our country today is that we allow people to have false expectations. I rather think, with all deference to my dear friend from Maryland, that this amendment allows people to have false expectations.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I assume that I am the gentleman's "dear friend from Maryland"?

Mr. DERRICK. Yes; Maryland is a great State with many fine people.

Mr. MITCHELL of Maryland. I thank the gentleman.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from South Carolina (Mr. DERRICK) and to raise one question so as to help me to learn.

Does not a cut in taxes as proposed in the Holt amendment almost assume the passage of a tax bill comparable to Kemp-Roth?

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. DERRICK) has expired.

(On request of Mr. MITCHELL of Maryland and by unanimous consent, Mr. DERRICK was allowed to proceed for 3 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield further?

Mr. DERRICK. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Does it not almost assume the passage of a tax bill comparable to Kemp-Roth to make that kind of substantial cut?

Mr. DERRICK. Yes, furthermore, the House addressed itself to this matter last week and by an overwhelming vote rejected Kemp-Roth.

Mr. MITCHELL of Maryland. That was the question I wanted to raise. I thought perhaps I had become confused. As I recall, we had voted on a kind of Kemp-Roth bill.

Mrs. HOLT. Will the gentleman yield?

Mr. MITCHELL of Maryland. I do not have the time. The gentleman from South Carolina has it.

We voted on a kind of Kemp-Roth bill, and as I recall it, it was overwhelmingly defeated. I do not see the rationale for reintroducing it in this amendment which is called a second budget resolution but really is a first budget resolution, because it goes back to aggregates.

Mr. DERRICK. That is my recollection.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. It is with pleasure that I yield to the gentlewoman from Maryland.

Mrs. HOLT. I thank the gentleman for yielding. That is precisely the point I want to make. When we debated the tax reform bill, Member after Member—I cited them all yesterday in general debate—on the gentleman's side of the aisle said the people want this kind of tax cut. We need this kind of tax cut. The Secretary of the Treasury, all of the executive branch are calling for this kind of tax cut, but we cannot do it without a comparable reduction in the rate of growth of Government. So here is the gentleman's package right here. It is all wrapped up for him. It will do exactly what he has asked for.

Mr. DERRICK. Let me say this to the gentlewoman. Let us do the hard part first. Let us cut the outlays, and then if the money is there, fine, we will cut back on the revenues. That is the way to do it. Unfortunately, that is the difficult way to do it, and the way no one wants to do it.

Mr. LATTA. Mr. Chairman, will the gentleman yield to me?

Mr. DERRICK. I will be delighted to yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

I would just like to insert into the debate a couple of figures that might change the gentleman's mind slightly.

Mr. DERRICK. Do these figures come from Mr. Laffer or whom?

Mr. LATTA. These come from the Congressional Budget Office. The budget authority of the bills passed—and we have passed all the appropriation bills here in the House—to date total $519 billion in budget authority and only $469.8 billion in outlays. These figures also include permanent spending authority, such as social security and medicare. We are going to look kind of foolish if we pass a resolution having $561.5 billion in budget authority and outlays of $590.5 billion, since these figures far exceed what the House has enacted for fiscal year 1979. That would seem to indicate to me that the Appropriations Committee is doing a little better job than we are on the budget authority.

Mr. BURGENER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, it has been sugggested that the adoption of the Holt amendment might keep us here until Christmas. I do not believe that, but even if true, I think there is no better way we could spend our time for the good of the country. The Senate has only passed a few appropriations bills. We have many conferences to go on this bill and on all appropriation matters. I think the Holt amendment is reasonable. I think it is responsible. I think it is long overdue, and particularly I believe it is what the people want us to do. It provides growth at a reasonable rate, cuts nothing—it cuts nothing but excessive promises. It does not cut any delivery of service. Seven-percent growth is reasonable under our ability to pay. That is the growth it provides so it accommodates inflation. I think most of us would agree that inflation is the greatest problem facing our Nation today.

Government lives by it. The taxpayers and wage earners die by it. We have an opportunity to do something about it, if we have the will. If we have the will, here is a way and, indeed, it does address itself to outlays, which it should.

Now, at the risk of sounding like a broken record, let me get back to the matter of aggregates. We will never restrain the growth of Government and the budget process will never become effective until and unless this Committee on the Budget, on which I am proud to serve, and then this Committee of the Whole, then the House itself will deal with aggregates first, not last. By dealing with them last, we merely become an adding machine committee.

We are unrestrained, each and every one of us. The chairman has asked us quite properly, would we be willing to

vote less for this favored program or that favored program? None of us is under any restraint to cut anything under present budget procedures. We are giving up the most valuable weapon we could ever have, a weapon against special interests.

Now, is there anything illegal or immoral about special interests? Certainly not. Each and every one of us belong to one of these groups or certainly support them; but, if we would set a ceiling before we go down the wish list, then we would have some real priority setting that would be meaningful. If we want to vote for more impact aid, which I probably would, or more defense, which I probably would, and if others want to vote for more public service jobs, they could. We would have a real battleground, but all of us would be under the restraint of knowing we had a ceiling under which to operate. Anything else does not work and we can demonstrate it does not work. In the 4 years this Budget Committee has been operating. the national debt has doubled.

As I said yesterday, as some members of our Budget Committee were busy congratulating the committee for providing budget restraint, I shudder to think what it might have been without the Budget Committee, because, with it, the national debt has doubled in the 4 years the Budget Committee has been in existence. This is restraint?

If we were dealing with aggregates first, then I would battle with my colleagues for my favorite program; but I would have to go back to my schools for example, and say, "You are not going to get 100 percent of your aid this year. You are only going to get 90 percent, because I earlier voted for a ceiling. I voted for that in the national economic interest.

We all talk about this. We all agree it is a great idea, but we never seem to get around to it.

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. BURGENER. I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Chairman, I want to associate myself with the gentleman's remarks.

I believe that this House should first consider what is to be our fiscal policy, and to do so we should first make a determination as to the aggregate revenues and the aggregate outlays and the resultant deficit or surplus which is appropriate to suit the current fiscal situation. This is what we have called the two-step process. Under this procedure all of us could be statesmen. Once we have decided the overall totals for spending and income then we would consider the specific programs under those restraints. We would be forced to consider our priorities for spending within the overall framework we have previously established. Programs would not be agreed to because they sound good but rather would be weighed one against another. Under our current procedures there is no restraint to cut any program and the result has been that we keep adding on new ones. To correct this situation I joined with the gentleman from California (Mr. BURGENER) and the gentlewoman from Maryland (Mrs. HOLT) in introducing a bill (H.R. 12345) to bring about a change in the way the House considers its budget resolutions.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. BURGENER was allowed to proceed for 2 additional minutes.)

Mr. BURGENER. Mr. Chairman, I might say with respect to each one of these special interests, each are laudable, and it depends your own point of view as to priority, but there is no coordination. How can you expect them to coordinate their activities, one against the other? That is our job, but it is a job we have failed to do, because we will not agree on the ceiling in advance. We merely say yes to everything.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BURGENER. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I think the gentleman from California (Mr. BURGENER) has made an excellent point. It is a function of the Committee on the Budget to coordinate these various elements that differ.

The gentleman is also a distinguished member of the Committee on Appropriations. We have heard that the Committee on Appropriations of this House has approved for fiscal year 1979 $469 billion in outlays. That is the total amount. Does the gentleman not agree with me that that is still roughly $10 billion below what the gentlewoman from Maryland (Mrs. HOLT) is recommending?

So there is more than enough slush to work with, should this extra money be provided on the basis of this amendment offered by the gentlewoman from Maryland (Mrs. HOLT). Assuming it is agreed to, is that not correct? The gentleman is a member of the Committee on Appropriations.

Mr. BURGENER. Yes. In conclusion, Mr. Chairman, the only thing the Holt amendment cuts is excessive promise. It cuts no program, it provides affordable growth, and I ask that the Members support the resolution. It is all the American taxpayers can afford.

Mr. MINETA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, earlier our colleague, the gentleman from New York (Mr. CONABLE), raised some questions about the inflation rate that is used in the budget resolution. I believe this goes to the old adage about playing with numbers and statistics and making them come out to justify a specific point.

Our colleague has challenged the inflation rate assumed in the second concurrent resolution. Specifically, he regards the 6.9-percent year-over-year projection from calendar 1977 to calendar 1978 as too low. He is concerned because the increase in the Consumer Price Index from December to June annualized has averaged 10.5 percent, and this would imply very low rates of inflation during the second half of the year.

There are several ways to measure the rate of inflation. One method is not more correct than another. In fact, the budget for fiscal year 1979 presents the result of both the yearly change from December to December and the change in the average of 1 year compared to the average of the following year in its projected economic assumptions for inflation. The two methods can yield significant differences. From December 1973 to December 1974, the change in the CPI was 12.2 percent; from the 1973 yearly average to the 1974 yearly average, the change was 11 percent. The change measured on one basis cannot be compared with the change measured on another, but this is what Mr. CONABLE is doing. He is comparing a change from December to June to a yearly average change.

The 6.9-percent increase is based on a 7.8-percent increase—a 6-month average—during the first half of the year and a projected increase of 6.1 percent during the second half. The 7.8-percent increase is calculated from the average for the first 6 months of 1978 compared to the last 6 months of 1977. If, as Mr. CONABLE suggests, we assume an 8-percent increase in 1978 based on the annual average method, it would imply that prices during the second half of the year would have to rise by 10.5 percent.

Now, if Mr. CONABLE is implying that the Kemp-Roth proposal is more inflationary than the fiscal policy recommended by the Budget Committee in the second concurrent resolution, I will agree with him. To legislate a 33-percent reduction in taxes over the next 3 years with no regard for the level of expenditures in those years or for the state of the economy is bound to be inflationary. Even the projection that Mr. KEMP put in the RECORD last April 6 shows inflation accelerating and the budget deficit rising to $79 billion in 1979 and to $89 billion in 1980. I can sympathize with Mr. CONABLE's wish to project a higher rate of inflation, given the program he is proposing. A higher rate of inflation will increase revenues, but that, to me, is poor public policy.

Mr. DERRICK. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Thirty-seven Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the history books tell us that Alexander Hamilton walked through the House Chamber with a guest one day and made the following statement:

Here, sir, the people govern.

Is there any question in anyone's mind today that if this issue were put to the vote of the people, as to what the outcome would be? I am confident that the vote would be to hold the line—perhaps not the interpretation of "hold the line" that some Members might have as evidenced by the buttons being worn today but rather to hold the line at current services or in other words to say in effect: "Let us not increase Federal expenditures or Federal programs any more than we the people are being increased in earnings and we have available to spend in our own budgets at home."

Taxpayers would say "Let us not increase our tax load any more than we are having an increase in the gross national product." In essence that is what the Holt amendment is all about. It simply says that the Federal Government should grow no faster than the economy, should grow no faster than the income of the people back home that we represent.

I would like to speak particularly to the budget authority feature in the Holt amendment. I think that is one of the most important aspects of this proposal. If you will note from the chart, the second budget resolution which is before us has a budget authority of $561.5 billion. The Holt amendment proposes to reduce this to $539 billion.

The gentleman from Maryland (Mr. MITCHELL) spoke earlier about the need to reduce spending as a percentage of the gross national product over the long haul ahead and yet the proposal in the second budget resolution flies in the face of that objective. I would point out to you that the budget authority provided in the second resolution assumes a future growth in Federal expenditures of 12.3 percent. It is made up of a number of different items. A growth in international affairs of 30 percent, agriculture 416 percent, education, training, employment and social services, 53 percent, general government 17 percent, all adding up to a average growth rate of 12.3 percent.

What we are proposing in the Holt amendment is to simply hold back the growth by reducing budget authority to 7.5 percent.

I think the gentleman from California (Mr. BURGENER) made an excellent point when he said the problem in the second budget resolution is because it is filled with "excessive promise." What we want to do is to bring it into reality with the same kind of fiscal restrictions that are on the State and local governments and that are imposed on the taxpayers in terms of growth of their own businesses and in their own financial lives.

As an illustration of what is happening, because we are allowing budget authority to run ahead at a rapid rate, is the fact that in 1970 the total accumulated budget authority was 431.7 billion, which was the equivalent of 45 percent of the gross national product this year. If the second budget resolution as before this House today is enacted the total budget authority, the total spending authority that will be available will be $1190.4 billion and the percentage of the gross national product will be 51 percent—up 6 percent from 1970.

This illustrates the tremendous growth that is taking place in budget authority. Although we have not discussed this at great length, I think it is one of the important features of the Holt amendment; that is, the reduction from $561.5 billion in the budget authority to $539.0 billion for fiscal 1979, putting a constriction on the ability of the Government to spend in future years that is commensurate with the normal growth in the economy and that will result in the expenditures of the Federal Government staying at a point of about 20 percent of the gross national product as opposed to a level where we are headed of about 23 percent.

For this reason I think the Holt amendment deserves your vote. It deserves your vote because it will say to the American people that we are going to put the same kind of restraints on Government spending that we are asking the people to put on their own spending.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. MITCHELL of Maryland, and by unanimous consent, Mr. REGULA was allowed to proceed for 1 additional minute.)

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I will be pleased to yield to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I thank the gentleman for yielding. I am doing so just to try to make sure that I am remembering what happened in the Committee on the Budget deliberations. It seems to me that when this approach was offered in the Budget Committee, it was pointed out that it might be more efficacious and effective to do this on the first budget resolution than the second budget resolution, is that correct?

Mr. REGULA. I do not recall the timing, however, I would always be in favor of getting the reductions at the earliest possible moment.

Mr. MITCHELL of Maryland. I have one further question. Why would it be more effective to do it on the first budget resolution than the second budget resolution?

Mr. REGULA. Because in starting out with the first budget resolution, we are setting targets; and we would be setting a target for the authorization and appropriation committees to use, and hopefully, restrain the spending levels. In spite of what we might have done, I think there has been some restraint, as evidenced by the fact that thus far the total budget authority legislated is $519 billion that has been authorized by committees and approved by the House.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. REGULA) has expired.

(By unanimous consent, Mr. REGULA was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield further?

Mr. REGULA. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I thank the gentleman for yielding.

Then my interpretation of what the gentleman has said is that although this might be a good approach, it comes really at the wrong time because we set the targets initially on the first budget resolution.

Mr. REGULA. I would not disagree with the gentleman's interpretation, however, we did not have the facts at the time of the first budget resolution that we now have.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Is it not true that the effort was made to do this on the first budget resolution, and it camped here on the floor until the leadership of the House turned around several votes, and then it was defeated?

Mr. REGULA. That is correct.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, the gentleman has gone into more details on these figures than many others have.

Does the gentleman think it is realistic to have a $4.4 billion tax cut and expect only a $1.8 billion drop in revenue?

Mr. REGULA. I am not an economist, and I cannot predict that. However, I would say this, and it is only a general response, that a reduction in taxes will stimulate a great amount of economic activity and therefore generate additional revenues.

I get that feeling from talking to people who are no longer willing to work Thursday, Friday, and Saturday for the Government.

Mr. SIMON. There is some stimulus. In other words, if we have a $4.4 billion figure, we might have a drop in original sales of $4 billion, but a drop like that, I think, is unrealistic.

Mr. REGULA. I think the gentleman is correct.

Mr. STOCKMAN. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Michigan.

Mr. STOCKMAN. Mr. Chairman, I think a very good question has been raised by the gentleman from Illinois. The revenue gain partially reflects a difference in the assumptions about inflation in the Holt amendment versus what the committee proposes. Our revenue is higher, but it is not entirely due to feedback. Part of this is assuming a higher level of dollar GNP in the economy, and that is why there is a difference.

Mr. REGULA. Mr. Chairman, I want to make one further point, and that is that many have asked, "Where are you going to cut?"

Very shortly, the gentleman from Texas (Mr. MATTOX) and I will be offering an amendment to cut a substantial amount out of the budget and provide at least a reduction of $673 million.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. REGULA) has expired.

(On request of Mr. GIAIMO and by unanimous consent, Mr. REGULA was al-

lowed to proceed for 2 additional minutes.)

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman. I think we should clear up something. The revenue figure which the gentlewoman from Maryland (Mrs. HOLT) has is $445 billion, as contrasted with $446.8 billion, which is a difference of $1.8 billion However, let us bear in mind that what the gentlewoman from Maryland is actually suggesting is an additional $10 billion reduction in taxes, a $28 billion tax cut in a calendar year, and a $20 billion cut in a fiscal year, which is basically the Kemp-Roth proposal, which this House strongly repudiated last Thursday.

What the Holt amendment suggests is that we cut $10 billion additional in taxes and then recoup $8.2 billion. This is similar to doing it with mirrors. One cuts $10 billion in taxes, but he only loses $1.8 billion in tax revenue. He recoups $8.2 billion, while he loses $1.8 billion. Therefore, he recoups $8.2 billion on a $10 billion tax cut.

We do this, the theory is, in two ways. One is that that type of tax cut would be inflationary—very inflationary, I will concede. As a result of inflationary pressures, it will mean additional revenues, albeit in inflated dollars worthless to the Treasury.

The other theory is that it will stimulate the economy to a greater rate of growth than 4 percent, and that will bring in more revenue. Therefore, our real loss in revenues, according to the Holt amendment, will only be $1.8 billion.

However, I submit, Mr. Chairman, that the real loss will be $1.8 billion plus the additional billions which the American people will be paying in inflated prices along the way. That is something we should resist.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. REGULA) has expired.

(By unanimous consent, Mr. REGULA was allowed to proceed for 2 additional minutes.)

Mr. REGULA. I would only respond by saying that could be accommodated without any inflationary pressures simply by reducing the expenditures 2 percent. We have had this on a number of bills already, and a 2-percent cut on the outlays would accommodate without allowing anything for recouping. I am quite confident there would be a substantial amount of recouping.

Mr. GIAIMO. Will the gentleman yield further?

Mr. REGULA. I yield to the gentleman from Connecticut.

Mr. GIAIMO. There is no question that with a substantially larger tax cut we also have a commensurate reduction in expenditures. There is no question that it would compensate somewhat for the inflationary pressures of a Kemp-Roth-type tax cut, but the fact is that inflationary pressures reflect in greater revenues immediately. The same is not true of reduced expenditures, and we would have the situation where we would get high inflationary pressures in the fiscal year offset in later years, in the next year perhaps, by the reductions in expenditures. So we would still be hit with the inflationary pressures in 1979 and a greater cost to the American people.

Mr. REGULA. I have great respect for my distinguished chairman, but I do not think there is any different impact, whether the taxpayer keeps the money and spends it, as opposed to the Government spending the money. In either event, it comes into the economic stream and, therefore, any inflationary pressure resulting from increased private expenditures would be offset by a reduction of pressure from Federal expenditures. I would prefer to let the taxpayer who earns the money spend the money.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

The gentleman makes an excellent point. There is a much greater impact by the tremendous amount of money that the Federal Government dumps into the system than there is by the individual decisions to either consume, save, invest, or whatever. So the gentleman makes an excellent point. There is a major difference in the Holt amendment.

Mr. WHITTEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the members of the Budget Committee have done a very excellent job, and perhaps I am presumptuous in attempting to speak on the efforts they have worked on so long and so tirelessly during the year. But I happen to have been on the first committee where the Congress tried to write the one-package bill. That bill was somewhat similar to what this amendment would require here. After we got through, the Committee on Ways and Means of the House, the Finance Committee of the Senate, and the two Appropriations Committees got together and attempted to take the bills that they had and to scale them back. It developed that they could not act on specific items and a blanket cut would leave the application up to the Bureau of the Budget. It failed.

Let us be realistic at the moment. In the first place, I was a senior member of the committee that made a study that led to the Committee on the Budget. My colleague from Oregon had more confidence in the approach being successful than I did, and most of the publicity was in that direction. I was hopeful, but I did realize some of the limitations, having had this prior experience. I do not believe there is a Member of this Congress who is more disturbed about the inflationary trend that we have, or who recognizes the dangers of inflation that we face than I. History shows, and I have some figures that I had gotten together earlier, that Nero back in A.D. 60 devalued the currency by minting 45 aurei (gold coins) to the pound instead of 42 and 96 denarii to the pound of silver, as opposed to 84, making money cheaper in value.

We look back to the American Revolution when debts were paid with paper called Continentals, where a barrel of flour was $1,200; a pound of butter $12; a pair of shoes, $120.

During the Civil War with Greenbacks a pair of shoes was $150; flour, $300 a barrel; and beef, $6 per pound.

Germany, World War I—paper marks increased from 2 billion in 1914 to 500 quintillion (500,000,000,000,000,000,000) 10 years later.

I was in China in World War II. We had loaned Nationalist China $300,000,000, much of which they spent having Chinese money printed in the United States. They had us quit printing $10 bills because it cost more to print them than they would buy.

We are on that road, and as a country when we start adding to appropriations bills so much money to offset inflation, that is inflation, additional inflation. It is like pouring kerosene or gasoline on a fire. If you just multiply, by simple arithmetic you can see we will go out the roof if we keep it up. I agree there is the problem, and am more disturbed than perhaps many Members are.

What we have in this budget act is a requirement that we set a target, which of necessity is high so the people's branch, the Congress, can work its will, and we hope to hold down appropriations and expenditures, but we set that at a time when we set out to work on it. So here, 7½ months later, as your Committee on Appropriations has met week after week, after the Committee on Ways and Means has finally passed a bill, which has not come up in the Senate with the new fiscal year coming up October 1. We are directed in a matter of weeks to do it all over again.

Of course, this is not to disparage the figures of my colleague, the gentlewoman from Maryland, or the figures of the committee. You have to get estimates from somewhere. Let us presume they are the best estimates you can get; but after we have reached this stage of the Congress, we attempt to say that instead of the amounts within the targets set by the Congress after we have been kept within that limit, you say do it all over again, that would cause a blanket cut; it would mean you are turning over to the Office Management and Budget the right to select that which they cut out and that which they leave. Judging by their recommendations water and sewer, reforestation, flood control, soil conservation Appalachia, with its access roads, water projects for our cities and similar investments would be cut out while services of doubtful value would be left.

Now, the other side, let me show the impossibility of the amendment. It says:

> The House Committee on Ways and Means and the Senate Committee on Finance shall promptly submit to the Committees on the Budget of their respective Houses reconciliation legislation to decrease Federal revenues by approximately $1.8 billion to a level consistent with the provisions of section 1 (1) of this resolution.

Now, the gentlewoman is directing the chairman of the Senate Finance Committee, the chairman of our Committee on Ways and Means, to take specific action, and the first of the year is October 1, this year.

Let us read a little further:

> And the Appropriation Committees of the

House and the Senate shall promptly submit to the Committees on the Budget of the their respective Houses reconciliation legislation to decrease budget authority by approximately $22.5 billion.

Why, we have been working 7½ months on the bills, hearing hundreds of witnesses, and we just got a conference on one of them. You can imagine what we have should we take this amendment to the Senate. We cannot even get them to conference, much less to do what you propose here.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. WHITTEN) has expired.

(By unanimous consent, Mr. WHITTEN was allowed to proceed for 5 additional minutes.)

Mr. WHITTEN. Mr. Chairman, let me finish my statement and then I will yield.

Now, further than that, it says:

And the Committees on the Budget of both Houses shall report to its House a reconciliation bill or reconciliation resolution, or both, carrying out all such recommendations without substantive revision.

You can see that the very words embodied there are impossible to attain except by turning the matter over to the Office of Management and Budget.

Mr. Chairman, I would like to point out here again that I hope that this Congress when it meets in January will tangle with the fact that you cannot meet inflation by providing for additional inflation. You are going to have to start taking steps down the line to scale back, to stabilize if you please.

I think we are going to have to once again tie our money to something of value. We took gold out of our currency. We took silver out of our coinage. We do not have anything behind it except the full faith and credit of our people. We are going to have to tie it to something to hold us back.

I will tell you further, we will have to distinguish between productive expenditures, where you have goods to offset expenditures, where you keep goods and expenditures in balance to restore some stabilizing influence in our economy.

Now, on the other side, I realize there is our national wealth, our land and development and other physical resources. Money, as important as it is, is a medium of exchange. That is why I have stood here and fought for public works, for reforestation, for the development of sewer and water projects, for the development of our rivers and harbors and for all these things where you get value received and end up a richer country.

Again, we need to recognize that we have to find some way to keep from providing an added percentage to meet inflation as a part of the annual appropriations so as to speed up the process and stabilize our currency. It is not going to be easy. We will have to do it in successive steps.

I repeat again that in 7½ months of day-to-day hearings, with my subcommittees going from 10 to 12 and 1 to 5, on two subcommittees we have not even yet had a conference with the other body, and I do not see how even if we tell them that in 6 to 8 weeks we have to bring these bills back here with those cuts made in them that they or we could possibly do it. The only way it could possibly be done would be to come back with a blanket cut.

That will not work. My colleague, the gentleman from Ohio (Mr. MILLER), had a 2-percent cut adopted to a number of bills. I analyzed the bill which I handle to see how it would work. The gentleman said it would be from 2 to 5 percent. A review showed that two-thirds of that bill is embodied in laws that make entitlements.

That means that one person can file a class action suit and make us pay. In most cases the programs were made entitlements because there seemed to be some reason to cut the amount.

It used to be that they went around the appropriation process by using contract authority. Now they write entitlements into the acts.

Should you tell the Committee on Appropriations that we have to do this on entitlements it would mean repealing a lot of laws, although some of them perhaps should be repealed, at least those with the entitlement figures in them.

I am just saying that this proposal has a lot of appeal at first blush, but it is impossible timewise, workwise, and in every other way, especially since we have two bodies of Congress, the House and the Senate. We know their rules. There is no chance in the world of this proposal being adopted on the other side of the Capitol.

But even if it were adopted, the circumstances are such that if we were to cut back to these figures after hearings, if it is possible at all, we would be turning over to the Office of Management and Budget the right to lift out that which they do not want and to leave in those things that they would like to leave in, and their judgment on the bills that come to my attention is not the best in the world, to say the least.

I am speaking, in other words, of those things that go to take care of our country. Such things as soil conservation, and reforestation, those things that go to development land, those things that go to provide water for our cities, and those things that go to protect us from floods. They would scale those way, way down as they propose this year.

Other programs, highly inflationary, would be increased, judging by the recommendations of the Office of Management and Budget for the coming fiscal year which begins October 1.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. WHITTEN) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. WHITTEN was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, the gentleman from Mississippi (Mr. WHITTEN) mentioned the cuts several times. The gentleman understands that his Committee on Appropriations, on which he has worked very hard and for many months, has come up with a total figure of $469 billion for all the appropriations that have passed.

The Holt amendment is $10 billion over that figure, so it provides more than enough adequate additional funding.

Mr. Chairman, the gentleman did not mean to imply, did he, that there was a cut in the appropriation process provided by this amendment?

Mr. WHITTEN. Mr. Chairman, may I say that we have not been in conference with the other body yet, and historically they have increased the House amount. Of course, we must contend with the cost of "entitlement" programs.

Mr. ROUSSELOT. The gentleman is anticipating they would still raise the figure?

Mr. WHITTEN. I am a little slow to anticipate what they would do, but that is the general record.

Mr. ROUSSELOT. But this amendment has accommodated the potential for a higher figure; it is $480 billion.

Mr. WHITTEN. I have been around here quite awhile, and I have never seen them scale things down on a general basis.

Mr. ROUSSELOT. But the gentleman recognizes these are not cuts, only restraints on increases?

Mr. WHITTEN. In the first place, I do not recognize the soundness of these figures or of the other figures. I have been dealing with estimates here for over 21 years, and I know when we send these annual budgets through, we can estimate them up or down, however we want to. But these are the best figures we can get.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the chairman of the committee.

Mr. GIAIMO. Mr. Chairman, when they talk about how much money the Committees on Appropriations have appropriated so far, we have to take into consideration that they have not yet completed action. We still have several large appropriations to go, and we also have the supplemental next Spring. That has the pay amounts in it, and it includes a lot of other major items which will bring us up in total dollars.

Mr. WHITTEN. Those are facts we can foresee, but we cannot anticipate the dollars, nor do I have an estimate of the costs of "entitlement" laws.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, first, let me say in response to what the chairman of our committee has said, that we have passed all the appropriation bills. We have not had the supplemental, that is true, but we have passed all the appropriation bills in the House, and as I pointed out earlier, that figure is $10 billion less than the figure we have in the Holt amendment.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. WHITTEN) has again expired.

(On request of Mr. LATTA, and by unanimous consent, Mr. WHITTEN was allowed to proceed for 1 additional minute.)

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I am sure

the gentleman did not mean to leave the impression, since he was a member of the Budget Committee earlier, and did an outstanding job on that committee, that all we are supposed to do is to add up all of these figures that come out of the Committee on Appropriations, and then add something additional and come up with the figures for a budget resolution? Is that what the gentleman is telling us?

Mr. WHITTEN. I thank my friend. Let me express, without saying yes or no, to my colleague, for whom I have the highest regard, that I would say I contemplated we would set a budgetary ceiling that, when we got through, we would stay within that ceiling, but I never thought we would make the mistake, as we made in the other package bill, that when we got through we would direct them to scale it back in a blanket manner. It does not work. We do not have the time to do it. I have spent all year on the hearings. I do not consider the Budget Act a measure by which you can cut back, as a practical matter, that which you have approved item by item and package by package. That is not my understanding of how it is intended to work, and I do not believe it could work that way.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. WHITTEN) has again expired.

(On request of Mr. LATTA and by unanimous consent, Mr. WHITTEN was allowed to proceed for 1 additional minute.)

Mr. LATTA. Mr. Chairman, if the gentleman will yield further, let me just read, for the purpose of the record, one or two sentences from the Declaration of Purposes of the Budget Act. It says:

> The Congress declares that it is essential—
> (1) to assure effective congressional control over the budgetary process;
> (2) to provide for the congressional determination each year of the appropriate level of Federal revenues and expenditures . . ."

That is in the law, and that is the responsibility of this committee. That is what we are trying to do.

Mr. WHITTEN. That is the reason I am following the majority on the committee. The gentleman is trying to do that. I am saying the proposed amendment is unworkable because it directs us to do in 6 working weeks what we have not been able to do in 7½ to 10 months—certainly not without surrendering to the Office of Budget and Management the selection of projects and programs to be financed and those to be eliminated.

Mr. ANDERSON of Illinois. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened with interest to the argument that has just been made by my very good friend and distinguished colleague, the gentleman from Mississippi (Mr. WHITTEN). It reminds me of something a former distinguished Member of this body used to say, that on the street of by and by we come to the land of never never. And that, in effect, is what he recommends—that even though this is a very attractive proposal, that this is not now the time, that somehow we have the luxury of waiting.

Mr. Chairman, I rise in support of the amendment offered by the gentlewoman from Maryland (Mrs. HOLT). I think she and her other Republican colleagues on the Budget Committee have done this body—yea, the entire Nation—a very profound service by offering a clear alternative to the budget before us, a budget that promises only higher taxes, increasing inflation, lower growth and bigger government.

The other argument we have heard this morning is that we have made progress in the second budget resolution, therefore, let us not disturb what the committee has done. And that is essentially the argument a few minutes ago of the gentleman from South Carolina (Mr. DERRICK).

I would suggest that, yes, we have made progress; but it is simply not enough, and that is the real reason that necessitates the offering of the Holt substitute.

All we have to do is to step out into the Speaker's lobby, as I did a few minutes ago, and look on the UPI wire, and we will see the ticker grinding out today, as it does day after day after day, the grim news that the American dollar is continuing to decline day after day after day against key European currencies. And why is it declining? We do not have to be one of these occult breed of economists to know the answer is patently clear, palpably clear. The decline is because European central bankers, Europeans and Japanese, do not believe that it is within the power of this institution, within the power of the Congress, to assert the kind of inherent discipline and fiscal restraint that is going to be needed to halt the precipitous decline in the value of American dollar.

This morning the Washington Post carried a very interesting commentary on the current state of congressional Republicans. And thanks to the able leadership of the minority leader on this side of the aisle, the gentleman from Arizona (Mr. RHODES), and the distinguished senior Senator from Tennessee, the minority leader in the other body, one of our Nation's most eminent political columnists was moved to observe that the minority party in Congress has become "in many domestic and international areas, the effective arbiters of the direction of national policy."

And I am proud this morning that in this substitute budget resolution of the gentlewoman from Maryland (Mrs. HOLT), we have another clear, cogent illustration of the kind of innovative leadership that the minority party can provide. But it is more than a minority position. It is a clarion call for a responsible fiscal policy, and it is one that represents the mainstream of contemporary American thinking.

I am not just talking for the minority side of the aisle. I am talking for millions of Americans of both political faiths, who in ways like the vote in California on the 6th of June, in the letters coming in to our offices day after day, are demanding that we not wait until the next Congress; but that we take action now to demonstrate very clearly that we are capable of this kind of fiscal restraint.

The Holt amendment is not a draconian measure that is literally going to put the sword at the jugular vein of the Government. It is a measured response to the explosive growth of Government in the post-World War II era, simply an attempt to restrain the increase in the rate of that growth. The Holt substitute is based on what we have to do now before we come to the point of a balanced budget in 1983.

It calls for what? Approximately a 7-percent increase in spending, and I think that means we can move toward a proper goal without sacrificing the many worthwhile programs that Government operates on behalf of its citizens. And yet, it would send out an unmistakably clear signal across the country—and even more importantly I think this afternoon, to other nations around the world who are bidding against the dollar day after day—that something has happened in Washington. The message has gotten through, and this Congress is determined by the adoption of this substitute, and I hope on the broadest kind of bipartisan basis, to do something about the crisis that faces this Nation.

Unfortunately, the need in our economy is for something quite different, namely, for conditions that stimulate investment in the private sector—where the most productive and lasting jobs are created—and the capital formation that will produce the goods a surfeit of consumer demand is presently seeking. Excessive Government intervention in the marketplace has again succeeded in putting supply and demand out of balance. What with all the uncertainties businessmen already face, their investment is only inhibited the more by the one single certainty; near-confiscatory taxes.

Though for some reason our President was originally overcome with the good sense to propose a $25 billion net tax package some months back, he quickly overruled himself and permitted it to be scaled down, and its effective date postpone, so that allowance for it in the first budget resolution amounted only to $15 billion. Further shortsighted action by this body taken recently on the Ways and Means tax bill may create pressure to whittle down the allowance for tax relief in the budget resolution even more. This should be resisted, so that the door is left open to the greater tax reduction that the Senate may choose.

The premise of the Holt amendment is for a $28 billion tax cut on an annual basis—the one cut, compared to other alleged "cuts," that will actually make the taxpayer better off, given inflation and newly scheduled social security taxes. Combined with serious restraint in the growth of Federal spending, the increased revenue flowing from a more prosperous private sector should be enough to bring down the deficit much sooner than the President's shopworn strategies.

The fact that the Budget Committee has managed to report a reduction of the deficit in this second resolution should be taken as nothing but a happy accident. The real credit belongs not to tough decisions or fiscal discipline, but, rather, to things like technical reestimates, the historical phenomenon of budget authority being outlayed much slower than

projected, and the scaling down of the tax cut.

Moreover, the grand claim that the Budget Committee slashed by tens of billions the spending that authorizing committees had mentioned in their March 15 letters, is equally unimpressive. These March 15 letters are merely projections for the cost of just about anything the authorizing committees are thinking of considering, not what they actually contemplate passing.

In truth, the Budget Committee, rather than slashing spending, pretty much operates on the premise that "current policy"—present programs, adjusted upward for inflation—is the baseline from which to mark up the Federal budget. It is assumed there will be significant real growth in the budget—representing new programs, or expanded old programs; the only question is: How much growth? For all the rhetoric, the Budget Committee is simply not oriented to reductions.

Frankly, the procedure of our new—and, not surprisingly struggling—budget process is upside down. As it stands, the Budget Committee looks at the different spending functions one-by-one—something authorizing and appropriations committees are already supposed to do—and then adds up the totals. Since the committee is not working against any limits, this does not make for much real scrutiny. Instead, the purpose of the committee should be to start by setting totals—or "aggregates," in the jargon—and then work back. That is, it should be decided what price level, unemployment rate, growth rate, and tax burden are justified by economic circumstances and our philosophy on the role of Government. Decisions on revenues, outlays, and budget authority (commitments to future year spending, which drive outlays) should then be made accordingly. Otherwise, the Budget Committee, as well as the whole Congress, opens itself up to pressure for new spending from constituencies that exist for practically every item in the budget. It would be much easier to say no if a predetermined aggregate cap were available to point to. Every program has its merits and its advocates, but it is not the purpose of the Budget Committee just to ratify things blindly. It is its difficult and thankless burden to impose some discipline, in the name of fiscal responsibility. The burden could be shouldered easier if the procedures were more rational.

It should be decided what represents a reasonable level of Federal spending in relationship to our GNP, and what constitutes a reasonable level of taxation. Why not, as Mrs. HOLT suggests, look at the historical level for guidance?

Is it not reasonable to think that what has sufficed as the average between the time of the Korean war and 1976 would no longer be adequate? It is not as though we are standing pat: our spending will still grow as our GNP does, taking account of both inflation and real growth. If Democrats want a bigger Federal budget, what better way than to foster the growth of the GNP? And the way to do that, ironically, is to keep the Federal budget down so as not to crowd out private sector spending and initiative; as the economy expands, so do revenues. The pie is bigger for both the private and the public sectors. In the meantime, as unemployment is reduced, as well as idle productive capacity, a deficit becomes all the more dangerous.

Once again, the Republicans seem to be called on to rescue the President from himself. Of all the grand promises Mr. Carter made in his campaign—and there were more than a few—who will ever forget the ringing promise of a balanced budget? Somehow that wonderful idea seems to have been left by the wayside. Although I have the greatest confidence that such an idea will find itself resurrected by Mr. Carter before 1980 or so, the Congress should not be so patient. Certainly the voters are not.

I urge support for the amendment by Mrs. HOLT.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I think it is time that we really look at this amendment, as to what it is going to do to programs and what it is going to do to things that the majority of us in this House believe are necessary and that we believe the American people want. I am talking about expenditures.

First, let me talk about the revenue situation. The amendment of the gentlewoman from Maryland would cut $10 billion additional over what this House and the Ways and Means Committee recommended, and what was enacted last week—an additional $10 billion cut. But, it is only going to result, we are told, in a net loss to the Treasury of $1.8 billion. It will result in a feedback to the Treasury of $8.2 billion.

There will be some feedback because there is no question that an additional $10 billion cut will be so inflationary that it will so fan the flames of inflation that it will quickly raise the amounts of taxes and revenues which will flow to the Government, both through increased taxes and through inflated prices that will be paid all along the line. So I say do not be deceived by that.

It is the Kemp-Roth tax bill, purely and simply, which this House repudiated as one of the most inflationary vehicles we could foist upon the American public, and so voted it down last week. But they say now that we are going to couple that tax cut with reductions in expenditures so that it will not be so inflationary. Are they, really? Let us look at these cuts, these reductions, if you will, of $10 billion in outlays.

In order to get that $10 billion in outlay, the gentlewoman from Maryland instructs the Appropriations Committee to go and find $22.5 billion in budget authority or appropriations, if you will; or entitlements, if you will. The point is that to get a reduction of $10 billion outlays, we have to cut down about $22.5 billion in budget authority.

That means a combination of appropriations and/or entitlement programs. When this body and the other body are mandated and compelled to find $22.5 billion, I submit we will have a very difficult job indeed.

Let us look at this $500 billion budget of the United States. What is it made up of? It is made up of $149 billion for health and $159 billion in income security—those are people programs—the social security and the welfare and the unemployment compensation and all of the other major programs that sustain millions of American people. Then it is made up of $21 billion for veterans. Those three programs add up to $229 billion of this $500 billion budget.

Add to that the education, which the American people want and demand, and we are talking about another $31 billion. That brings up to $261 billion. Add the interest on the national debt, which is $48 billion, and it bring us to $309 billion.

And then add in the $112 billion for defense, and it brings us to $421 billion—which leaves us a little less than $69 billion to pay for all kinds of programs: For the energy program and for general science and technology and natural resources and environment and agriculture and housing and transportation and community development, our city programs, and also the problems of general government.

I submit that we are not going to cut very much of the $22 billion out of defense, or out of health or out of income security or out of interest on the national debt or out of education.

We are going to take that $29 billion out of the $69 billion that is left. We are going to hurt the people in this country who can least afford to be hurt. We are going to hurt the cities and the farmers and all those people who insist upon being assisted by their Government.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 3 additional minutes.)

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I will not yield until I have completed my statement.

Mr. Chairman, let me say something else. The gentlewoman from Maryland (Mrs. HOLT) says this is not a cut. She says—and I am sure that is what she wanted to ask me—that it is just trying to hold the budget growth down. Do not let it grow as fast as we did from last year's figure, I am sure the gentlewoman would say.

Fine. Do not have any growth in the budget. What she is basically saying is: Continue the programs we enacted last year, the current services, if you will, and do not add any new starts.

Do Members know what that means? It means we will have to eliminate the $2 billion this House voted for veterans' benefits. I very much doubt that the Members of this House will join, as I did, when I tried to hold the line on the veterans' amendment. I had 33 Members with me out of 435 Members. I had only 33 Members voting with me on that.

I very much doubt that many of the new starts we enacted this year in urban initiatives and in the National Energy Act and in the public works—which will be coming along—and in increased moneys in the defense bill will be cut. I very

much doubt the Members of this body are going to want to hold the line on that.

So I say to the gentlewoman we will just not do it. What will happen is we will take the money out of those programs involving the cities and the rural areas and involving the poor and the people who can least help themselves and defend themselves. The fat cats in this budget will always get funding.

You will not take one dollar out of the $48 billion that we have to pay interest on the national debt. You will not take one dollar out of defense. You will not take one dollar out of health. You will not take one dollar out of Social Security. You will not take one dollar out of education. You are going to take it out of the hides of the people who can least defend themselves and least help themselves in this high inflationary process.

Mrs. HOLT. Mr. Chairman, if the gentleman will yield, is the gentleman saying we will never be able to slow down the Government because there will always be these special interests that are forcing us to continue this spending, and that we will have to add more Federal programs for what is worthwhile?

Mr. GIAIMO. Mr. Chairman, I am saying that we have been coming out of a recession. We have been getting this budget deficit down after 4 years of extremely high deficits, and extremely high unemployment. We have got economic growth going better than in the last year. We have cut unemployment down, we have put unemployed people to work, we have created a better climate for private investment. We hope to get greater productivity and a better rate of economic growth in the future.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 1 additional minute.)

Mr. GIAIMO. We also hope to tighten our belts and not begin new programs as fast as we have in the past.

The gentlewoman from Maryland (Mrs. HOLT) knows that I have worked with her in this regard, but I submit to you that we cannot cut back on programs which are designed to help the American people. And when you take or when you attempt to take $22 billion of appropriations and entitlements out of this resolution I submit to you that you would be rendering a great disservice and injury to the American people.

I do not think this House or the other body would tolerate our doing it.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yiled?

Mr. GIAIMO. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, even though I disagree with many things the gentleman has said, I must point out that the gentlewoman from Maryland (Mrs. HOLT) has not made the choices the gentleman has said she has made. But, on interest, the gentleman is definitely wrong because you are assuming other items in her amendment than I think a majority of the Members would be inclined to do. There would be a much lower interest rate. So I am sure the gentleman would want to revise and extend his remarks on that point.

Mr. GIAIMO. It would be lower because you would have a lower deficit.

Mr. ROUSSELOT. I thank the gentleman.

Mr. GIAIMO. But I suspect that the interest rates would go higher.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. GIAIMO was allowed to proceed for 2 additional minutes.)

Mr. GIAIMO. You would have a lower deficit only if your estimate on taxes were correct. I do not happen to agree with that. I think that instead of having a feedback that the gentlewoman from Maryland (Mrs. HOLT) claims to get in her revenue figures of 8.2 percent, I think that is incorrect, I think you would have a lower feedback.

I also think that the deficit would be higher than the $40 billion. I believe under the Holt amendment the Federal deficit would go from $40 billion to perhaps $47 or $48 billion.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield on that point, you have already adjusted your revenue figures in the recent substitute. You have adjusted your revenue figures up to $450 billion and she has adjusted hers downward.

Mr. GIAIMO. The reason I think what we did was proper was we adjusted on the revenue side.

Mr. HILLIS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment offered by the gentlewoman from Maryland (Mrs. HOLT).

Mr. Chairman, I rise in strong support of the amendment offered by the gentlewoman from Maryland (Mrs. HOLT) because I think the amendment goes directly to the root of many of our fiscal and financial problems in this country which basically stem from excessive Government spending. It seems to me a lot of this debate breaks down on the two sides of the aisle with what I think is a constructive proposal offered by the gentlewoman from Maryland (Mrs. HOLT) and a whole bag of reasons why it will not work.

You know, from sitting listening to this debate you can almost get an idea of the old story of the person who is off on his way on a long trip, and he needs directions on how to arrive at his destination, so he stops and asks an old country gentleman for directions and the gentleman says go down this road for a couple of miles and then turn to the right. Then he backs off and says no, that is not right, go back down the road about 2 miles and turn to the left. Then he said "No that isn't right."

Finally, he scratches his head and says, "You just cannot get there from here."

I think that is partly what the majority side of the aisle is trying to tell the American people and to tell us in this Chamber concerning balancing the budget, "You just cannot get there from here." Somehow, however, we have lost our direction, and we are wandering around in the wilderness.

Mr. Chairman, I am going to submit my statement here for the record, but I do want to comment on this matter of interest because it concerns me greatly.

I can remember many, many years ago as a small child a very famous politician in this country saying, "Don't worry about national debt. We just owe it to ourselves."

That we "just owe it to ourselves" cost us $48 billion this year, which happens to be more than we are paying as the price of all this oil we have to import to keep our country going. In fact, this figure of $8 billion alone which is the additional debt if this amendment is not adopted will carry a finance cost at current interest rates of a half billion dollars.

Mr. Chairman, that is what we are talking about. We can talk about taking out of the hide of the poor people, taking it out of the hide of those who cannot respond and whose programs are not well represented and lobbied for in Washington. However, this inflation is taking it out of the hide of all Americans and more importantly out of the hide of our children and grandchildren. It is time that we faced up to it and recognized it for exactly what it is.

Mr. Chairman, we are spending in interest alone $150 million a day. We are spending for foreign oil approximately $120 million a day. Therefore, I think we should come to grips with the problem. It is finally time that we come to grips with the world of reality.

Mr. Chairman, something else which the gentleman from Illinois brought home to me is that the reason for the fall of the American dollar compared to the Japanese yen and to the German Deutschmark is because we cannot get a grip on this energy situation, and we cannot seem to get a grip on our own financial situation.

Therefore, I think that the course as charted by the gentlewoman from Maryland (Mrs. HOLT) is the right one to follow. It is not going to dismantle the establishment to throttle or slow down the rate of its growth.

Mr. Chairman, when we can get our house in order and our budget balanced, at that time I think we will see a strengthening in our dollar abroad. We will see more confidence in our money supply, not only here, but elsewhere as well.

That is why I rise in such strong support of this amendment at this time.

Mr. Chairman, the Holt amendment is badly needed.

By adopting the Holt amendment, Congress can begin the process of balancing the budget. Obviously, the first step in that process must be to limit our increases in spending from one fiscal year to another. Between fiscal year 1976 and fiscal year 1979, Federal spending increased 10.6 percent annually. The Holt amendment will provide for an increase in fiscal year 1979 of 7.4 percent over fiscal year 1978. The amendment

does not cut spending; it does not take one dollar out of any Federal program. It does, however, limit the growth of Federal spending in the future.

The resolution we are considering today is part of the new budget process established by the Congressional Budget Act of 1974. That act was a great improvement in the way we handle the budget. Nevertheless, Congress continues to make a fundamental mistake by examining the 19 separate budget categories and determining their spending levels individually. Adding all 19 categories together in order to get aggregate levels of outlays and budget authority does not place pressure on Congress to hold spending down.

We should reverse that process. The aggregate level of Federal outlays and budget authority should be determined first and should be based on the level of revenues raised by the Federal Government. The individual levels of the 19 budget items should then be adjusted to fit the projected aggregates. By establishing aggregate levels based on the level of revenue available, we can begin to reduce the deficit.

During fiscal year 1979, the interest on the national debt will cost the American taxpayer $48 billion. That is more than we pay for all our imported oil in 1 year. If we do not begin to reduce the ever-growing debt and interest thereon, our economy will continue to worsen until we face major economic difficulties. The writing is already on the wall. The dollar continues to fall in value overseas. For the first time in years, the British pound is gaining in value against the dollar, and the dollar is at an alltime low compared to the Japanese yen and the German mark.

With all the rhetoric we have heard this year about reducing Federal spending and with the tremendous public attention given proposition 13 in California, this Congress has done nothing to decrease Federal spending or lowering the tax burden on the average citizen. Yes, we passed a so-called tax cut just last week. However, as I stated during debate on that measure, the average citizen will pay more Federal taxes in 1979 than in 1978. In 1976, Federal income taxes took 11.3 cents of every taxable dollar; in 1979, income tax will take 13 cents out of every tax dollar. That equals a 15-percent increase even though we have had the Tax Reform Acts of 1975 and 1976, the Tax Reduction and Simplification Act of 1977, an most recently the Revenue Act of 1978.

The Holt amendment will allow for a larger tax cut than the Revenue Act of 1978. Hopefully the other body will pass a more significant tax measure so that Congress can truly give a tax cut to our constituents during 1979.

I am sure we all remember Member after Member coming to the well during debate on the motion to recommit the Revenue Act of 1978 with instructions to adopt Mr. KEMP'S amendment to personal income taxes and stating that they could only support a further tax cut if it were coupled with a reduction in spending. That is precisely what the Holt amendment does. It allows a reduction in taxes, and a reduction in spending increases.

The American people are facing an annual inflation rate for 1978 of somewhere around 8 percent. The administration can predict a 6-percent or 6.5-percent annual rate of inflation, but they cannot change the fact that come December 31 the actual rate of inflation will be near or at 8 percent. The administration can also artificially reduce the estimated deficit for fiscal year 1978 by reestimating levels of Federal spending in hopes of heading off any meaningful spending reductions, but the bottom line is that we face a deficit this year of just below $50 billion.

The gentlewoman from Maryland deserves the support of this body. She has, by offering this amendment, brought to focus the causes of an ever increasing deficit and has offered a responsible course of action to slow that growth. The gentlewoman has done this body and the Nation a great service. She has done her part, now we must do ours and adopt the Holt amendment.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I would like to commend the gentleman on a very good statement. The explanatioı that he heard when he was a young boy, that we do not have to worry about the national debt since we just owe it to ourselves, is no longer true because 16 percent of that debt is now owned by foreigners.

Mr. HILLIS. That is a very good point, and that national debt is bought by American dollars which are going overseas to pay the $120 million a day for oil.

Mr. LATTA. That is correct.

Mr. STOCKMAN. Mr. Chairman, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Michigan.

Mr. STOCKMAN. Mr. Chairman, the gentleman mentioned the figure of 16 percent, but last year 50 percent of the net increase in lending by the Treasury was purchased by foreigners, so over half of the debt last year was purchased by foreign banks and other foreign interests. Therefore, it seems to me to be pretty obvious why we have the situation today that we do.

Mr. PIKE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I do not think that the numbers presented by the gentlewoman from Maryland (Mrs. HOLT) are all that different from the numbers presented by the committee. Further, I think that to say that we can get down to a $40 billion deficit, but we cannot get down to a $35 billion deficit does not make much sense.

We have gone from a $60 billion deficit down to a $40 billion deficit. To say that we cannot go another $5 billion does not make much sense. We have gone from the $60 billion down to the $40 billion largely by not doing anything. However, we were told when we had 9 percent unemployment that for every 1 percent that we reduced it, we were going to save $17 billion. We reduced it about 3 percent, and that ought to be 17 times 3, but we simply have not accomplished that reduction in our deficit.

Mr. Chairman, I happen to know that the chairman of the committee has stood up and fought the good fight on a lot of tough issues. He fought it on veterans' pensions. He fought it on tuition tax credits. There have been a lot of tough issues, and I think that when we say that because we do not win these tough issues we cannot do anything about it, we are misinterpreting the role of the Committee on the Budget. It seems to me that the Committee on the Budget ought to be saying, "This is our upper limit, these are our revenues, and we must fit things within these parameters."

This, to me, is what the budget process is all about. We are going to bring reason out of confusion. We are going to have a budget, not simply an adding and subtracting process. We were going to have an amount of revenue that we set, and we were going to have an amount of expenditures that we set, and we must fit everything else within those parameters.

I do not think we have done that. I think we have looked at individual programs. And, Lord knows, I voted to cut everything. I voted to cut the welfare programs and the defense programs. I voted to cut the outlays right across the line. I think the only way we are going to get there is by having real spending limitations overall and then making the programs fit inside of them. It is for that reason that I, too, support the amendment offered by the gentlewoman from Maryland (Mrs. HOLT).

I have a little bit of trouble, frankly, with the revenue side of her amendment. When you have a tax cut of $4.4 billion according to the chart, and only lose $1.8 billion in revenues, I find in the medicine a little bit of the taste of snake oil. But I think basically the amendment is on the right track, particularly in cutting the budget authority.

Why our budget authority year after year after year has to be so much higher than our outlays are year after year after year, I do not understand. We are mortgaging ourselves down into the future. We are making promises for the future that we are going to have to keep or look very bad to our constituents. We have got to start by cutting on our budget authority. I think it is the role and responsibility of the Committee on the Budget and the budget resolution—all of the Members of the House—to do these things, and I think we have to be tough enough on ourselves. I support the amendment of the gentlewoman from Maryland (Mrs. HOLT), and I hope that it passes.

Mr. BAUMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I believe what we are hearing here today from the gentleman from Connecticut (Mr. GIAIMO) and those who support his position is the death rattle of economic liberalism in this country. It is the same big spending philosophy that for 40 years has bankrupted

the United States and has caused the greatest suffering for the poor, the middle class, everyone who has had these policies inflicted upon them. We have heard that suffering cataloged in detail, dissected, and laid before us today in terms of deficit, inflation, the failing dollar, and all of the economic evils that follow with them.

I know it is difficult to accomplish a major change in the economic policies of any country, and certainly it is hard for us. I know that it is very difficult for the majority party and the Committee on the Budget to appreciate what the American people are feeling. But this amendment pending before us mirrors the feelings, the desires, the wishes of the majority of Americans today. They demand tax and inflation relief now.

We have been told by the gentleman from Connecticut (Mr. GIAIMO) and his predecessors, whenever an attempt to balance the budget has been made, whether now or in 4 years, "You just can't do it." The gentleman from Connecticut apparently feels that we can never balance the budget, even as he lauds that as a goal that everyone ought to support. I do not agree. We can do it. We must.

Tnis is a bipartisan amendment. When it was presented to the House in May by the gentlewoman from Maryland (Mrs. HOLT), it got the backing of a substantial number of Members from both sides. The Democrat Members voted for it; the Republicans voted for it, though it happened to be a minority initiative offered on this side. I suspect today they are going to support it again because they read last month's Gallup poll which showed 60 percent of the American people think inflation and high taxes are the most important issue in these congressional elections. They have read the Harris poll that said Federal taxes are said to be, by 70 percent of the people of the country, the greatest problem that they face on the Federal level. The American people are, indeed, concerned about this issue.

Now we come down to this critical juncture in this grand and glorious parliamentary parade called the budget process. This process was adopted by this Congress several years ago to control spending. But now we are told in a confession by the leaders of the Committee on the Budget. the gentleman from Connecticut included, that we cannot carry out the process that Congress enacted; that we cannot ever balance the budget; that the Holt amendment, which is the first step in a 4-year balanced budget, should be rejected. I could not be more in disagreement.

We are told that we are not to be allowed to force all of the various bits and pieces in the congressional spending puzzle into the aggregates that this resolution is supposed to adopt. We are told it is too much trouble, that we might be here until Christmas. Well, that is too bad. I used to feel we had a duty to stay here, until I saw this Congress in action. I am sympathetic to getting Congress adjourned tomorrow. I think that would be better for the American people; but the law says we have a duty to balance these budget figures and to tell this House that the committees do not have the capacity to make these cuts is a confession of the failure of Congress.

But here is what the gentleman from Connecticut told us on May 2:

> As you know, however, it is the responsibility of the authorizing committees and the Appropriation Committee to make specific recommendations on specific program levels. Alterations by these committees of the assumptions within the overall target ceilings in this resolution are entirely consistent with the Budget Act and the budget process.

Well, the committees have not cut enough, so we must do it with the Holt amendment. We must set those levels and force those committees to go back to the drawing board.

I suspect with the pressure of the election in early November that we will reach an accommodation. This is not business as usual, the same old bankrupt economic policy. We must start on a 3- or 4-year road to balancing the budget. Balance the budget, that is what the gentleman from Connecticut repeatedly prefaces his remarks over and over again. He is for a balanced budget but—well, the "but" is here. We are facing the "but" today. In the Holt amendment we will solve that problem of a balanced budget. Those who oppose this amendment obviously do not want to balance the budget and let them take the consequences they deserve.

Mr. Chairman, I yield to one of the foremost budget cutters in the House, the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman for yielding.

The gentleman has made an excellent statement about the importance of what this Congress led the country to believe when it wrote the budget legislation back in 1974.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BAUMAN) has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. BAUMAN was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, the same people today in this House who formerly said in 1974 that we look to 1978 or we look to 1979 to achieve a balanced budget are the same ones today that are arguing against the amendment of our colleague, the gentlewoman from Maryland, that goes a long way toward achieving that goal. So the gentleman was correct in reviewing that history of the Budget Committee. These very same voices were the ones that promised us when we passed the budget resolution that we should achieve that goal.

Mr. BAUMAN. Mr. Chairman, we should realize this is not just the Holt amendment. This is the Carter-Holt amendment. This is the 1981–1982 balanced budget that our President promised and said we can believe in.

Mr. ROUSSELOT. He said, "You can trust that we will adopt it."

Mr. BAUMAN. So I trust we will adopt the Carter - Holt - Rousselot - Bauman amendment.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BAUMAN) has again expired.

(At the request of Mr. SIMON, and by unanimous consent, Mr. BAUMAN was allowed to proceed for 2 additional minutes.)

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, the gentleman goes into history in great detail. Does the gentleman recall what the deficit figure was for fiscal year 1978 in the second budget resolution?

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield, it was too much.

Mr. BAUMAN. That is the first budget resolution.

Mr. SIMON. The second budget resolution was $61 billion last time. We are now down with the committee amendment to $40 billion for the second budget resolution for fiscal year 1979.

Mr. BAUMAN. Mr. Chairman, the reason the projected deficit has declined is because the Government could not spend all of it. This new figure results from reestimates and changed projects, not from any real cuts recommended by your committee.

Mr. SIMON. Mr. Chairman, let me point this out. The gentleman referred to the astute gentleman from New York (Mr. PIKE) and he pointed out one major flaw in this amendment: This $4.4 billion tax cut and only a reduction of $1.8 billion in revenue.

I have great respect for the mental ability of the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. The gentleman is very kind.

Mr. SIMON. But does the gentleman really believe that is possible?

Mr. BAUMAN. Yes; I believe this is just as possible as the Budget Committee projections that the gentleman from Connecticut (Mr. GIAIMO) insists are written on tablets of stone. I think a balanced budget can be accomplished. There may be a few drops of snake oil in this, but it is nothing compared to the oceans of snake oil in the proposed figures of the gentleman from Connecticut (Mr. GIAIMO).

Mr. PIKE. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from New York.

Mr. PIKE. Mr. Chairman, I would simply say, since I have raised this issue, that people have pointed out to me that the difference is based on a different estimate of the rate of inflation and the fact that the estimate in the Budget Committee resolution assumes an inflation rate of 6.9 percent in 1978 and 6.7 percent in 1979.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BAUMAN) has expired.

(On request of Mr. PIKE and by unanimous consent, Mr. BAUMAN was allowed to proceed for 2 additional minutes.)

Mr. PIKE. Mr. Chairman, if the gentleman will yield further, the Holt amendment estimates or is based on inflation rates of 8 percent in 1978 and

7 percent in 1979. I am obliged to concede that the estimates of the Holt amendment are in my judgment far more realistic than the estimates of the Committee on the Budget.

We are operating at an inflation rate right now of 10 percent; the gentlewoman from Maryland (Mrs. HOLT) does not go to 10 percent, she goes to 8 percent. To me, that is a far more realistic estimate than the one the budget resolution is based on.

Mr. BAUMAN. Mr. Chairman, I certainly concur with what the gentleman from New York (Mr. PIKE) has said. We must take this chance to vote for the Holt amendment. It is the only step toward a balanced budget that we are likely to be able to take in this Congress.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, it just strikes me that if the gentlewoman from Maryland (Mrs. HOLT) is wrong in her calculations and if we lose the whole $4.4 billion in revenue, we will still be about $7 billion better off in the deficit. Assuming the other side is correct and the gentlewoman's figures are wrong, we still pick up $7 billion, so this seems like a better deal than the committee proposal.

Mr. BAUMAN. Mr. Chairman, I think the gentleman is correct.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask a question or two of the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Chairman, if the gentleman will yield, I would be happy to respond.

Mr. JOHN L. BURTON. Mr. Chairman, I understand the gentlewoman's amendment would still leave us with a $35 billion deficit which, for one of those who has consistently voted to balance the budget immediately, as the gentlewoman has, I find troublesome.

But in what areas are we going to accomplish these savings or reductions in future expenditures?

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I would be happy to yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Chairman, first let me say that the $35 billion deficit goes against all my inclinations also. But this is only the beginning of a downward trend toward a balanced budget.

Chairman MILLER testified before our committee that it would be better for the economy to do it this way, to reduce gradually until we reach a balanced budget in the next 4 years, and that it is absolutely essential that we do it to improve the situation as far as our dollar is concerned, our economy, to reduce inflation.

Mr. JOHN L. BURTON. In other words, it is not proper to try to do it immediately, but we have to phase into it?

Mrs. HOLT. It is my contention that we should take this first step toward balancing the budget.

Mr. JOHN L. BURTON. The question is, where does the gentlewoman seek to make the reductions?

Mrs. HOLT. It is my view that the Committee on the Budget acts as a disciplinary action on the rest of us. The chairman of our committee pointed out that we all have special interests, that we have to deal with our own special interests and the greeds within ourselves, but that the budget preparation should be a disciplinary action to force us to go back to the committees and tell them that this is the amount of money that we can afford, this is what we want to spend, this is what we feel the American people want us to do, and the decision will be made there.

Mr. JOHN L. BURTON. In other words, what would happen then? Is that the authorizing committees and the Committee on Appropriations?

Mrs. HOLT. Let me point out just one thing, if I may, in answer to the gentleman.

Mr. JOHN L. BURTON. I am just trying to figure this out. I would hate to have these amounts all come out of necessary programs.

Mrs. HOLT. The Committee on Appropriations has acted on all the appropriation bills, and to date the House action brings us to $519 billion in budget authority. That, I think, is very, very important, because that is setting the spending rate in the years to come and in outlays at $469.8 billion, and I am $10 billion above that.

Mr. JOHN L. BURTON. The question I ask is: Are we going to leave the military budget sanguine under the gentlewoman's amendment and then have the cuts to be made under the programs for the elderly and social services?

Mrs. HOLT. That is up to the Committee on Appropriations. That is not the Budget Committee's decision to make. We set the fiscal policy.

Mr. JOHN L. BURTON. It is the position of the House. And I would point out that the only appropriations that did not get cut were in both military construction and in weapons. In other words, the gentlewoman does not target where these potential savings are going to be.

Mrs. HOLT. That is right. It is my position the Budget Committee should set the aggregate amounts and then let it go back to the committee to make the decision. But when the outlay figure is only $469.8 billion, we are still within that amount of money.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding to me on this point.

Mr. Chairman, the answer to the question is that the budget law, Public Law 93-344, provides specifically in section 310 how this matter is to be handled. The House is empowered by the law to provide in the budget resolution directions to the Appropriations Committee—which of all of the committees is the one that could do this—to go over every appropriations bill and force cuts. The House would then reconcile these cuts as of September 25, which is the date provided in the law, and decide where they could be made. In my view we should look at all programs with an eye to reductions.

Mr. JOHN L. BURTON. We never seem to cut them.

Mr. BAUMAN. I suggest one cut that might be in order. On Monday afternoon the House failed, by about 6 votes, to cut $400 million out of the foreign aid bill by way of the Miller amendment.

The gentleman from Connecticut, who is great for cutting veterans, voted against cutting that unnecessary foreign aid out.

We can go back under the terms of the budget resolution and conform there by cutting foreign aid. Maybe that is a place where it could be done.

The CHAIRMAN. The time of the gentleman from California (Mr. JOHN L. BURTON) has expired.

(By unanimous consent, Mr. JOHN L. BURTON was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Mr. Chairman, I want to respond to the question the gentleman has raised about how the outlay of $480 billion can basically be allocated in these various functional categories. It is already allocated. as the gentlewoman from Maryland pointed out, by the Appropriations Committee in its actions, which is far under the $480 billion in the actions taken so far.

The conference committees on the appropriations will also have to act.

The point is that the $480 billion becomes a ceiling.

So I believe that there is more than enough to accommodate whatever changes are made. We think that is a better ceiling for expenditure than the one presented by the committee.

Mr. JOHN L. BURTON. I thank the gentleman for his contribution.

Mr. Chairman, I have been informed that there is between $40 billion and $50 billion of unobligated funds that are in the various budgets. If that is a fact, would it not be better to deal with those where we could in fact balance the budget and not hurt any programs?

Mr. ROUSSELOT. If the gentleman will yield, I will be glad to respond.

I would say that that is one area which I understand the gentlewoman from New York is going to very properly raise, that many of these agencies already have balances of funds previously appropriated—not contracted for, in many cases, but in some cases it is—of anywhere from $42 billion to $48 billion. We cannot get the exact figure.

So the gentleman is correct, there is one area right there where they already have been given appropriated funds.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, I would just like to comment on a statement made by the gentleman from Maryland about the gentleman from Connecticut being great on cutting veterans. I under-

stand what the gentleman from Maryland means by that, because I read some of the propaganda that gets peddled around 2 months before election. But I would like to correct the gentleman, because I have a record of voting for veterans' programs for 20 years, to the tune of $20 billion for veterans this year. What I did do was object to the add-on, which I thought was excessive. But not voting for an add-on to the veterans bill does not make me great for cutting veterans' programs, and I resent the allegation of the gentleman from Maryland.

Mr. JOHN L. BURTON. Mr. Chairman, first, I would like to point out, so far as Christmas is concerned, some of us are 3,000 miles away, and the gentleman is 30 miles away.

Mr. BAUMAN. Eighty-five miles, but haul out the holly anyway.

Mr. Chairman, if the gentleman will yield further, I apologize if I have wrongly offended the gentleman from Connecticut. The gentleman voted against the veterans program add-on, as he stated correctly. But I did say that he also voted against the Miller amendment that would substantially reduce the foreign aid bill by $400 million. When we are talking about add-ons, the gentleman from Maryland believes foreign aid can easily be cut, far more easily than veterans benefits.

The CHAIRMAN. The time of the gentleman from California (Mr. JOHN L. BURTON) has again expired.

(On request of Mr. BAUMAN and by unanimous consent, Mr. JOHN L. BURTON was allowed to proceed for 1 additional minute.)

Mr. BAUMAN. The only reason I raised the point was because the gentleman from Connecticut repeatedly raised the issue of whether the gentlewoman from Maryland (Mrs. HOLT) wanted to cut impacted aid, whether she wanted to put a 5.5-percent cap on Federal employees' raises. When we start raising the issues that apply in individual districts, I think anybody's voting record becomes fair game. The gentleman says he has voted for veterans over the years, but in this instance he did not vote for them. He did vote for foreign aid. Of course, choosing where to cut is the problem with this whole budget process, as we all agree.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I will be happy to yield to the gentleman from Connecticut.

Mr. GIAIMO. I think everyone's voting record is fair game. I am just asking if the gentleman stated it correctly, and I am grateful that the gentleman corrected himself and did state it correctly.

Mr. JOHN L. BURTON. Mr. Chairman, the only thing I would quickly like to say, now that everybody has finished talking, I still kind of lean to that Rousselot plan of immediately balancing the budget. I do not want my Republican friends to go back and run on a $35 billion deficit.

Mr. STOCKMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. STOCKMAN. Mr. Chairman, I rise in strong support of the Holt amendment. I would suggest that we have spent an inordinate amount of time here nit-picking at the precise accuracy of the budget estimates, and that we have missed something in the process.

The fact is the $5 billion difference in the fiscal year 1979 deficit between these two measures is not the important thing. There is a far more fundamental and important difference, and I think this needs to be underscored before we vote. The Holt amendment represents a reasoned and cogent fiscal course, not just for next year, but for the next 5 years in which the budget numbers are disciplined and subordinated to basic policy objectives; and in which those basic policy objectives of a substantially reduced tax level relative to national income and sharply constrained rate of outlay growth are targeted on the real economic problems and weaknesses that we have in this economy today.

Those obviously are inadequate rates of capital formation, anemic productivity growth, and weakening incentives for production. I would suggest that our attention should be directed to just that kind of fiscal game plan. What we have in the committee resolution is nothing more than a fortuitous, ad hoc compilation of budget numbers. The fiscal policy rationale is totally an afterthought; it is merely a veneer of justification for a purely arithmatic exercise, as the gentleman from New York (Mr. CONABLE) said a while ago.

Of course, we can read the budget report, and it includes numerous non sequiturs about reading the very narrow line between too much stimulus and too little stimulus—whatever that might mean. We can read phrases about this resolution being a delicately-harmonized trade-off between our real economic growth goals and anti-inflation goals. But I must say that I hope one of these days at least some of the majority members of the Budget Committee will stop listening to all the Keyensian mumbo-jumbo they are getting from the Congressional Budget Office, because I would suggest to them, as this debate has made amply clear, that it is leading you down a primrose path of circular logic and fruitless preoccupation with miniscule differences in agregate demand one, two, or four quarters down the road which are totally irrelevant to our basic economic problems here at home, and also abroad.

I would suggest that the proof of the pudding for any policy lies in the outcome, and therefore it would be not unfair to ask, what has been the result over these past 4 years of all this expert advice on fine tuning aggregate demand which we have been getting from CBO.

The four things that come to mind immediately are that, first, we have a currency that has literally collapsed on international markets. Second, the world economy is beginning to drown under a flood of paper dollars; third, the domestic recovery is already faltering, and finally we have rip-roaring inflation that I do not think anybody believes shows any signs of abating at any time soon.

We heard a while ago about the snake oil that is supposedly lodged in this Holt resolution and about the difference between the tax cut and the revenue feedback that we predict. But I suggest if we want to talk about snake oil, we should look at the snake oil imbedded in the majority resolution. Because if we need an example of circular logic, it is the high-tax demand stimulus approach implicit in the majority resolution. It provides for a 10-percent increase in spending, or additional outlays of $45 billion for next year.

The committee report tells us this increase in spending stimulus is supposed to support aggregate demand sufficiently to insure a continuation of the expansion we have underway and ward off the threat of the recession that might be around the corner. But it is made possible entirely by another $45 billion of new net borrowing or financing on the part of the Treasury from the credit markets. If we simply make the assumption that the Federal Reserve is going to hold the line on money supply growth, it means that with this majority resolution we are shifting $45 billion out of the credit markets where it would function as demand for capital goods, housing, and production inventories, and shift it into the pockets of transfer recipients where it will function as demand for consumption goods, including imported consumption goods, thus deepening our trade deficit. You are, therefore, not increasing aggregate demand, you are simply rearranging it.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. STOCKMAN) has expired.

(By unanimous consent, Mr. STOCKMAN was allowed to proceed for 1 additional minute.)

Mr. STOCKMAN. The point I am making is if we are talking about snake oil and sleight of hand, look at the majority resolution. It reallocates resources out of the credit markets, where it would go for capital spending, and into transfer recipient pockets for consumer spending.

I would suggest to the House that any short-term advantage, any slight up-tick in GNP that we might get next year will be more than offset in future years by a smaller or less productive capital stock and reduced income and ability to finance Government activities in the future. We are robbing future years in order to finance an inordinate or unsustainable level of consumption today.

Moreover, the evidence for that is already beginning to catch up with us, as I think is indicated by the fact that last year we had zero rate of productivity growth in this country.

In the light of the self-evident proposition that this economy needs incremental capital investment because we need more capital per barrel of energy we produce in light of the fact that the cheap stuff is gone, and that we need more capital per ton of steel because we have used up all our clean air and water, and we need more capital per dollar of output we produce in order to regain our competitive position in the world markets—under those conditions it makes no sense to continue to pilfer from the savings stream in order to finance current

consumption and then to pretend we are increasing aggregate demand, because we are doing nothing of the kind. And yet this is what we have in the majority resolution—one more year of counterproductive, make-believe demand manipulation.

The Holt resolution, by contrast, phases out the deficit in 4 years, which means we take the pressure out of the credit market and we can begin to crank down our excessive rate of money growth. That will slow down inflation and that will stabilize the dollar abroad. Second, it rolls back the Government claim on the national output back to the level we had in the sixties. We must realize that conditions for economic growth are far worse today because of the fourfold increase in energy cost, the high cost of environmental clean up, our loss of competitiveness in foreign markets, and many other supply side deteriorations which could be enunicated. Our economy cannot stand to have the Federal Government preempting so much of our national income. We have to go back to previous levels if we want to have increased economic growth and an improved standard of living that the American people are demanding all over the country today.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. STOCKMAN. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I want to commend the gentleman from Michigan (Mr. STOCKMAN) on the statement he has made because I think it is a very significant statement. I think what the gentleman is saying is vitally important to our future.

I wonder if the gentleman would yield for a question?

Mr. STOCKMAN. Certainly.

Mr. REGULA. In the judgment of the gentleman is not the most significant thing the fact that budget authority is reduced because this starts the down trend in terms of forcing, as part of the gross national product, a reduction in spending in future years?

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. STOCKMAN was allowed to proceed for 2 additional minutes.)

Mr. STOCKMAN. I thank the gentleman for the additional time. The answer to the inquiry of the gentleman from Ohio (Mr. REGULA) is that he is correct.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. STOCKMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, the point that the gentleman from Ohio has just made, in conjunction with the statement made by the gentleman from Michigan (Mr. STOCKMAN) is terribly important for the future of our country, and that is that the Holt amendment clearly puts a down trend on the accelerating authorizations. That has been one of the complaints in the past by some of our colleagues, that the House authorizing bills provide for to much over expectation, therefore we are forced to fund it with outlays.

Mr. STOCKMAN. Mr. Chairman, I would suggest to the gentleman from California (Mr. ROUSSELOT) that the majority was lucky this year in that the reestimates went down. But if we continue to pump all of this authority into the stream, next year that we might not be so lucky and we might have a far different situation.

Mr. ROUSSELOT. Mr. Chairman, I want to compliment the gentleman from Michigan (Mr. STOCKMAN) on the statement he has made about the impact of the deficit in the capital markets because the Treasury is out there borrowing so much money to fund our deficits. It just so happens that the present Treasurer has complained about the problem of having to borrow so much, and so has the President about being forced to borrow from the private market to such a high degree. It does damage the availability of funds for the private sector to properly finance its plant expansions for equipment and for new jobs. So that another major benefit of the Holt amendment is that the deficit suggested here is enough less than the one proposed by our chairman's resolution, that it creates less pressure on the marketplace.

Mr. STOCKMAN. In the current year, and also we have a 4 year phase-down, so it is a clear signal to the credit market that the Treasury is getting out. And I think that is what the Federal Reserve Board is trying to do now.

Mr. ROUSSELOT. The gentleman from Michigan (Mr. STOCKMAN) has done an excellent job in explaining this.

Mr. RHODES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this has been a stimulating and I think very informative debate. I congratulate all of the Members on the level at which it has been conducted. I think that the issues are pretty well outlined. I just desire to take a few minutes, if I may, to put them into what I hope will be some kind of order.

To begin with, I think the issue before the House today is the sense of priorities which the American people have now come to have.

I agree with the gentleman from Connecticut (Mr. GIAIMO) and I agree with the gentleman from Maryland (Mr. MITCHELL) that there are a lot of important programs in this Government and that some of them undoubtedly are going to receive less if either the Holt amendment or the committee bill is adopted. And I regret that because, as a matter of fact, the programs deserve to be continued. But the sense of priorities of the American people, if I understand it correctly, and I think I do, must be considered.

Whereas the people used to look at all of these programs it would be nice to have, they are now looking at the real situation we are in. They realize our first priority has to be defense, but the second priority must be to save the economy of this country. That is what this debate is all about.

The priority of the American people, unless I am badly mistaken, the thing that they expect the most from this body is to balance the budget just as soon as we can balance it. That is what the Holt amendment is all about.

Mr. Chairman, there is a program which was put together by the members of the Committee on the Budget on the Republican side to balance the budget within 5 years.

If it were possible I would like to balance the budget this year and I think most of the Members of the House would. However, we recognize that you cannot start from a $51 billion deficit and balance the budget in 1 year without doing violence to our economy.

Mr. Chairman, we try to lead the clay pigeon as one does in skeet shooting. We tried to arrange things so that the revenues and the outlays will meet at a certain point in the near future. The best point, is somewhere in fiscal year 1983.

That, again, is what the Holt amendment is all about.

Mr. Chairman, we attack the problem in two ways. In the first place, by cost containment. We do not believe that the people of the country's sense of priority requires at this time there be no brand-new programs. In fact, we believe that the people of the country do not even want the old programs to be increased as far as size is concerned until we balance the budget.

That is the No. 1 priority. But also, in order to keep the economy rolling along and humming at a good rate, we think a tax cut is absolutely necessary. The Holt amendment and the Republican plan to balance the budget in 1983 does include the Kemp-Roth tax cut. This tax cut will act as a stimulus to the economy, and I do not think there is any doubt but what that stimulus will result in more money going into the Treasury, more dollars, because of the added velocity to the economy. So we attack the economic problem from that angle, too.

We not only do not increase the amounts of money which will be spent by the Government insofar as percentage is concerned but we also increase the amount of revenue in dollars.

Mr. Chairman, there will be a very important document which will be unveiled tomorrow called the House Republican legislative agenda.

I am going to give the Members a preview of part of it. In that legislative agenda we say that the cost of Government can actually be reduced. We say it can be reduced if the Congress of the United States recognizes its duty for legislative oversight. The Congress has not done anything more than give a lick and a promise to legislative oversight. When a new problem came up, what did we do? We threw money at it, or we threw a new agency at it. It is time we look at all those new agencies and make sure they are needed. Many of them probably are not. Maybe some of them can be consolidated. In that way we can save not only money but save the American peo-

ple from some of the harassment they have been put to because of the requirements for reporting to so many of these agencies.

Mr. Chairman, this is part of a very well-thoughtout, very well planned program to bring the economy of this country onto the proper line of march, to do the things which are required for this country.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words.

As we prepare to vote in this very important amendment, let me give the Members four sets of figures to ponder before they vote. The figures that have been proposed by the revision of the chairman of the committee would have our budget authority at $561.2 billion, outlays at $490.5 billion. The Senate committee budget resolution which has been recommended by the committee provides for $557.7 billion in budget authority and outlays of $489.5 billion.

The Holt amendment would provide budget authority of $539 billion, outlays of $480 billion, and the House-passed appropriation bills provide budget authority of $519 billion and outlays of $469.8 billion. So if the Members vote down the Holt amendment, they will be in effect voting for the highest of these four figures, and I do not believe that we want to do that.

[In billions of dollars]

	Holt amendment	Committee substitute amendment	Senate budget committee	House-passed appropriations and permanent spending authority
Budget authority	$539.0	$561.2	$557.7	$519.0
Outlays	480.0	490.5	489.5	469.8

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Maryland (Mrs. HOLT) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mrs. HOLT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 201, noes 206, not voting 25, as follows:

[Roll No. 707]

NOT VOTING—25

Burke, Calif.	Huckaby	Sisk
Conyers	Jenrette	Skubitz
Crane	Kasten	Stokes
Dellums	Le Fante	Teague
Dent	Lloyd, Tenn.	Thompson
Flowers	McDonald	Wilson, C. H.
Flynt	Miller, Calif.	Young, Alaska
Frey	Risenhoover	
Garcia	Shipley	

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Thompson against.

Mr. Huckaby for, with Mrs. Burke of California against.

Mr. McDonald for, with Mr. Le Fante against.

Mr. Kasten for, with Mr. Stokes against.

Mr. Frey for, with Mr. Dent against.

Mr. Crane for, with Mr. Garcia against.

Mr. Young of Alaska for, with Mr. Miller of California against.

Mr. Skubitz for, with Mr. Dellums against.

Mr. Flynt for, with Mr. Shipley against.

Mr. JOHN L. BURTON changed his vote from "aye" to "no."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MATTOX TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. MATTOX. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. MATTOX to the amendment in the nature of a substitute offered by Mr. GIAIMO: In the matter relating to the appropriate level of total new budget authority reduce the amount by $223,000,000;

In the matter relating to the appropriate level of total budget outlays reduce the amount by $673,000,000;

In the matter relating to the amount of the deficit reduce the amount by $673,000,000;

In the matter relating to the appropriate level of the public debt reduce the amount by $673,000,000;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, reduce the amount by $673,000,000.

In the matter relating to function 500: Education, Training, Employment and Social Services reduce the amount for budget authority by $135,000,000; and reduce the amount for outlays by $335,000,000.

In the matter relating to function 850: General Purpose Fiscal Assistance reduce the amount for budget authority by $88,000,000; and reduce the amount for outlays by $338,000,000.

Mr. MATTOX. Mr. Chairman, the amendment that I am offering along with Mr. REGULA is an amendment that we believe conforms to the actions that we expect the House and the Senate to follow in the future in the budgetary process. Basically, the amendment to the second budget resolution would reduce the aggregate budget authorities by $223 million, and aggregate outlay figures by $673 million.

The amendment goes to two budget functions. First, it reduces function 500, which is education, training, unemployment, and social services, by $135 million in budget authority and $335 million in outlays. This would reflect the House actions that were taken when we passed the Jeffords amendment to the comprehensive training bill, the CETA legislation. In effect, it would conform the House budget resolution to that action.

Now, let me repeat that again. That would be a reduction of $135 million in budgetary authority, and $335 million in outlays. That would conform the second budget resolution to the action we took on the Jeffords amendment on the CETA legislation.

The second part of the amendment would reduce function 850, General Purpose Fiscal Assistance, by $88 million in budgetary authority and $338 million in outlays. That will leave a total of $700 milion in budgetary authority and $700 million in outlays, of which we might reasonably expect to be spent on a countercyclical-type assistance program.

This is approximately the estimated amount carried by the Senate Finance Committee in a compromise program that they have announced they will be working out. They have not worked out the entire problem, but I visited with the Treasury Department, and they have been in constant contact with the Senate Finance Committee. Treasury indicates the approximate estimated amounts would be at the level in my amendment.

We are offering this amendment because both of these programs are overfunded in the resolution that came out of the Budget Committee. We feel they should be cut back actually to reflect the actions of both the House and the Senate to decrease. Our Government Operations Subcommittee has indicated they are not in favor of passing any legislation, but we are assuming some legislation might be passed, and we are funding at the maximum level we feel would be possible in the legislation. We are also setting a ceiling for the CETA public works programs in line with what we expect the anticipated House action will be.

In a moment I will yield to the gentleman from Ohio (Mr. REGULA), who will explain the countercyclical portion to a greater extent.

In asking the Members to support this amendment, I wish to point out that with its adoption we will, for the first time in 4 years reduce our budget deficit below $40 billion. The actual budget deficit should be $39.8 billion. We will have a lot of other opportunities, of course, but this will bring it below $40 billion.

Many of us have indicated this is the path we would like to get on in balancing the Federal budget. The adoption of this amendment combined with the floor and committee actions will reduce by 2.3 percent from what was targeted in the first resolution. Members have asked for this reduction, and the Budget Committee resolution and this amendment give reductions of $3.128 billion.

The CHAIRMAN. The time of the gentleman from Texas (Mr. MATTOX) has expired.

(By unanimous consent, Mr. MATTOX was allowed to proceed for 2 additional minutes.)

Mr. MATTOX. Mr. Chairman, let me explain a little more in detail about what I mean. The controllable discretionary programs, other entitlements, make up about 28 percent of our original targeted budget of $500 billion. This means about $140 billion is controllable.

We have proposed with the adoption of this amendment, counting other floor actions already taken, a cut in the controllable expenditures in this budget of 2.3 percent. I think this is the direction the American people have been asking us to go.

I am dedicated to that direction. I would like to see us take this action to reduce the deficits below $40 billion. I think this would have a great impact on the value of the dollar abroad and give great confidence to the business community in the States.

Mr. REGULA. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I hope the Members will listen carefully. What we have here as proposed by the gentleman from Texas and myself is an amendment that will cut 30 percent in expenditures in two items in the budget. It will do it without affecting programs. The amendment we have reflects actions already taken by this body and also actions taken in the Senate thus far.

I would like to speak particularly to the subject of countercyclical funding. In the budget resolution, when the second budget resolution was adopted, I offered an amendment in committee that was supported by all of the Republicans and several of the Democrats to effect the reductions in countercyclical that are proposed in this amendment. Since that time the case is even better than it was at the time of the committee hearings in light of subsequent actions by this body and the other body. I am pleased that the majority is offering the Regula amendment from the committee as part of the overall reductions proposed in the amendment today.

I would like to address the section of our amendment dealing with countercyclical funding.

I believe the House is faced with a real quandry insofar as setting spending levels regarding this program. We still have no authorization on which to base any cost estimates. The unemployment rate has successfully remained at strong lows in the past 6 months, reducing the need for countercyclical aid and the program is producing substantial carryover balances, approximately $250 million for 1978.

In other words, I believe things have changed since the first budget resolution and this should be recognized in the second one. That is part of the reason for a second budget resolution. If we do not make countercyclical assistance funding compatible with what is actually happening, then our efforts are a mere mockery of our responsibilities.

Let us look first at the authorizing situation. The House has deferred any action on a new bill. Only last week the Senate Finance Committee approved its reauthorization on countercyclical which still does not have an official cost estimate. Unofficial estimates range from $600 to $700 million. That figure is what we recognize in the amendment that is before us. Certainly it is considerably less than the President's original request of $1.038 billion in outlays and $788 million in budget authority. We can refer to the Senate Finance Committee's action only very loosely at this point.

Another factor in support of this amendment at this point is that less funds are now needed. The original purpose of this assistance in this program was to aid cities temporarily—and I emphasize "temporarily"—in distress due to high unemployment.

Let us have a look at the change nationally that has occurred in the past year. The seasonally adjusted national unemployment rate for the months of January to July in 1977 were: January, 7.4 percent; February, 7.4 percent; and on down to July when it was 6.9 percent. For 1978 we find a real drop: From January of 1978, 6.3 percent and moving downward to 6.2 percent in July 1978.

For a program that is triggered by unemployment figures, these reductions have an impressive impact.

If we continue to overfund the countercyclical assistance funding regardless of fluctuating needs, we are encouraging States and cities to use it as nothing more than extended revenue sharing. This is not the intent of the program. This is especially disconcerting when the money is going to States with surpluses in their budgets.

In the committee testimony, Chairman Schultze, of the Council of Economic Advisers, indicated that the States have something like $31 million in surpluses.

If we do not pass this amendment, we will see more carryover in unobligated expenditures in countercyclical programs. The real estimate is that in fiscal 1978 there will be a $250 million carryover.

By not reducing the resolution we are condoning this problem.

Our reductions in countercyclical funding, as suggested by the gentleman from Texas, in countercyclical funding, conform the program to the levels ap-

proved by the Senate Budget Committee. By recommending this amount, we are simply bringing countercyclical funding to the realistic level of the proposals before us. If we do not remove the excess that is now in the resolution, you can be sure that it will float around in that budget until it is used for something else—something for which it was not intended.

There is another factor in support of our amendment.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. REGULA) has expired.

(By unanimous consent, Mr. REGULA was allowed to proceed for 2 additional minutes.)

Mr. REGULA. Mr. Chairman, there is another factor in support of our amendment. It is designed to give spending directives to the authorizing and appropriating committees. This is needed in the case of countercyclical assistance. The funding levels established are no longer compatible with reality. We have a great opportunity today and also a great responsibility to remedy some of this problem with this amendment. In effect, by adopting these levels on countercyclical outlays and budget authority, we are saying to our committee what should be a reasonable amount to be spent for this function. I think that is the proper function of the Committee on the Budget.

Mr. Chairman, I urge all of my colleagues to support the amendment.

Mr. MITCHELL of Maryland. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, what we have before us is another regular ruthless run—that is with an "r"—against job-training programs and employing people.

Hold on, this is the precursor to another even more ruthless run that will be coming up in the form of another amendment at some time in the near future, I think.

The thing which I find so terribly wrong about this approach is that I believe most of the Members of the House who want to vote for this—and they are going to vote for it—will do so on the basis of all of the allegations about abuse and misuse of funds. I think that will be an emotional vote rather than a vote based on facts.

Mr. Chairman, as we look at the facts, is there any economist in America who can predict with any reliability that the unemployment rates are going to stay where they are or will go below that?

Mr. Chairman, there is no economist in this country who can predict that unemployment rates are going to remain where they are or will fall below the present rate. That cannot be done.

Above and beyond that, Mr. Chairman, does anyone mean to tell me that the Members of this House, the Members of the House and the Senate, are going to be satisfied that a 6.2-percent unemployment rate is acceptable in this Nation?

Whatever happened to the idea of the work ethic which I talked about earlier in another debate? How can we be complacent and satisfied with a 6.2-percent unemployment rate?

That is a fact, not the emotional matters associated with abuse and misuse.

Mr. Chairman, let us look at fact No. 3. I know I am fighting a losing battle. I know that this is going to be voted for; but when the Members vote for this regular ruthless run, I hope they will take these facts into consideration.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, may I ask the gentleman whether he is referring to the CETA portion of this amendment or to the countercyclical portion.

Mr. MITCHELL of Maryland. I am going to address both of them.

Mr. REGULA. I recognize the alliteration the gentleman is using here, if that is the right word. I want to know which part of the amendment the gentleman is speaking to.

Mr. MITCHELL of Maryland. Actually, it is both parts, really both countercyclical and CETA.

I would appreciate it if the gentleman would let me finish my statement.

Mr. REGULA. I hope the gentleman will let me share some of the responsibility here.

Mr. MITCHELL of Maryland. All right, then, I will yield to the gentleman later, if he wishes.

Mr. Chairman, if anyone is proud of the fact that America is accepting a 6.2-percent unemployment rate and thinks it is a good thing, then let us look at the black unemployment rates. I have been reading about on this on the floor month after month, and year after year. The rate is 12.5 percent. The House is going to say, "That is all right. Leave it right there. That is good for America. It is 12.5 percent."

Mr. Chairman, if we reduce the CETA jobs and if we go blithely along with this reduction in countercyclical, what we are saying is that it is perfectly legitimate for this country, the greatest democracy in the world, to accept an unemployment rate of 12.5 percent for its largest minority or what is nearly its largest minority.

That is a fact. Above and beyond that, the gentleman talks about the action that the Senate Finance Committee has taken or will take. There has been no final authorization on CETA in this House. When did we become so clairvoyant that we could predict the ultimate resolution of this problem in the other body? Those are facts that we have to deal with, rather than the emotional pull of a regular run against training and employment programs.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. WEISS. I appreciate the gentleman's yielding.

I want to associate myself fully with his comments. Although for most of the people of this country the recession may be over, in many of our older, larger cities the recession is still riding high. In New York the unemployment rate is still in excess of 8 percent, and that is across the board. As far as the minority areas are concerned, it is in excess of 15 percent. As far as youth in those minority areas are concerned, it is around 40 or 45 or 50 percent. It seems to me that when we take the position that simply because national figures look good that we can stop to look at what is happening in areas of greatest need, we as a nation are in very serious trouble.

I appreciate the gentleman's yielding and his comments.

Mr. MITCHELL of Maryland. I thank the gentleman for his comments. Let me come to the conclusion of my argument against this proposition.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of Maryland. Is it not ironic—and, indeed, it is more than ironic; it is almost tragic—that at the very time when the authorizing committee for CETA has tightened up its program for the first time so that it specifically targets for the very poor, the very disadvantaged, at that very moment, is it not ironic that this House is going to blithely act to preclude reaching out to help the very groups that we talk so much about that need to help? Those are the minorities, the poor, the disadvantaged. It is kind of tragic and ironic that, at the moment a legislative committee has taken the action to undo all of the abuses that obscured the goodness of the program and denied access to that program of those who need it the most, at that very moment we are going to decide to go ahead and cut. I think it is sad. I think it is tragic.

My talk down here is not going to change a single vote, but maybe some day—some day when we reap the whirlwind for keeping blacks and poor and minorities unemployed year, after year, after year, maybe when we reap that whirlwind, we will understand the damage we will have done by voting for this amendment, which is a regular run against those who are unemployed.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Is it not correct that the House subcommittee by a vote of 7 to 6 has rejected all countercyclicals at this point?

Mr. MITCHELL of Maryland. Yes.

Mr. REGULA. Would it not be proper to call this the Regula renaissance?

Mr. MITCHELL of Maryland. Let me qualify how I am using the term "regular." It is r-e-g-u-l-a-r. No, I was not using the gentleman's name, of course.

But how many times in the history of this body has the subcommittee taken an action which has been turned around by a full committee? My time is nearly gone, and the gentleman has many effective arguments on his side.

Mr. REGULA. If the gentleman will yield further, would the gentleman also agree that the unemployment rate is presently going down?

Mr. MITCHELL of Maryland. Of course, I would agree to that but—but with a caveat—it went down before, and it went back up. There is no one who can say with absolute surety or any minimal degree of surety that the trend is going to continue.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. REGULA, and by unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 3 additional minutes.)

Mr. REGULA. If the gentleman would yield further, would the gentleman agree that the funding level proposed in this amendment is about the same as the actual expenditures in fiscal 1978 have been—$700 million?

Mr. MITCHELL of Maryland. Yes, I would agree to that, however, again with a caveat. The gentleman has got to remember that the actual spending levels on many of these programs have been slowed down simply because we were taking the time to look at abuses and problems in the program.

Mr. REGULA. Would the gentleman agree that New York City, as mentioned by the gentleman from New York, would receive money under this proposal in view of the fact that the unemployment rate is 8 percent there and that New York City would in no way be affected?

Mr. MITCHELL of Maryland. Mr. Chairman, I cannot speak for New York City. I speak for my own city of Baltimore where we will not get countercyclical, because the rate of unemployment has gone down on the average, but not for black people.

I am not going to be parochial about this. I am concerned about people who are out of work and hurting wherever they are, whether it is in Ohio, New York, or anywhere in America.

Mr. REGULA. Mr. Chairman, if the gentleman will yield further, I am concerned about that, too. That is why I am putting it at this level.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Chairman, I would like to address the concerns the gentleman from Ohio describes in the countercyclical funds. I do not know about the CETA part of the amendment; but I am on the subcommittee the gentleman referred to that dealt with the countercyclical program.

I think it is a very different program than the administration sent up this year from last year. It was not a countercyclical program in the sense that last year's program was a countercyclical program. I would like to tell the gentleman that the subcommittee dealt with that measure in a very, very shabby way. The program, a very important program for the cities, was voted down on a motion to table about 20 minutes into the markup meeting. I do not think there was ever any opportunity to deal with the issues or to amend it. That the subcommittee voted it down is totally irrelevant to what we shall be doing today because the subcommittee did not really consider it.

But I would like to address the substantive issue, which is essentially that what our cities face today is a combination of two things. One is inflation; second is a taxpayer's property tax revolt. It is less a concern about unemployment than it was a year or 2 years ago.

I would concede to the gentleman that countercyclical in its present sense is really not needed; but what is needed is supplemental fiscal assistance, which is what the program was and it was funded to the tune of $1 billion. We should have that program and we should have that full amount of $1 billion, because our communities are really caught in a squeeze between prices and property taxes.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. MITCHELL) has again expired.

(By unanimous consent, Mr. MITCHELL of Maryland was allowed to proceed for 1 additional minute.)

Mr. MITCHELL of Maryland. Mr. Chairman, I cannot yield further.

Let me just say this. This is the amendment which will build the wooden part of the guillotine for those who are unemployed. Later we will get another amendment which will bring out the blade to be put on the guillotine to chop off our heads. Go ahead; if that is your preference, do it.

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to oppose this measure, because I believe that the modified countercyclical program that has been referred to is one that is badly needed by those areas of the country where there are still very high rates of unemployment, such as my own.

I am one of those who is not prepared to give up on the pending legislation. I think it is very clear that if there is any significant increase whatsoever in the levels of unemployment, and we certainly had a very sharp upturn recently on a month-to-month basis, the funds provided by this amendment would be inadequate to meet that situation.

I, therefore, urge that the amendment be defeated.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I would be delighted to yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I just point out that what is in the Mattox-Regula amendment will continue the funding at the level of fiscal year 1978. Therefore, with the unemployment rates that have been alleged for New York City, it would have no impact on the funding for that city. I think this is an important feature here. We are simply saying that countercyclical should not be expanded and should be maintained for the areas of high unemployment, but should not be general revenue sharing.

Mr. GREEN. Mr. Chairman, if I may reclaim my time, I will yield to the gentleman from Wisconsin (Mr. ASPIN) later.

My understanding is that even with a 6.2-percent national rate of unemployment, New York City would not get all the funds that would be coming to it under the formula in the Senate committee bill, giving the amount to which this amendment would limit the program.

Mr. ASPIN. Mr. Chairman, if the gentleman will yield, let me just address the issue of New York, because that has come up a couple of times in this discussion.

I think it is important to understand that what the amendment the gentleman from Ohio (Mr. REGULA) has proposed and the gentleman from Texas (Mr. MATTOX) has offered would do is indeed to keep the funding next year at roughly the amount of money provided this year. So New York would not be hurt in that sense, as compared to last year. However, it would be hurt, compared to what the administration proposed and what the subcommittee so unceremoniously dumped.

That program would have helped New York a great deal. We have the funding in this budget resolution right now for the President's program, which was so unceremoniously dumped by that subcommittee, and that would be of a great deal more benefit to New York.

So I think what the gentleman in the well says is right. If he wants to help New York and if the gentleman from New York (Mr. WEISS) wants to help New York, the correct thing to do would be to vote for the budget resolution as it now stands and not for the amendment.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I just want to point out to the gentleman from Wisconsin (Mr. ASPIN) that the amendment only reduces the President's proposed budget authority by $88 million.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have studied this amendment very carefully, and I would recommend to my colleagues that they support the amendment offered by the gentleman from Texas (Mr. MATTOX) and cosponsored by the gentleman from Ohio (Mr. REGULA).

What the amendment does is basically to conform the budget resolution to recent House action in one instance and to conform the budget resolution to reality as a result of some other actions which have taken place in recent days.

Let me explain that. The amendment offered by the two gentlemen would reduce budget authority in CETA funds by $135 million, and it would reduce outlays by $335 million, providing for 616,000 public service jobs and transferring some funds to the youth and private sector areas.

This is what the House voted on some days ago when it took up the CETA legislation.

So this would be conforming our resolution, which was put together prior to

that time. It would conform it to what actually happened in the House.

The other thing that this amendment does is it addresses the question of supplemental fiscal assistance and what we in the vernacular call countercyclical assistance. As the Members know, the House of Representatives has not acted on this item of legislation; the other body has. The budget request that we are carrying is the $1,038 million figure. Since the House of Representatives has not acted, since the committee has given every indication that it is not about to act in the remaining weeks, and since the other body, which is the only one that has acted in this regard, is somewhere in the neighborhood of between $500 million and $700 million, rather than the $1 billion, the $700 million figure which the other body uses is the Treasury's estimate of what it would cost to implement the supplemental fiscal assistance program.

That is what the amendment offered by the gentleman from Ohio (Mr. REGULA) and the gentleman from Texas (Mr. MATTOX) would suggest, that we provide budget authority in outlays for $700 million for supplemental fiscal assistance, with the hope that the other body and this body will get together and enact that type of program.

So, Mr. Chairman, I think it would be wise and proper to amend the budget resolution to make the changes provided for by this amendment.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would just like to state that I agree with the chairman of the committee and urge that the House support the Mattox-Regula amendment.

As everybody knows, I have stood on this floor four times and tried to increase funding for CETA. But this is a difficult situation. This amendment responsibly reflects what we think the House is going to do in the end. In fact, it reflects what the House has already done in one instance, and that is what the House budget resolution ought to do.

We should not play games, but we should accept what the realities are of the situation; and the realities would dictate, I believe, support of the amendment.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from California.

Mr. JOHN L. BURTON. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman this question: Does this amendment reflect what the Senate did?

Mr. GIAIMO. In the sense of CETA, it reflects what the House did. Insofar as it addresses itself to supplemental fiscal assistance, it addresses the realities of the House. The House has not acted and does not intend to act.

Mr. JOHN L. BURTON. What about the other body?

Mr. GIAIMO. The other body has acted in committee. I do not believe it has come up on the floor as yet. There is a difference of opinion as to whether the funding in the other body should be $500 million or $700 million. We think—our best estimate is—that they will be in the $700 million figure. And, therefore, we also make the estimate that perhaps, and most likely, this will be enacted into law and we should make provision for it, because it is essential. As the gentleman from Maryland, the gentleman from Wisconsin, and others, have indicated, this is an essential program. The cities are in need. We have to make provision for countercyclical or supplemental fiscal assistance. The only thing is that we think the correct figure will be $700 million rather than $1.038 billion.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. GIAIMO) has expired.

(On request of Mr. ASPIN and by unanimous consent, Mr. GIAIMO was allowed to proceed for 1 additional minute.)

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Wisconsin.

Mr. ASPIN. I thank the gentleman for yielding.

Mr. Chairman, I think, basically, what the gentleman from Connecticut and what the gentleman from Wisconsin (Mr. OBEY) are saying about the realities is correct, and I think the gentleman is correct in saying that the Senate proposal is probably closer to $700 million than $500 million. So what it means is that the amount of money is only $300 million less than what we had in the bill which was dumped by the House committee. And as the gentleman from Ohio pointed out, that is not a great deal of money.

Mr. Chairman, I would like to point out to the members of the committee, however, that behind that reduction in money is a very great difference of distribution systems. The formula by which the $1 billion supplemental fiscal assistance would have been distributed is very different from the formula by which the $700 million under countercyclical will be distributed. So where it is only $300 million less, it is going to mean a great deal of difference when it comes down to what each community gets.

Mr. GIAIMO. The gentleman is correct. But I would not want the record to indicate that we think that $300 million is not a great deal of money. I know I think it is a great deal of money, and I am sure the gentleman from Wisconsin and the gentleman from Ohio think it is too. It is a huge amount of money. But we think it is the correct figure.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Mr. Chairman, it is a 30-percent reduction over the present resolution, which is substantial. I think the gentleman from Wisconsin is correct. It does reflect the fact that we feel countercyclical ought to do what it is designed to do, and that is to speak to areas of high unemployment and should not be converted to general revenue sharing. And that, in effect, is what the President's proposal does.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I agree with the point that has been made, that the countercyclical is a crucial program for the survival of the cities, the urban areas, and other areas of this country that are especially hard hit by unemployment. I think it is essential that the program be funded fully.

Mr. Chairman, I am disappointed by the amendment offered by the gentleman from Texas and I oppose it. I can understand the motivation behind it, but it will have an adverse impact on many areas of the country including my city that need that assistance desperately.

Mr. CONABLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I would like to associate myself with the remarks of my chairman that were just made in the well. I also would like to come out in favor of something called truth in rhetoric or truth in legislation.

We are dealing here with two programs which were essentially stimulative programs originally.

I would like first to deal with the so-called countercyclical stimulus program, the grant program for cities. It has been pointed out that this program was originally designed for a few large cities. It was based on the assumption that if there is in the city a high unemployment rate, the tax base in that city has become eroded and city services are difficult to maintain. It is in no way tied to employment, except that the employment rate is the triggering device by which we determine what cities get this particular aid. There is not one new job tied to the countercyclical aid program.

Of course, the city, if it gets additional money, is going to spend it in services, because that is what cities provide. But because the rate of unemployment has dropped, a lot of cities that otherwise have qualified for countercyclical aid no longer qualify.

And so, a proposal was made to reduce the triggering point and to greatly increase the number of communities that would be able to participate in countercyclical aid. The result would be a much wider distribution, one converting it from a program which has only a remote connection to new employment, to a revenue-sharing program, in effect, that has no such connection.

I happen to be one of those people in this House who supports revenue sharing, but I am fed up with revenue-sharing programs that are being promulgated under the guise of some sort of hard-core unemployment program. We have got to bring our rhetoric into alinement with the realities of programs of this sort if we are to have any credibility in the way we legislate. So much for countercyclical aid.

As to CETA, CETA is itself becoming a revenue-sharing program, and we all

know that. The only way we can justify continuing CETA at the same level and extending countercyclical aid when we have some improvement in the economy is by saying, "But our community needs it," and that is another argument for revenue sharing. Let me tell my colleagues that if we continue to go this route, pretending that we are doing something that we are not doing at all, and mislabeling the legislation we are putting forth here on the floor of the House, we are going to get so locked into these things that people are not going to understand our budget process at all; they are not going to understand our legislative process at all; they are going to find very little correlation between the rhetoric and the reality of our national programs.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I appreciate the gentleman from New York yielding to me. I would like to associate myself with his very accurate and eloquent remarks in describing our present countercyclical program.

I would like to point out that in the last year the GAO has done four separate studies of the countercyclical program, and has concluded that for all practical purposes countercyclical has been a wasteful failure. The GAO said that it had three purposes to begin with: The first was to provide quickly an economic stimulus into the economy; second, to target selectively the assistance to areas of need; and third, that the program would phase itself out when it served its anti-inflationary purpose.

The GAO said that the program had failed in its first two purposes, and by extending the program we would be defeating the third purpose, which was to phase it out. It seems to me that what we should have been doing is to reduce this budget amount to zero, not just to $778 million, because as the gentleman has accurately stated, the fact of the matter is that the countercyclical program was targeted at 17,000 communities in America, which were to be included.

Under the new proposal that was sent over, which was supposed to be better targeted, instead of having 17,000 communities we have 28,000 targeted communities. That means that 70 percent of all of local government would be deemed to be in distress and in need of targeted fiscal assistance from Federal taxpayers.

Mr. Chairman, many of our local and State governments in the United States are operating with surpluses, while we are talking about trying to reduce the Federal deficit to under $40 billion this year.

Mr. CONABLE. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent Mr. CONABLE was allowed to proceed for 2 additional minutes.)

Mr. CONABLE. I do not have any doubt that this money will do some good. I do not have any doubt that it will be a benefit to communities that need money. I must point out, however, that nationally, in the aggregate, local government is in surplus, and certainly far better off than it was a year ago or 2 years ago when these programs were first promulgated. But let me say, Mr. Chairman, that there would also be some good derived by simply shoveling the money out of an airplane without any accountability of any sort, except for the fact that we have to take the money first in taxes or indirectly from the taxpayers by printing it and devaluing their savings.

And so I hope that a balance will be struck here and that we will find some way of either being more truthful about what we are trying to do, and approach the problems of our communities directly through the avenue of revenue sharing and abandon these so-called employment programs which if they are continued can only damage the credibility of our process.

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address my comments to the gentleman from Georgia (Mr. LEVITAS) and the gentleman from New York (Mr. CONABLE), if I could get their attention, because I think it is important we look at this.

It is unfortunate that we are here discussing this program today, because if we had had a chance to debate it on the floor we could have settled a few of these issues, or even if we had had more than 15 minutes to debate it in the markup in the subcommittee we might have settled some of the issues.

I am rather troubled by the remarks of the gentleman from New York (Mr. CONABLE), who worries about the wording, because he keeps calling it the countercyclical program when the proper title is supplemental fiscal assistance.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield, does the gentleman from Wisconsin believe there is a change in the basic concept?

Mr. ASPIN. Absolutely.

Mr. CONABLE. In other words, he now considers it a revenue-sharing program?

Mr. ASPIN. No, because it does not distribute the money in the way the revenue sharing does. It is a different formula. The countercyclical program distributed money on the basis of unemployment and unemployment only. Revenue sharing distributes it on the basis of tax effort among other factors. The supplementary fiscal assistance, which is the program we are supposedly talking about, distributes it on the basis of four factors: unemployment, growth in per capita income, growth in employment, and growth in population. It is those four factors on which the supplemental fiscal assistance distributes the money.

In talking about the countercyclical program, the gentleman from Georgia commented about how the General Accounting Office found the program lacking and I would agree with that. I was opposed to that formula of the distribution program last year. It is no good to distribute money on the basis of unemployment only. We have to broaden it.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. Let me make my points first and I will yield.

What we have got is a supplemental fiscal assistance program, which is not a countercyclical program. The purpose of the supplemental fiscal assistance is to give some cities some help. Why? Because the cities need help. They need it for two reasons. No. 1, they are faced with inflation, as all of us are, but the costs of local government are going up due to inflation. And No. 2, with the property taxpayers' revolt, as in California, we can see what is happening. Any city is faced with that. Naturally when we broaden the scope of the program, more cities and towns get into the program because more cities and towns are affected.

It is not just unemployment. It is the total financial situation and the taxpayers' revolt, and the local government taxpayers require and ask that we do something about it. That is the situation then that we are trying to address. Do not claim this program is countercyclical.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I would absolutely agree that the supplemental fiscal assistance program is not countercyclical. Indeed it is a brand new permanent fiscal aid program to cities and counties around the country.

Mr. ASPIN. Exactly. That is why the General Accounting Office studies the gentleman cited earlier are not relevant.

Mr. LEVITAS. The President's urban program recommendations said this new program is to help the distressed cities and is targeted to them only. The fact is that the formula of this bill means we are talking about 70 percent of all cities in America now being distressed. That just is not true. There are distressed local governments and they need help but it is utterly wasteful to include 70 percent of all local governments in these programs.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield, it is not cities, it is municipalities. Almost every community is included, as in revenue sharing.

Mr. LEVITAS. The gentleman from Connecticut says that the $700 million which is being kept in the bill is to carry out not the administration's proposal but the Senate's bill. The Senate bill has two titles. The first title is the old countercyclical program which the gentleman from Wisconsin (Mr. ASPIN) opposed last year and this year has restated his opposition to it. Even title II is not the administration's supplementary fiscal assistance program. It is another last minute jerry-built wedge. It just takes $650 million and shovels it out.

Mr. ASPIN. The gentleman from Georgia (Mr. LEVITAS) knows why we are facing that bill over here from the Senate, because the gentleman from Georgia moved to table our bill in the subcommittee. So we may end up with this other program as the best we can get. It is not very good. I wish we could adopt the position of the gentleman from Maryland (Mr. MITCHELL). We ought to go with the full funding in this resolution

and pass it and then later pass the President's supplemental fiscal assistance bill.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I find a little irony in the justification for this bill in the property taxpayers' revolt in California under proposition 13 because I am sure that if the proponents of proposition 13 in California felt that they were voting for centralization of government, they would have had second thoughts about its passage. We should not be increasing taxes here to offset taxes rejected at the local level, or we are just making a mockery of the taxpayers' intentions. Besides that, the resulting centralization of government will vitiate our democracy.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. LEVITAS, and by unanimous consent, Mr. ASPIN was allowed to proceed for 3 additional minutes.)

Mr. CONABLE. Mr. Chairman, if the gentleman will yield still further, it is just possible that they are rejecting taxation on the ground that they do not want to have the growth of government at all levels continue unchecked.

Mr. ASPIN. The gentleman is not correct to say there is an increase in centralization because centralization is not the issue. The issue is whether we will help communities in this short run, and I think that is a further argument, the fact that it is a short-run program. The issue is that these communities face very severe inflation right now and face a property taxpayers' revolt right now. Communities in the face of that could use some assistance. I hope that we will give them some assistance in view of that.

If I thought that cutting this $700 million or this $1 billion would stop the inflation or cut taxes or stop the growth of government then the gentleman from New York would have an argument. It is not going to do it. It is going to give some slight assistance to these communities in the face of their needs because of the current economic situation.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding, and there are two points that the gentleman from Wisconsin (Mr. ASPIN) has just made that I really have a question about.

The first is that we have a property taxpayers' revolt in America. With reference to proposition 13, if you lived in California, going beyond what the gentleman said, would it not be nice to reduce property taxes under proposition 13 because you knew that Uncle Sam and the U.S. taxpayers' are going to come in and put more money in?

That does not make sense.

Mr. ASPIN. The gentleman from Georgia (Mr. LEVITAS) knows perfectly well that the supplementary fiscal assistance is not going to come anywhere near to the amount of money that will be lost to the State and local governments in California due to proposition 13.

Mr. LEVITAS. If the gentleman will yield still further, the other point is the gentleman says this is a short-term program. The fact of the matter is that countercyclical was supposed to be a short-term program but we have kept extending it and extending it. This new proposal is for new permanent programs.

Mr. ASPIN. It is not, it has a limited term. The reason we are going to be stuck with the countercyclical again is because the gentleman moved to table supplemental fiscal assistance in the committee, so we are ending up with the Senate cramming countercyclical back down our throats because of the action the gentleman took in the committee.

Ms. HOLTZMAN. Mr. Chairman, if the gentleman will yield, I think it is very important to point out that, although unemployment has been reduced on a nationwide basis, there are still pockets of high unemployment existing in the cities. These areas are going to need countercyclical aid, and we cannot ignore their problems.

Mr. JOHN L. BURTON. Mr. Chairman, if the gentleman will yield, I would just like to make the coment, first of all, with reference to the reduction after the State of California adopted proposition 13, that they are losing a lot of Federal funds through lack of maintenance, through lack of funding under revenue sharing, and I do not know how the gentleman from Georgia can say this will get them more money because it will get them less money, and I do not think my friend, the gentleman from California, JOHN ROUSSELOT, is going to bail them out.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am disturbed by what I hear in this House from time to time. An effort was made the other day to target moneys, $1 billion of the enormous $11 billion of the CETA program, into youth unemployment in our poor cities. It was resisted.

What we seem to be hearing today is that if the taxpayers do not want to pay taxes at the local level and they say so, we are going to fool them. We are going to raise them at the Federal level, and then we are going to send the money back to the cities so that they are right back where they started. We seem to think the people will not know it.

Mr. Chairman, there is a lot of duplicity here. We wonder sometimes why Congress is beginning to fall in the respect and esteem of the people of this country. This is why: because we keep trying to fool them. We never fool them. That is the extraordinary gift of the American people. They know exactly what we are doing. They do not know the names of the amendments, perhaps, but they know what we are up to.

We are saying, "If you do not want it, we will do it in another way. We will put it over down here, pull it out, give it to the localities, and you will get the taxes whether you like it or not."

Mr. Chairman, the deficit will go up and the service on the national debt. It has risen from $42 billion to $48 billion a year since I have been here.

What is the end going to be?

Mr. ASPIN. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Chairman, the gentlewoman from New Jersey (Mrs. FENWICK) is not correct. The supplemental fiscal assistance was put together long before proposition 13 passed in California. It was in no way an answer to proposition 13.

Mrs. FENWICK. Mr. Chairman, if I may reclaim my time, we now have what has been described as a brand-new $9 billion program.

Mr. ASPIN. No, no, not $9 billion.

Mrs. FENWICK. That is what it says.

Mr. ASPIN. It is $1 billion.

Mrs. FENWICK. That section is $1 billion. The section is $750 million, but that does not sound like peanuts to the folks back home.

Mr. GARY A. MYERS. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I may be confused, but I was listening to the debate on the floor. I thought the gentleman from Wisconsin (Mr. ASPIN) was just justifying the program on the basis of the reaction to proposition 13.

Mr. ASPIN. If the gentlewoman will yield further, Mr. Chairman, the reaction to proposition 13 is just the symptom. The decrease is that local governments are faced with increasing costs due to inflation, and they are faced with a very unfair and very unpopular property tax. That was true before proposition 13, and it is true after proposition 13.

Mr. GARY A. MYERS. If the gentlewoman will yield further, Mr. Chairman, I really do not know what the gentleman's support of the program is, then. He spent a considerable amount of time in the well in convincing us that the program ought to be brought out of committee and voted for as a part of this budget because of the proposition 13 situation. Now he is trying to convince us that proposition 13 has nothing to do with it because someone has taken him to task on that argument.

Mrs. FENWICK. We are going to have to speak clearly here, my colleagues. Are we going to increase the number of towns, cities, and municipalities dependent on the Federal Government and Federal revenues, or is this going to be a Federal system with the independent localities supplying their own funds? That is the question.

We have gone from 17,000 to 28,000 municipalities, according to the gentleman from Georgia (Mr. LEVITAS). Where is it going to end?

Every single town is going to ask for money in the long run. I know a town which is very much in trouble. The salaries of the councilmen have all been raised; they have been doubled. They have all been given a car and a chauffeur and an expense allowance. That is

going on in one of our most troubled cities.

Mr. Chairman, we cannot get a sense of reality in the operations of our town if we continue to fuel the feeling that money will come from the Federal Government regardless of the circumstances.

Mr. FOUNTAIN. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Chairman, I would like to answer what the gentlewoman has said by pointing out that Federal assistance to State and local governments has grown from $2.3 billion in 1950 to $7 billion in 1960, and to a present level of $80.3 billion. It is estimated that it will be $85 billion for the next fiscal year.

And we already have on the statute books a general revenue sharing bill which provides $6.1 billion annually going to local and State units of government. And remember—this is just one of the many grant programs included in the $80.3 billion now going out from Uncle Sam to local and State levels—almost 30 percent of their total operating budgets.

Mrs. FENWICK. I thank the gentleman.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, I would like to deal with statements made by my dear friend and respected colleague, the gentleman from Wisconsin (Mr. ASPIN), concerning the action in the committee.

The gentleman would have conveyed the impression that in a 20-minute consideration that entire matter involving the expenditure of some $1 billion in 1 fiscal year and $1 billion in another fiscal year was disposed of.

The fact of the matter is that notwithstanding efforts made by our committee to get the administration to work cooperatively with us and develop a responsible program, we did not get any program or any cooperation until the 11th hour. Without prior consultation, the administration sent up the brandnew supplemental fiscal assistance proposal. The committee held 3 days of hearings on the bill, hearing from witnesses from the public sector, the administration and others. Very inadequate statistical data was presented by the administration.

There were 2 days of two executive sessions and caucuses, and then before a vote was taken on my motion in the committee, three invitations were made by the chairman for people to offer amendments. No member of the committee ever circulated or discussed any proposed amendments at any time prior to the meeting. It was pretty clear that there was no way to make a silk purse out of a sow's ear at that point, and in order to save the House the difficulty and chaos of dealing with this situation in trying to rewrite complex, major $2 billion legislation on the floor, the subcommittee put this very bad bill to a merciful death.

What was this bill? What is this supplementary fiscal assistance? I have already pointed out it does not target need. It actually increases the number of covered local governments from 17,000 to 28,000, but who is covered by it? Let us see how this wonderful formula works, which was called a "mindless formula" by one expert on urban affairs from the Urban Institute, Dr. Peterson. Under this formula, because of the way it works, creating a brandnew and permanent program for a new type of revenue sharing to add to our deficit, for example, the town of Greenwich, Conn., in the State of our distinguished chairman of this committee, one of the wealthiest communities in America, which builds its schools and public buildings for cash and which does not even issue bonds, would get three times per capita the amount from the Federal deficit under this program that Yonkers, N.Y., would receive, yet Yonkers, N.Y., was on the verge of bankruptcy just 2 years ago. That is among one of many examples of the working of this mindless formula.

The way this formula is structured, a mindless formula, we are not targeting it to the places where there is need. We are not using a proven formula of general revenue sharing, but we are starting and launching a brandnew program which would start at $1 billion this year, and if history serves as any test and criterion for the future, in 5 years time we are talking about a $5 billion program.

Where do we stop? Where do we stop creating new programs and putting more of the Federal deficit to State and local governments who have surpluses and who are cutting back on what they are spending today?

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. LEVITAS was allowed to proceed for 1 additional minute.)

Mr. LEVITAS. Just to conclude, Mr. Chairman, I would hope that we would have the opportunity not merely to adopt this amendment which is offered by the gentleman from Texas (Mr. MATTOX) and the gentleman from Ohio, but really do something about this proposed new program and eliminate it and save the taxpayers approximately $1 billion this year alone. I hope we will have the opportunity to take action to eliminate supplementary fiscal assistance this year and let the Congress next year develop a true and meaningful countercyclical program.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. MATTOX) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. GIAIMO. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 271, noes 134, not voting 27, as follows:

[Roll No. 708]

NOT VOTING—27

Bonker	Frey	Roncalio
Buchanan	Huckaby	Runnels
Burke, Calif.	Jenrette	Shipley
Dellums	Kasten	Sisk
Dent	Le Fante	Teague
Edwards, Calif.	Lloyd, Tenn.	Thompson
Fish	McDonald	Wilson, C. H.
Flowers	Miller, Calif.	Young, Alaska
Flynt	Risenhoover	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Thompson for, with Mrs. Burke of California against.

Mrs. Lloyd of Tennessee for, with Mr. Dent against.

Mr. McDonald for, with Mr. Jenrette against.

Mr. Runnels for, with Mr. Le Fante against.

Mr. Teague for, with Mr. Risenhoover against.

Mr. Kasten for, with Mr. Dellums against.

Mrs. BOGGS, Messrs. BLANCHARD, TUCKER, and WYDLER, Mrs. HECKLER, and Mr. ROE changed their vote from "aye" to "no."

Messrs. CAPUTO, WALSH, McHUGH, and AuCOIN changed their vote from "no" to "aye."

So the amendment to the amendment in the nature of a substitute was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. LATTA TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. LATTA. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. LATTA to the amendment in the nature of a substitute offered by Mr. GIAIMO:

Strike all after the words "Budget Act of 1974," and insert the following:

That for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $450,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $19,900,000,000;

(2) the appropriate level of total new budget authority is $539,000,000,000;

(3) the appropriate level of total budget outlays is $480,000,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $30,000,000,000; and

(5) the appropriate level of the public debt is $828,300,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $30,300,000,000.

SEC. 2. Pursuant to Section 310 of the Congressional Budget and Impoundment Control Act of 1974, the Appropriations Committees of the House and the Senate shall promptly report to their respective Houses reconciliation legislation to decrease budget authority by approximately $22.5 billion to a level consistent with section 1(2) of this resolution.

Mr. LATTA. Mr. Chairman, I proposed this amendment after discussing it with the gentleman from Ohio (Mr. VANIK) and other Members in the Chamber, in an attempt to come up with a compromise that can pass this House, a compromise that even I could vote for. and that is saying a lot considering I have not voted for a budget resolution yet.

I am interested in reducing the public debt. For that reason, I am interested in reducing the deficit in this resolution. What I am proposing is a combination which takes the revised revenue figure in committee substitute, which is $450 billion, and the Holt figure on the outlay, which is $480 billion. This gives us a deficit for fiscal year 1979 of $30 billion.

If you are interested in reducing the deficit, then the $30 billion deficit figure in my amendment may appeal to you. If I sense the mood of this House, this resolution, as it is before us now, is in real serious trouble and if you are to pass a resolution I think the majority side had better give a little bit. We are giving a lot. Especially I am giving a lot when I say that I am prepared to vote for a resolution with a $30 billion deficit in order to get a $10 billion reduction in spending.

So I would hope that my good friend, the gentleman from Connecticut, would think very seriously before he rejects this proposal.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I will be happy to yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, I think it would be helpful to all who are hearing this debate, since the gentleman is using that chart, that we have the correct figure. You have the Budget Committee, for revenue, at $446.8 billion, it should be $450 billion. If you assume the committee substitute amendment that we are offering, that has to be corrected to $450 billion.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield, the only problem I can say to my chairman is that he has a substitute which is before the House, the $446 billion was the original resolution passed out in the committee so that the gentleman has clearly accepted our chairman's new figure.

Mr. LATTA. This is a perfecting amendment.

Mr. GIAIMO. Mr. Chairman, I am not faulting either of the gentlemen, who know full well what the correct figures are, I am only saying it may be extremely misleading to some of the Members who come in here and do not know the correct figures and see $446 billion when the proper figure is $450 billion.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I will be happy to yield to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, let me say that I came to this Congress with my distinguished colleague, the gentleman from Ohio (Mr. LATTA), and we have had voting records here over the years that have been just exactly the opposite.

Mr. LATTA. Amen.

Mr. VANIK. We are together now.

This amendment is a very important amendment. What it does in effect is to provide that we pay for the tax cut that was voted by this Congress just last week through a cutback of Federal expenditures.

As I explained in debate on the tax cut, this has a very serious effect on Government spending. It is going to be hurtful. It is going to hurt defense. It is going to hurt welfare, education, and health. But I think the most serious thing we have got to face in this country today is the solvency of our Government.

We must fight the inflationary multiplier that is operating in our society today. Every penny of the tax cut we voted for last week is going to come out of borrowed money. The amendment offered by my colleague, the gentleman from Ohio (Mr. LATTA) which I support, would pay for it by reducing Government expenditures.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. VANIK, and by unanimous consent, Mr. LATTA was allowed to proceed for 4 additional minutes.)

Mr. VANIK. Mr. Chairman, if the gentleman will continue to yield, I want to point out that the amendment pays for the tax cut by reducing Government expenditures.

I know this is going to hurt. It is going to hurt a lot of programs. It will affect all of our communities, but I think that this medicine is needed in order to restore the solvency and the integrity of this country. I urge the adoption of this amendment offered by my colleague, the gentleman from Ohio (Mr. LATTA).

The dollar is falling on the world markets. We can almost guarantee that because of the increase of the deficit by the tax cut the oil price is going to be increased by 8 or 10 percent because the dollar will probably be rejected as the oil-buying currency. When we have to pay for foreign oil in another currency, we are going to have an 8- or 10-percent increase in our cost.

Mr. Chairman, if this amendment has the effect of preserving enough integrity in the dollar to permit it to continue as the vehicle for the purchase of the energy which we continue to buy from abroad, it will pay for itself by slowing down the intolerable escalation of inflation. Otherwise we will face an increase in the cost-of-living, resulting from the increased cost of oil.

I think that our country needs this kind of fiscal responsibility.

Last week there were 57 Members of this House who felt that a tax cut should not be paid for out of borrowing, and we opposed it for that reason. Since we have decided on the cut, it seems to me that the only credible, responsible thing we should do is to reduce the cost of Government. We can do it. I think if we gird ourselves, we can work it out. We can change things. We can cut back. The budget process will have to adjust to this change, but I think it can be done. I think it must be done.

Mr. Chairman, if we are going to preserve the fiscal integrity which remains in our currency, the little bit of respect that the people of America and the rest of the world still has for the viability of our economy, we must do it.

Mr. Chairman, I urge my Democratic colleagues to support the amendment.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I am happy to yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I just want to say that I supported the gentleman on his views on the tax cut. However, I just cannot bring myself to vote for a $30 billion deficit. I am waiting for a balanced budget to come up through the Rousselot amendment.

Mr. LATTA. Mr. Chairman, let me reclaim my time and say that I am also waiting for a balanced budget.

Mr. Chairman, let me say that this is not the end of the road. We have a long way to go. We have to go to conference with the Senate, and the Senate is below us in budget totals. I would like to go to conference with figures below those of the Senate. I want to go over there with lower figures. This will give us the opportunity to do it.

Mr. Chairman, I think the American people want to see a cutback in spending. This is an opportunity to do that and also to reduce the amount of the debt from $40 billion to $30 billion.

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment, as I understand it, will maintain revenues at the figure which the committee and the House have recommended, $450 billion. It would cut spending by an additional $10 billion, and it would direct and mandate the Committee on Appropriations to find $22.5 billion in budget authority.

Let me explain that budget authority is appropriations, the authority to commit and authorize expenditures. It can be an appropriation or it could be entitlement. Outlays are driven by budget authority; and in order to get $10 billion in outlays, we have to get sufficient budget authority which will result in a $10 billion outlay reduction.

Therefore, the direction to the committee is, "Go and find $22.5 billion."

Let me say to those Members who are interested in national defense and who are interested in some of the other areas of defense and that kind of a priority, the Committee on Appropriations would find it very difficult to find reductions in our noncontrollable programs, in our mandatory programs, and 70-odd-percent of our budget is mandatory and noncontrollable. We are talking about the entitlement programs, unemployment compensation, social security, health programs, medicare, medicaid, and on and on. Where would they find this money, this $22.5 billion? They would find it in the controllable programs, in the discretionary programs. Let me just say the No. 1 discretionary program that sits out there in a large amount is defense and other programs of that type—highways and others. I say that this is not the way to legislate. This is a meat-ax approach, $10 billion in outlays which calls for $22.5 billion in budget authority reduction. It would destroy many of these very vital and worthwhile programs beginning with the defense program.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague for yielding.

As I understand it, not one single program will be cut—not one. There is no program for defense, education, health, or welfare—no program that is going to be cut. The only thing that is going to be cut is the increase in the growth of spending. In other words, we are trying to say, "Look, do not balloon the increases quite so big."

Mr. GIAIMO. All right, I will recoup my time. That means that defense, which is at $127 billion in budget authority, would go back to last year's figure. How much was last year's figure in defense—somewhere around $118 billion. It means that the veterans add-ons which were made this year of several billion dollars would go back to what we had before that. The gentlewoman from New Jersey (Mrs. FENWICK) is wrong. This would mandate reductions in outlays. It would literally say, "You will reduce outlays by $10 billion."

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my chairman's yielding.

First of all, as it relates to budget authority, my colleague, the gentleman from Ohio (Mr. LATTA), who is very familiar with the authority provisions that we all are faced with, provides for a budget authority of $539 billion. That is a substantial increase over last year. It is clearly higher. So he has not "terminated" or done great damage to the authority process. It is clearly less than what the original committee budget figure was of $561 billion, but it is over last year's authority figure.

Mr. GIAIMO. I am not going to yield to have you make a long speech.

Mr. ROUSSELOT. No, but I want to comment on the authority. There is adequate increase in the authority.

Mr. GIAIMO. All right, I will recoup my time. We have been in this debate 3 hours.

I will say to the gentlewoman from New Jersey we cannot do these things with mirrors. If she thinks that we can reduce $10 billion in outlays and it does not have an effect on the outlay expenditures of the Government, someone is deceiving her.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 1 additional minute.)

Mr. GIAIMO. The fact of the matter is it will come about. And let me say this: I recognize what my friend, the gentleman from Ohio (Mr. LATTA) is trying to do here. I sympathize with his concern because I know that what the gentleman from Ohio (Mr. LATTA) really believes in is that we should not have had a tax cut this year. What he is trying to do is to recoup, with an outlay reduction of $10 billion to recoup $10 billion worth of that tax reduction, which I know the gentleman felt we should not have voted on last week. But I will say to the gentleman this is not the way to do it, because we have had this opportunity to have a smaller tax cut. The fact is that the will of the House was to have a larger tax cut than the gentleman would have wanted. We cannot recoup it through the outlay route by reducing outlays by $10 billion without seriously damaging very significant governmental programs, and I think it would create chaos if we were to compel the Committee on Appropriations at this time of the year, with the fiscal year just a month and a half off, telling that Committee on Appropriations, go back to work; undo all you have been doing all year; and find $22.5 billion to take out of next year's budget. I think it is a mischievous amendment and should be voted down.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I joined the distinguished Member from Ohio (Mr. VANIK) in supporting the gentleman's no-tax-cut proposal. I felt it was sound. I recognize it was not the most politically popular thing to do. I felt it would have moved us in the right direction; but I have to disagree and disagree strongly with the gentleman right now.

The one aspect of the Latta proposal that is better than the Holt proposal is in the tax cut area; but the point that the chairman of this committee (Mr. GIAIMO) made is an extremely important one.

I would point out to those of us who are interested in agriculture, in employment programs, educational programs, that the bulk of the budget is entitlements. We cannot do anything about school lunch programs or interest rates or a variety of other things. We have in this budget about $140 billion that is controllable.

What the gentleman is suggesting is

that we take $22.5 billion out of that controllable amount. That means a 16-percent cut on the average for programs that many of us have fought for.

The point that I made earlier on the Holt amendment has to be made again. We are talking about aggregates and aggregates only. We are on the second budget resolution. We are not on the first budget resolution. We are going to have to go over to a conference committee with the Senate, and I have been on every conference committee since I have been on the Budget Committee; we would have to go in there without any figures on any one of the functions. The Senate would have figures. We would have none. Then we start work. Where do we go from there? How can we function without a base?

Another point I made earlier, and that is even clearer now. I said, for those who may have been here or those few who may have been listening at that point. I said the easy thing is to cut from the people who need it the most. We have had amendments since that time. We had one that was adopted hitting the countercyclical program. Now, there are things that are wrong with the countercyclical program, I acknowledge that; but it goes to people in areas of high unemployment. We have had no amendments to cut defense. We have had no amendments to cut education, no amendments to cut veterans' programs. We have no amendments to cut the additional airline subsidy that went into this budget. We have a flock of things that we might cut into, but we did not.

If we adopt this, the people who will get hurt the most are the very people who need the help the most in your district and in mine.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, the gentleman has stated it so very well and I want to associate myself with the gentleman's remarks.

The medicine we need is the medicine associated with gradual weight reduction, not a purgative, not a strong laxative that we find in the Latta amendment.

I think the gentleman from Illinois has put the case so well and I hope the Members will listen to the gentleman and listen positively.

Mr. SIMON. Mr. Chairman, I thank my colleague, the gentleman from Maryland (Mr. MITCHELL) for his contribution.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I thank the gentleman for yielding.

I do not wish to associate myself with the gentleman's remarks.

Mr. SIMON. I assumed the gentleman would not.

Mr. CONABLE. However, I do think I have to agree with the gentleman that we have an additional process to go through, and I would like to say to my friends on this side of the aisle that if we accept this amendment, we are also accepting the idea of a tax cut of only the dimensions of the Jones package. We are going to put considerable pressure on the Senate, if we adopt this amendment and go to conference, to reduce their expectancy in terms of the tax cut.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(On request of Mr. CONABLE, and by unanimous consent, Mr. SIMON was allower to proceed for 1 additional minute.)

Mr. CONABLE. Mr. Chairman, if the gentleman will yield further, as I said in my remarks in the well a few minutes ago, the Senate is expecting to increase the size of the tax cut involved in the Jones compromise. If we now accept the Jones compromise, then in the budget conference we are going to put pressure on the Senate to cut back on its tax cut expectancy. I am not sure that my friends on this side of the aisle want to do that, although perhaps the size of the tax cut on the Senate side could go considerably larger simply by their adopting more realistic inflation assumptions. A higher inflation rate assumption would make room for a larger tax cut within the parameters of this budget, since it would mean a higher revenue figure.

Mr. Chairman, I thank the gentleman for yielding.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment.

It is just vitally important that every Member of this House understand what he would be doing before he votes for this amendment. Let there be no misunderstanding. We are not now establishing a target as we do in the spring. Today we establish a ceiling.

It is perfectly appropriate in the spring to come in with a general across-the-board cut and make each of the targets conform to the figures within that cut. At that point, we give timely guidance to the Appropriations Committee and to ourselves before those bills come before us. To our credit, we have kept the appropriations bills below those targets which we established last spring.

At this point we are establishing not targets but ceilings on expenditures. The House already has worked its will, quite laboriously, on all but one of the appropriations bills. To adopt this amendment would be to require by law that we go back and redo all the work we already have performed on each of the appropriations bills.

Are we prepared to do that? Well, let us see if we are. A cut of this magnitude would amount to a 2-percent reduction across the board of the entire budget. That may sound comparatively innocuous, if you assume that you can cut social security by 2 percent, if you assume you can cut interest payments by 2 percent, if you assume you can cut all the entitlement programs by 2 percent—but, of course, you cannot; they do not yield to the appropriations process. That portion of the budget which is controllable by the appropriations process amounts to slightly less than a third of the total expenditures. So, by adopting this amendment, we would be mandating that, after all the cuts we have already established in our appropriations bills, and after having reduced the deficit to a figure of about $20 billion below that originally forecast by the President, we would have to bring each of those bills back again and cut every one of them by about 9 percent at a minimum.

If you vote for this amendment, you will be voting to mandate a cut of about 9 percent in the military budget of this country as established in the defense appropriation bill which we passed last week.

How many of you who voted a few minutes ago—innocently, I am sure—for the Holt amendment realize that your vote would have mandated a 9 percent cut in what this House already voted for military? Would you do that if you had the choice to make again? The House only a week ago voted against a 1-percent cut in the military budget. Would the same Members now turn around and vote to mandate a 9-percent cut in the figure we endorsed only a week ago?

Let me ask the members of the Committee on Agriculture this: Do you consider the legislation you have brought to this House to be 9 percent too much? I am sure Members like the gentleman from Texas (Mr. DE LA GARZA), the gentleman from Oklahoma (Mr. ENGLISH), the gentleman from Texas (Mr. HIGHTOWER), and the gentleman from Tennessee (Mr. JONES)—and they are all my good friends—who have been in favor of a strong and effective agriculture program and who have been indeed the architects of that program, would not now want to mandate an across-the-board 9-percent cut in their handiwork. If they vote for this amendment, that is exactly what they will be doing.

Mr. Chairman, I am sure that my good and wise friends who serve on the Committee on Public Works and Transportation—the gentleman from Texas (Mr. ROBERTS), the gentleman from Louisiana (Mr. BREAUX), the gentleman from Georgia (Mr. LEVITAS)—who have been the architects of the Public Works and Water Resources programs, would not now want to mandate that we cut their handiwork by 9 percent. Yet that is precisely what they would do if they vote for this amendment.

I think we have established a very creditable record in this Congress for fiscal responsibility and prudent, individual expenditure cuts where they can be made. Just a few moments ago, the Members of this House voted for a selective and intelligently conceived reduction in this budget resolution. The majority voted for it. It at least had the merit of saying exactly what moneys would be deleted from precisely what items in this proposed budget. Specific reasons were given. This amendment, however, is not selective. It is based upon no particular knowledge of specific programs. It does not say which moneys. It says all moneys. It says we will have to go back and redo each of the appropriations bills we have so carefully constructed, and cut about 9 percent at a minimum from each of them.

Mr. Chairman, I know not when Congress could adjourn if we do that, but I do know that the responsible course is to follow the committee, the leadership of the House, and our own individual judgments expressed already on the appropriations bills. This process already has performed a good and creditable task of reducing the deficit by at least one-third below the administration's projections in this 1 year and not fall for a will-o'-the-wisp by this amendment.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Ohio (Mr. LATTA) is recognized for 5 minutes.

There was no objection.

Mr. LATTA. Mr. Chairman, let me say to my good friend, the gentleman from Texas, that he makes a very good speech, but he makes a lot of assumptions which are not quite correct.

The gentleman assumes that everything that he has mentioned is going to be cut, as he calls it. The gentleman assumes that in this proposal there is not the 7-percent increase in spending in fiscal year 1978. The gentleman makes it very clear that he does not want to put any kind of restraints on this Congress, because when you have an increase as we have in this resolution proposed by the committee of about 10 percent, we are not cutting anything when we come down to a 7-percent increase.

So I think it is a misnomer when we say it is a cut rather than a restraint on spending.

Let me say that we have about a $10 billion shortfall in spending in 1978. That could not be spent fast enough, so there is $10 billion floating around. We had a finding on HEW that they had about $7 billion of waste in that one department. Well, now, why can't they cut out some of that $7 billion in waste to accommodate what we are proposing here?

They are mixing oranges and apples when they talk about $22 billion in one single year, because what we are talking about in fiscal year 1979 is a reduction of $10 billion in outlays.

When the gentleman talks about $22 billion, he is talking about authorization—things that are on the shelf that are constantly getting us in trouble from a budgetary standpoint. That is where we ought to start to cut. Cut those things that are on the shelf which are going to get us in more fiscal trouble down the road.

So let us not mix oranges and apples when we talk about this budget. Sure, we can cut the outlays for fiscal year 1979 by $10 billion, and what would be left would still be way and above what we need to run this Government. The taxpayers of this Nation are crying out for some real tax relief from this Congress, and yet Members come down in the well and they say we cannot reduce spending, as proposed by the Budget Committee, by a mere 2 percent.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague's yielding—a member of the Budget Committee who has worked long and hard and, frankly, has been able to be present for the budget hearings more than other distinguished colleagues who have other duties.

Mr. Chairman, the $480 billion expenditure level recommended by my colleague in the resolution is $30 billion more than we spent in 1978. That is not a cut. That is a substantial increase.

The gentleman was not talking about cutting the guts out of anything. The gentleman is merely suggesting that we restrain the massive increase that was originally suggested by some of the members of the Budget Committee. Is that not true?

Mr. LATTA. The gentleman is absolutely correct.

Mr. ROUSSELOT. In other words, after proposition 13 began to ripple across the country, as Members of this Congress began to find out what that meant, the gentleman from Ohio is merely asking that we restrain the massive increase in expenditure suggested by a few people on the Budget Committee, is that not true?

Mr. LATTA. That is absolutely true.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to my colleague from Ohio.

Mr. LUKEN. Mr. Chairman, I would like to ask the gentleman from Ohio, as the author of the amendment, whether he would agree with the statement that was made earlier that on the revenue side, on the passage of this amendment, it would in fact restrict the Senate in considering a tax bill to the Jones tax cut, and if that is part of the aim of the gentleman from Ohio?

Mr. LATTA. Let me say, we are accepting the revenue figures of the committee. It does not provide for a greater tax cut than that which passed the House the other day. It takes into consideration the fact that we failed to pass the Kemp-Roth proposal. I assume that the gentleman opposed Kemp-Roth. It accepts the committee figures.

Mr. LUKEN. This gentleman did not oppose that proposal.

Mr. LATTA. I correct my statement. I am glad to have the gentleman aboard.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Illinois.

Mr. SIMON. There is some confusion about how much, what percentage, we are taking out. So that there is absolutely no confusion, we should understand that when we talk about appropriations, we are talking about budget authority. Between one-fourth and one-third of that is controllable so that, in fact, of the controllable items the gentleman is asking for a reduction of 12 percent to 16 percent. Is that not correct?

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(At the request of Mr. SIMON and by unanimous consent, Mr. LATTA was allowed to proceed for 2 additional minutes.)

Mr. LATTA. I am sorry, will the gentleman repeat his question?

Mr. SIMON. When we talk about appropriations we are talking about budget authority, and since one-fourth to one-third of the items are controllable we are in fact talking about a reduction in appropriations of between 12 percent and 16 percent. Is that not the case?

Mr. LATTA. No, I would not accept that.

Mr. SIMON. Can the gentleman give me some reason for not accepting it?

Mr. LATTA. I do not know where the gentleman gets this 16 percent. I have not heard that figure yet.

Mr. SIMON. If we take one-third or one-fourth—I do not know what figure the gentleman uses—as controllable, and we take that fraction from the total in budget authority. Then we take your $22.5 billion and compare it and determine a percentage of the controllable. It seems to me that the gentleman cannot get around those figures.

Mr. LATTA. Let me say that I am surprised that my friend from Illinois would be opposing my amendment, because it does reduce the deficit by some $10 billion. I noticed the other day—and I was glad to have him sign my discharge petition to provide a chance to vote for a constitutional amendment to provide for a balanced budget, we are getting closer. This is the only way we can get closer, and I am sure my friend wants to get closer.

Mr. SIMON. If the good gentleman from Ohio will yield further, I concur with the gentleman from Ohio on that.

Mr. LATTA. We have got to start now. We cannot wait.

Mr. SIMON. I simply point out—I do not mean any disrespect to the distinguished majority leader who earlier referred to a 6-percent cut—but in fact we are talking about reductions in appropriations of 12 percent to 16 percent, and we ought to be aware of that.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

(At the request of Mr. SNYDER and by unanimous consent, Mr. LATTA was allowed to proceed for 1 additional minute.)

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I appreciate the gentleman yielding. Not being on the committee, I just want to see if I have got the facts on all this straight. The gentleman's proposal is for $539 billion in budget authority. Am I correct that the budget authority for fiscal year 1978 was $503.8, and the gentleman is suggesting a $36 billion increase in this fiscal year over last year?

Mr. LATTA. I am afraid those figures are correct figures.

Mr. SNYDER. Am I correct also in that the gentleman's proposal on outlays is $480 billion, as opposed to $447.5 billion in fiscal year 1978, and the gentleman is suggesting a $33 billion increase in outlays?

Mr. LATTA. That is correct.

Mr. SNYDER. I just have a little trouble seeing why that is a cut.

Mr. LATTA. That is not a cut. It is a restraint on spending, and it is a 7-percent increase, whereas the other side has a 10-percent increase.

Mr. SNYDER. I commend the gentleman on his amendment.

Mr. FISHER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we are dealing, of course, with the budget, the second resolution. This is for keeps this time. We are about to establish binding ceilings on spending and a floor under revenues. We are not in the guideline business any longer.

Now we argue excessively perhaps about a few billion dollars this way or that, and this is important not only in itself but because it sets a direction and gives a signal as to what the House of Representatives wants to do in fiscal policy for the next year.

It comes down to a matter of judgment. We can go through the econometric studies and models and projects and all that and absorb as much of it as we can, and then we have to make a judgment. I would like to share with the Members my judgment. I am a member of the Budget Committee. I am a professional economist. I have worked in the Executive Office of the President, seeing it from that end of the avenue, for quite a number of years. I want to share my judgment with my colleagues and my reasons for it.

Keep in mind that since I have been a member of the Budget Committee I have been for restraining expenditures. Members will recall I have put amendments here on this floor in the last couple of years to do this.

In the first resolution I proposed a reduction of 2 percent pretty much across the board from $500 billion of outlays to $490 billion. The Budget Committee in the second resolution came forward to this House with $490 billion, a 2-percent cut, which is what I thought was in order.

Time passes. The economic situation changes; revenue collections change; expenditures are different. My judgment now is that we should put additional pressure to cut outlays and cut budget authority by about $5 billion. The $10 billion already achieved in the last few months is in the right direction. Unfortunately too much of that results simply from reestimates, valid to be sure. But by judgment now is that we ought to cut into flesh, so to speak, by about $5 billion in addition to what we have done already today in the conforming amendments and in the amendment just passed, offered by the gentleman from Texas (Mr. MATTOX) and his colleague.

This is my judgment. There is no magic in it. I cannot prove it nor can anybody else. But we must recognize that it comes to sober judgment. I think a cut of about $5 billion in addition to the $3 billion or so that we have cut already today is about right, taking it all in all.

I want to remind the Members that I will be offering an amendment following this for that kind of cut. I think it is responsible, I think it is achievable. Those who want to put further pressure to reduce outlays and reduce authority might want to hold back and come with me for this kind of cut which I think is about the way it ought to be.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague's yielding, and I know he is, as he has said, one who would like to limit the expenditure side further than we have done so in the resolution before us or in the substitute offered by the chairman—and he so offered it in the committee, a very close holding amendment. The gentleman's amendment, as I understand it will cut $5 billion from the outlay side, so instead of an outlay figure of $480 billion, it will be $485 billion. Is that correct?

Mr. FISHER. That is correct.

Mr. ROUSSELOT. And so the gentleman would agree with my colleague, the gentleman from Ohio, that there should be $5 billion less but not $10 billion?

Mr. FISHER. That is correct. It is a matter of judgment and feel, and this is where I come out.

Mr. ROUSSELOT. Has the gentleman allocated his reduction of $5 billion to functional categories?

Mr. FISHER. Yes; I have.

Mr. ROUSSELOT. What functional categories are affected by your reduction?

Mr. FISHER. I reallocate it on a pro rata basis to all functions with the exception of interest allowances and miscellaneous.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ROUSSELOT and by unanimous consent, Mr. FISHER was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield still further, the gentleman does agree that in many categories we could clearly restrain the increases that the committee has made a judgment on?

Mr. FISHER. I agree with that.

Mr. ROUSSELOT. You think that should be $5 billion?

Mr. FISHER. I do.

Mr. ROUSSELOT. You do not reduce interest because obviously a $5 billion cut in outlays could not reduce interests by 5 percent.

Mr. FISHER. That category is really one of those fixed categories although it changes, too, with the ups and downs of the rate structure. But it would be, I think, quite a mistake and misleading to prorate a certain cut on that.

Mr. ROUSSELOT. So you do agree with the gentleman from Ohio (Mr. LATTA) that there is no great damage to the whole budget process by taking, as you say, $5 billion out of the outlays. You do not hurt or harm a lot of the programs, is that correct?

Mr. FISHER. I do not think we hurt too much. Of course, any cut hurts somewhere.

Mr. ROUSSELOT. But these are really restraints on increases, are they not?

Mr. FISHER. Exactly.

Mr. EVANS of Colorado. Mr. Chairman, if the gentleman will yield, it is my understanding that you are going to offer this amendment after disposing of the pending amendment?

Mr. FISHER. That is correct.

Mr. EVANS. of Colorado. Could the gentleman tell me what the parliamentary situation would be in the event the pending amendment were agreed to, as to what would be the effect?

Mr. FISHER. My understanding is, subject to a ruling by the Chairman, that my substitute would still be in order. It is an across-the-board, sweeping substitute that goes to all categories.

Mr. EVANS of Colorado. And the gentleman feels that even if this pending amendment does pass, you would still have an opportunity to offer your amendment?

Mr. FISHER. That is my understanding and I would hope a ruling would support that.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the chairman, the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I understand that if the amendment offered by the gentleman from Virginia (Mr. FISHER) were to be agreed to, which is a $5-billion outlay cut, that you have allocated those cuts throughout the functions; is that correct?

Mr. FISHER. That is correct.

Mr. GIAIMO. And while the gentleman has small cuts in the 45- to 50-, to 60- to 80-million dollar categories in some programs—

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. GIAIMO, and by unanimous consent, Mr. FISHER was allowed to proceed for 2 additional minutes.)

Mr. GIAIMO. Mr. Chairman, will the gentleman yield further?

Mr. FISHER. I yield to the gentleman from Connecticut.

Mr. GIAIMO. As I understand, while you have small cuts in some functions, you have rather substantial cuts in national defense of 1.2 billion in outlays, is that correct?

Mr. FISHER. That is correct, approximately 1 percent.

Mr. GIAIMO. And $1.7 billion in income security?

Mr. FISHER. That is correct.

Mr. GIAIMO. And $536 million in health?

Mr. FISHER. That is correct.

Mr. GIAIMO. And $338 million in education?

Mr. FISHER. May I interrupt?

Mr. GIAIMO. And $227 million in veterans' benefits, is that correct?

Mr. FISHER. If I may interrupt the litany, I would say that if you want to reduce the budget you have got to cut.

Mr. GIAIMO. That was all prefatory, and my question is, if you are going to cut $1.2 billion in defense, and $1.7 billion in income security, and a half billion in health and a quarter billion in veterans' benefits, and on and on, with a 1 percent cut, could we assume that the cut the gentleman from Ohio (Mr. LATTA) is proposing would double those amounts?

Mr. FISHER. If they are allocated in the same way, and properly, they would be, more or less.

Mr. GIAIMO. Probably more or less they would be?

Mr. FISHER. The chairman is quite

correct, it would be twice as much of a cut, too much, in my judgment.

Mr. GIAIMO. So you would be talking conceivably about a cut of $2.5 billion in defense, and over $3 billion in income security and $1 billion in health and half a billion in veterans' programs, and on and on? That is what we are talking about here when we talk about a reduction through cuts?

Mr. FISHER. That is correct. I believe, at least because of my experience, which I have been bold enough to recite earlier, that a 1-percent cut is a manageable cut out of more efficiency, better management in certain cases and reductions in fraud and abuse and in these other matters.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. FISHER) has expired.

(On request of Mr. EVANS of Colorado and by unanimous consent, Mr. FISHER was allowed to proceed for 1 additional minute.)

Mr. EVANS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the gentleman from Colorado.

PARLIAMENTARY INQUIRY

Mr. EVANS of Colorado. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. EVANS of Colorado. I would like to ask the Chair what the situation would be in the event the pending amendment passed, and thereafter the gentleman from Virginia (Mr. FISHER) were to offer his amendment. Would his amendment then be in order?

The CHAIRMAN. The Chair would like to advise the gentleman from Colorado (Mr. EVANS) that a substitute amendment to the amendment offered by the gentleman from Connecticut (Mr. GIAIMO) would be in order.

Mr. EVANS of Colorado. I thank the Chair.

Mr. MAHON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

The colloquy between the two gentlemen who have just spoken reveals the problem with which we are confronted. We have passed all 13 annual appropriation bills. We have debated them. We have made some increases, we have made some decreases; and those bills have gone to the other body.

We are approaching the new fiscal year. It is not long now, just a few weeks, until the first of October.

Mr. Chairman, for us to try to reduce the budget authority in those bills by $22 billion is totally impractical and illogical because there would be no way, in my opinion, to persuade the House that these reductions should be made specifically. It is very easy to be for reductions in general, but to be for reductions in specific areas, such as in veterans' benefits, in health, in farm benefits, in defense, and so forth, is a different matter.

Mr. Chairman, we have spent days and days and months working on the authorization bills and on the appropriation bills. We have done the best we knew how, and all the Members have had an opportunity to participate. We have made our decision. To come in now at this late date just prior to the beginning of the new fiscal year and say that we are going to cut the appropriations in new budget authority by about $22 billion, it seems to me is impractical; and it cannot be done successfully.

Mr. Chairman, if this amendment were passed, in my opinion—and I think most of the Members will agree with me—and if the recommendations were brought in and specific proposals to make reductions were made, they would not be adopted by the House or by the other body.

Therefore, Mr. Chairman, it just seems to me that while it is good to contemplate a balanced budget—and we are all for a balanced budget—we have to find a way to get a better handle on spending. We have to or else we are confronted ultimately with disaster. However, I do not see how this proposal could possibly succeed, so I rise in opposition to it and in support of the action of the Committee on the Budget.

I just think that there is no practical way, at this stage, to achieve the objective. If we had started earlier and if we had been able to cut those bills back when they were before us, the authorization and appropriation bills, that would have been a different matter; but it is late in the session. To reconvene our committees now and start additional hearings and try to find a way to implement the reductions that would be proposed and probably rejected is just impractical.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I want to thank my chairman, the gentleman from Texas (Mr. MAHON), for yielding. The gentleman is absolutely right.

All of the appropriation bills have left the House. Most of them have gone through the Senate committee. Some of them have gone through the Senate and are in conference. As a result, it becomes almost an impossibility to unravel what has been done.

Mr. Chairman, I voted in favor of the Holt amendment, but I certainly could not go along with this amendment because I do not see that it is feasible to unravel what we have done.

Therefore, Mr. Chairman, I hope many of my colleagues on this side of the aisle will vote against the amendment.

Mr. MAHON. I thank the gentleman.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, let me give the gentleman from Texas (Mr. MAHON), the chairman of the Committee on Appropriations, some enlightening information while praising the gentleman's committee for the job it has done.

All of the appropriation bills out of the gentleman's committee which have passed this House, only total $519 billion in budget authority, which is $20 billion less than the figure in this amendment. In adding up all of the outlay figures from the bills from your committee, we come up with a figure of $469.8 billion. The outlay figure in this amendment is $480 billion.

So the gentleman's committee has done a much better job in holding down spending than has the Budget Committee. I am attempting to come closer to the chairman's figures. He has done a good job. I want to compliment him and congratulate him on the job he has done.

Mr. MAHON. I thank the gentleman very much.

It should be borne in mind that all of the approriation bills that will be required for fiscal year 1979 have not passed, although we have passed all the regular bills.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. MAHON was allowed to proceed for 1 additional minute.)

Mr. MAHON. But there were some instances, especially in HEW and otherwise, where the authorizations had not come through, so those programs are not in the bills which had been passed and, of course, there will be the usual supplementals. All of this could amount to some $30 or $40 billion. So I renew my statement that this is not the way to achieve the objective, and I believe that it would be a mistake to approve this amendment.

Mr. STOCKMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had not planned to speak on this amendment, and I do not want to delay the proceedings of the House, but I was sitting here a moment ago listening very carefully to the gentleman from Texas, and I thought for a moment that rather than the eloquent majority leader, I was hearing Dr. Pangloss come waltzing out of the pages of historical literature. I think some of the Members will remember Dr. Pangloss was the man who roamed around the ruins of a decaying fuedal order in Europe saying, "This is the best of all possible worlds. There is nothing that we can change, and there is nothing that we should change." It seems to me that this is the argument that we are getting time and time again from the chairman of the Committee on the Budget and from some of the others who spoke in opposition to this amendment.

Of course, we have gone through the entire appropriation cycle, but I would remind my colleagues that in the Budget Act that we adopted in 1974 we contemplated the situation in which the second budget resolution would lower the outlay level or would lower or increase the revenue level, and that we would have to have a reconciliation action. So the fact that the work of the Appropriation Committees is done and the fact that we have had all kinds of other legislative actions in the last 2 or 3 years that have built in a certain spending stream or outlay pattern for this year should not be any deterrent at all in light of the economic conditions that we face today. I

think that the argument that we have our hands tied, that this is all the entitlement money, that this is all advance appropriations, and that we can do nothing about it really is just wrong, and the members of this committee know it. The fact is that if we look inside that $500 billion budget, every one of us knows that in light of the economic contingencies that we face today, in light of the threats that we face today with inflation and the collapse of the dollar, that we can make $10 billion more in outlay cuts if we have to. I know our side said that we are just attempting to restrain the growth rate of outlays, and I agree with that, but the fact is, let us be honest and let us just look at some of the categories that are available for cutting.

We know that there is $600 million in this bill for the Amtrak system. Every one of us knows that there are literally scores of lines on that system that generate 10 cents worth of revenue for every dollar in cost that it incurs. That is not entitlement money. That can be scaled back this year. There is $700 million or $800 million in this for impact aid. I am opposed to that program, but I am not proposing that it be gutted. It can be scaled back, though. The payout rate can be reduced for this fiscal year.

I just want to lay out a couple of other areas so that the impression that our hands are tied and there is nothing to be cut or restrained can be clarified, because it is not true. We have a huge sewer grant program. I know that most of that is in the spending stream already, but the fact is that there is a multibillion-dollar obligation for this year, and that can be scaled back, and that will have some effect on outlays even during this year.

We have had a huge ballooning of the budget for the Department of Energy—everybody knows it—fourfold or fivefold in the last 2 years.

And what is some of that spending going for? It is going for building windmills, and it is going for building methane plants in barnyards. These may solve our energy problem someday in the future, but I would suggest that the timetable can be slipped just a little bit and that there is ample opportunity for savings in that area.

Some of this may come out of Defense, and I would not like to see that happen; but I can suggest if we do not get some economic leadership from this country, if we do not begin to restrain our rate of inflation and begin to reduce the enormous damage that we are doing to the world economy today with our huge balance-of-payments deficits that the defense we will be purchasing for 10 years in the future will not even matter, because we will have suffered serious economic collapse in the Western world long before that.

The point is that there is ample opportunity to cut $10 billion of outlays out of this budget. I think we are really undermining our own credibility and our own sense of self-esteem, and we are undermining the very purpose that we are sent down here for, if we say that 3 months in advance of a fiscal year that has not even started, we have gotten ourselves so hog-tied that we cannot deal with this excessive outlay level in this bill reported by the committee; so I hope the House will support this amendment.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. STOCKMAN. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, would the gentleman agree, the argument seems to be against the budget process. We could have this type of adjustment at this time of the year, and the budget process spells it out specifically.

Mr. STOCKMAN. Right; that is incorporated in the budget process. We are engaging in a midcourse correction in that process.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words. I rise to speak against the amendment.

I will only take a minute, Mr. Chairman, but I really do think it is something short of laughable to suggest to the House that these cuts, if they were, in fact, voted in this resolution, would come in an area such as energy and Amtrak and sewerage and impact aid. I know from personal experience what happens when you try cutting impact aid in this House, because I have had amendments on this floor to do it. I know how many votes I have gotten on that side of the aisle and I know how many votes I have gotten on this side of the aisle, and they were not very much on either side of the aisle. There is about as much chance of us cutting impact aid as there is the chance for the gentleman from Michigan becoming President tomorrow. Neither one is going to happen and I think all of us know it. There is about as much chance of us cutting sewer aid as my becoming President tomorrow. This House has added money consistently over the recommendations of the Appropriation Committees for sewer aid.

You cannot tell me you are going to have a resolution voted to cut Amtrak, and you cannot tell me you are going to have Members of Congress in other parts of the country who are getting a little bit fed up with subsidizing all the big city runs, you cannot tell me they are going to accept reducing Amtrak allocations which keep some of their runs running as well.

I would simply suggest that the gentleman from Texas has summed it up correctly. What is facing us is a question of how much pride we have. Do we really have pride in this House? Do we really have pride in the orderly processes of appropriations by which we approach the whole budget in question? If we do have that pride, we will stick with the committee and we will not support this most mischievous amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. LATTA) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and on a division (demanded by Mr. LATTA) there were—ayes 24, noes 36.

RECORDED VOTE

Mr. LATTA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 198, noes 204, not voting 30, as follows:

[Roll No. 709]

Mr. POAGE and Mr. SPENCE changed their vote from "no" to "aye."

Mr. RUSSO changed his vote from "aye" to "no."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MS. HOLTZMAN TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Ms. HOLTZMAN. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Ms. HOLTZMAN to amendment in the nature of a substitute offered by Mr. GIAIMO: In the matter relating to the appropriate level of total new budget authority reduce the amount by $4.7 billion;

In the matter relating to the appropriate level of total budget outlays reduce the amount by $1.5 billion;

In the matter relating to the amount of the deficit reduce the amount by $1.5 billion;

In the matter relating to the appropriate level of the public debt reduce the amount by $1.5 billion;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, reduce the amount by $1.5 billion.

In the matter relating to Allowances (function 920) reduce the amount for budget authority by $4.7 billion; and reduce the amount for outlays by $1.5 billion.

Ms. HOLTZMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mr. LATTA. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I thank the gentlewoman for yielding. Let me say that I have had an opportunity to study the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN), and I want to concur in the amendment and to compliment the gentlewoman for offering it.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman from Ohio (Mr. LATTA). It is indeed a high honor to be complimented by my colleague from Ohio and I appreciate that greatly.

Mr. LATTA. I thank the gentlewoman.

Ms. HOLTZMAN. Mr. Chairman, let me explain the amendment to my colleagues. My amendment deals with unobligated balances, which occur throughout our Federal Government.

Although we in the Congress are often accused of a great deal of overspending, in fact there is a great deal of money that the Federal agencies receive in appropriations that they do not spend. In fact, there is a great deal of money received in some of the appropriations. The agencies do not even earmark this money or contract for its expenditure. The amount of these unobligated balances, in toto, is $47 billion.

What my amendment does is simply to ask the Federal agencies to begin to spend some of the money that has been lying around unobligated, and it asks for a 10-percent cut in the unobligated balances. My amendment does not touch the balances that are obligated, it does not touch the trust funds, it does not touch the guarantee or insurance programs or loan programs. It seems to me, that if we are ever to try to get control of how our Government operates and over the kind of spending that takes place, we need to reduce the unobligated balances. The many agencies and departments ought to at least be efficient enough so that when they come to Congress for annual appropriations they ask only for the money that they can indeed spend.

Mr. Chairman, this is an effort to see that these agencies spend the money that they are given, and that they do not accumulate these large balances of unobligated funds, and that the funds that are appropriated are ultimately spent on programs for which the Congress intended them to be spent in the first place.

I think this is an important area in which we have to begin to take corrective steps.

Of the $47 billion in unobligated funds, roughly $20 billion is in the Department of Defense, roughly $13 billion in the Department of Energy, and the rest is in a variety of other agencies.

Mr. Chairman, we can begin to get a better hold on spending, spend more efficiently and more effectively, if we begin to ask Federal agencies to be more accurate in their estimates of what they need so that we do not appropriate money that is not going to be spent. I think this is an important time at which to begin to do that.

My amendment is only a modest step in that direction, but I would hope that it sets the stage for the important effort to improve Government fiscal habits which must be undertaken by Congress.

Mr. SIMON. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I would be interested in the reaction of the chairman of the committee on this amendment.

My own instinct, offhand, is that this is a sound approach which does not cut at the meat of anything. It will not impair programs and it still keeps things a little taut financially, so that I think the approach is to be welcomed by our colleagues.

Again, I would be interested in the reaction of the chairman of the committee.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman for his comments.

Mr. GIAIMO. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I would be happy to yield to the gentleman from Connecticut, the distinguished chairman of the committee.

Mr. GIAIMO. Mr. Chairman, much as I appreciate the efforts to the gentlelady from New York, I rise to oppose this amendment. I do so with considerable reluctance.

This amendment recognizes one of the most difficult problems that Congress faces in the area of budgetary control. So long as large balances of prior appropriations remain available for spending in the executive branch, our actions in both the budget and appropriations processes can be thwarted by program administrators downtown.

To take a hypothetical example: Suppose we determine that the rate at which some given procurement program ought to move forward in a given year is at a level of $100 million. Suppose, further, that this hypothetical program has built up a balance of $50 million in unobligated funds from prior-year appropriations—money that had been made available for purposes of the program but had not been contracted for. Thus, the program could exceed the congressionally determined rate by 50 percent in the next year.

The amendment deals with $4.7 billion—a figure equal to only 10 percent of the $47 billion in unobligated balances for construction and procurement programs. It wisely leaves out of consideration those unobligated balances that have been built up in the trust funds—the social security, employee retirement, and Federal-aid highway funds, for example—and those balances that represent the actuarial reserves of Government insurance, guarantee, and loan programs.

Mr. Chairman, I agree with the gentlelady from New York that we need better

planning of their actual minimum requirements by executive officials, so that these balances do not build up in the first place. I agree that Congress has to continue to reinforce its control over Federal spending. I particularly appreciate the fact that this amendment does not cancel or otherwise impair legitimate outstanding balances. This amendment calls for a reduction in the new budget authority that might be added to already swollen balances, and thus does not impair scheduled program progress.

However, we are dealing here today with the second budget resolution. Almost all major spending bills for fiscal year 1979 have already been acted on by the House. I fear we would be deluding ourselves by making the cuts in budget authority and outlays that this amendment demands.

The practical effect of this amendment, made at this time, would be that a reconciliation directive would have to be considered and enacted, forcing the House to go back and reconsider spending actions it had already debated and disposed of.

The gentlelady is aware of the interest that many members of the Budget Committee have in this matter. The gentlelady from Maryland (Mrs. HOLT) has identified this problem in very forceful terms on many occasions. Both the task force on budget control and the task force on defense have studied the problem. Special analyses have been made for our committee by the General Accounting Office.

I suggest that the proper course for us today is for the sponsor to withdraw the amendment and for the Budget Committee to continue its study of the matter. Next year's first budget resolution is a more appropriate time and vehicle for taking action.

Mr. Chairman, I oppose the amendment and urge that it not pass.

Ms. HOLTZMAN. I would say to the chairman of the committee, the very distinguished gentleman from Connecticut (Mr. GIAIMO), that I appreciate his comments very much. I think it may in fact be unrealistic to ask for the Committee on Appropriations to redo its work now. But I also do believe that the only way the Committee on the Budget can take effective action next year with respect to this problem of unobligated balances is for the committees of the Congress, when they advise the Committee on the Budget of their estimates for spending, to advise the Committee on the Budget at the very same time what they plan to do to reduce these unobligated balances. If that procedure could be accepted, I would be more than happy to agree with the chairman's suggestion and withdraw the amendment.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from California.

Mr. JOHN L. BURTON. I thank the gentlewoman for yielding.

I intend to offer an amendment that is going to put us in a surplus situation by wiping out $47 billion worth of unobligated balances. If we cannot even accept an amendment like this, why do we even have a second budget resolution, because we cannot amend it? I do not think this process does too much anyway except to give everyone a chance to make a speech and offer an amendment. But if we are saying we cannot cut 10 percent of money that is sitting downtown that they are not going to spend that is counted against us in deficits in Federal spending because it is going to work a hardship on the procedures of the House, why not just bring the budget up under a closed rule in the second resolution and say, You cannot adopt any amendments because it is going to work a hardship? There is $47 billion worth of money that we gave them from our taxpayers that they are not even spending—$20 billion in defense. Jim Schlesinger—God bless him—has got $13 billion he has not even been able to figure out how to spend; and he can figure out better than anybody in Washington, D.C. But we are told by the distinguished chairman of the committee it is a terrific idea but it is too late. Therefore, I do not think we should ever have a second budget resolution come up except under a closed rule, because if this amendment will screw up the House procedures, every amendment will do it. Therefore, we should not have it open for amendment. It should be an up or down vote.

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. If I have any time left, I will be happy to yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague, the gentlewoman from New York, who is a sage member of this Budget Committee. Although we do not always agree, she is very much on target on this whole issue of unobligated balances.

Many Members of this House do not realize that these are appropriated balances of which the gentlewoman is speaking. They have been appropriated. They really are sitting there as kind of reserves. In many cases they have not even been contracted out for future expenses. It is clearly a kind of secret slush fund that many of these agencies have. I appreciate the gentlewoman's bringing this up.

The CHAIRMAN. The time of the gentlewoman has expired.

(At the request of Mr. REGULA, and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Will the gentlewoman yield further?

Ms. HOLTZMAN. I yield to the gentleman.

Mr. ROUSSELOT. My understanding is that right now as of 1978 there is $48.4 billion in unobligated balances previously appropriated that can be utilized above and beyond what we are talking about here in the budget. The gentlewoman makes an excellent point. I do hope we attack it sometime soon.

Ms. HOLTZMAN. I appreciate the gentleman's comments.

Mr. REGULA. Mr. Chairman, will the gentlewoman yield for a question?

Ms. HOLTZMAN. I will be happy to yield to the gentleman.

Mr. REGULA. I thank the gentlewoman for yielding.

Would there be any danger that if we would eliminate the unobligated balances by an amendment of this type, or one that went even deeper in cuts, that in the future we would in effect invite agencies to get rid of their money, spend it without regard to carefully managing it, or without carefully contracting to get the best possible services for the dollars spent? Is that a danger? I do not know. I am asking that as a question.

Ms. HOLTZMAN. I do not believe that is a danger. When the agencies come to Congress and say, "We need an appropriation," in essence they are saying, "This is money that we need this year as opposed to next year because we can spend it this year." If they cannot spend it this year, then they ought not to ask for it. We ought not to allow these agencies to build up these huge reserves which end up in some cases not even being used for the purpose for which they were originally appropriated. I think that the existence of these balances pose danger to the congressional appropriation and budgeting process. I think it is not a sign of good management. It is not a sign of good estimating. I think we can ask the agencies to manage their funds more carefully and to make their requests to Congress more accurately.

Mr. REGULA. Would not a diversion, though, require a reprograming request to this body?

Ms. HOLTZMAN. Not necessarily.

Mr. Chairman, I ask at this point unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York (Ms. HOLTZMAN)?

There was no objection.

AMENDMENT OFFERED BY MR. FISHER TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. FISHER. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. FISHER to the amendment in the nature of a substitute offered by Mr. GIAIMO:

In the matter relating to the appropriate level of total new budget authority strike out the amount and insert in lieu thereof 556,019,000,000;

In the matter relating to the appropriate level of total budget outlays strike out the amount and insert in lieu thereof 484,790,000,000;

In the matter relating to the amount of the deficit strike out the amount and insert in lieu thereof 34,790,000,000;

In the matter relating to the appropriate level of the public debt strike out the amount and insert in lieu thereof 833,100,000,000.

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, strike out the amount and insert in lieu thereof 25,100,000,000.

In the matter relating to function 050 strike out the amount in budget authority and insert in lieu thereof 125,817,000,000; and strike out the amount in outlays and insert in lieu thereof 111,179,000,000.

In the matter relating to function 150 strike out the amount in budget authority

and insert in lieu thereof 12,249,000,000; and strike out the amount in outlays and insert in lieu thereof 7,042,000,000.

In the matter relating to function 250 strike out the amount in budget authority and insert in lieu thereof 5,098,000,000; and strike out the amount in outlays and insert in lieu thereof 4,937,000,000.

In the matter relating to function 270 strike out the amount in budget authority and insert in lieu thereof 9,511,000,000; and strike out the amount in outlays and insert in lieu thereof 8,590,000,000.

In the matter relating to function 300 strike out the amount in budget authority and insert in lieu thereof 12,841,000,000; and strike out the amount in outlays and insert in lieu thereof 11,256,000,000.

In the matter relating to function 350 strike out the amount in budget authority and insert in lieu thereof 12,110,000,000; and strike out the amount in outlays and insert in lieu thereof 7,545,000,000.

In the matter relating to function 370 strike out the amount in budget authority and insert in lieu thereof 5,499,000,000; and strike out the amount in outlays and insert in lieu thereof 2,783,000,000.

In the matter relating to function 400 strike out the amount in budget authority and insert in lieu thereof 19,268,000,000; and strike out the amount in outlays and insert in lieu thereof 16,877,000,000.

In the matter relating to function 450, strike out the amount in budget authority and insert in lieu thereof 10,230,000,000; and strike out the amount in outlays and insert in lieu thereof 9,371,000,000.

In the matter relating to function 500 strike out the amount in budget authority and insert in lieu thereof 33,568,000,000; and strike out the amount in outlays and insert in lieu thereof 30,773,000,000.

In the matter relating to function 550 strike out the amount in budget authority and insert in lieu thereof 51,667,000,000; and strike out the amount in outlays and insert in lieu thereof 48,762,000,000.

In the matter relating to function 600 strike out the amount in budget authority and insert in lieu thereof 190,330,000,000; and strike out the amount in outlays and insert in lieu thereof 157,913,000,000.

In the matter relating to function 700 strike out the amount in budget authority and insert in lieu thereof 21,051,000,000; and strike out the amount in outlays and insert in lieu thereof 20,686,000,000.

In the matter relating to function 750 strike out the amount in budget authority and insert in lieu thereof 4,124,000,000; and strike out the amount in outlays and insert in lieu thereof 4,128,000,000.

In the matter relating to function 800 strike out the amount in budget authority and insert in lieu thereof 4,059,000,000; and strike out the amount in outlays and insert in lieu thereof 3,991,000,000.

In the matter relating to function 850 strike out the amount in budget authority and insert in lieu thereof 8,847,000,000; and strike out the amount in outlays and insert in lieu thereof 8,862,000,000.

Mr. FISHER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Mr. Chairman, the Budget Committee has recommended a spending ceiling of $490 billion. This is close to the figure I had in mind when I offered my 2-percent amendment last spring during the debate on the first budget resolution. I am glad to see that progress has been made on the spending reduction front; but almost all of these reductions, these $10 billion in reductions, are due to reestimates of what will be spent, rather than real program cuts. In a time of large deficits and a growing economy, it makes sense to make additional efforts at keeping in check the growth in Government spending. I think that is what the country wants. The second resolution provides the means for doing this by setting tight ceilings on what can be spent in the next fiscal year.

In this amendment that I am offering, I am proposing an additional spending reduction of $5 billion, a modest amount in such a large budget, but nonetheless, a significant amount. This would bring us out with a deficit of about $35 billion, a considerable reduction this year over the last year and over what has been put forward in the first resolution.

I would distribute the cuts across most functions on a prorated basis on the premise that almost all programs can accommodate a 1-percent cut through better management, harder work and general belt tightening.

This principle applies to uncontrollable and controllable programs alike. Frequently there is a division between these two types of programs, a rather artificial division.

Adoption of my amendment will not necessitate a reconciliation process by which already approved bills must be cut back before the Congress can adjourn in October.

The budget resolution contains room for a number of items which will not have been considered before the Congress adjourns this year, including supplemental appropriation bills, new legislative initiatives, and revisions in existing law that will change spending needs within the same fiscal year.

All told, these items add up to $20 billion or more; so already approved spending commitments fall within the $485 billion or so spending ceiling that my amendment would impose.

My amendment might create a need for a third resolution when the Congress reconvenes next year. This would happen if no further spending cuts are achieved and if current estimates of spending hold up; but between now and next spring there are a number of possibilities that could lead to a third resolution, including the final size of the tax cut and many unforeseen changes that could occur in the economy. There is also a possibility that there will be additional shortfalls in actual expenditures over and above what has already been included in the committee's version of the resolution. This would, of course, relieve the pressure for a third resolution, and keep in mind, we had a third resolution last year and it did not break the process or upset the ongoing budgeting and managing of Government.

I expect we might see some rescission requests coming from the administration over the course of the fiscal year. My amendment is on the same wavelength with the administration, which has encouraged Congress to seek out another $5 billion in spending cuts. Now, a $5 billion cut at this time out of real spending is surely within our reach. This is not a cut below this year's 1978 budget expenditures.

It is a cut compared to a larger budget proposed for next year. More careful management surely can achieve a 1-percent cut in any program. The Congress should insist on this.

Furthermore, I believe the House should send this kind of signal to the Senate, to the executive branch, and to the whole country. The practical and responsible course is to adopt this amendment.

Let me say to my Republican colleagues that this may be their last chance this year to vote for an amendment that goes in their direction in a practical way. And to my Democratic colleagues, if they want to put a little more pressure to restrain Government spending, this will probably be their last practical chance to do it.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. FISHER) has expired.

(By unanimous consent, Mr. FISHER was allowed to proceed for 3 additional minutes.)

Mr. FISHER. Again, Mr. Chairman, let me say that this spending reduction amendment I am offering is responsible. It is achievable, and it should be voted for.

My colleagues perhaps will remember that when we were debating the first budget resolution last spring, I offered an amendment to cut spending by 2 percent or by about $10 million. It was my judgment then that this was what was needed. That amendment was defeated, but the second budget resolution brought to us today has in it a $10 billion cut, and so I am actually the author of that.

My judgment now, several months later, is that a further reduction of $5 billion is about what is needed in order to accomplish a real, meaningful cut in the budget.

Mr. Chairman, I strongly urge that my colleagues consider at this time, almost the last moment in our consideration of this matter, voting for this $5 billion budget cut.

Mr. WIRTH. Mr. Chairman, will the gentleman yield for a question?

Mr. FISHER. I yield to the gentleman from Colorado.

Mr. WIRTH. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman from Virginia (Mr. FISHER) on the amendment he is offering. I will support it, as I supported his amendment last spring for a 2-percent cut.

Some question is going to be raised about specified cuts in the area of income security, and I was hoping the gentleman might be able to respond to that question and expand a little bit on the statement he made about better management in the executive agencies and their ability to absorb the 1-percent cut as recommended by the gentleman.

Mr. FISHER. Yes. Nearly everybody wants to restrain spending, cut it back,

and hold it down, and yet be reasonable about it. That is how I come out on this $5 billion amount, or roughly 1 percent, and I distribute it, as is required under our procedures, over the various programs, not counting interest and one or two programs in that category.

This will involve a cut in defense, in income maintenance measures, in agriculture, and in all the other areas.

I do believe that a 1-percent cut is manageable. For example, in the program the gentleman cites, we have already adopted an amendment to cut quite a bit out of what is called fraud and abuse. There is other slack in this. For example, if the economy does well, as it now appears it will, there will be less claim for welfare payments, and quite a few people will not retire as early as they usually would.

So, Mr. Chairman, there is more slack than one would imagine in what we generally call uncontrollables.

The CHAIRMAN. The time of the gentleman from Virgina (Mr. FISHER) has again expired.

(On request of Mr. WIRTH, and by unanimous consent, Mr. FISHER was allowed to proceed for 2 additional minutes.)

Mr. WIRTH. Mr. Chairman, will the gentleman yield further?

Mr. FISHER. I yield to the gentleman from Colorado.

Mr. WIRTH. Mr. Chairman, I think the point the gentleman makes about first-rate management in these programs will signal very clearly our intent that each one of these executive agencies look very, very carefully at its practices. I think the previous amendment offered by the gentlewoman from New York (Ms. HOLTZMAN) illustrates the fact that there is obviously a great deal of slack in the budget.

Mr. Chairman, I again want to commend the gentleman from Virginia (Mr. FISHER) on his amendment, and I urge my colleagues to support it.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the amendment was not read, and, therefore, I want to be sure that I understand what the scheme of the gentleman's amendment is.

As I understand it, the amendment does provide for a $5 billion reduction in outlays, as opposed to the $10 billion cut that was narrowly defeated when it was offered by the gentleman from Ohio (Mr. LATTA).

In addition to that, as I understand it, another major difference is that it actually goes into reductions of specific functional categories of the budget, providing for specific reductions in both budget authority and outlays.

What is the scheme, however, of the reduction? According to the chart I hold in my hand, there is a reduction of $1,195,000,000 in budget authority for national defense.

I drop down to income security and find a reduction of $1,809,000,000.

On what basis have those cuts been made?

Mr. FISHER. They have been made this way: The $5 billion has been prorated among all of the categories, save interest, allowance, and undistributed offsetting receipts. Each of them is a difficult one to deal with. But all of the others bear a pro rata share of the $5 billion cut.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. FISHER) has again expired.

(By unanimous consent, Mr. FISHER was allowed to proceed for 2 additional minutes.)

Mr. FISHER. It comes down to this: If you want to reduce spending, you just have to cut somewhere.

Mr. ANDERSON of Illinois. I appreciate the truth of the statement that the gentleman has just made. But how does the gentleman proceed to cut income security programs, the budget authority for the programs, by $1,809,000,000? The gentleman is talking now about social security and programs of that kind.

Mr. FISHER. Yes.

Mr. ANDERSON of Illinois. Just how does the gentleman make that reduction?

Mr. FISHER. My response earlier to the gentleman from Colorado was to this point. You tighten up management. You cut back further on abuse and even fraud. This kind of cut is well within the range of what can result from the course of economy. If we do as well as present indicators seem to say, there will be less call for welfare payments, there will be fewer people retiring and going on social security. There are all of these possibilities.

Mr. ANDERSON of Illinois. As I recall it, if the gentleman will yield further, when we had the appropriation bill before us for the Department of Health, Education, and Welfare, there were reductions made then, I think, in the appropriations process because of alleged fraud and abuse in that Department and in the programs that it administers. So I am wondering just how much flexibility remains in that particular category to be reduced under the terms of the gentleman's amendment.

Mr. FISHER. Another source of slack in this whole business is reestimating. The experience of recent years has been that each stage along the way we overestimate the amount of spending that will occur, and that tends to save us some money. So these factors, taken together, and others that I have not mentioned, lead me to the conclusion that it is not unreasonable at all to find in a budget of this size some areas for reduction.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. FISHER) has again expired.

(On request of Mr. SIMON and by unanimous consent, Mr. FISHER was allowed to proceed for 1 additional minute.)

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I would like to follow through with some of the comments of my colleague, the gentleman from Illinois (Mr. ANDERSON). But first let me say that I commend the gentleman from Virginia (Mr. FISHER) for this detailed approach. This is the responsible way to have an amendment, so we know exactly what we are talking about and not simply deal in the aggregates. But when we get down to item 600, income security, the gentleman is talking about, roughly, $160 million in the second budget resolution. Of that amount, only 3 percent is controllable. So we have $4.8 billion that is controllable, and out of that the gentleman is suggesting that we delete $1.8 billion. That seems to me to be clearly excessive. In some of these areas I would, frankly, go along with the gentleman from Virginia, but there are some problem areas.

Mr. FISHER. If I may respond to that, again let me repeat that the differences between controllable and uncontrollable are not as rigid as most people think. In fact, I was in the White House under President Eisenhower when this provision was first performed. Ike was so distressed that he did not seem to have control over all of the budget. And it is very arbitrary. I will just give a few examples that I have alluded to previously. One example is that many of the so-called uncontrollable programs hinge upon what happens in the economy. If unemployment goes down, you save a lot of money. Or, take the agricultural program. If prices go up, you save a lot of money. And so it is. And so they are only uncontrollable in a certain frame of reference, regardless of what it is going to be. So there are various reasons why I think it is not too irresponsible to approach the problem in the way I have.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words, and I rise to oppose the amendment.

Mr. Chairman, I really believe—and I started to say it on the first amendment, but I want to get into a little more detail on it on this one—I really believe that what we are talking about here is, how much faith we do have in the processes of this House, and how much pride we really do have in this House and in ourselves and in our ability to explain to the people who we represent what in fact the actual facts of life are in the Federal budget process.

Those Members who know me well in this House know that I place process above almost everything, because that is what democracy really is. It is a question of process. I voted against the equal rights amendment extension yesterday because while I support ERA very strongly I also believe so fundamentally in decent, orderly, fair process. I would urge Members to oppose this amendment today for the same reasons.

Now, we have had our go at appropriation bills, and we have cut some money from those bills through individual specified actions on specific programs, and then we have made other cuts across the board on those appropriation bills. In the main, those cuts have been in the nature of 2-percent across-the-board cuts. I opposed virtually all of them ex-

cept the foreign aid bill—for admittedly tactical reasons on the foreign aid bill.

I submit to the Members that sooner or later we as individual Members have to stand by what we have done. If Members wanted to vote for a 3-percent cut on the Labor-HEW bill and on the foreign aid bill and the other bills instead of a 2-percent cut, we should have done it at the time, on the proper vehicle, and not on the budget resolution.

I want to read to the Members what Senator HENRY BELLMON, the ranking Republican in the Senate on the Budget Committee, has to say about these mischievous across-the-board cuts, he called them—and I am quoting from a National Journal article analyzing the great destruction to the appropriations process occurring in this House. He described the across-the-board cuts as, "* * * dangerous, intellectually lazy, and an invitation to demagoguery."

Then, he went on to say—

> Continuation of the across-the-board budget cutting trend might well cause the appropriation committees to add cut insurance to their bills.

And that is exactly what is going to happen. I know this is 3 or 4 months before an election. I know it is convenient to run home and say, "Every day on the hour, every hour, I have voted for another cut," but sooner or later your own sense of self-respect is going to have to make you stand up and say, "That's enough."

I would urge Members not to go down this line, because they will cause the Appropriation Committees in the future, and this committee, to come out with what we know is fat, because we know that the House will want to have its day and make some cuts, no matter how highly the bills are drawn.

I would like to make a couple of other points. I voted against the carrier on the defense budget 2 weeks ago because I thought the carrier was stupid, but I lost, and when the amendment came up afterward to cut the defense budget across the board, I voted against it because I thought we have the obligation to spell out specifically what programs we are talking about if we make cuts. We have had 2-percent after 2-percent after 2-percent cuts, and as a result of the congressional action. I know this amendment sounds very easy to take, like "It ain't going to hurt nobody," but I want Members to put it in perspective.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(By unanimous consent, Mr. OBEY was allowed to proceed for 3 additional minutes.)

Mr. OBEY. Mr. Chairman, through every action the Congress has taken so far we have reduced appropriation bills by $4.7 billion on the 13 appropriation bills that we have run through this House. What we are being asked to do in this little old harmless amendment is to double that ante. You know, you know that almost all of you at one time or another have written every subcommittee on the Appropriations Committee and you have said: "Hey, boys, give us some additional money for this program and give us some additional money for that program," and then you have been able to send your letters to the appropriate interest groups bragging on the fact that you have been really looking out for their interest. And then what you do, if you vote for this amendment, is you walk down the other side of the street and you say: "OK, now that I have satisfied every interest group in the country that wants a nickel out of the Congress and taken credit for it all personally, I am going to walk the other side of the street and be able to tell my Rotary groups and be able to tell my Kiwanis groups that I am fiscally responsible because I have cut the budget." That is the most irresponsible way you can approach the budget. I ask you, for what it means to the House in future years, not to travel down that road.

You have literally dozens of rollcalls that you can take back to your people to show you have cut responsibly and specifically. But if you look down this list, how many of you come from an agricultural area as I do? You know how hard we had to fight for a decent agricultural bill. This cuts the agricultural budget by $115 million. It cuts defense—and I would love to do it and cut defense by $1.1 billion as this amendment does, but it does it in a very uncourageous way, and I would urge you not to do that.

If you are going to cut, cut when the authorization bill is here. If you are going to cut, cut when the appropriation bill is here.

In income security, how many times are we going to eliminate fraud and abuse in that category? The gentleman from Illinois (Mr. MICHEL) had put an amendment on the Labor-HEW, cutting that category by $1 billion in fraud and abuse. It was just an estimate how much we could save.

How many reflections are we going to put up? How many mirrors are we going to put up in each of those programs? We can put up five or six or seven mirrors and cut $1 billion each time because we have added another mirror, but we have not changed reality, we have only changed the number of mirrors. Please smash the mirrors and face reality and vote down this amendment.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has again expired.

(On request of Mr. HUGHES, and by unanimous consent, Mr. OBEY was allowed to proceed for 1 additional minute.)

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I think much of what the gentleman has said has a great deal of merit. But the gentleman has suggested that the proper way we cut is as we have each appropriation bill before the House. If we carry the gentleman's statement to its logical conclusion, we would just be having a pro forma session to approve the budget. Is that not so?

Mr. OBEY. No. I disagree with that. I have no objection to people coming in here and cutting specific programs, but this across-the-board, 1-percent business is I think undignified. I think it is unreflective of the courage and business sense I know is in this House, and I do not think we ought to do it.

Mr. HUGHES. If the gentleman will yield further, I do not know how any Member can express his own feeling that the budget is not fiscally sound, that the outlay item and the deficit is too high, unless we do it in the manner in which we are doing it.

Mr. OBEY. If I can claim back my time, the way to do it is to vote to cut specific programs, not doing it like this.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, shortly after I first came to the Congress when I was originally elected, the Congress was being accused again and again of wrong doing, and I want to be honest with you, there were times when I hesitated to identify myself as a Member of the Congress because it was under such vigorous attack for so many reasons.

I am proud to identify myself as a Member of the Congress now because I think, in the ensuing years, the Congress has begun to act in a very responsible fashion. It has taken on some initiatives it should have taken on a long time ago. The one thing it has done in the last 4 years is, most of the time, to act in a consistent manner.

I am not even going to speak to the substance of the Fisher amendment. I am going to speak to its absolute inconsistency.

This is a 1-percent cut across the board. Less than 10 days ago, in the last week, I offered an amendment on the defense appropriation bill. It was a 1-percent cut. Actually it was less than a 1-percent cut, it was an eight-tenths of 1-percent cut and the House voted it down.

Of course, I was hurt about it. But, how in the world can this same House today vote for the Fisher amendment which is a 1-percent cut in defense which the House repudiated less than 2 weeks ago? I do not think that is at all sensible or responsible. I think that begins to undermine the kind of credibility that this House has slowly begun to establish. There is no logical way that you can explain to your constituents that 10 days ago you voted against a less than 1-percent cut in the defense budget and then, 10 days later, you voted for it.

Do you tell them, "I am a will-o-the-wisp"? Do you tell them, "I float and go with every current that invades the House"? Do you tell them, "I like JOE FISHER. That is why I voted for it"?

Are you going to tell them, "I had been pressured, additional pressure was put on me, therefore I had to succumb to the pressure and vote against my better judgment which I exhibited less than

10 days ago"? You cannot do it and still expect the respect of your constituents. It is inconsistent. It is illogical. It is nonsensical, after having voted down a 1-percent cut 10 days ago to vote for it today.

I urge defeat of the Fisher amendment, primarily in the interest of the respect of each and every Member of this House should earn.

Mr. ROBERTS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, I defer to no one in attempting to have responsible spending. I voted for the Holt amendment. I have voted for a lot of other cuts. But, Mr. Chairman, 60 percent of the cut proposed by the gentleman from Virginia (Mr. FISHER) is in three items, national defense, income security—which you really cannot touch—and the Veterans' Administration.

The veterans' benefits basically are entitlements and there is no way you can reach them by law, no way. I think I could sit down and regardless of what the gentleman wrote in, it would not affect the veterans, not the veterans' pension fund, not the veterans' compensation fund. But, Mr. Chairman, I just do not like to be legislating in the way that this amendment does it. I think it is going to be very difficult to vote against this amendment.

I think it is going to be very difficult to vote against this amendment; but if we are going to be responsible, we ought to strike out those three items. If we do that, we ought to strike the whole thing out.

Mr. FISHER. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I will be happy to yield to the gentleman from Virginia.

Mr. FISHER. Mr. Chairman, I simply want to point this out, that the only numbers in the resolution which are legally binding are four or five totals. The categories are shown, but those are not legally binding.

Therefore, if there is an entitlement in a veterans' program which, by law, has to be paid, then the administration would have to find slack elsewhere in the budget to meet that obligation.

Mr. ROBERTS. If I may reply to the gentleman, Mr. Chairman, what would happen is that it would close eight VA hospitals. That is about what it would cost to operate eight VA hospitals. The medical program is not under entitlements.

Mr. Chairman, the amendment is a bad one; and despite the fact that it is difficult to vote against it, I hope it will be defeated.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Chairman, the gentleman from Texas (Mr. ROBERTS) has highlighted the problem with which we are confronted.

We cannot, and should not, in the budget resolution come to grips with every detail in the budget. I do not think the House ought to place itself in the position of attempting to make reductions in appropriation bills in this manner.

Mr. Chairman, I applaud the gentleman from Texas (Mr. ROBERTS) for his opposition to the amendment.

Mr. ROBERTS. The amendment would not achieve the purpose at all.

Mr. FISHER. Mr. Chairman, if the gentleman will yield further, I would like to respond to the point made by the most respected chairman of the Committee on Appropriations.

Mr. ROBERTS. If the gentleman would care to respond to me, fine. Otherwise the gentleman can get his own time.

Mr. Chairman, I yield back the balance of my time.

Mr. DERRICK. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we have done a great deal in the budget process over the last 3 years. We finally end up here today where we have a deficit figure which is around $39 billion, and we have done that in a responsible manner.

Mr. Chairman, budgeting is not an easy task. This is a large Federal Government. It cannot be changed dramatically in 1 day. However, the important thing to this House, and the important thing to those who we represent, is that we are heading in the right direction.

We have a deficit which is some $25 or $26 billion less than we had 3 years ago. With all due respect to my dear friend, the gentleman from Virginia (Mr. FISHER), a very able member of the committee, I rather think a meat-axe approach is not too responsible.

I know that we are not willing to go back to our districts and tell those people who depend on us, the aged, the 33 million Americans who depend on social security, those who do not have enough to live on today and who are suffering from the ravages of inflation, that we are going to vote to cut their income security programs by $1.7 billion.

I know that we are not willing to go back to our districts and tell those people who are so concerned about our country's defense posture in the world today, and how we stand relative to the Soviet Union, that we voted to cut, in a meat-axe approach, $1.2 billion in defense outlays. We are not willing to reduce veterans' benefits by the sum of $227 million and also funds for the administration of justice. A burning issue, at least in many of the polls that I have seen, is crime in this country.

The Fisher amendment calls for us to cut back in these areas. Let us continue to be responsible with our budget process, as we have been over the last 3 years. Let us do what we are charged to do in a responsible manner. Let us not act in a harum-scarum manner here, so that we can go back to our constituents and tell them that as "great statesmen" we voted to cut those terrible Federal expenditures but not tell them that we cut those programs that they are so vitally interested in.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I am delighted to yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding and would like to state that I intend to vote against the Fisher amendment.

Mr. DERRICK. I am delighted to hear that.

Mr. LEVITAS. I am pleased the gentleman from South Carolina is delighted, and I know one of the reasons the gentleman is delighted is that I have consistently voted for every single across-the-board cut on appropriations bills that have come up. Frankly, I think a 1-percent cut is too little. That is one of the reasons I voted for the Holt amendment which would have been a $10 billion reduction.

Mr. DERRICK. If I might interject right at this point, I think it was Shakespeare who said that consistency is the hobgoblin of little minds. I would not put the gentleman in that category.

Mr. LEVITAS. I recall hearing that on one of these occasions. Let me tell the gentleman one of the reasons—there are several reasons—I think the appropriations process is where we should cut across the board, and I am happy to say that we have exercised that power.

Also, each of the amendments offered to cut appropriations by the gentleman from Ohio (Mr. MILLER) or others, has always had a safeguard which says we will cut 2 percent across the board, but no program shall be cut more than 5 percent. In the Fisher amendment we do not have that important cap and as a result we will be cutting some programs more than others, where we take the entitlement programs into account, such as income security programs, which are entitlements; veterans' benefits, which are entitlements; food programs, which are entitlements; general revenue sharing, which is an entitlement. Therefore, what we are going to do is not cut national defense by only $1.1 billion since it is not an entitlement; we are going to be cutting it by $2 or $3 billion or more. We are going to be deeply cutting health programs and other programs by not just one or two percent but in many instances by much, much more because entitlements are protected and appropriations are not. I do not think that is a responsible way to cut in the budget resolution.

Mr. DERRICK. The gentleman's remarks are well taken, and I commend him on his vote he is about to make.

Mr. FISHER. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from Virginia.

Mr. FISHER. I thank my colleague very much for yielding.

A few moments ago my colleague in his inimitable good-natured way castigated me for a meat-ax approach—it is a small meat ax, the gentleman will have to concede, 1 percent—and not being willing to face my constituents or anybody else and say where I would make

the cuts. I am the first one to come along today, I guess, with a reduction amendment in which the cuts are specified category by category. I am quite willing to face that music.

Mr. DERRICK. May I say this to the gentleman from Virginia that sitting there and reading his amendment, I was about to get up and compliment him on that fact until, if he will allow me to say so, he started equivocating with the gentleman from Texas (Mr. ROBERTS) on where it would lead.

Mr. FISHER. No, if I may respond.

Mr. DERRICK. I thought the gentleman started to equivocate. He was hedging there a little bit, I will say to my dear friend.

Mr. FISHER. No, I would not call that a hedge unless, indeed, truth is a hedge.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. FISHER, and by unanimous consent, Mr. DERRICK was allowed to proceed for 4 additional minutes.)

Mr. DERRICK. "Quibbling," is any attempt to impart a false impression, or conceal a fact using a technicality which in itself may be a true statement.

Mr. FISHER. Of course, my colleague understands that if I wanted to conceal anything, I would not have responded to the gentleman from Texas (Mr. ROBERTS). Instead, I came right out with it and said, indeed, what is the law that only the totals are binding? And, of course, if some category has legal entitlements that carry it up so that it cannot accommodate the 1-percent cut, then something else has to give or we have to come back for a supplemental appropriation. This is well known, and I make no attempt to conceal it.

Mr. DERRICK. If the gentleman does not believe that the statute would support the specifics as outlined in the amendment, I know the gentleman might not well have included it.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I will not take the 5 minutes. You know, we listen and listen in this House. We have been asked if we would be willing to go back to those poor people who can hardly live on the money they get through welfare or social security. Of course, we would not be willing, because we are not thinking of doing that. We are not asking that those benefits be cut. We are asking that the benefits, indeed, be raised, but only that the raise be a little bit slowed down.

Passion is poured out on this floor in praise of our responsibility. We are not totally responsible, and we know it. We have a gallant chairman of our Budget Committee and a gallant ranking member and they try; but can they control this House? No, they cannot.

What did we fail to do right in the beginning? We failed, because we did not at the outset of the budget process, in the first resolution, set some kind of ceiling on what we were going to spend, a total into which all these programs could have been fitted. It was because we did not want to, because we have powerful people on this floor who will not give up an appropriation desired by some special interest group.

I yield to no one in this House in voting against spending. I have voted against appropriations one by one as they come up, at great cost from the standpoint of popularity; but we are fooling ourselves if we talk about fiscal responsibility here. If there are entitlements, who made those entitlements? We did. If they have built-in costs, who built them in? We did.

There is no use for all this grand talk. No one is proposing to keep these programs at the present level. Neither am I. But I am sure there is not a veteran or a person on social security or any of these unfortunate people referred to so movingly who would not be happy with a 7-percent rise, and that is all we are saying. In fact, it would be more.

We have heard much talk about the tremendous unemployment of our central cities and of our young blacks; is anybody in this House more concerned than I am? I do not think so. In every committee on which I sit, I concern myself with this problem. But try to take any money out of public service jobs and put it in that area and see what happens. We try to fool everybody. We are simply playing games. The citizens are going to understand perfectly well whether or not it makes sense to say that we have $480 billion or $490 billion to spend, and we cannot even cut $4 billion out of it. We know perfectly well we could. We have Amtrak trains running and we will not even cut the trains that cost $100 per passenger.

Mr. GIAIMO. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the distinguished chairman.

Mr. GIAIMO. Mr. Chairman, you know part of the problem, and I think the gentlewoman points up the very real problem we face in this country. I know that both the gentlewoman and I have been trying our darnest to cut expenditures.

Mrs. FENWICK. We have.

Mr. GIAIMO. And I think we have to try even harder to do so. I think there are areas where we can make cuts. I think there are areas where we can have reductions. I think we have made a start this year.

Mrs. FENWICK. I do, too.

Mr. GIAIMO. But we are at the end of the year now.

If the gentlewoman will yield further, and I will get the gentlewoman some more time, let me say the appropriate committees have exercised their functions. We have cut their bills on the floor. I am sure both the gentlewoman and I tried to take the 2 percent out of a lot of those bills and in many instances we were successful, but it is finished. It is over now and those bills are going over to the other body. We will have conferences and we will come out with figures that might be even higher than they are now. What will be the result if we cut this resultion now? We will have a $5 billion reduction in budget authority and $5 billion in outlays.

What will happen? I doubt very much if the other committees will go back to their deliberations and look around to see where they can find their portion of that $5 billion. They will not do it, and we will then be faced with a budget resolution that will have $5 billion less. So at some point in the fiscal year we will hit up against the ceilings. When we do that, we are either going to have to stop programs or we are going to have to come back here with a third budget resolution and adjust the figures to what the authorizing committees and the appropriating committees have done. That is the problem.

Mrs. FENWICK. Maybe the gentleman and I ought to have a heart-to-heart talk.

Mr. GIAIMO. I would be delighted to have a heart-to-heart talk with the gentlewoman.

Mrs. FENWICK. But maybe we cannot do it on the floor of the House.

Mr. GIAIMO. That is what we are doing now, I am told.

Mrs. FENWICK. It never seems to be the right moment to cut spending. When we want to start right at the beginning of the process, we are told that is not the time to consider spending controls.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. FENWICK) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mrs. FENWICK was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. Yes, I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague's yielding.

I think the gentlewoman from New Jersey (Mrs. FENWICK) has made an excellent point. Unfortunately, although I know the chairman of my committee has worked very hard in many areas to make substantial cuts when authorization and appropriation bills have been before us, the argument that he uses that our committees will not respond to what we do in this budget resolution is the same argument that was made against proposition 13, that the county and city governments would not be responsible in adjusting their expenditures downward. But they did. They have not all done it perfectly, but they did.

I believe that this House of Representatives, for this relatively small cut, would be just as responsible as the cities and counties of California were in responding to the passage of proposition 13.

Mr. Chairman, I think that is what the gentlewoman from New Jersey was trying to say.

Mrs. FENWICK. I was not really thinking of proposition 13.

Mr. GIAIMO. Mr. Chairman, will the gentlewoman yield further?

Mrs. FENWICK. I yield to the chairman of the committee.

Mr. GIAIMO. Mr. Chairman, the gentlewoman may well be right. All I am saying is that it is much more difficult to do this at the time of the second budget resolution, when the other com-

mittees have done all their work, than it is to do it at the beginning of the year when they begin to consider these bills.

Mrs. FENWICK. But, Mr. Chairman, let me say to the gentleman that we cannot get the votes to control it at the beginning. We just cannot get the votes. We have a two-thirds majority of one party in this House, but the House refuses to vote for a control like this. Oh, yes, there are fiscal heroes over here, and there are some over there, too, although I see some who are not.

We do not seem to be able to come to grips with this. Could we agree right now, those of us who may come back next year, that we could start to solve this problem by setting a ceiling and fitting the pieces under that ceiling?

Is there any Member here who would agree to that? I have heard the eloquent Members who have spoken, including the gentleman from Wisconsin (Mr. OBEY) and my colleague, the gentleman from South Carolina (Mr. DERRICK).

Would the Members be willing next year to start on some really rational program? I wonder.

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will try to be brief.

Mr. Chairman, I am a little troubled by some of the things I have heard today about the budget process. I want, first of all, to congratulate our colleague, the gentleman from Connecticut (Mr. GIAIMO), the chairman of the Committee on the Budget, because I think he does a good job considering all the problems that exist in trying to formulate a budget that will carry out all of our needs and aspirations and at the same time stay within fiscal bounds.

One of the reasons I voted for the first budget resolution was because the chairman of the committee convinced me that they were just temporary budget targets. I was unhappy, first of all, with the size of the outlays, and I was unhappy with the size of the deficit. But the committee chairman, along with our colleague, the gentleman from Wisconsin (Mr. OBEY), convinced me that I should vote for the first concurrent resolution because the job was to work on a piece-by-piece basis as the legislation came before us in trying to cut expenditures, which is what Americans want us to do.

I do not know of very many programs that we have underway in this Congress that are not needy and very worthwhile, and that is the difficulty when we come to the point of trying to cut specific projects and programs. All these programs are needed, but unfortunately we do not have enough dollars to fund them.

One of the reasons a so-called meat-ax approach is so attractive is because it does offer an opportunity to try to strike a balance as we cut outlays. That is what the taxpayers expect us to do. One of the arguments I have heard today is that we should now vote against the Fisher amendment because we have already sent the major appropriation bills across to the Senate.

Mr. Chairman, it seems to me that there is something wrong, then, with the process if we say that it is too late now because we have already done the damage and it was too early back in May because they were only temporary targets. That, to me, does not make sense. I frankly support the Fisher amendment because I think there is 1 percent fat in all of the functional categories we have talked about. We have enough fraud and abuse, we have enough duplication and overlapping, and we have enough waste in the Federal bureaucracy that we can surely find areas to cut 1 percent. I would urge my colleagues to support what I consider to be a responsible and a reasonable amendment. It is what the American public wants and expects of us as their national leaders.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding, and I want to say that I think the gentleman is very wise to bring up the fact that the General Accounting Office has indicated in many, many reports that they have found fraud and abuse exceeding $25 billion in the expenditure of funds. So on that issue alone, this would force many of these agencies to really look at that issue and save.

Mr. HUGHES. I thank my colleague for his remarks.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HUGHES) has expired.

(On request of Mr. MITCHELL of Maryland and by unanimous consent, Mr. HUGHES was allowed to proceed for 1 additional minute.)

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I do not quarrel with what the gentleman is saying, but I think the record has to be made clear that in the second budget resolution that is before us, in almost every one of the functional categories we have reduced the targets, we have reduced the spending from what it was in the first budget resolution. So the process does work. There have been some intervening factors which have caused us to come in now with a deficit which will be below $40 billion, way below what was first envisioned in the first budget resolution.

Mr. HUGHES. If I may reclaim my time, I do not quarrel one bit with the statement the gentleman has made. I think the Budget Committee has done a credible job. I know somewhat about the pressures that the Budget Committee is subjected to. I know every chairman views his own particular committee's work as the most responsible and the most needy of programs.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HUGHES) has again expired.

Mr. HUGHES. Mr. Chairman, I ask unanimous consent that I may be allowed to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. BEARD of Tennessee. Mr. Chairman, reserving the right to object, I do not plan to object but I would like to say that we have gone through this procedure for the last several hours on the other amendments, and I plan to object to any requests for additional time because I think we have beaten this horse to death. I just want to say that after this I will object.

Mr. HUGHES. Mr. Chairman, I withdraw my unanimous-consent request.

Mr. CORMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am concerned about the amendment as it relates to function 600, income security because almost all of the expenditures under that function are entitlement, and there is no possibility of there being any cuts. So instead of having a 1-percent or a 2-percent cut across the board, we would see an elimination of at least two programs that this House has considered fairly important. One is the money we intended to spend to assist severally disabled to move into the employment market. We did that just a week ago, with only five votes against it.

We sent over to the Senate a year ago last April a program for about $75 million to try to get little children out of orphan homes and into adoptive homes. That program would have to be eliminated because it is not entitled to the program.

Mr. Chairman, I would urge defeat of the amendment. I know we all like to think of ourselves as fiscal heroes. That is the way I felt when I voted against cutting the Federal income tax 33⅓ percent last week.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, first, let me state that I will not take the 5 minutes. I personally wish to compliment the Budget Committee for doing what I think is a wonderful job.

I know that during the Budget Committee's process of scrutinizing all these appropriations and authorizations, we had much difficulty before the Budget Committee to get them to approve certain appropriations for our educational legislation. Now, this amendment will cut education and the training programs back by $338 million. I want to inform the gentleman that his amendment is just too drastic insofar as the welfare of education is concerned.

It would be my hope that such a meat ax approach as this, where it will apply to some of the most worthy programs after they have been so carefully scrutinized already by the Budget Committee should not be considered by the committee. I want to say that the gentleman's amendment should be voted down.

Mr. JOHNSON of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, speaking as chairman of the Committee on Public Works and Transportation, there are a number of items here that would be drastically cut back. We worked very closely with the Budget Committee on the first resolution to make sure that all of our matters of concern were worked out with them. Then, we worked very closely with the Appropriations Committee to make sure that those projects that were underway were financed properly by the appropriations allowed by the Appropriations Committee. We have worked very closely with the Budget Committee, and I want to commend the gentleman from Connecticut (Mr. GIAIMO) for the very fine work of his committee in receiving all of the matters of concern from the Committee on Public Works and Transportation.

Our budget experts have worked with him. We have tried to comply and cut back in every way we could, but there are a number of items here that will be touched by the Fisher amendment. Therefore, I stand in opposition to the amendment, and hope that the House will vote down the Fisher amendment.

Mr. PICKLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Fisher amendment.

Mr. Chairman, on many of the amendments we have had today and in recent days, there is much speculation and many assumptions made that they might or might not reduce our deficit. This amendment is real; it is specific. It may be the very best way to show that we are trying to tighten our belts. I would hope that it passes.

I recognize fully that in every category, every chairman and every related group can feel that this might also cut into their programs. We will all accept that, but this is perhaps the best, if not the last, chance today for us to make a meaningful cut in the overall budget deficit. I would, therefore, recommend that the Fisher amendment be agreed to.

Mr. FISHER. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Virginia.

Mr. FISHER. Mr. Chairman, I thank the gentleman from Texas for his support. I would like to say just a couple of things. These same arguments that are being raised here this afternoon against this $5 billion cut, 1 percent, were raised against the 2-percent cut I offered 3 months ago. Now the Budget Committee, on which I am proud to serve, comes back with the 2-percent cut, and argues against any further cut with exactly the same points.

I claim that the situation has moved along. The economic outlook is good, unemployment is down, and now is the time to take another little bite out of the expenditures. This is my judgment.

People everywhere in the country are clamoring for budget restraint. You hear it everywhere you go. How can we tell these people that we cannot manage a 1-percent cut? How can we tell the housewife faced with a tight budget that we cannot do that? How can we tell the small businessman, or the big businessman either, that we cannot do it? The answer is that we can do it.

Sure, it will hurt here and there a little bit, and I recognize that different Members will of course step forward to defend this program or the other one, but I have been perfectly straightforward in this amendment and told all the Members what the cut would be for defense or income maintenance, for agriculture and everything else.

There is no use any longer trying to vote for cuts in the abstract without knowing what they mean to particular programs. I believe the people of the country will respond to this and give us some credit for trying to achieve a practical, manageable cut and being men and women enough to say what is going to have to be reduced. So I do urge, in the name of commonsense and in the name of what I believe the people of this country want, I do urge the Members to vote for this modest, achievable, practical reduction and restraint in expenditures.

Mr. BURKE of Massachusetts. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am not going to take much time here, but I do note that the gentleman from Virginia is offering an amendment that will cut close to $2 billion from social security benefits. In other words, every person in your district is going to feel this cut of $2 billion at a time when we are facing the highest inflation in our history.

I say it would be outrageous to adopt this amendment and I hope it is defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. FISHER) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HUGHES. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 155, noes 241, not voting 36, as follows:

[Roll No. 710]

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Thompson against.

Messrs. SKELTON, MURPHY of Illinois, BYRON, WEISS, BUCHANAN, MARLENEE, KELLY, FITHIAN, and LIVINGSTON changed their vote from "aye" to "no."

Messrs. HEFTEL, ENGLISH, and PREYER changed their vote from "no" to "aye."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. LEVITAS TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. LEVITAS. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS to the amendment in the nature of a substitute offered by Mr. Giaimo:

In the matter relating to the appropriate level of total new budget authority reduce the amount by $753,000,000;

In the matter relating to the appropriate level of total budget outlays reduce the amount by $753,000,000;

In the matter relating to the amount of the deficit reduce the amount by $753,000,000;

In the matter relating to the appropriate level of the public debt reduce the amount by $753,000,000;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, reduce the amount by $753,000,000.

In the matter relating to function 850: General Purpose Fiscal Assistance reduce the amount for budget authority by $700,000,000; and reduce the amount for outlays by $700,000,000.

In the matter relating to function 900: Interest on the national debt reduce the amount for budget authority by $53,000,000; and reduce the amount for outlays by $53,000,000.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

Mr. WYDLER. Mr. Chairman, reserving the right to object, I wonder if the gentleman in the well can tell us if the effect of the gentleman's amendment would be to eliminate all funds from the budget for any type of countercyclical programs?

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield, it would reduce by $700 million the amount of budget authority for countercyclical programs and would reduce by $53 million the interest on the national debt.

Mr. WYDLER. Mr. Chairman, what would be left if the amendment were to pass in the program?

Mr. LEVITAS. Just about $500 billion.

Mr. WYDLER. I said in the program, in the countercyclical program.

Mr. LEVITAS. In the countercyclical program, nothing.

Mr. WYDLER. Nothing?

Mr. LEVITAS. Nothing.

Mr. WYDLER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia (Mr. LEVITAS) that the amendment be considered as read and printed in the RECORD?

There was no objection.

Mr. LEVITAS. Mr. Chairman, this amendment would have the effect of reducing the interest on the national debt by $53 million, it would bring the deficit under this bill to approximately $39.2 billion, and it would eliminate entirely the so-called supplemental fiscal assistance program.

Supplemental fiscal assistance was purported to be the son of countercyclical. Countercyclical was to phase out as unemployment reached 6 percent, and then it would no longer be in effect. Instead, the administration, at the last minute, sent over a new program called supplemental fiscal assistance. That program is a brandnew permanent program as sort of an add-on to revenue sharing. We already spend $6.1 billion a year in revenue sharing.

The proposed program was so poorly targeted that many very wealthy communities such as Greenwich, Conn., and the affluent district represented by my colleague, the gentleman from New York (Mr. WYDLER)—and these are very affluent communities, communities not in need—would continue to receive substantial funds because there was no targeting.

Instead of targeting on the communities in need, we would be spreading even more money out across the country to State and local governments in which we see budget surpluses at a time when the Federal Government is operating at an enormous deficit, as we all know today.

The present countercyclical program, as has been said by the GAO, is not working, but at least it had the merit of phasing out. Now, instead, we have a new program by which, in addition to the 17,000 communities and local governments covered by countercyclical, we would increase the number of communities covered to 28,000.

Mr. Chairman, we would, by this program which was supposed to have been targeted declare that 70 percent of all local governments in the United States ar suffering from fiscal distress. That is just not the case. What we do need is a targeted program but we do not have one.

As a result, the subcommittee of the Committee on Government Operations which considered this bill voted to postpone indefinitely further consideration of it so that next year a true, meaningful, and targeted countercyclical program can be developed. The House of Representatives has no pending legislation before it which would create this program. The Senate committee has reported out a substitute program. We should let them put it in their budget, but I think it would be wrong for us to add to our deficit by including it in our budget. I think we properly ought to relieve ourselves of that burden.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, is it not true that this is what happened with this particular program: When we got down below 6 percent in national unemployment, the program on countercyclical fiscal assistance was no longer operable. The way we originally wrote it was that if we had less than 6 percent unemployment at the national level for 3 months, there was no need for countercyclical aid and we did not need a countercyclical program. We are very close to reaching that cutoff point in the program in the current quarter.

So what happened was that many of the cities that had gotten used to spending the money came to Washington and said to the administration, "We have got to continue getting some money. You just can't end the money. The recession that this was designed to try to resolve or ameliorate is over, but you have still got to give us some money."

So the administration tried to craft a program that would get the maximum support in a political sense, and the result was a program that helped some of the major resort cities of the country where the superrich go to play. It helped some of the superrich communities of the country, too. But the people who pay the taxes under that fiscal assistance program are the middle-income taxpayers in the average cities where we find about the average per capita income around the country.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(On request of Mr. BROWN of Ohio, and by unanimous consent, Mr. LEVITAS was allowed to proceed for 3 additional minutes.)

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield further?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. As a matter of fact, in a State like my own, the result of the administration's proposed program would have been that the major cities in my State would get back, on a per capita basis, something like $3 for every $4½ that they would pay in taxes. But areas like Greenwich and Bridgeport, Conn., which are among the highest per capita income areas in the country, would have gotten a very good deal from that arrangement, and also the Hamptons in Long Island.

Mr. LEVITAS. Mr. Chairman, the gentleman is absolutely correct. The one virtue countercyclical had was that it would cycle out when unemployment reached 6 percent. Instead, what we are talking about is a poorly targeted program, literally scattering money around the country, with a mindless formula, and this is not the way we should treat the tax dollars of the people across this land. If the people of California want to vote for proposition 13 and reduce local taxes, fine. But they should not then look to the Federal Government to make up the difference in whole or in part; and that is exactly what we are being asked to do in this program.

The House committee has eliminated this program. Why should we include in our program something the House committee has eliminated? Let the Senate deal with it in their own way.

Mr. BROWN of Ohio. I thank the gentleman for his comment. If there is any way we can cut and save in this budget without doing damage to the needs of our society, it is clearly in this one.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Mr. Chairman, the gentleman said in his statement that what we needed is a target program. Would the gentleman agree in fact that the Senate Finance Committee bill is a targeted program?

Mr. LEVITAS. I am glad the gentleman raised that question. I think the Senate finance bill, if anything, may be worse than the supplemental fiscal assistance. I will tell you why. It has two titles to it.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(On request by Mr. REGULA and by unanimous consent, Mr. LEVITAS was allowed to proceed for 1 additional minute.)

Mr. LEVITAS. Title I is an extension of the present countercyclical program, which GAO has said is bad. My dear friend, the gentleman from Wisconsin, has said repeatedly it is not a good program. That is title I. When title I triggers out at 6 percent, they have another program setting off in the wings, and that new program that is going to come in is a program that takes $650 million, as I recall it, and says you can either get it under general revenue sharing, or some other formula similar to fiscal assistance. So you take your choice wherever you get the most money. I agree that there are many cities and counties which do need additional aid. I think we need to target it. This legislation does not. I think we in the House ought to let it go, and if it gets to conference, let them work it out.

Mr. REGULA. This budget resolution does not propose to target anything. We simply put the cap on the amount to be expended and we leave it to the authorizing committee to do the targeting, the committee on which the gentleman is a member. Is the gentleman suggesting there would be no bill dealing with countercyclical coming out of this House in this session?

Mr. LEVITAS. I do not see legislation coming out unless the administration submits a piece of legislation that makes vastly more sense than anything we have seen so far.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. The unemployment rate in this country is going down. It is one of the few economic successes we have. Since that is the case, that we are having the unemployment rate reduced, why do we need a countercyclical program at this time?

Mr. REGULA. Mr. Chairman, will the gentleman yield so that I may respond?

Mr. LEVITAS. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, the answer to the gentleman's question is that the unemployment rate nationally is going down, but that does not necessarily mean it is going down in the targeted areas.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that the House Budget Committee acted in a very responsible fashion by leaving some target money in here for countercyclical programs. It is quite clear to me that the gentleman from California is right, that while unemployment has gone down, it has not gone down across the board and remains high in our urban areas. Therefore, the urban areas continue to remain distressed.

I am not going to belabor the point. I think we ought to vote down the amendment, but I want to confess to all Members here tonight that if I ever leave the city of Baltimore and change my residence, I am going to beautiful Atlanta to live. It is a marvelous city, beginning to grow and become a mighty center. I do not want to leave that city in distress.

If for one reason or another Atlanta would not want me, then I would go to Savannah, Ga. Have Members been to Savannah recently? It is the garden spot of the east coast, a city in distress which I do not want to desert. I am in love with Georgia, I guess.

Therefore, if I am unable to go to Atlanta or Savannah, I would then go to Columbus, a beautiful little city in distress. Athens—have you been there recently? A gorgeous place, a place to go to if it comes out of its financial distress. Finally, my colleagues, the great city of Macon, Ga., a symbol of revitalization which, hopefully, one day will come out of its economic distress.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I would just simply say this: I cannot think of any city in America that would not be proud not only to have the gentleman as a citizen, but also, as a Congressman. The gentleman has articulated well the needs of our cities and their taxpayers.

Mr. MITCHELL of Maryland. Mr. Chairman, I love each one of those Georgia cities so much that I would ask for defeat of the gentleman's amendment.

Mr. WYDLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment, and I think everyone in the committee should be well aware of what this amendment means. The passage of this amendment kills any and all hope of any type of countercyclical program for our country. That is what Members are voting on. I think everybody should have that clearly in mind.

Much of what was said about the supplemental fiscal assistance program I can agree with. That is a very difficult program to justify in a great many ways, and gives money to communities that do not apparently deserve it. However, that is not what we are talking about here. We are talking about a countercyclical program.

As a practical matter, where we stand is as follows: The House Committee on Government Operations has killed the supplemental fiscal assistance program for this year. They did that in subcommittee. They did that with about 25 minutes consideration of the bill, and a vote to postpone consideration of it for a year. That was the total consideration by that subcommittee. There was none by the full committee.

I think we can do a little better than that in the Congress of the United States for those areas of our country that are struggling with unemployment and trying to do something about it. These areas need help, and are currently getting aid from this program. I think most Members have areas in their constituencies that are getting aid under the present countercyclical program.

What is going to happen? As a matter of reality here, we are going to get a bill sent over by the other body, since that is the only way this can now be done, since we had no consideration of this matter in the Government Operations Committee. A bill will be sent over by the Senate which, in effect, will continue the countercyclical program at a reduced rate. That is going to be the program. It is not the best program we could have, but it is at least some kind of program.

If we pass this particular amendment, we wipe out all chance of that happening. As a practical matter, the House will never have acted on this matter, and

have allowed it to go by default. I hope Members will not support this amendment. I think it is very destructive of the process we treasure here in the House and cherish, for deliberate consideration of very important programs. Countercyclical is based on unemployment. I hope the Members of the House will overwhelmingly defeat this amendment and allow a program to be considered in the House.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. WYDLER. I yield to the gentleman from Georgia.

Mr. LEVITAS. The gentleman speaks about unemployment rates. I am glad we got into that. We talked about triggering this program in at 6 percent under the countercyclical program. I would like to ask the Members of the House: Do you know what supplemental assistance triggers payments in at? It is at 4.5-percent unemployment. That is less than the level of full employment. That is where your taxpayers' money would be going.

Mr. WYDLER. I have to reclaim my time, only to tell the members of the subcommittee, not the House, that we are not talking about the supplemental assistance program. The gentleman is raising a red herring and he knows it. This has nothing to do with the debate going on here today. That program was killed with the gentleman's help in the subcommittee and postponed for a year. So why does he talk about it here? We are not considering that. He made sure of that. What we are talking about is a program that will in some fashion continue the countercyclical program.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. WYDLER. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, let me just respond to that. We are talking about three basic programs in the Senate bill. The Senate bill first continues the countercyclical which triggers out at 6 percent and which almost everybody agrees is a poorly targeted program—almost everybody.

Mr. WYDLER. I do not know that at all. As a matter of fact, I have never heard anybody agree to that except the gentleman himself. I have not heard a single person say that is a poorly targeted program. It is the program targeted right now. It is the one they are presently getting relief under in our communities.

Mr. LEVITAS. But the reason that program was substituted for is because it was a poorly targeted program.

The CHAIRMAN. The time of the gentleman from New York has expired.

(On request of Mr. BROWN of Ohio, and by unanimous consent, Mr. WYDLER was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WYDLER. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I have a great affection for the gentleman from New York—as a matter of fact, so much affection that I was persuaded by the gentleman from New York and others from his area to vote for the loan guarantee programs that we provided to the city of New York.

Now my question is: When will we stop? We have jobs programs and all kinds of other programs designed to send Federal money into the cities of this country to try to assist them to the tune of—how much? It is $4 billion in the public works jobs program—going to $6 billion. We have revenue sharing to the tune of $6.1 billion. We have unemployment compensation for individuals in those areas economically distressed. We have loans and grants to the tune of billions of dollars for economic development and for water and sewers and all those things. Those are not being destroyed or reduced or abrogated by the amendment of the gentleman from Georgia. Those programs will still exist.

Mr. WYDLER. But I would say to the gentleman, if I follow his logic, he says because we made loan guarantee programs for the city of New York we should not let it be a part of this—and it is only a small part of this countercyclical program. We could make the same argument for revenue sharing and cut it off for the city of New York and they do not get any revenue sharing.

The point is, it is an ongoing program and based on unemployment rates, and the rates in New York are high.

It seems to be a serious problem the Congress has addressed in the past. We should address it. This is the only way we can pass it. It is the best way. But the Committee on Government Operations made an attempt to consider it but we are forced to do it in this way because of what the gentleman from Georgia and other members of the subcommittee did.

Mr. FUQUA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, if there has ever been a temporary program that is being made into a permanent program, this is the start of one. The reason this program is here today is because the countercyclical program is beginning to phase out. We have had a general decline in unemployment and it is triggering out.

What do they do? They plan to open this program up to just about every community in the country that says it might be eligible. But there are some other factors that limit the eligibility.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. When I complete my statement I will yield to the gentleman from New York. The gentleman has had his time.

What we do is bring in over 70 percent of the communities, making them eligible, but there are other factors other than unemployment.

We had hearings on other programs in the Subcommittee on Intergovernmental Relations, and the head of the Bureau of Labor Statistics testified repeatedly that any time you have a community of the size of 50,000 there is absolutely no correct way you can determine the unemployment figure. The larger the base the more accurate they can determine, but the smaller the base there is no way they can determine it.

The President's Council on Economic Advisors has said that full employment should be considered at 4.9 percent. This bill reduces it to 4.5 percent.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. When I finish my statement I will be glad to yield to the gentleman from New York.

This is not a countercyclical program, this is the supplementary fiscal assistance act. If you have any growth in any area then, friend, you had better forget it because you are not going to get any funds under the proposed formula that the administration set up.

My friend, the gentleman from New York (Mr. WYDLER), and in some other communities, in some other areas that have stable growth, that have stable per capita income, they are the ones who will receive the funds under this program. But if you have an area that has any growth, or that has consolidated to modernize its government, they will not get any funds.

I would like to defend the chairman of the subcommittee here. He is not here because he had to leave because of a death in his family. I refer to the gentleman from North Carolina (Mr. FOUNTAIN).

We had 3 days of hearings. We heard witnesses from all over the country. We had formal meetings, we had caucuses of the Democratic Members and nobody came forth with any sort of formula. I am beginning to wonder tonight if we ever had a meeting because I keep hearing from 20 minutes to 5 minutes. But we had a meeting, and the chairman was anxious to try to dispose of the matter one way or another because the House was convening early and he did recognize the gentleman from Georgia to make his motion. But nobody else had made any motion to take any action on the bill that was before us with an improved formula.

I am saying to my friends, if we want to eliminate a temporary program before it gets started, this is the way to do it.

I hope we can come up with a sensible, sound approach that simply makes assistance to communities in distress, but not to reward those rich communities who do not need it.

We have some communities in Florida, Palm Beach is a good example, it comes out smelling like a rose on this. Bel Air Beach over at St. Petersburg can come out all right, too. Greenwich, Conn., and Nassau County, N.Y., any one in which you have a stable growth works out OK.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. Now I will be happy to yield to my good friend and colleague, the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. Mr. Chairman, I am delighted and pleased at the gentleman yielding. All I wanted to point out to you, and apparently I did not make it clear, and I hope everybody else understood it, this program that the President has proposed would help Nassau County. I am

not for it. I am against countercyclical as we are going to get it from the Senate.

I do not know why you keep talking about the Supplementary Fiscal Assistance Act. You killed it. It is dead. So, why keep attacking it, why keep beating a dead horse? Let us talk about the reality of the situation as it is.

Mr. FUQUA. There is no bill in committee that I know of to remove countercyclical funds.

Mr. WYDLER. I just explained to you what was going to happen here and what causes the state that we find ourselves in, the other body is going to place this kind of a program in the bill.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 1 additional minute.)

Mr. FUQUA. I would just like to say to my good friend, the gentleman from New York (Mr. WYDLER), that I think he is probably one of the first who would say that the actions of this House do not necessarily have to depend on what the other body does. I think we have to act here as a responsible body, and not be concerned about what happens in the other end of the hall.

Mr. REGULA. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I find myself in a rather strange position today, and that is one of supporting countercyclical aid. I might say that I was an opponent of it. I voted against countercyclical when it was put in place because what I feared would happen is, in fact, happening; and that is an attempt to convert it into revenue sharing.

Mr. Chairman, I am opposed to the supplemental fiscal assistance program of the President. However, having said that, I think we have lost sight of what the budget process is all about.

We are not talking about any particular program in terms of how it is structured. We are talking about the second budget resolution, and in the budget process we allow a fixed amount of money for budget authority and outlays. Then it is the responsibility of the authorizing and the appropriating committees to determine what, if anything, will be done by way of programs. But I think it would be irresponsible at this point to simply walk away from this matter and leave no room for the two committees, namely, the authorizing and appropriating committees, to deal with the problem of unemployment in targeted areas of the United States.

Mr. Chairman, what we are simply saying is that we are trying to comply with what the GAO recommended, and that is to phaseout countercyclical aid.

I would point out that earlier today this body, by a vote of 2 to 1, reduced the budget outlay figure by 30 percent. That is a one-third cut; and if that is not phasing out, I do not know what would be. I hope that next year we will reduce it another third and then another third, and get down to zero because I do not agree with countercyclical aid as a permanent program. However, having established a program and having given the targeted areas of high unemployment some hope that they would have assistance, I do not think that today we can just arbitrarily cut it off to zero.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Chairman, let me say that I agree with the gentleman from Ohio (Mr. REGULA) entirely in what he was saying.

There is something kind of ingenuous about the people who have moved to cut off all consideration of this bill in the subcommittee and prevented it from coming to the floor for debate or even to the full committee now arguing against it on the specifics. We do not know what the specifics are. We do not know what the specifics are going to be. We have not the chance to consider this thing in the subcommittee. It was cut off without much debate. It never reached the full committee. We never had a chance to consider it here in the House.

Now if we vote in favor of this amendment, we will never have a chance to look at it, to even consider it, to even look at what the Senate would like to present.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I apparently did not successfully make my point to my colleague, the gentleman from New York, because the gentleman in the well is saying the same thing, that cities were promised countercyclical assistance; and if we do not have this program, they will not have such assistance.

I would have to say, on the contrary, there are many programs enacted by this Congress which figure directly in those areas of unemployment.

That is countercyclical assistance, is it not?

Mr. REGULA. Depending on semantics; one can call almost any program which is sending money back to the local communities almost anything; one can label it however he chooses.

Mr. BROWN of Ohio. But these programs such as the public works program were to go into areas where there was need because there was unemployment, as I understand it; so this is not going to deny cities with high unemployment rates assistance from the Federal Government. The very unemployment compensation program, as it is drawn, assists cities because it funnels money into the populations of those communities.

Mr. ASPIN. If the gentleman will yield further, Mr. Chairman. What we have is different programs which have different formulas, and they are designed to do different things. Revenue sharing gives out money essentially on the basis of tax effort. Countercyclical, the program we had last year, gave it out on the basis of unemployment rates. The bill which the Senate apparently has sent out of committee modifies that concept slightly.

The supplemental fiscal assistance program which the President sent over and which was so unceremoniously dumped by the gentleman from Georgia (Mr. LEVITAS) through his motion to table in our subcommittee would have distributed the money based on four factors, one of which was unemployment.

In any event, the point is that each of these things is targeted to do different things with different ideas in mind and different objectives in mind.

To say all of it is countercyclical or all of it is revenue sharing is completely false. What we are trying to do is to tailor each program to a specific need.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REGULA. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. GIAIMO. Reserving the right to object, and I shall not object, but the hour is getting late, and we have had a very, very long debate on this, not only tonight but earlier this afternoon when we had the Mattox-Regula amendment. I do not think we should go on and on and on. I think the issue has been pretty well spelled out and clarified, and I would hope that Members would try to curtail debate so that we will not have to limit debate here.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Wisconsin.

Mr. ASPIN. I thank the gentleman for yielding.

I think what the chairman of the committee has said is absolutely right. This is not the point to debate what each of these different formulas is designed to do. That should be done when the bill itself is before the Congress. All we are saying at this point is the point the gentleman from Ohio was making is let us leave some room in the bill so that when we do consider it, we at least do save money in the budget resolution.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I thank the gentleman for yielding, just for a final comment to the gentleman from Wisconsin. My point is merely this: There are loads and loads of programs which are fully budgeted in this budget resolution that are countercyclical in nature.

Mr. ASPIN. Absolutely.

Mr. BROWN of Ohio. The fact that this one program is being taken out because there is no backstop authorization legislation for it does not mean that we do not have countercyclical programs budgeted for.

Mr. ASPIN. If the gentleman from Ohio (Mr. REGULA) will yield. I have no time to go into why this is different, but just to lump all programs together which are countercyclical in nature is not right. They are all different.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

I would just like to commend the gentleman for the statement he has made, because I think he has put the debate in proper perspective, and I certainly want to commend the gentleman for his logical approach to the matter. What we are dealing with here is a budget resolution, and what the gentleman is saying is that we ought not cut off consideration of this subject by the House at this point.

Mr. REGULA. That is exactly right.

Mr. HORTON. All we are doing here now is providing authority for these funds. It is up to the House to make a decision later.

Mr. REGULA. That is absolutely correct.

Mr. HORTON. I want to commend the gentleman for his objective approach to this matter.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

I would like to ask the gentleman a question in line with the point made by the gentleman from New York (Mr. HORTON). Is there any other place in this budget resolution that the gentleman is aware of where we are requesting funds in the budget for a subject matter on which there is no bill pending in the House? Is there any other place in the budget?

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from New York.

Mr. WYDLER. I thank the gentleman for yielding. There is plenty of legislation pending. We just cannot get it considered—that is the problem.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I will yield to the chairman of the committee.

Mr. GIAIMO. I thank the gentleman for yielding.

Some of the urban initiative programs may well still be pending in the committees, some of the transportation bills, and some of the public works bills, but it is contemplated that there will be legislation.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Georgia.

This is a program, Mr. Chairman, whose time, if it ever was here, has long since gone. We are no longer, by any measure of economic activity, in a recession that calls for Federal assistance to cities to help them maintain basic operations. That was the purpose of this legislation, and one of the main points stressed by its sponsors was that when the economy recovered, the program would phase out. We have reached that point. Unemployment is expected to be well below 6 percent next year, which is the point at which the program is supposed to turn off.

But, even if the unemployment rate did not drop below 6 percent, there would be good reasons to stop this program. It simply has not met its objectives. This is not just speculation on my part. The General Accounting Office has made a detailed study of the program since its inception and concluded that: "It has not been an effective tool for stimulating the economy and has not effectively met its principal objective of selectively targeting aid to only those governments substantially affected by recession."

That is the conclusion of the agency that Congress has established to help it evaluate programs. The GAO has recommended that the antirecession assistance program as it now exists should not be extended, but that Congress find a better way to channel money to cities that actually need it.

Among the findings in the GAO report are that:

Forty-six of the fifty-two government recipients covered by the study had surpluses in their general funds at the end of last fiscal year.

Unemployment rates, the chief factor used to allocate funds, are not reliable indicators of a city's financial health.

More than half the funds received by the 52 governments studied went for salaries and wages, including across-the-board wage and benefit increases.

Mr. Chairman, the economic problem facing this country today is not recession, but inflation. We should examine carefully every program we enact to make sure it will not increase the inflationary burden that now weighs so heavily on our citizens. We should not enact programs that do not meet the objectives set for them. Examined in that light, countercyclical revenue sharing or supplemental fiscal assistance should not be extended.

This nation with approximately a $40 billion estimated deficit does not have any excess revenues to share with cities and areas which have surpluses.

I would like to see this program do what it is supposed to do, and that is fade away. I urge that the House approve this amendment.

Mr. CUNNINGHAM. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Washington.

Mr. CUNNINGHAM. Mr. Chairman, I wish to associate myself with the gentleman's remarks.

As a member of the subcommittee that did listen to this bill and finally did act on it, not to table, but to postpone, this is a logical approach and I simply urge my colleagues to support this amendment and come back at the next opportunity to target, and not take a shotgun to a national concern. We should fight inflation and then help the cities.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Chairman, I respect the gentleman from Texas a lot. Of course, I read the GAO report, too. The GAO report is critical. It says improvements should be made in the program. The trouble is we were not ever allowed to improve the program.

The gentleman from Texas participated in the subcommittee meeting and arranged to postpone consideration of any improvements until next year; so we are left with the problem of trying to deal with the situation you created for us. The only way we can deal with it now is to bring a bill over from the Senate and have it passed in the House.

● Mr. FOUNTAIN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Georgia. I find it incongruous that anyone would propose to continue an antirecession program that pays out money at a time when the economy is not in recession. The concern today is not over slow growth, but rather the need for containing a high and growing rate of inflation—the Nation's No. 1 domestic concern. Make no mistake about it, the proposed antirecession/revenue sharing program would be inflationary and would add to the Federal deficit.

Extension of the countercyclical program or its replacement with the administration so-called supplemental fiscal assistance revenue sharing proposal is irresponsible. My Subcommittee on Intergovernmental Relations and Human Resources has made an extensive study of the administration's proposal and concluded that it would not target money to distress cities but would allocate $1 billion a year to 26,000 communities in the United States.

Neither the administration proposal nor the existing countercyclical proposal recently approved by the Senate Finance Committee will reach the objective of helping distressed cities. The use of local unemployment rates as the mechanism for targeting money to needy governments is a fatal flaw. Those rates are so unreliable that the Commissioner of Labor Statistics has described them as random numbers for communities under 50,000. No more than 5,000 of the 26,000 governments can be assigned actual unemployment rates.

All presently proposed countercyclical or antirecession revenue sharing programs distribute money indiscriminately to rich and poor cities alike. For example, Greenwich, Conn., a prosperous and fast growing community would receive $8.03 per capita while Yonkers, N.Y., which has experienced severe financial problems, would get $2.38 under the administration proposal.

Let me review briefly the history of this legislation. It originated in the Senate in 1976 at a time when the national economy had already completed a year of recovery from the recession. It was extended last year as a vehicle for stimulating the economy. This year, we have a third reason given for extending this program because we do not need stimulation for the economy. Our concern now is not slow growth, but a high and growing rate of inflation. This year, it

is proposed that a new program be enacted that will become a permanent supplemental revenue sharing program at the rate of $1 billion a year. It is time for this Congress to take a stand against these programs that would spend huge amounts of taxpayers funds with no clearly delineated objective and for which there is no proven need.

To cut the budget resolution at this time by approximately $300 million to reduce a $1 billion proposal to $700 million does not face the issue. The $700 million remaining amount is presumably justified on the basis of what the Senate Finance Committee has done, but, in fact, we do not know what the Senate has done. They do not yet have a document describing their program.

Furthermore, a local government becomes entitled to assistance, under both the President's and the Senate Finance Committee and is therefore considered "distressed" under their proposals, if its unemployment rate exceeds 4.5 percent. This rate, I would remind you, is lower than the 4.9 percent the President's Council of Economic Advisers defines as "full employment." Obviously, equating a 4½ percentage rate with "distress" is just plain silly.

I am convinced that federalism in this country is at a crossroads.

Federal assistance to State and local government has grown enormously from $2.3 billion in 1950 and $7 billion in 1960 to the present level of $80.3 billion. And, it is estimated at $85 billion for the next fiscal year. There is almost no State or local function today in which the Federal Government is not involved. We have grants for welfare, health and medical care, education, law enforcement, sewage treatment, highways and urban mass transportation, community development, job training and employment, local public works, libraries, and so on. To this growing list we have added the nearly $7 billion a year general revenue-sharing program. And, now the administration proposes to add still another general revenue-sharing program on top of that one.

Let the Senate do what they want, but the House should take action now to let this program terminate as it was intended to terminate when we extended it last year. We should take all the funds for this program out of the budget resolution and let the American people know that we mean business when we say we are tightening up the budget and reducing unnecessary and unwarranted expenditures and that we are doing it at a time when we have a national debt fact reaching the $900 billion figure, with annual interest at approximately $49 billion. We just must leave the road of fiscal irresponsibility and get on the high and desperately needed and taxpayers wanted road of fiscal responsibility.

The adoption of this amendment will be one step in that direction.●

● Mr. BIAGGI. Mr. Chairman, I rise to express my strong opposition to the effort by the gentleman from Georgia to prevent the House even an opportunity to provide funds for an urgently needed program for our Nation's cities.

My colleagues no doubt recall that the vote to postpone further consideration of the countercyclical program in subcommittee was 7 to 6. Is it upon this mandate that the House will now choose to act?

Consider the fact that major cities such as New York are literally budgeting in funds from this program as they prepare their own budgets. In New York City's case, $140 million was expected from this program—$140 million which if not provided could have dire consequences on the city's already precarious fiscal situation.

There are other cities where similar expectations have been made. The question before us—are we going to again engage in the politics of pitting cities against the rest of the Nation? Are we not going to concede the points that our cities continue to have higher than average unemployment rates—and are in need of this assistance.

Consider the fact that the Senate has passed legislation extending the countercyclical program. Are we going to defy their logic and bar ourselves an opportunity to even consider this program?

I believe the budget resolution offered and championed so well by the gentleman from Connecticut provides a sound and fiscally reasonable approach to this issue. I believe on the other hand that the amendment by the gentleman from Georgia is wrong—is antiurban but more importantly threatens to impede the economic progress we are making as a Nation. If we continue to permit rampant unemployment in our cities—then we will simply regress further. A vote for this amendment is a step in the wrong economic direction and I urge its defeat.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LEVITAS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 187, noes 208, not voting 37, as follows:

[Rollcall Vote No. 711]

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Thompson against.

Mr. Teague for, with Mr. Rodino against.

Mr. Fountain for, with Mr. Hawkins against.

Mr. Risenhoover for, with Mrs. Meyner against.

Mr. McDonald for, with Mrs. Burke of California against.

Mr. Sikes for, with Mr. Stokes against.

Messrs. CAPUTO, ECKHARDT, and SCHEUER changed their vote from "aye" to "no."

Messrs. VOLKMER, KAZEN, LEHMAN, and KRUEGER changed their vote from "no" to "aye."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. JOHN L. BURTON TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. JOHN L. BURTON. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. JOHN L. BURTON to the amendment in the nature of a substitute offered by Mr. GIAIMO: In the matter relating to the appropriate level of total new budget authority reduce the amount by $47 billion;

In the matter relating to the appropriate level of total budget outlays reduce the amount by $15 billion;

In the matter relating to the amount of the deficit reduce the amount by $15 billion;

In the matter relating to the appropriate level of the public debt reduce the amount by $15 billion;

In the matter relating to the amount by which the statutory limit on the public debt should accordingly be increased, reduce the amount by $15 billion.

In the matter relating to allowances (function 920) reduce the amount for budget authority by $47 billion; and reduce the amount for outlays by $15 billion.

Mr. JOHN L. BURTON. Mr. Chairman, this amendment would reduce the deficit by $15 billion. It would do it by reducing the unobligated balances. These are moneys that agencies of Government have that were given to them by the Congress after the money was paid by our constituents in taxes, but the agencies have not figured out how they are going to spend it yet. Now there are $47 billion-plus of these unobligated balances: $20 billion is in the Department of Defense; $7 billion is in the Department of Transportation; $13 billion is in energy—even Jim Schlesinger cannot spend it that fast; and $1.5 billion is in the Environmental Protection Agency; and so on down.

The amendment reduces outlays by $15 billion. This is one place we can reduce. They tell us first of all, do not make a meat-ax cut because that is very chicken and you are putting the heat on somebody else. So we vote against that one. So then when somebody like the gentleman from Virginia (Mr. FISHER) comes along with a specific cut, everybody says: "My God, that is my program."

This is a cut which is only going to be made out of money they have got, I think, in their petty cash program that they have not used and they have stored it up.

Earlier the gentleman from Ohio (Mr. REGULA) raised the question to the gentlewoman from New York (Ms. HOLTZMAN) and said would not this encourage the department to spend the money so that they could get a better appropriation next year? First of all, I think it would give the Committee on Appropriations the opportunity to put their feet to the fire and, secondly, in the Accounts Committee in the House, the Committee on House Administration, they used to have a procedure whereby committees could keep all unexpended balances. We changed that and after each session of the Congress, the committees return to the Treasury, to the contingency fund, their unexpended balances. We in no way hold that against them when they come in with their new budget request the next year if they can justify that amount.

So here is a chance to cut the deficit to $25 billion by reducing the outlays and also reducing the budget authority by this $47 billion.

Again this is money they have sitting in the pipeline and they do not know what to do with it.

The argument was made against the Holtzman amendment that it really made a lot of sense but, unfortunately, the committees would have to go back and do a lot of work. It really means we should not deal with the first budget resolution, as it has been pointed out, the first one is to target it, but it is too early, and the second one is too late because the work has been done, and it becomes a legislative nightmare.

This leads one to believe that maybe there ought to be some adjustment in the budget dates.

Mr. HARKIN. Mr. Chairman, if the gentleman will yield, this $47 billion in the unobligated balances, you say that is money we have paid in, and therefore, because of the huge budget deficit, I can only assume that we are paying interest on the money, is that right?

Mr. JOHN L. BURTON. That is correct. This would reduce the national debt by $15 billion, so it would reduce the interest on the $15 billion.

Mr. HARKIN. So it would save the interest payment we are paying on the debt and therefore would not be a drain on our economy?

Mr. JOHN L. BURTON. It would, and I believe it should make sense.

Mr. GARY A. MYERS. If the gentleman will yield, the gentleman from Iowa (Mr. HARKIN) asked, in essence, whether or not the Government borrows the money before the committee actually needs it. It is not my concept that they go out and borrow it and pay interest on it. It would be much like if you were going to buy a car next year, you would never borrow the money for it this year.

Mr. JOHN L. BURTON. Do not tell that to GENE TAYLOR.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield, the point the gentleman was making, so that our colleague, the gentleman from Pennsylvania (Mr. GARY A. MYERS) can understand, is that we have any number of bills that contain appropriations which do not involve long term borrowing. The gentleman is trying to attack the proposal that the gentlewoman from New York (Ms. HOLTZMAN) referred to, namely that there really is not a very good accounting of these unobligated balances. Consequently, what he is attempting to do is to say to the agency: Get rid of the unobligated balances and ask for the funds when you really need them. So it really does not involve the Treasury's need to borrow.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. GARY A. MYERS, and by unanimous consent, Mr. JOHN L. BURTON was allowed to proceed for 2 additional minutes.)

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I think it is perfectly obvious we do not have a very good accounting in such things but nobody is claiming that there is $47 billion in cash sitting in some office safe somewhere, because there is not.

Where did the gentleman get his figures?

Mr. JOHN L. BURTON. I got the figures from a member of the Committee on the Budget, and the figure referred to was $47.1 billion.

Mr. CONABLE. I do not believe that is the way it works.

Mr. JOHN L. BURTON. I do not know how it works. All I know is that it does not make sense to appropriate a lot of money and have $47 billion already appropriated.

Mr. GARY A. MYERS. If the gentleman will yield further, in response to the gentleman from California (Mr. ROUSSELOT), he has not convinced me that we have borrowed money and set it aside for these unobligated balances.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield. I did not say that. I said exactly the opposite.

I said the account contains appriated dollars given by the Congress of the United States to these various agencies. The account is called "Unobligated Balances." It actually contains $48 billion, so the gentleman has been con-

servative and allowed $1 billion to spread around.

Mr. GARY A. MYERS. I thought the gentleman was taking a view opposite to that which I expressed about the comments of the gentleman from Iowa (Mr. HARKIN). That gentleman distorted the picture. I thought the gentleman from California was referring to that.

Mr. JOHN L. BURTON. Mr. Chairman, if I may reclaim my time, the point being made is that this reduces the national debt by $15 billion. Thereby, it reduces interest on $15 billion of the national debt.

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think we are getting to the tired stage here tonight because we are making some statements which are not quite accurate.

I think we ought to understand what we are doing. We are not talking about moneys that are sitting some place, as someone here stated. We are not talking about moneys which we have borrowed and upon which we are paying interest. This is not money; this is obligational authority which has not been obligated as yet and, obviously, therefore, has not been expended.

The Members know that in many programs we have the obligational authority for a given purpose and a good purpose. In the area of defense, for example, we do this all the time. We just voted the other day to appropriate $2 billion for an aircraft carrier. That money has not been expended, obviously, as yet. That money has not been obligated as yet. However, somewhere down the road the Defense Department will obligate that money and all of the other funds that we have appropriated.

Mr. Chairman, that goes not just for defense; it goes for energy, it goes for insurance programs, it goes for all kinds of contingent expenditures of the Government. It is not money. It is the obligational authority which Congress votes to the executive branch to do certain things, and in time they will do them. They will then get the money, and ultimately they will spend the money.

From time to time, these unobligated balances and these unexpended balances have grown to inordinate heights; and the Committee on Appropriations has traditionally put the pressure on the executive branch to hold down unexpended balances or unobligated balances. They have done a good job on it from time to time. Some of us think that we could do an even better job. Sime of us think we could take away some of these unobligated balances. I think that is what the gentlewoman from New York (Ms. HOLTZMAN) had in mind when she suggested earlier that we reduce them by a smaller percentage figure. I know that the gentlewoman from Maryland feels the same way, that throughout the Government we have a lot of these unobligated balances sitting there year after year.

Perhaps we ought to try to shrink them down or take them away. Perhaps we should, but certainly not by this kind of amendment, which would knock out $47 billion worth of them in one fell swoop.

Mr. Chairman, much of that money which is unobligated will be obligated and will be properly obligated, and eventually it will be expended.

I myself from time to time have tried to eliminate some of the unobligated, unexpended balances in the defense account. My colleague, the gentleman from New York (Mr. ADDABBO), on that committee has tried to do that in past years when we thought they were too high; but certainly, we are not accomplishing anything by meat axing $47 billion worth of unobligated funds, most of which will be obligated, will be properly obligated, and will be needed in order to carry out the mandates of various kinds of legislation we have enacted in the past.

Mr. Chairman, this amendment should be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. JOHN L. BURTON) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and on a division (demanded by Mr. JOHN L. BURTON) there were ayes 10, noes 66.

Mr. HARKIN. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. One hundred and forty-five Members are present, a quorum.

The pending business is the demand of the gentleman from Iowa (Mr. HARKIN) for a recorded vote.

A recorded vote was refused.

So the amendment to the amendment in the nature of a substitute was rejected.

AMENDMENT OFFERED BY MR. ROUSSELOT AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT as a substitute for the amendment in the nature of a substitute offered by Mr. GIAIMO:

Strike all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $464,148,000,000 and the amount by which the aggregate level of Federal revenues should be decreased is $29,500,000,000;

(2) the appropriate level of total new budget authority is $519,046,000;

(3) the appropriate level of total budget outlays is $464,148,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $798,300,000,000 and the amount by which the statutory limit on such debt should accordingly be increased is $300,000,000 (this figure repesents off-budget agency outlays and trust fund surplus).

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $127,102,000,000,
(B) Outlays, $112,403,000,000;
(2) International Affairs (150):
(A) New budget authority, $8,754,000,000,
(B) Outlays, $6,200,000,000;
(3) General Science, Space, and Technology (250)
(A) New budget authority, $5,146,000,000,
(B) Outlays, $5,001,000,000;
(4) Energy (270):
(A) New budget authority, $9,200,000,000,
(B) Outlays, $7,100,000,000;
(5) Natural Resources and Environment (300):
(A) New budget authority, $12,900,000,000,
(B) Outlays, $11,001,000,000;
(6) Agriculture (350):
(A) New budget authority, $9,197,000,000,
(B) Outlays, $7,628,000,000;
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,386,000,000,
(B) Outlays, $2,814,000,000;
(8) Transportation (400):
(A) New budget authority, $16,200,000,000,
(B) Outlays, $16,500,000,000;
(9) Community and Regional Development (450):
(A) New budget authority, $8,500,000,000,
(B) Outlays, $20,913,000,000;
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $22,100,000,000,
(B) Outlays, $26,600,000,000;
(11) Health (550):
(A) New budget authority, $48,600,000,000,
(B) Outlays, $46,102,000,000;
(12) Income Security (600):
(A) New budget authority, $182,394,000,000,
(B) Outlays, $150,100,000,000;
(13) Veterans Benefits and Service (700):
(A) New budget authority, $21,100,000,000,
(B) Outlays, 20,913,000,000;
(14) Administration of Justice (750):
(A) New budget authority, $4,100,000,000,
(B) Outlays, $4,051,000,000;
(15) General Government (800):
(A) New budget authority, $4,098,000,000,
(B) Outlays, $3,903,000,000;
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,019,000,000,
(B) Outlays, $9,237,000,000;
(17) Interest (900):
(A) New budget authority, $43,500,000,000,
(B) Outlays, $43,500,000,000;
(18) Allowances (920):
(A) New budget authority, $1,087,000,000,
(B) Outlays, $743,000,000;
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, $17,163,000,000,
(B) Outlays, $17,163,000,000.

SEC. 3. Pursuant to Section 310 of the Congressional Budget and Impoundment Control Act of 1974, the Appropriations Committees of the House and the Senate shall promptly submit to their respective Houses reconciliation legislation to decrease budget authority by approximately $42.2 billion to a level consistent with Section 1(2) of this resolution.

Mr. ROUSSELOT (during the reading). Mr. Chairman, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BROWN of Michigan. Reserving the right to object, Mr. Chairman, I only reserve the right to object because I am sure the gentleman will explain his amendment.

Mr. ROUSSELOT. If the gentleman will yield, I will.

Mr. BROWN of Michigan. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROUSSELOT. Here we are again. This is the opportunity that many have sought when we discussed some of the other bills and amendments that have been presented to the House. This is an opportunity to show restraint on increases and expenditures. It does not cut any program that we voted on for fiscal year 1978. It merely restrains increases in all functional categories and places the level of expenditure at $464 billion.

Let me review for the Members of the House just how this balanced budget resolution compares to the committee amendment and other years' actuals:

SECOND BUDGET RESOLUTION/FISCAL YEAR 1979

[In millions of dollars]

	House Budget Committee	Actual 1978 CBO current estimate	Rousselot balanced budget amendment
Revenues	450,000	397,992	464,148
Budget authority	561,242	495,757	519,046
Outlays	490,463	447,922	464,148
Deficit	40,463	49,930	0
Debt subject to limit	838,800	768,730	798,300

RESULT OF HOUSE-PASSED APPROPRIATIONS FOR FISCAL YEAR 1979, ALONG WITH PERMANENT AUTHORITIES

[In millions of dollars]

	House status	Second budget resolution	Rousselot amendment
Budget authority	519,000	561,242	519,046
Outlays	469,800	490,463	464,148

The expenditure level in the resolution is roughly what gentlemen from the other body—two people on the Budget Committee said in their deliberations, and one was a Republican and one a Democrat; it was a very bipartisan statement; that $465 billion was a reasonable level of expenditure for 1979. Both Members of the Budget Committee felt that we did not need to accelerate our expenditure level more than this resolution calls for; $16 billion more than we will have spent by October 1 of this year. We still may spend less by substantial amounts than the dollar amounts we have spent in 1978, because the executive branch continues to be in the awkward position, and this has happened for the last 4 years. It is a bipartisan problem that the executive is not able to spend all the dollars that we appropriate. This has popularly become know as shortfall. I call it savings. In other words, they cannot spend as fast as we have been appropriating. This year, depending on what kind of estimate and where you begin, the shortfall or savings will be anywhere from $11 billion to $18 billion, depending whether you talk to the Congressional Budget Office, OMB, or whoever. These are dollars that this Congress appropriated last year that we will not spend.

So let me first comment on the expenditure side of this resolution and why I believe it is a reasonable and rational approach.

EXPENDITURES IN ROUSSELOT SUBSTITUTE

First. Expenditures are increased by $16 billion over fiscal year 1978 but there are no cuts in functional categories from 1978. There are restraints in increases, but no program is cut. Congress for the last 3 years has appropriated more money than the administration is able to spend—we have been seeing shortfalls in expenditures of $12 to $17 billion and we do not even know what the shortfalls will be for fiscal year 1978—they may be greater than even anticipated. These shortfalls can more than accommodate the lower increases in expenditures anticipated in the balanced budget resolution.

Second. The General Accounting Office has produced reports showing extensive waste and mismanagement of funds by Federal agencies. These are accounts of fraud, overdrafts, misallocations and misexpenditures of Federal moneys that add up to $25 billion a year. The restraints in the balanced budget resolution will force the Government agencies to control the handling of taxpayers' money and prevent this unconscionable fraud.

Third. In many cases, the Federal agencies have funds available in unobligated balances. If reallocated across-the-board, those unobligated balances would more than compensate for the spending restraints called for in the balanced budget resolution.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 4 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, my belief is that a $25 billion difference between the amount of Committee on the Budget of $490 billion and the $464 billion—is a very moderate proposal, because I believe those agencies can accomplish that kind of change. But in addition to that, as has already been brought up by our colleague, the gentlewoman from New York (Ms. HOLTZMAN) and by my colleague, the gentleman from California (Mr. JOHN L. BURTON) who spoke just previously, we also have unexpended balances in many of the accounts that add up to $48 billion in 1978.

I am not asking that all of those unexpended balances be spent out, but I am saying that previously appropriated dollars are there. No agency will starve, no agency will be required or forced to drastically reduce.

I think this proposal is workable on the basis of these three points alone: The shortfall on the basis of past experience; the unexpended balances that are there and presently available for expenditure and that amount to roughly $48 billion; and/or the simple admission by the General Accounting Office that there are substantial amounts of waste that we can eliminate.

So on the expenditure side there are more than enough adequate dollar amounts available for reduction to meet the $464 billion expenditure level.

Mr. Chairman, let me briefly explain my calculations on the revenue side. I have tried to leave it flexible on the revenue side to accommodate what we will finally have as a result of what comes out of the conference on the revenue bill for 1978. Let me review those calculations:

REVENUES IN ROUSSELOT SUBSTITUTE

First, Justification of $14 billion increase in revenues. Calculation made by using GNP deflator at 7.5 percent—$2,390 trillion. Chairman's figures used lower GNP. GNP will be higher because tax cuts will improve employment and increase the tax base. Reduction of taxes provides individuals and business a chance to reinvest in the economy.

Second. Inflation rate estimated at the more realistic rate of 7.5 percent. Committee resolution calculated at annual inflation rate of 6.8 percent.

Third. Feed-back effects of tax cuts. On the basis of past experience, when there have been tax cuts in this country, the feed-back effects have been much greater than what has been anticipated in the Committee's resolution.

The difference in the calculations comes about because the Committee has guessed that the gross national product will be roughly $2.3 trillion. I say it will be $2.30 trillion, and the reason for that is because of the tax cuts that I believe will occur as a result of our final product on taxes, because the incentives for the private sector will be present. Further, I feel that this year's tax cut bill will generate revenues, as it has on the 10 previous times when this Congress has reduced taxes.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has again expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Therefore, Mr. Chairman, I believe that the normal growth rate will be 13.5 percent and that the real growth rate will be 5.5 percent. Those are improved estimates from the committee version. My belief also is that on the basis of those calculations and the other points I have mentioned, the revenues will be better than estimated by some of those who serve on our Committee on the Budget.

Second, as I have already partially mentioned, I believe the feedback effect, on the basis of history, is far better in the private sector than has been forecast by the chairman of my committee on the basis of economic studies of some of the members of our staff.

Mr. Chairman, let me quickly review the facts. The Rousselot amendment would provide $464 billion in revenues, $519 billion in budget authority, $464 billion in outlays, and no add-on deficit

for 1979. That alone would reduce the necessity for increasing the interest charge on the debt.

The debt limit would then be $798 billion, the same figure we just voted a few weeks ago.

How does that compare to 1978? In 1978, the revenues were roughly $400 billion, or $398 billion. The budget authority was $495 billion. The outlays were $447 billion. The deficit was $449 billion, or is projected to be by October 1. Therefore, in those areas of expenditures where there are no cuts there is an increase in expenditure level of $16 billion, so it will cover all of your pet projects. Now let me review the function categories as compared to fiscal year 1978:

SECOND BUDGET RESOLUTION/FISCAL YEAR 1979

[In millions of dollars]

	House Budget Committee	Actual 1978 CBO current estimate	Rousselot amendment
Revenues	450,000	397,992	464,148
Budget Authority	561,242	495,757	519,046
Outlays	490,463	447,922	464,148
Deficit	40,463	49,930	0
Debt subject to limit	838,800	768,730	798,300
CHAIRMAN'S RECOMMENDATION			
050—National defense:			
Budget authority	127,013	117,877	127,102
Outlays	112,403	103,980	112,403
150—International affairs:			
Budget authority	12,365	9,454	8,754
Outlays	7,119	5,905	6,200
250—General science, space and technology:			
Budget authority	5,146	4,848	5,146
Outlays	4,991	4,744	5,001
270—Energy:			
Budget authority	9,601	8,048	9,200
Outlays	8,684	5,580	7,100
300—Natural resources and environment:			
Budget authority	12,963	12,503	12,900
Outlays	11,380	10,916	11,001
350—Agriculture:			
Budget authority	12,225	3,182	9,197
Outlays	7,628	8,125	7,628
370—Commerce and housing credit:			
Budget authority	5,551	5,386	5,386
Outlays	2,814	3,115	2,814
400—Transportation:			
Budget authority	19,451	15,027	16,200
Outlays	17,063	15,497	16,500
450—Community and regional development:			
Budget authority	10,327	8,927	8,500
Outlays	9,474	10,433	9,001
500—Education, training, employment, and social services:			
Budget authority	34,022	21,842	22,100
Outlays	31,446	26,673	26,600
550—Health:			
Budget authority	52,158	46,416	48,600
Outlays	49,268	43,729	46,102
600—Income security:			
Budget authority	192,055	180,053	182,394
Outlays	156,566	145,800	150,100
700—Veterans benefits and services:			
Budget authority	21,251	18,805	21,100
Outlays	20,913	19,110	20,913
750—Administration of justice:			
Budget authority	4,163	3,741	4,100
Outlays	4,173	3,885	4,051
800—General government:			
Budget authority	4,098	3,510	4,098
Outlays	4,035	3,434	3,903
850—General purpose fiscal assistance:			
Budget authority	9,019	9,688	9,019
Outlays	9,297	9,590	9,237
900—Interest:			
Budget authority	48,000	42,480	43,500
Outlays	48,001	43,436	43,500
920—Allowances:			
Budget authority	−1,087	0	−1,087
Outlays	−743	0	−743
950—Undistributed offsetting receipts:			
Budget authority	−17,163	−16,030	−17,163
Outlays	−17,163	−16,030	−17,163

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has again expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 2 additional minutes.)

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my distinguished colleague and chairman, the gentleman from Connecticut (Mr. GIAIMO), of the very fine, hard-working Budget Committee.

Mr. GIAIMO. I thank the gentleman for his kind words.

Mr. Chairman, I am intrigued by the gentleman's proposal.

Mr. ROUSSELOT. I knew the gentleman would be.

Mr. GIAIMO. It fascinates me, and I want to be sure I understand it.

Mr. ROUSSELOT. I want to have the gentleman understand it because I need his vote.

Mr. GIAIMO. As I understand it, the gentleman is proposing a $29 billion tax cut.

Mr. ROUSSELOT. No. I said $20 billion, roughly, is my anticipation. That is assuming what the final result of the conference will produce.

Mr. GIAIMO. A $20 billion tax cut, which is going to result in a revenue fiure of $464 billion.

Mr. ROUSSELOT. Yes.

Mr. GIAIMO. But what the gentleman is saying is that, by having a $20 billion tax cut, we are going to wind up with $14 billion more in revenues.

Mr. ROUSSELOT. That is correct.

Mr. GIAIMO. I would like to hire the gentleman from California to be my accountant the next time I am required to make a financial statement to get a loan from the bank.

Mr. ROUSSELOT. I would like to do that, because I think that the money released in the private sector, in both the corporate tax cut we have in our bill and all of the other cuts will be that much and will generate that many new jobs which enlarges the tax base.

Mr. GIAIMO. Why do we not cut more?

Mr. ROUSSELOT. By the way, even the econometric models we used will show that there will be an increase in jobs of 1,600,000 at the end of a year's time, that there will be an increase in GNP in many of those econometric models, the same ones our committee uses. My belief is that the generation in the private sector will produce that add-on revenue and, additionally, on the basis of the 10 last cuts we have had since 1946, the same thing has happened in the private sector.

I urge the support of my colleagues for the Rousselot balanced budget resolution.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in "supposition" of the amendment, and I yield back the balance of my time.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the latest of the Rousselot balance the budget amendments. The distinguished gentleman from California is on the right track and is once again providing the House with an opportunity to go on record as favoring, if not a balanced budget, a reduction in the deficit.

I am persuaded by careful consideration that both in the short run—1978 and 1979—and in the long run—the rest of this century and beyond—that Congress must adopt a method to stop deficit spending except in case of national economic necessity, and I have introduced a bill to do just that.

The critical problem for our country both in the short run and the long run is to contain inflation which is so disruptive to all segments of our Nation. There is no doubt in my mind that deficit spending by the Federal Government is the major cause of inflation, and it is a source of inflation which we in the Congress can directly do something about.

For the short run through 1979 we in the Congress have a distinct problem to address and correct. Inflation has been accelerating in 1978 as the year has progressed, and interest rates have also climbed sharply higher. The gentleman mentioned the Congressional Budget Office. In support of his position I refer to the Congressional Budget Office report of July, 1978 entitled "Inflation and Growth: The Economic Policy Dilemma." On page 30 it says:

> No one knows precisely how much higher short-term interest rates can go before the economy is greatly weakened. Historical experience suggests not much further.

If we have another substantial deficit which keeps Treasury in the capital markets and interest rates continue to rise, then, in the short run through 1979, we will be responsible for setting the conditions specified in the recession scenario of the July report of our own Budget Committee. Their recession scenario says that if the 3-month treasury bill rate rises to 8.5 percent in a few months and then declines slowly thereafter, we will have a recession in 1979. Unemployment will rise to over 7 percent and total employment will be some 2 million persons less than otherwise.

The same report concludes:

> This projected recession, like its predecessors, would reduce business profits and investment in plant and equipment and postpone still further advances in labor productivity and improvements in employment opportunities for the most disadvantaged.

For the short run we have a responsibility to try to balance the budget, and the Rousselot substitute is the way to begin the process.

My good friend, Prof. Paul Craig at the Ohio State University, has brought his thoughts together on the longrun problem in a pamphlet entitled "A Layman's Guide to Inflation." He points out, and I agree with him, that, with productivity declining and expectations rising, the struggle over finite resources is intensifying.

Modern governments are attempting to placate the conflict by trying to fund more in government programs than political support in the form of a willingness to be taxed will support. The result has been deficits in Government budgets. The resulting excessive increase in the money supply has, in turn, been directly responsible for our high rates of inflation. Inflation, in turn, is basically unfair, "a creeping unvoted tax that falls on the unwary," and erodes the value of the savings of the average citizen. This destroys the incentive to work hard to be able to save which is so crucial to our work ethic and the maintenance of a middle class. Inflation is thus socially dysfunctional in the long run.

To address the problem of inflation in the longrun we must first recognize and accept our responsibility and obligation to do our part. Our part is to make the tough decisions on spending programs which cause deficits. The way to assure that we will act responsibly in making these decisions is to adopt a balanced budget. If we cannot run deficits, then we will be required to vote only for those programs our constituents will be willing to pay for in taxes. I might say this system has worked very well in Switzerland—and I recognize that running a government of only 6½ million people is not the same as running one for 213 million. With no deficits, the Federal Reserve could do a much more responsible job of restraining monetary expansion.

Inflation will then come under control. As inflation begins to decline, expectations of inflation will spiral down. Long-term interest rates will decline. Housing and capital investment will be more attractively priced, and savings will be available to finance them.

Inflation is our No. 1 problem. It is our duty to bring inflation under control, and we should address it by voting for the Rousselot substitute.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, the gentleman makes an important point. One of the major contributors to inflation that we have all talked about is, in fact, overspending by the Federal Government. When we constantly raise our expenditure levels so far beyond the normal increases, when this Congress so consistently increases the expenditures at such a high rate and does not intend to contain them the way this resolution does, the Federal Government does in fact, contribute to the inflation to which the gentleman refers.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(At the request of Mr. ROUSSELOT and by unanimous consent, Mr. WYLIE was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. The gentleman's point is well taken. One way to stop that inflationary spiral is not only to have the Federal Government set the example, but actually restrain the increases in expenditures.

Mr. WYLIE. I thank the gentleman.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, everyone in this House would like to balance the budget. Everyone in this House is working diligently toward that end in the very near future when we will be able to balance the budget, but we do not think we will be able to do it merely by legislative fiat and by cutting the budget and cutting necessary expenses drastically and thus arriving at a zero deficit. We think that is unrealistic.

This amendment should be defeated.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the very distinguished gentleman from New York, a very valuable Member of this body.

Mr. DOWNEY. Mr. Chairman, I thank the gentleman.

I have a number of questions because the gentleman from California has made some persuasive points.

Is it my understanding the Rousselot amendment will balance the Federal budget by 1979, create a $20 billion tax cut that will generate $14 billion in additional taxes, eliminate waste in Federal programs, solve our problem of inflation, and balance the budget, and it will not touch Defense or veterans? Can the gentleman tell me, if I vote for this amendment, our Middle East crisis and energy problems will also be solved?

Mr. GIAIMO. I do not think I could answer that question. I am sure the gentleman from California would have some responses. It seems to have accomplished everything else. But I really believe one would have to believe in the tooth fairy if we expect it to accomplish it all.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROUSSELOT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 153, noes 235, not voting 44, as follows:

[Rollcall Vote No. 712]

AYES—153

Ford, Mich.	Michel	Thompson
Fountain	Milford	Tsongas
Fraser	Miller, Calif.	Wilson, C. H.
Frey	Moss	Young, Alaska
Guyer	Risenhoover	Young, Tex.
Hagedorn	Rodino	

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Thompson against.

Mr. Risenhoover for, with Mr. Rodino against.

Mr. Sikes for, with Mr. Le Fante against.

Mr. McDonald for, with Mrs Burke of California against.

Mr. HILLIS changed his vote from "no" to "aye."

So the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

● Mr. HARRIS. Mr. Chairman, the Budget Committee has worked long and hard to produce for us this second concurrent resolution on the budget for fiscal year 1979. Again this year, Congress has acted to set a realistic budget for the United States and to live within it. While I believe that this final House version of the budget for the fiscal year results in a deficit which is entirely too high, I have to fault the entire Congress and numerous committees rather than the Budget Committee, which has worked hard to reconcile the many separate spending and revenue measures enacted by the 95th Congress. There are a lot of "bugs" left in the new congressional budget procedure, and they will remain there until Congress gets serious about waste.

ELIMINATING THREE KINDS OF WASTE

Every Member of this House is concerned about waste in Government, but most of us take a view of waste which is entirely too narrow. If we are serious about getting the economy going in the right direction again, we must pursue a policy of balanced economic growth that presents expanding opportunities for all Americans without having that progress taxed away through inflation. And it means we must work to eliminate all three kinds of waste in Government which influence budget outlays, revenues, and deficits. Despite progress, Congress has failed to construct an economic and budgetary policy which addresses the three kinds of government waste.

ELIMINATING WASTEFUL SPENDING: FAT PROGRAM OUTLAYS

A number of my colleagues joined with me earlier in this Congress to oppose $800,000,000 in funds for unnecessary water construction projects which are not only wasteful, but harmful to the environment. Some of us fought, too, against giveaway subsidies to the maritime industry, which the House saw fit to grant. We fought, also, against $4.7 billion in excessive subsidies in the farm program which are too skewed toward large corporate farmers. We missed the opportunity to increase Defense spending by $7 billion instead of $9.7 billion by simply eliminating purchases of obsolete hardware. And we have been, so far, unsuccessful in cutting some $2.4 billion in waste in the important medicare and medicaid programs by cracking down on fraud.

I don't believe that taxpayers should be asked to foot the bill for that kind of waste—I am disappointed that we have not made enough progress this year eliminating it. That is why the budget authority and outlay figures recommended by the Budget Committee are too high.

ELIMINATING WASTEFUL "SPENDING": UNCOLLECTED TAX REVENUES

The second kind of waste which Congress has failed to eliminate is the waste of resources which occurs when wealthy individuals and corporations are able to reduce or escape their fair taxes by utilizing tax loopholes. Not only did Congress drop the ball from President Carter in failing to take action on some tax reform this year, we opened the tax dollar goody bag once again and agreed to spend another $1.6 billion next year on new capital gains exemptions.

In the alternative budget that I proposed earlier this year, I identified four major tax loopholes that enable big corporations to avoid paying their fair share of taxes, at a cost to taxpayers of $7 billion per year. Our constituents remember, even when we "forget," that revenue lost by tax loopholes costs them in higher taxes.

I joined with the majority of my colleagues last week in passing the tax bill sent to us by the Ways and Means Committee, because I believed it was essential to give working families some protection against artificial elevation into higher tax brackets solely because of inflation, and because the bill offered some relief from the pinch of higher payroll taxes for social security. But the kind of tax cut written by that committee—the tax cut on which this budget resolution is partially based—totally failed to come to grips with this second important kind of waste in Government.

As he does each Congress, our distinguished colleague from Ohio brought to our attention earlier this year a list of 17 of the biggest corporations in the country which used tax loopholes to produce an effective U.S. tax rate of zero in 1976. Congress took no action to insure that these companies would pay their fair share next year, which means that the revenue projection on which this budget is based is inappropriate.

ELIMINATING WASTEFUL UNDEREMPLOYMENT

The greatest waste of all occurs, in my opinion, when the healthiest, best-trained work force in the world has to suffer from unemployment and underemployment. When most of the Members of this body were entering the job market after high school, college or the military, we faced an economy which was expanding. We had an opportunity to achieve.

Today we are wasting strength, vitality, imagination, and productive labor of our people—especially our young people, who are caught in the squeeze between inflation and recession. Although we have made progress this year against both unemployment and the rate of inflation, we will have to remain vigilant against their causes: First, worldwide manipulation of fuel prices by the OPEC nations and their American trading partners with a ripple effect on the whole economy; second, loss of our competitive edge against other nations in the advance of business creativity and technology; and third, our failure to eliminate the three kinds of waste I have outlined here today.

Mr. Speaker, when we are able to hold the line in this Congress against artificial price increases for energy, when we stop squandering our revenues on unnecessary tax loopholes and spend those tax dollars wisely, perhaps we will be presented a budget resolution which effectively addresses the kind of balanced economic growth America needs so badly to maintain.

Perhaps at that point, too, I will be able to support the budget resolution.●

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I believe we are now ready to vote on the Giaimo substitute amendment.

The CHAIRMAN. The gentleman is correct.

Mr. GIAIMO. Mr. Chairman, I just want to advise the Members that if we adopt the Giaimo substitute amendment in the budget resolution, we will have a budget deficit of less than $40 billion, and it will be $39.8 billion.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO), as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

Mr. GIAIMO. Mr. Chairman, I move that the Committee do now rise and report the concurrent resolution back to the House with an amendment, with the recommendation that the amendment, as amended, be agreed to, and that the concurrent resolution, as amended, be agreed to.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of

the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979, had directed him to report the concurrent resolution back to the House with an amendment, with the recommendation that the amendment, as amended, be agreed to and that the concurrent resolution, as amended, be agreed to.

The SPEAKER. Pursuant to the statute, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the concurrent resolution.

Mr. LATTA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 217, nays 178, not voting 37, as follows:

[Roll No. 713]

Fraser	Moss	Wilson, C. H.
Frey	Risenhoover	Young, Alaska
Guyer	Rodino	Young, Tex.
Hagedorn	Sarasin	
Harrington	Schulze	

The Clerk announced the following pairs:

On this vote:

Mr. Thompson for, with Mrs. Lloyd of Tennessee against.

Mr. Rodino for, with Mr. Huckaby against.

Mr. Le Fante for, with Mr. Frey against.

Mr. Burke of California for, with Mr. Stangeland against.

Mr. Dent for, with Mr. Kasten against.

Mrs. Meyner for, with Mr. McDonald against.

Mr. Stokes for, with Mr. Sikes against.

Until further notice:

Mr. Miller of California with Mr. Guyer.

Mr. Risenhoover with Mr. Hagedorn.

Mr. Charles H. Wilson of California with Mr. Schulze.

Mr. Evans of Colorado with Mr. Young of Alaska.

Mr. Jenrette with Mr. Sarasin.

Mr. Shipley with Mr. Dellums.

Mr. Harrington with Mr. Flowers.

Mr. Flynt with Mr. Fraser.

Mr. Moss with Mr. Teague.

Mr. Tsongas with Mr. Sisk.

Mr. Bonker with Mr. Fountain.

Mr. VENTO changed his vote from "nay" to "yea."

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 12050. An act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 12050) entitled "An act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. RIBICOFF, Mr. BENTSEN, Mr. MOYNIHAN, Mr. ROTH, and Mr. DOLE to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 2543. An act to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails;

S. 3382. An act to waive the statute of limitations with regard to the tort claim of Eazor Express, Inc. of Pittsburgh, Pa., against the United States; and

S.J. Res. 148. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week."

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 10898, AUTHORIZING APPROPRIATIONS FOR UNITED STATES RAILWAY ASSOCIATION FOR FISCAL YEAR 1979

Mr. MURPHY of Illinois, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1502), on the resolution (H. Res. 1321) providing for consideration of the bill (H.R. 10898) to amend the Regional Rail Reorganization Act of 1973 to authorize appropriations for the United States Railway Association for fiscal year 1979, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF S. 1613, ENLARGING CIVIL AND CRIMINAL JURISDICTION OF U.S. MAGISTRATES

Mr. MURPHY of Illinois, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1503), on the resolution (H. Res. 1322) providing for consideration of the Senate bill (S. 1613)

to improve access to the Federal courts by enlarging the civil and criminal jurisdiction of U.S. magistrates, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERSONAL EXPLANATION

Mr. RUSSO. Mr. Speaker, on yesterday on House Joint Resolution 638, the proposed equal rights amendment extension, I was paired against the previous question and against the motion to table. Had I been present I would have voted for the previous question and for the motion to table.

SUCCESSFUL BALLOON CROSSING OF ATLANTIC

(Mr. LUJAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUJAN. Mr. Speaker, I take this time to inform the House of an important event today. Three of my constituents, Maxie Anderson, Ben Abruzzo, and Larry Newman have successfully crossed the Atlantic in a balloon today. It is the first time it has ever been successfully done.

CONFERENCE REPORT ON H.R. 12602, MILITARY CONSTRUCTION AUTHORIZATIONS, FISCAL YEAR 1979

Mr. NEDZI. Mr. Speaker, I call up the conference report on the bill (H.R. 12602) to authorize certain construction at military installations for fiscal year 1979, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make the following announcement, before the Clerk reads the statement: We will adjourn for the evening following the adoption of the conference report, and this will be the last vote of the evening.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 7, 1978.)

Mr. NEDZI (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement, and I will give an explanatory statement.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER. The gentleman from Michigan (Mr. NEDZI) will be recognized for 30 minutes, and the gentleman from Virginia (Mr. WHITEHURST) will be rceognized for 30 minutes.

The Chair recognizes the gentleman from Michigan (Mr. NEDZI).

Mr. NEDZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on May 22, 1978, the House passed H.R. 12602, the Military Construction Authorization Act for fiscal year 1979, which provided new construction authorization for the military departments and the Department of Defense in the total amount of $4,169,444,000.

On July 12, 1978, the Senate considered the legislation, amended it by striking all language after the enacting clause and wrote a new bill. As passed by the Senate, H.R. 12602 provided new construction authorization in the total amount of $3,998,432,000.

As a result of the 2 day conference, July 31 and August 1, between the House and the Senate on the differences in H.R. 12602, the conferees agreed to an adjusted authorization totaling $4,128,312,000.

This compromise is $119,497,000 below the amount requested by the Department of Defense. It is $41,132,000 below the House figure and $129,880,000 above the Senate figure.

There were 194 differences between the House bill and Senate amendment, many of which were concerned with the U.S. construction program in the North Atlantic Treaty area. The other differences primarily involved adjustments the House made in construction contingencies, respective House and Senate project and policy additions and deletions, and mutual reorganization of various authorities under which the military construction program operates. However, we were able to reach agreement on each of these differences. I will not go into detail because House report 95–1448, the conference report on H.R. 12602, explains the actions of the conferees.

The major item in conference involved authorization of construction in support of the U.S. forces committed to NATO. At issue was $288,270,000 authorized by the House for such construction but not contained in the Senate amendment. After extended discussion, the conferees agreed to a compromise figure of $144,475,000. This authorization covers the most critical and time-sensitive projects that support the alliance.

In reaching this compromise the conferees adopted the policy that to the extent possible construction requirements in support of NATO operational mission and readiness objectives should be common-funded by the alliance. However, the conferees also agreed that the strict application of this criteria to the bill H.R. 12602 could result in unacceptable delay to specific readiness-related projects. Therefore, to provide an orderly transition, the conferees agreed to authorize the high priority projects.

Consistent with this approach, the conferees increased the requested $90,000,000 for NATO infrastructure to $120,000,000. This adjusted figure is $50,000,000 above the House figure and $30,000,000 below the Senate figure. The conferees believe this new authorization represents on the part of the United States a commitment to the alliance to increase the U.S. contribution, on a cost-shared basis, to meet the large backlog in infrastructure requirements.

Once the NATO issue was settled the other items were resolved quickly. Time does not permit greater detailing but the conferees believe that the bill agreed to in conference is one that should meet the construction needs of the military establishment during fiscal year 1979. In closing I want to assure the House that all Senate provisions adopted by the conference are germane. Therefore, I urge adoption of the conference report on H.R. 12602.

Mr. WHITEHURST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the statement of the gentleman from Michigan, regarding the conference report on H.R. 12602.

The conference report on H.R. 12602 contains the initiatives of both the House and Senate. As such, the construction requirements of the three services and the defense agencies for fiscal year 1979 should be met adequately.

Of particular interest is the NATO construction program. While it may have been appropriate to include greater United States prefinancing at this time, I am convinced that increased common funding by the alliance is required. As the gentleman from Michigan indicated, the conferees believe that the United States is demonstrating its willingness to participate actively in this approach as a result of the conference action to increase the NATO infrastructure program.

The bill agreed to in conference is a good one which I urge the House to adopt.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. WHITEHURST. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I rise to support the Military Construction Authorization Act Conference Report, on which our distinguished colleagues on the Armed Services Committee and on the Conference Committee labored so long and so hard.

As a Member of the Board of Visitors of the U.S. Military Academy at West Point, I am especially cognizant of the construction needs at that fine institution. My concern is sharpened by the fact that Orange County, N.Y., in which West Point is located, and which is part of my 26th Congressional District is currently suffering an extremely high unemployment rate. This construction is vitally needed not only by the Academy, but will be welcomed by the construction trades throughout the surrounding area.

I call the attention of my colleagues to the total amount of $12,265,000 which is earmarked for this purpose.

This $12,265,000 in construction at the Academy will be utilized as follows:

For alteration of cadet support facilities, $5,153,000;

For alteration of Michie Stadium and Gymnasium, $3,634,000;

For outdoor athletic fields and facilities, $1,326,000; and

For separate power and utility facilities, $2,200,000.

These projects are needed at West

Point, and I am confident that the committee did its utmost to provide us with a fair and reasonable authorization.

Accordingly, Mr. Speaker, I urge my colleagues to join in support of this legislation.

Mr. NEDZI. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to announce that the gentleman from Arizona (Mr. UDALL) has asked to take up a conference report on which he has said there is no controversy.

CONFERENCE REPORT ON S. 1633, PROVIDING EXTENSION OF BENEFITS AND SERVICES TO THE PASCUA YAQUI INDIANS OF ARIZONA

Mr. UDALL. Mr. Speaker, I call up the conference report on the Senate bill (S. 1633) to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

Mr. CUNNINGHAM. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the chairman, the gentleman from Arizona (Mr. UDALL) as to why this conference report has to be taken up tonight? I presume it is because the gentleman is anxious to get away.

As the gentleman knows, I have some problems with this matter.

Mr. UDALL. Mr. Speaker, if the gentleman will yield, let me say that this is a very minor Indian bill that affects only a very small number of Indians. It was passed almost unanimously in the committee. The conference committee took about 5 minutes to consider the legislation. I have cleared this with the gentleman from Kansas (Mr. SKUBITZ) and with the ranking minority member on the subcommittee, the gentleman from Colorado (Mr. JOHNSON) and I do not think it is the kind of a bill that the gentleman should be making an issue of.

Mr. CUNNINGHAM. Mr. Speaker, further reserving the right to object, I have got some differences against the bill, and maybe the gentleman does not believe I should be taking a position on this, but I am trying to be as reasonable as I can. The gentleman understands that I have some questions on this matter, so I will continue to reserve the right to object so as to have the chairman answer those questions, and if the gentleman can answer them, possibly he can resolve my concerns and then I will withdraw my reservation.

Mr. UDALL. I will try to answer the questions.

Mr. CUNNINGHAM. One of the questions that I have is: Why is this bill necessary?

Mr. UDALL. The Pascua Yaqui Indians are a dispossessed band of Indians who have no reservation, and therefore there have been no benefits for them through the Federal Government. They are entitled to them and have been over the years. It has been the hope of many of us that this small band of less than 400 Indians should be eligible for such benefits.

Mr. CUNNINGHAM. Further reserving the right to object, it is my understanding that these Indians are basically a Mexican tribe.

Mr. UDALL. These were fugitives from Mexico about 60 or 70 years ago, after the revolution they fled to the United States and have been living here ever since.

Mr. CUNNINGHAM. Could the gentleman assure me that they have ceased their revolutionary activities or efforts?

Mr. UDALL. The gentleman can be assured that they pose no threat to the people of Washington State.

Mr. CUNNINGHAM. I appreciate the gentleman's levity, but I am going to stay with the questioning, and that is, as I understand, these people are still taking up arms against the Province of Sonora.

Mr. UDALL. No, the gentleman is badly misinformed.

Mr. CUNNINGHAM. I am entitled to know the answer.

Mr. UDALL. I would repeat that this is just a very small band of Indians, some of them living in Tucson and some of them living around Phoenix. They are a very small group, and they have a great number of social problems.

Mr. CUNNINGHAM. Mr. Speaker, further reserving the right to object, I would state to the gentleman that the report states that in their enrollment they must prove that they are citizens of the United States.

Recently there have been several thousand Indians visiting here who have denied they are U.S. citizens. I wonder if this is consistent with that sort of action.

Mr. UDALL. I assure the gentleman that these people are very proud to be American citizens.

Mr. CUNNINGHAM. Then I am very pleased to withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 11, 1978.)

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

ACTIONS OF CAROL FOREMAN DESERVE IMMEDIATE INVESTIGATION

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, a series of highly improper actions by Assistant Secretary of Agriculture Carol Foreman have recently come to light. An impartial review of the facts involved indicates that, unless the investigation I am requesting the Inspector General to conduct proves otherwise, Mrs. Foreman should resign her post immediately.

The first case raises an apparent conflict of interest. The Department of Agriculture's Food Safety and Quality Service, under the direction of Mrs. Foreman, awarded a $24,000 grant to the Consumer Federation of America. The purpose of the study was to analyze the economic impact of a proposed net weight regulation.

Foreman, of course, is the former executive director of the Consumer Federation of America. So we have Foreman moving from the CFA to the Department of Agriculture, where she then gives a $24,000 award of taxpayers money back to the CFA.

Can you imagine the outcry if someone moved from a private business to a position in the Government and then awarded a contract to his former company? The air would be filled with conflict of interest charges. I can see no reason why the same standards should not apply to someone coming into the Government from the so-called public interest area as well as that of private business.

Mrs. Foreman seems to think that having no direct financial links to CFA is sufficient. This overlooks the obvious emotional, philosophical, and friendship attachments she would have for CFA.

As a further element of bias the CFA testified on the net weight issue before the USDA and the Food and Drug Administration. This, of course, is the very issue it will "study" under the contract. The conflict of interest charge cannot be swept under the rug.

Mrs. Foreman also denied taking part in the contract award. She testified before the House Agriculture Committee's Subcommittee on Livestocks and Grains that,

> I was not involved in this contract except after the point after which Consumer Federation was the sole organization interested in performing the contract.

That is not the case, however. Internal USDA memos show Mrs. Foreman was involved before the contract was awarded. Two lines added to the contract justification are as follows:

> Consequently FSQS is seeking bids for a study of this proposal from recognized con-

sumer advocacy organizations. The bid should indicate the organization's demonstrated ability to provide or procure the services and expertise necessary to perform the analysis within the established time frame.

I have seen a copy of a memo signed by O. V. Cummings, Director of the USDA's Administrative Service Division. This memo, dated April 7—2 months before the contract was awarded—indicates that Mrs. Foreman was responsible for the addition of the previously mentioned two lines. It states: "We were told Mrs. Foreman wanted this added." Mr. Cummings argued against these lines because they were overly restrictive and probably illegal.

It seems that Mrs. Foreman was not telling the truth. Despite her denial of involvement in the contract award to CFA she apparently gave instructions to the staff on that very matter. What other misstatements did she make to the House Agriculture Subcommittee? And what other facts did she fail to mention?

Nor is this the only occasion when Mrs. Foreman has played fast and loose with the rules. Her handling of the nitrite controversy indicates a blatant abuse of authority.

The Department of Agriculture requires that before a rule is issued on other than routine business the Office of the General Counsel must first approve an accompanying memorandum as to the legality of the proposed rule. Mrs. Foreman, however, conveniently overlooked these regulations. She failed to get legal clearance before issuing the rule on nitrites on May 16, 1978.

Testifying before the Subcommittee on Livestocks and Grains, she admitted that she knew of the policy, that it was her responsibility to get clearance and that she failed to do so. In her own words:

It was a mistake and I overlooked it. It clearly should have been there.

And when did she finally seek a legal determination on the rule? Why, on July 10, the day before she was to testify before the House subcommittee. From May 16 until July 10 she did nothing to bring herself into compliance. Only with a House hearing looming 1 day ahead did she finally do what she was required to do months earlier.

Mrs. Foreman's treatment of formulated grain-fruit products is little better. In August 1977 she pushed through the USDA a proposed rule to withdraw such products from the school breakfast program.

Seven weeks later, the USDA awarded a $340,000 contract to study the value of using formulated grain-fruit products in the program. In other words, make up your mind on what to do and then commission a study on it later.

Carol Foreman's high-handed actions as Assistant Secretary of Agriculture do not serve the public interest. Unless the investigation by the Inspector General shows these allegations to be unfounded, she should resign or be fired. My letter to the Inspector General follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 16, 1978.

INSPECTOR GENERAL,
U.S. Department of Agriculture, Agriculture Administration Building, Washington, D.C.

DEAR MR. INSPECTOR GENERAL: It has come to my attention that the Food Safety and Quality Service of the Department of Agriculture has recently awarded a $24,000 contract to the Consumer Federation of America.

Mrs. Carol Foreman is now the Assistant Secretary of Agriculture for Food and Consumer Services. The FSQS is under her jurisdiction. Mrs. Foreman's immediate prior employer was the Consumer Federation of America.

This is an obvious apparent conflict of interest. I call upon your office to make a thorough and public investigation of this action.

Sincerely,

JOHN M. ASHBROOK,
Representative to Congress,
17th District.

A PROPOSED CONSTITUTIONAL AMENDMENT TO REQUIRE BALANCED FEDERAL BUDGET

(Mr. WHITE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WHITE. Mr. Speaker, a few days ago, on August 10, 1978, I introduced House Joint Resolution 1116 proposing an amendment to the Constitution of the United States to require a balanced Federal budget except in time of war declared by Congress or when two-thirds of the Members of the House of Representatives and the Senate authorize Federal budget deficits, to provide for the disposition of subsequent deficits, and to regularly reduce the public debt through timely open-market operations by the Federal Reserve Board.

Mr. Speaker, we know that inflation causes unemployment. We know that the Federal Government's deficits are a leading cause of inflation. We know that inflation erodes the workers pay check and reduces the real profits of business. We know that the aged and all people on fixed incomes are irreparably damaged by inflation. The time has come for us to use our best efforts to curtail one of the leading causes of inflation—deficit spending by the Federal Government.

Mr. Speaker, the time has come for we in the Congress to recognize what our constituents already know; namely, that while Government has grown, the Nation's problems have not been solved. We have seen private initiatives increasingly displaced by the virtually inexorable growth of the public sector. Legislators and bureaucrats increasingly determine what will be produced, how it will be produced, and for whom it will be produced. Rising tax liabilities and deficit-induced inflation have eroded real disposable incomes. Confidence has sagged to the point where investment spending has come to a virtual halt. In short, while some in Government have tried to foster the perception that there is a free lunch, that the "Government can do it," and that it can somehow be done at no cost, our constituents realize that Government cannot solve all of our problems, and that Government "solutions" are often very costly; and that Federal budget deficits are the single most important cause of the problems of rising unemployment, accelerating inflation and declining real incomes.

The proposed amendment, House Joint Resolution 1116, recognizes that legislating Federal budget deficits by a simple majority in Congress generally creates as many economic problems as it solves. Yet in times of recession or depression Federal deficit financing and economic pump priming may be necessary. House Joint Resolution 1116 establishes the principle that a balanced Federal budget is the norm and that if Federal deficit financing is necessary, it should be voted by a two-thirds majority of the Congress.

Mr. Speaker, the following is House Joint Resolution 1116:

H.J. RES. 1116

Joint resolution proposing an amendment to the Constitution of the United States to provide that the level of total expenditures of the United States for any fiscal year shall not exceed the level of total revenues of the United States for such fiscal year and for the disposition of subsequent deficits, and that the gross Federal debt be reduced by open-market operations.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid if ratified by the legislatures of three-fourths of the several States within seven years of the date of the final passage of this joint resolution:

"ARTICLE —

"SECTION 1. Except as provided in section 2, the level of total expenditures of the United States for any fiscal year shall not exceed the level of total revenues of the United States for such year.

"SEC. 2. The provisions of sections 1 and 3 shall not apply to any fiscal year—

"(1) if, at any time during such fiscal year, the United States is in a state of war declared by the Congress, or

"(2) if, with respect to such fiscal year, the Senate and the House of Representatives determine, by an affirmative vote of two-thirds of the members present and voting of each House, to suspend the application of section 1 of this article.

"SEC. 3. Except as provided in section 4, the amount of any annual deficit in any fiscal year shall, upon its determination, be considered an expenditure of the United States for the first following fiscal year. If the amount of such deficit exceeds 2 per centum of the level of total expenditures of the United States for such first following fiscal year, the Congress shall provide for a corresponding increase in the level of total revenues of the United States for such first following fiscal year.

"SEC. 4. The Congress may, in any fiscal year, by an affirmative vote of a majority of the members present and voting of each House, apportion the amount of any annual deficit, upon its determination, or any part thereof for such fiscal year as an expenditure of the United States over one or more of the four following fiscal years, or by an affirma-

tive vote of three-fifths of the members and voting of each House, include such deficit or any part thereof in the gross Federal debt.

"SEC. 5. The public debt of the United States shall, consistent with the general welfare of the people, be regularly reduced by the Board of Governors of the Federal Reserve System through its open-market operations.

"SEC. 6. The Congress shall have the power to carry out the terms of this article by appropriate legislation.

"SEC. 7. This article shall take effect on the first fiscal year which begins more than three fiscal years after the date of ratification of this article.".

Mr. Speaker, the following is a section-by-section analysis of House Joint Resoltuion 1116:

Section 1: The purpose of section 1 is to make a balanced Federal budget the norm, thereby reversing the trend toward ever-larger government, burgeoning deficits, accelerating inflation and rising unemployment. Simply stated, section 1. establishes the deliberate, systematic balancing of expenditures with receipts as the norm in Federal fiscal management.

Section 2: While section 1. contemplates budgetary balance as the norm, section 2. recognizes that circumstances may require deliberate, discretionary departures from the norm. In time of war, balanced budgets are neither feasible nor desirable. Thus, during a time of war declared by Congress, the provisions of section 1, shall not be binding. Moreover, even in peacetime it is conceivable that circumstances may justify a deliberate departure from budgetary balance. Section 2. requires, in such instances, that a departure from the norm predicated upon an affirmative vote of two-thirds of the members present and voting in each House of the Congress.

Section 3: It is recognized that, on occasion, realized tax receipts may be less than expected. In these circumstances, passive deficits will emerge. Section 3. provides that such deficits, once determined, be considered an expenditure for the first following year after the tax revenues have been collected and the defict is determined. In the event the passive deficit exceeds two percent of total expenditures for the first following fiscal year after such deficit has been determined, section 3. requires that the Congress provide for a corresponding increase in revenues during that first following fiscal year.

Section 4: Because of prevailing economic or other conditions, provision of compensatory tax increases during the first fiscal year following determination of the magnitude of a deficit may be counter-productive. Section 4. provides, therefore, that the Congress may, upon an affirmative vote of the majority of the members present and voting in each House, apportion all or part of the deficit over one or more of the four following fiscal years. Alternatively, upon a three-fifths vote of the members present and voting in each House, the Congress may elect to include such deficit, or any portion thereof, in the gross Federal debt.

Section 5: Provides for the reduction of the public debt of the United States through the open-market operations of the Federal Reserve System. As economic growth proceeds, more currency will be needed. This currency can be provided by the purchase of outstanding Treasury debt by the Federal Reserve System. In this way the Federal Reserve can accommodate the currency needs of a growing economy, the public debt can be systematically reduced, and the taxpayer need not directly bear the burden of debt retirement.

Section 6: Empowers the Congress to implement the terms of this article by any legislation deemed appropriate.

Section 7: The purpose of section 7. is to provide for the orderly transition to a balanced budget. The transition period would cover three fiscal years after ratification of this article.

ANDREW YOUNG DOES LIE

The SPEAKER pro tempore (Mr. AMMERMAN). Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 30 minutes.

Mr. ASHBROOK. Mr. Speaker, "Honk if you think he's lying!" shouted bumper stickers from coast to coast in 1974, with Richard Nixon as their target. In every major newspaper, the chorus of "independent liberal thinkers" hammered on a single theme: "A lie is a lie, a liar is a liar," no matter how powerful the culprit or how exalted his position.

I agree with that fair principle and believe it should be applied to all. I said so then and agree with those sentiments today. But today the chorus of "independent liberal minds" is singing a new tune: Andrew Young, though his statements may be consistently false, is simply too exalted a person to lie.

Mr. Young has been trying to establish himself as America's Alexandr Solzhenitsyn, a martyr of a system of political prisons in America. There were, of course, some minor distinctions. Russia's Solzhenitsyn was sentenced to 10 years in a death camp for writing letters insulting to his country's head of state. Young spent some hours in jail for trying to halt the pickup of garbage in Atlanta, Ga., during a labor dispute. Young was arrested for interferring with the delivery of municipal services, an act for which any citizen of this or any other country is subject to arrest and, unless a fool, expects to get arrested and should be arrested.

Young's exact words were:

Ten years ago I was arrested in Atlanta for having organized a protest movement.

Young has been in the civil rights movement for about two decades. He knows very well that had he actually been "arrested for organizing a protest movement" he could have brought immediate State civil and Federal criminal action against the arresting officers, and had ample free legal help from liberal organizations to do so. He would not have hesitated to do so had his civil rights been unconstitutionally abridged. The facts are clear: Andrew Young was not arrested for "organizing a protest movement." Your charge is a flat out lie, Mr. Young.

Young's supporter's have repeated this false statement without even commenting on its duplicity. That is the way a big lie is accepted by the public as Joseph Goebbels demonstrated to the world. Even the President of the United States in a press conference on July 20 referred to the arrest by using the Young version, that Young had been arrested for civil rights activities.

To use Young's argument that he was arrested for civil rights work would be like a Mafia chieftain complaining that he was arrested for exercising his freedom of speech—when that speech was a command to implement a criminal act. Or the protester saying he was arrested for exercising his constitutional right which guarantees freedom of assembly—and not tell you that he had assembled his protesters on the street of the busiest intersection in downtown Cleveland at 4:30 p.m. We would laugh them out of serious consideration when the true facts were known and the same should be the case with Andrew Young. A lie is a lie is a lie. Even worse, he used his big lie to blacken the image of the United States in the eyes of the world.

Moreover, I do not just believe he uttered a falsehood, I believe it was a deliberate falsehood. Mr. Young's false comparison of himself to Russian political prisoners would not be a lie if he were too ignorant to know it to be false. Whatever else he is, he is not that ignorant. While many of his statements do border on the absurd or indicate he does not know what he is saying, his long record of anti-American statements can be recounted one by one, as the prosecutor would say, to build the case that in this instance he knew what he was doing and what he was saying. It totally fits his pattern so this excuse does not fit here.

Several disasters ago, Mr. Young referred to the presence of Communist Cuban troops in Africa as "a stabilizing influence." As we have seen, Andrew Young has real difficulty getting any sort of fit between the meaning of words in the English language, what he wants to express, and objective reality. This Cuban troops business is one of many cases in point.

It may be true that the Berlin Wall, concentration camps, police dogs in Siberia and Cuban troops in Africa are stabilizing influences, if your idea of stability is keeping slaves under control. From his muddled attempts to clarify the statement while denying it, Young got himself deeper and deeper in hot water.

Here again, whether Young was lying depends upon whether he really knows what he said and, assuming he did, whether he knew it was a falsehood that Cubans were good for—as opposed to being a useful set of slavedrivers in—Africa. Next January 1, we will have seen two full decades of Cuban-style stability, and of world Communist stability we have seen over seven decades, so that now something over a billion people are duly "stabilized". Judging from the record of his comments which show an anti-American bias and a clear admiration of communism and African dictators, it is clear that he believes Cuban Communists are a favorable and stabilizing influence in Africa.

Unlike Richard Nixon, the significance of Andrew Young is not the position he holds. The importance of which one of Carter's clowns should go to the U.N. circus is about on a par with the choice

of leadership of the Vegetarian Party of Monaco. What is made clear here is the fact that all the pious verbiage we heard four years ago was pure hypocrisy, and that the liberal chorus will only brand a liar if he is a Republican or conservative Democrat who has insulted the press corps or our elitist liberal leaders and their programs.

A second point made by the incident is that Jimmy Carter continues to be the weakest personality who has ever sat in the Presidential chair. As National Review put it with deadly accuracy:

Carter is the first president in this country's history to send diplomatic notes to his own ambassador.

In his statement on being arrested "for having organized a protest movement," Andrew Young was caught in a direct lie. His other babblings and observations range from lies to propaganda to stupidity. Each American can judge for himself as he studies the dismal record of this Carter misfit. As for Young himself, our choice is between perceiving this particular statement as a lie, as feeble mindedness or evidence of disloyalty. Give the man a break. Call him a liar.

THE YOUNG RECORD

Mr. Speaker, a further in-depth study of Andrew Young indicates his political prisoner quote was not isolated, that it was a logical part of his bias, built through the years of his involvement in radical, anti-American politics. Now I turn to some of those activities to shed further light on this man who speaks not for America and the majority of Americans but a narrow liberal-left clique and a narrow leftist political philosophy.

Probably the most controversial single appointment made to date in the Carter administration is that of Andrew Young, who was confirmed as U.S. Representative to the United Nations on January 26, 1977, by vote of the U.S. Senate. The vote was 89 to 3, with Senators CARL CURTIS, JESSE HELMS, and WILLIAM L. SCOTT, the only Senators to vote against confirmation despite the fact that serious objections to Young's appointment had been raised, most notably in the statement by Representative LARRY P. MCDONALD before the Senate Committee on Foreign Relations during Young's confirmation hearings. Young now holds the rank and status of Ambassador Extraordinary and Plenipotentiary, in addition to being U.S. Representative to both the United Nations and its Security Council.

Born in New Orleans, La., in 1932, Andrew Young holds degrees from Howard University and Hartford Theological Seminary and is an ordained clergyman in the United Church of Christ. An avowed liberal, he served as youth activities director for the National Council of Churches from 1957 through 1961 and was appointed to the position of executive director of the Southern Christian Leadership Conference by the late Rev. Martin Luther King, Jr., in 1964. His official biography reflects that he has also served as chairman of the Atlanta, Ga., Community Relations Commission—1970–72—and that he is a member of the World Council of Churches, Robert F. Kennedy Foundation, National Urban Coalition, Common Cause, Southern Christian Leadership Conference, and Martin Luther King, Jr., Center for Social Change. A Democrat, Young was elected to the 93d Congress in 1972 and reelected to the 94th and 95th Congresses in 1974 and 1976. The extent of his political liberalism is indicated by the fact that while in the House of Representatives from the Fifth Congressional District in Atlanta, Young served as regional vice president and as a member of the executive committee of the Democratic Study Group, as treasurer and member of the executive committee of the Congressional Black Caucus, and as a member of the Environmental Study Conference. During his career in the House, he was also supported by—and was an enthusiastic endorser of—the National Committee for an Effective Congress, probably the Nation's preeminent left-liberal political action organization—see Heritage Foundation Institution Analysis No. 5, "National Committee for an Effective Congress," April 1978.

Opposition to Carter's appointment of Young arose primarily because of what many knowledgeable observers saw as Young's dangerously weak stance on issues which vitally affect the national security. Much may perhaps be seen from a comparison of the way in which his performance in Congress was rated by a variety of groups. The American Conservative Union and the American Security Council, for example, both of which tends to emphasize national security issues in rating Senators and Representatives, each gave Young a "O" rating, while the conservative Committee for the Survival of a Free Congress, based on an unusually all-inclusive survey, gave him only a "9" rating. On the other side of the ideological spectrum, however, both the League of Women Voters and the National Education Association have given Young ratings of "100," while the Americans for Democratic Action and Common Cause have rated him as, respectively, "95" and "91."

Much is also indicated by an interview with Young conducted by Dan Rather of CBS News, as reported in the Washington Post for February 1, 1977. Young stated, among other things, that "communism has never been a threat to me." He stated, to be sure, that he has "no love for communism," but then reiterated that "it's never been a threat." To Andrew Young, racism is the threat:

Racism has always been a threat—and that has been the enemy of all of my life and, everything I know about life.

It was reported during this interview that Young made his well-known assertion:

There's a sense in which the Cubans bring a certain stability and order—to Angola, for instance, and that the enemy—all over the world, I think, is chaos.

He continued by saying that when a nation has a disciplined military force, "it can be ordered in, it can be ordered out. I have no question in my mind but that we could negotiate very successfully withdrawal of Cuban troops from southern Africa." According to Young, it was all right for Cuban troops to be in Angola because they "were in Angola at the invitation of" the MPLA, the Communist-oriented guerrilla group that ultimately conquered the country. Later, he stated that the "Cubans went to Angola because we were not there with a rational movement first," adding that another justification "for the Cuban presence was the South African presence." It was not mentioned by Young that Cuban Communist troops might be in Angola doing the work of the Soviet Union.

That such a view of both communism and the racial situation is not uncharacteristic of the man, or the result of his having been misquoted in this one instance, is indicated by Young's statements during an April 1970 television program on the Black Panther Party, described numerous times in official reports as a violence-oriented and militantly racist extremist group with significant domestic and foreign Communist ties. Young stated:

Western technology and western militarism has so interfered with the right of—the possibility of, say, democracy in Latin America, or real freedom in Africa and Asia, that it may take the destruction—and this of course is Black Panther ideology—that it may take the destruction of western civilization to allow the rest of the world to really emerge as a free and brotherly society, and if the white west is incapable of brotherhood with colored peoples, then this small body of colored peoples, black people within the white west, may be the revolutionary vanguard that God has ordained to destroy the whole thing.

Young was then queried as to whether he would "support the destruction of Western civilization if you were convinced that the rest of the world would thereby be liberated," to which he responded by saying, " I probably would."

More recently, Young was quoted as accusing the American people of being "paranoid about a few Communists" in Africa. According to an account in the Washington Star for April 13, 1977, Young's overview of the African situation—described by President Carter's Deputy Press Secretary as "not in disagreement with that of the President"—is as follows:

The only thing I'm thinking is, don't get paranoid about a few Communists—even a few thousand Communists. Americans shouldn't be afraid of Communists—they just shouldn't. It offends me, really.

The gravamen of the opposition to Young's becoming U.S. Representative to the United Nations can be seen in Congressman MCDONALD'S statement that, based upon these facts and many others of a similar character, Young would have to find himself in conflict with what should be basic United States policy when confronted with the machinations of the Communist powers and their allies in the so-called Third World. MCDONALD mentioned that Young is "a principled man" who will of necessity find his own views coming into conflict with the U.S. foreign policies. As he himself told "the New York Times" last month, December 19, 1976, "I'm going to be actively working within the State Department, the Congress, the Executive for my own concerns."

Andrew Young's past performance, as indicated by the examples already cited, as well as by a mass of other evidence, would seem to indicate that there is reason to be apprehensive as to precisely what these concerns may be.

RADICAL ACTIVITIES

Several examples from the public record should be noted. During the early 1960's, for example, when he was first involved with the Southern Christian Leadership Conference, Young studied at the Highlander Folk School, an avowedly radical facility in Tennessee. This school was mentioned during the sworn testimony of one of the Communist Party's principal organizers in the South before the Senate Internal Security Subcommittee in May 1954:

A school operated at Monteagle, Tennessee, ostensibly as an independent labor school, but actually working in close cooperation with the Communist Party.

A large percentage of those actively associated with Highlander over the years of its existence had significant records of affiliation with causes of the Communist Party and, in many cases, of actual Party membership.

Young was an active opponent of the war in Vietnam and was carried on official rosters as being among SCLC representatives invited to participate in top-level meetings of both the National Mobilization Committee to End the War in Vietnam and the New Mobilization Committee to End the War in Vietnam. The House Committee on Internal Security and its predecessor, the House Committee on Un-American Activities, held lengthy hearings on both these primary anti-Vietnam war coalitions and documented, with meticulous attention to detail, the Communist domination of both. National Mobe—as it was popularly known—was the direct lineal predecessor of New Mobe; and the Committee on Internal Security officially cited New Mobe as being under "Communist domination" in its annual report for 1970. In 1973, it was reported that Young was supporting activities of two New Mobe successor coalitions, the National Peace Action Coalition and Peoples Coalition for Peace and Justice. After detailed hearings, the Committee on Internal Security reached the formal conclusion, in its annual report for 1971, that—

The National Peace Action Coalition (NPAC) is tightly controlled by the Socialist Workers Party and that a generally predominant influence in the Peoples Coalition for Peace & Justice (PCPJ) has been exercised by the Communist Party, U.S.A.

The record of both the SWP and the CPUSA as subversive Communist organizations adhering ultimately to the doctrine of violent overthrow of the U.S. Government has been too thoroughly documented over the years to need specific citation here.

An organization which interlocked significantly with the Communist-dominated anti-Vietnam war coalitions of the late 1960's was the National Conference for New Politics, which held a so-called New Politics Convention in Chicago, Ill., over the Labor Day weekend in 1967. According to several issues of the official convention newspaper, New Politics News, the membership of the Convention Steering Committee included, among others, "Andrew J. Young, Southern Christian Leadership Conference." The complete infiltration of the NCNP by members of the Communist Party, U.S.A., and other Communist and Communist-front organizations has been remarked on several occasions. During hearings before the House Committee on Un-American Activities on October 1, 1968, when the committee was inquiring into subversive attempts to disrupt the 1968 Democratic National Convention in Chicago, Committee General Counsel Chester D. Smith stated that NCNP was "a New Left-oriented group which is heavily infiltrated by members of the Communist Party, U.S.A., and other subversive organizations."

Also, the sworn testimony of Gerald Wayne Kirk before the Senate Internal Security Subcommittee on March 10, 1970, includes much information gathered by Kirk as a result of his attendance at closed meetings of a Chicago CPUSA club to which he had belonged during his service as an informant for the Federal Bureau of Investigation. Kirk stated unequivocally that the CPUSA "was instrumental from the very beginning in developing the NCNP Convention" and that "this was considered to be one of the party's great successes in the past 10 years * * *." The following exchange between Kirk and Committee Research Director John Norpel is particularly explicit:

Mr. NORPEL. In other words, are you saying this was completely organized, controlled and dominated as a plan of the Communist Party, U.S.A.?

Mr. KIRK. I could say that, yes.

Mr. NORPEL. You would say that?

Mr. KIRK. I could. One thing you have to remember, though, is that the Communist Party, U.S.A., is also very good at public relations. And so for people who don't understand * * * how Communists work * * * it would seem as though the NCNP simply grew out of the suggestions of people in a lot of disjointed new left and old left organizations. But if you looked more closely, you realized that within many of those organizations, other than the CP, U.S.A., that suggested the formulation of the NCNP, you would find quite a few high-ranking party members who were instrumental in suggesting the formation of NCNP.

In February 1975, Young was reportedly among the sponsors for the Second National Conference in Solidarity with Chile, which, along with an earlier such project in 1974, has been thoroughly exposed, with specific documentation, as an operation of the Communist Party, USA. The Chile conference was merely one ingredient in an overall campaign waged by the CPUSA as part of a worldwide Moscow-directed propaganda and agitation effort designed to rewrite the history of the downfall of the pro-Communist Allende government in Chile and to discredit U.S. policy throughout Latin America in furtherance of the dictates of Soviet policy.

The April 30, 1976, edition of the Daily World, official newspaper of the CPUSA, reported that Andrew Young was among "184 nationally prominent Senators, Members of Congress, labor, civil rights and religious leaders" who were serving as cosponsors for a May 15, 1977, luncheon honoring a leading congressional sponsor of such activities as the founding of the National Alliance Against Racist and Political Repression, one of the CPUSA's principal front organization, and participant in a January 1978 meeting in Washington, D.C., under the auspices of the World Peace Council, long known to be the most important of the international Communist front organizations controlled by the Communist Party of the Soviet Union. According to the Daily World account, the luncheon was to be chaired by Mr. Anne Braden, identified in sworn testimony as a member of the Communist Party, and was to be held by the National Coalition to Fight Inflation and Unemployment. The NCFIU is a recently formed CPUSA auxiliary which was described in the December 1975 issue of Political Affairs, official CPUSA theoretical publication, as an organization in whose creation the CPUSA "has played an important part." It is noted that Young's reported sponsorship of this gathering occurred subsequent to his becoming Ambassador.

In November 1975, the Institute for Policy Studies—see Heritage Foundation Institution Analysis No. 2, "Institute for Policy Studies," May 1977—released a volume titled "The Problem of the Federal Budget," prepared by a special IPS/Transnational Institute "Study Group on the Federal Budget." As noted in the Heritage study of IPS, "the study was essentially radical in its approach, advocating a sharp increase in Government involvement in the economy coupled with a severe reduction in our national defense and national security postures." The volume had been commissioned by one of our colleagues by letter dated February 20, 1975, which letter was signed by him and 47 other Members of the House among them "Andrew Young (Ga.)." The Heritage study documented the extreme radical complexion of IPS and its leadership, a fact previously noted by the House Committee on Internal Security in its annual report for 1971, which referred unambiguously to the "Institute for Policy Studies, the far-left radical 'think tank' in Washington, D.C."

BRADY TYSON'S SORRY RECORD

It is perhaps noteworthy that one of Andrew Young's chief aides, Brady Tyson, who is on record at the United Nations as apologizing for alleged U.S. Central Intelligence Agency involvement in the overthrow of the pro-Communist government of Salvador Allende in Chile, has also been listed in an official IPS publication as being among those who have served as IPS "Lectures-on-Occasion." Tysons background, like Young's, is an interesting one. A founding member of the North American Congress on Latin America, described in the 1971 annual report of the House Internal Security Committee as "an offshoot of SDS (Students for a Democratic Society)," Tyson has also, according to public source records, participated in a pro-Castro Congressional Conference on U.S.-Cuba Relations, in addition to appearing at a public forum conducted under the auspices of the Trotskyite Communist Socialist Workers Party.

Available evidence indicates Young's collaboration with at least one other major operation of the Trotskyite Communist Socialist Workers Party, in addition to his reported support for activities of the SWP-controlled National Peace Action Coalition in 1973. A letterhead dated June 15, 1976, reflects that "Rep. Andrew Young (D-Ga.)" was a sponsor of the Political Rights Defense Fund (PRDF), an organization which operates as a front for the SWP. An official PRDF mailing issued in September 1973 stated that the PRDF had been formed "as an adjunct of the Committee for Democratic Election Laws," another organization well identified as an SWP front group. The primary focus of PRDF activity has been the SWP's continuing campaign of legal harassment directed at crippling all Government domestic security programs. The national secretary and all but one of the PRDF national staff listed on the same letterhead have been identified as functionaries of the SWP in primary documentary material, much of it from within the SWP itself, that is a matter of public record.

An example of Andrew Young's support of Third-World-oriented pro-Communist activities occurred in 1971 when Young spoke at an annual stockholders meeting of the Gulf Oil Corp. in support of a shareholders motion brought up by the Gulf Boycott Coalition. Public source data reflect that the purpose of the Gulf Boycott Coalition "was to aid the Marxist-led, Soviet-equipped guerrilla movements in Angola by putting severe economic pressure on Portugal through persuading Gulf to end all involvement in Angola and southern Africa." At the Gulf meeting, Young proposed the adoption of four people as members of an expanded Gulf board of directors. The list is a revealing one. It included himself; Amilcar Cabral, head of a Soviet-controlled terrorist movement which now rules Guinea-Bissau; Agostinho Neto, a Marxist-Leninist theoretician and leader of the Soviet-run MPLA in Angola who now serves as the head of that country since its takeover by the Soviet- and Cuban-supported terrorist movement; and Angela Davis, an avowed member of the Communist Party, USA, who serves as a member of the party's governing central committee.

Another cause for concern has been Young's well-known friendship with Robert Mangaliso Sobukwe, founder and leader of the Pan Africanist Congress of South Africa (PAC). The PAC is an outlawed terrorist organization which, as shown by a study of terrorism issued by the House Committee on Internal Security in 1974, is specifically Maoist Communist in orientation and which also, in 1963, "claimed sponsorship of the Poqo guerrilla terrorists in South Africa." Sobukwe's son and daughter have been living with Young's family since May 1975, and Sobukwe's wife has also been Young's house guest. This datum assumes added interest when viewed in conjunction with Young's having helped produce "The African-American Manifesto on Southern Africa" in September 1976. This document, to which Young gave his active support, states:

> We totally support the liberation of Southern Africa from white minority rule by means of armed struggle, where necessary, and affirm the right of the African liberation movements to seek necessary assistance from whatever sources available to achieve self-determination and majority rule.

At this point, it is instructive to recall Young's statement, in the television interview cited earlier, about troops from Communist Cuba bringing stability and order to Angola, as well as his other statement regarding communism's never having been a threat.

One final example of Young's apparent propensity toward affiliation with radical causes is perhaps of special interest. In 1968, Andrew Young was one of the two principal leaders of the Poor People's March on Washington, a project of the SCLC. Among those who served to help organize this effort was a woman named Grace Mora Newman from New York City. Sworn testimony before the House Committee on Internal Security by a former undercover informant within the Communist Party, USA, during hearings conducted by the committee in 1971 identified Grace Mora Newman as a member of the CPUSA, as a member of the Claremont Club of the CPUSA in the Bronx, and as a member of the Bronx County Committee of the CPUSA. More recently, she has emerged as the publicly avowed chairman of the CPUSA's Puerto Rican Commission. Later in 1968, Newman ran for Congress from the 22d Congressional District in New York under the auspices of the Freedom and Peace Party, which has been officially identified by the House Committee on Internal Security as "a CPUSA front organization." Among the sponsors of Newman's bid for a seat in Congress, as shown by a letterhead of the FPP dated July 1968, was "Andrew Young, SCLC."

HIS ETHNOCENTRISM

The background information cited above will help the reader place into perspective the most recent controversy surrounding Ambassador Young. As Congressman McDonald stated in the Congressional Record for July 14, 1978: "Mr. Young has demonstrated an extreme ethnocentrism in his concerns with southern Africa," although it can also be argued that such "ethnocentrism" has characterized his statements about a number of other regions and individuals, including several past Presidents of the United States and not a few of America's allies. Numerous accounts in the public press reflect that Young has branded Kennedy, Johnson, Nixon, and Ford as racists; that he has said the British "almost invented racism" and are "a little chicken" about admitting it; and that he has described the Swedish people as "terrible racists." He has even reportedly denounced the Russians as the "worst racists in the world."

Young's most recent difficulties have arisen, however, because of his somewhat bizarre views on human rights problems in the United States and the Soviet Union. The Washington Star for July 14, 1978, carried pertinent extracts from an interview given by Young to a French Socialist newspaper, Le Matin, as translated by the Associated Press. So that the sentiments which led to Young's being rebuked by officials of the Carter administration may be seen in their full context, these extracts are here reprinted in full:

> Q: Don't you then fear a third world war?
>
> A: Oh, not at all. Our rapport with the Soviet Union is too good.
>
> Q: At the level of the SALT negotiations, perhaps.
>
> A: At every level. After all, [Secretary of State Cyrus] Vance and [Soviet Foreign Minister Andrei] Gromyko meet almost every month.
>
> Q: How do you explain the opening of the trials of Scharansky and Ginzburg on the eve of a Vance-Gromyko meeting?
>
> A: Oh, it's certainly a challenge, a gesture of independence on their part. But that will not prevent them from pursuing the SALT negotiations. And then, one doesn't know what can happen to the dissidents. After all, in our prisons too there are hundreds, perhaps even thousands of people whom I would call political prisoners. Ten years ago I myself was tried in Atlanta for having organized a protest movement. And, three years later, I was a Georgia representative. It's true that things do not change that quickly in the Soviet Union, but they do change.
>
> Q: But one cannot compare the two systems . . .
>
> A: I do not agree that these systems should be considered as opposing each other. Take the United States for example: the society of today has nothing in common with the pre-Roosevelt one. In the years 1930–40 the trade union movement launched a radical revolution in American life, a revolution without which we certainly couldn't produce nine million automobiles a year today. In the 1950s there was a revolution of civil and racial rights, today it is women who are participating more and more in our economy. And this constant evolution is the rule everywhere. I think the current Soviet dissidents could well be the salvation of the Soviet Union. They are a natural development of Soviet society, but the leadership has not yet realized it.

Young's assessment of the relative significance of the Scharansky and Ginzburg trials as "a gesture of independence" by the Soviets is an interesting one, especially when read in conjunction with a statement made by Young in an earlier interview which was published in the June 1977 issue of Playboy magazine: "I don't think the Soviet government is, in fact, very concerned about its dissidents." According to Young, "Of far more importance are its satellite countries in eastern Europe" and, rather than the President's "statements on human rights * * * such things as increases in the budgets of Radio Free Europe and Radio Liberty. * * * "

The same edition of the Star further reported that "the French were offended by Young's criticism of their policy toward Africa" and that "conservative members of the British Parliament reacted angrily" when

> The American ambassador, in the same newspaper interview with Le Matin in which he made his remarks about U.S. political prisoners, said, "If this (the recent massacre of white missionaries in Rhodesia) was a planned operation of attacks against missions—and that seems to have been verified

in the last weeks—they can only have come from the Smith camp."

Reaction to the voicing of these sentiments was both strong and swift in coming. The reaction of Secretary Vance was reportedly unprintable, and several Members of the House and Senate expressed the belief that Young had gone so far as to make his resignation or dismissal imperative. President Carter is reported to have telephoned Young to voice his displeasure personally, and White House Press Secretary Powell made remarks which have been widely taken to mean that any future pronouncements by Ambassador Young on such sensitive topics may have to be cleared in advance by the White House. Young issued his own clarifying statement in which he averred that he is in "full accord" with official statements by President Carter and Secretary Vance condemning the Scharansky and Ginzburg trials and further saying that he had never meant to "equate the status of political freedom in the United States with that in the Soviet Union."

Nevertheless, many observers feel that the import of Young's words is clear. Whether or not Young intended to "equate the status of political freedom in the United States with that in the Soviet Union," he appeared to be drawing a clear parallel in terms of the basic concept of what constitutes a political prisoner. Also, to refer to the recent Scharansky and Ginzburg trials as being a "gesture of independence" by the Soviets must strike most people, especially those who are familiar with the true nature of the Soviet Communist system of repression, as somewhat piquant at best. I have mentioned earlier that Young, contrary to his statement in the Le Matin interview, was not "tried in Atlanta for having organized a protest movement." Rather, he was arrested specifically for obstructing garbage trucks in a labor dispute, which is obviously a matter of a somewhat different complexion from that of exercising one's right to protest in the abstract. Further Young's explicit statement that "I do not agree that these systems—that is, the U.S. and the Soviet—should be considered as opposing each other" would seem to speak for itself and should, like the other controversial statements attributed to him, be viewed in light of Young's statement to the Canadian Broadcasting Corp., as quoted in the July 19, 1978, edition of the Washington Post, that—

One of the interesting things about everything that's happened so far is that I get very little argument, or challenge, on the validity of what I really say. I get questions about whether a diplomat should say it, or I get questions about, you know, other people getting mad and the political impact of my making certain statements, but usually I have taken into consideration most of those things before I say something.

This interview reflects Young's unorthodox conception of himself as a diplomat. Young said:

I'm certainly not, you know, what people's traditional notion of a diplomat happens to be. But I don't represent a country like that. I became a diplomat and was appointed to this position because I was politically active in a human rights movement, and in an anti-war movement, and because I fought for the things that I believe in, and—did not fight to be a diplomat.

Whether I'm a diplomat or not, I am going to continue to fight in any way I know short of violence for the things that I believe in. And I really don't care what people think about it. The only thing that's important is that they think.

And if I am a wrong kind of diplomat, maybe diplomats for the last 50 years should have been making people think a little more and we might not have had some of the trouble that we've had for the last half century.

At a later point, Young indicated that his relationship with the President is a rather unusual one:

He said he tried "not to worry the President." Perhaps, he said, "I should talk to him more, but I think there's some advantage in my preserving my freedom. It gives him also the freedom to repudiate me, not to be responsible for what I say, or to agree with me. But it is, well, it is something I talked with him about before I accepted the job, and I hope it works."

The special nature of Young's relationship with President Carter had also been discussed by Young at an earlier point, during his June 1977 Playboy interview, when he stated that their relationship "has always been one of mutual trust" and added that "I didn't clear anything with him during the campaign and I've cleared almost nothing with him since then. I really get very few guidelines from Washington." During this interview, Young related an instructive anecdote:

PLAYBOY. So nothing you've said publicly thus far has embarrassed the President?

YOUNG. No. In fact, we drove up to the UN Building together on the evening he made his first big foreign-policy speech in the General Assembly hall. We were talking about how he and I have been criticized for discussing foreign policy in public, instead of observing all of the old diplomatic conventions of secrecy. It really shocked me the way he approached it. The President said: "I hope you're going to stick with me." I said, "What do you mean?" and he replied, "It seems like you and I are the only ones who want to talk foreign policy with the American people. And I think we just have to keep it up." That was right after he'd been to Clinton, Massachusetts, and he told me he'd been almost embarrassed by the thunderous applause he'd gotten when he said that the American people had a right to know in advance what kinds of commitments and decisions were being considered, since they would affect their lives and their children's lives. President Carter and I talk openly in public because that's what people have been looking for in Government: freshness and candor, even in foreign policy. The alternative is secrecy, which very easily leads to deceit and foreign policy conducted solely by experts, which closes out the American people.

Speaking in answer to a related question, Young reminded his interviewer that—

You have to remember that in the early months, there were still basically two administrations—the new people who came in with President Carter and the old people who'd been around for a while, the bureaucrats. They're the ones who haven't yet quite understood what we're doing, and that's where some of the criticism has come from. At first, they thought some of the things the President was saying were slip-ups. Now they know it was deliberate on his part and that this is a policy style he is encouraging as part of his Administration.

That Andrew Young's recent statements in the Le Matin interview may not be, despite Young's claims, uncharacteristic of his general outlook as ambassador is demonstrated by syndicated columnists Rowland Evans and Robert Novak in a copyrighted column carried in the July 19, 1978, edition of the Washington Post. As Evans and Novak observe, Young's comparison of Soviet dissidents with so-called political prisoners in the United States "was no aberration, but followed a pattern begun when he came to the United Nations." As an illustration of their contention that "it is fair to expect more of the same, although slightly softer," they refer to "the very day after the President's rebuke when Young reiterated to the International Herald Tribune the essence of his Le Matin interview." Because the Evans and Novak piece includes so much material which quite clearly indicates that Young's Le Matin interview was indeed "no aberration," the following key paragraphs merit quotation in full at this point:

"Outrage" was the most common word describing the reaction to Young's Le Matin interview among State Department officials, even McGovernite liberals. Yet what Young said was identical in substance to what he has been saying for 18 months, usually without anybody's taking notice.

"I see my country as vulnerable as anybody else's around the table," Young commented last year as he addressed the U.N. Human Rights Commission (representing the world's most barbarous despotisms). While the Kremlin persecutes dissenters, Young pointed out, "many of our own students were shot down on their campuses."

But in describing the communist world, he sometimes voices the axiom of Radio Moscow and Radio Havana that political freedom is subordinate to economic security. "For most of the world," he declared on Human Rights Sunday, last December 11, "civil and political rights come as luxuries . . . that are far away in the future." In the Soviet Union, he added, "human rights are essentially not civil and political, but economic."

While Young is unforgiving about right-wing dictatorships, he is lenient toward communist tyranny. This climaxed in May 1977 in Mozambique, a Marxist regime with 100,000 citizens in forced-labor camps. "East and West alike look to this nation with new hope and with new courage," Young said. While welcoming communist Vietnam into the United Nations by praising its "struggle for independence," he ignored repression and genocide in the new Indochina.

Those quotations and many more are recounted in a forthcoming Commentary article by Carl Gershman, executive director of the social Democrats. He comments on "Young's apparent lack of commitment to political freedom and his ability to turn a blind eye to oppression" by Third World "progressive" regimes. Gershman reaches this conclusion: "Young finds himself today for

the most part on the side not of the oppressed but of the oppressors."

In addition, it should be noted that, according to several press accounts, Young's statements have been characterized by Tass, the official Soviet news agency, as "noteworthy" because they "come from a member of the Cabinet and therefore signify an official admission that political persecution is widespread in the United States." Young's conception of "political prisoners" as "blacks in civil rights movements, antiwar people," and the like has also been echoed in a Tass statement from July 12, 1978, as carried by Radio Moscow: "The American authorities, using a wide choice of antidemocratic laws, put into prison fighters for civil rights, against racism, dissidents."

THE LEVISON CONNECTION

The precise motivation behind Andrew Young's public statements on such controversial issues as racism and Communist influence in Africa is, of course, difficult to assess. Congressman McDonald's reference to Young's "ethnocentrism" has already been noted, and it would certainly seem to provide at least one plausible explanation. However, it is also necessary to inquire as to whether Ambassador Young may be the victim of advice which leads him to make statements contrary to the best interests of the United States. In this connection, it is noted that syndicated columnist Paul Scott, in an article released on August 7, 1978, notes Young's "close relationship with Stanley Levison, a New York lawyer and long time adviser of both Young and the late Dr. Martin Luther King." The article includes the following paragraphs:

Levison, who took the 5th amendment when questioned in 1962 by the Senate Internal Security Subcommittee about his Communist connections, was the adviser to King that caused the late Attorney General Robert Kennedy to authorize the wiretapping of the civil rights leader during the 1960s. At the time, Levison was advising King on strategy, writing his speeches, and raising money for King's organization.

* * * Photographs of Levison with Young have been taken since the negro leader took over his U.S. position at the United Nations and became a member of the Carter inner circle. U.N. sources reveal that Levison advises Young on Africa and a number of controversial statements he has made on Soviet armed Cuban and East European troops in the region.

Information published in Book III of the final reports of the Senate Select Committee to Study Governmental Operations with Respect to Intelligence Activities in April 1976 confirms the significance of Levison's involvement in the civil rights movement. The report notes that an FBI memo dated January 3, 1962, labeled so-called "Adviser A" (known to be Levison) as a "member of the Communist Party, USA." Subsequent Bureau memoranda quoted in the report clearly show Levison's continuing influence on King with regard to matters of considerable substance. They further show that, in exercising this influence, Levison worked closely with a man referred to in the report as "Adviser B," known to be Hunter Pitts O'Dell, who was at one time a member of the National Committee of the Communist Party, USA. (O'Dell, also known as Jack H. O'Dell and J. H. O'Dell, is presently serving as a key figure in Jesse Jackson's Operation PUSH, in addition to his affiliation with Freedomways, official CPUSA Negro quarterly.) The Senate committee report also makes it clear that top officials in the Kennedy administration took the FBI allegations seriously. In view of the gravity of this information, one must ask just how much influence this identified Communist is currently exercising over our Ambassador to the United Nations.

All of the foregoing information on Andrew Young's background, activities, and apparent predilections is drawn from public source material, much of it available to the members of the Senate Committee on Foreign Relations during their examination of his qualifications for the post he now holds in the Carter administration. It is worth noting—and, indeed, somewhat perplexing—that the committee did not see fit to interrogate Young about these matters, despite the fact that certain questions would seem obvious on the face of it. Furthermore, these questions would seem to have become, if anything, even more obvious in view of Ambassador Young's more recent statements, especially when they are taken in conjunction with the current state of United States relations with the Soviet Union.

While it may be true that the administration has found Ambassador Young to be of value in cultivating relations with the so-called Third World, one may perhaps be forgiven for wondering whether Young has not demonstrated an essentially unhealthy imbalance in that area, the sort of imbalance that might well work to the detriment of America's largest foreign policy objectives. One may perhaps also be entitled to wonder whether President Carter continues to hold the opinion which he expressed when Young was sworn in as Ambassador by Supreme Court Justice Thurgood Marshall: that, of all the men he has known in public service, Andrew Young is "the best." The record of this Carter appointee certainly shows otherwise.

IF GUIDELINES ARE SET, CAN CONTROLS BE FAR BEHIND?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. MCKINNEY) is recognized for 5 minutes.

● Mr. McKINNEY. Mr. Speaker, on Monday, two bills were introduced which would counter inflation, according to their sponsors. Unfortunately, those Members seem to have disregarded the psychological impact of these proposals. If anything, these bills will add to the rapid increase in prices and wages in the coming months.

The Anti-Inflation Amendments of 1978 (H.R. 13857) and the Comprehensive Anti-Inflation Act of 1978 (H.R. 13865) both call for the establishment of wage and price guidelines. Such guidelines are usually viewed as the precursor of strict controls if not as controls per se. The obvious impact of such thinly veiled threats is a rush of anticipatory increases from both sides. Already I have received a number of calls from people expressing that concern.

I realize that these bills call for more than guidelines to fight inflation, but the other elements are overshadowed by the fears of labor and business about controls, fears which are well-founded if our experiences of 7 years ago are any example.

The Economic Stabilization Subcommittee, on which I serve as ranking Republican, recently held hearings on the administration's anti-inflation policy. Both Presidential Assistant on Inflation Robert Strauss and Barry Bosworth, Director of the Council on Wage and Price Stability, specifically ruled out the use of controls. I understand that this subcommittee will be holding 1 day of hearings on H.R. 13865 in late September. I would hope that that forum would be used to discourage as strongly as possible the reliance on federally mandated wage and price levels. Not only is this abhorrent to anyone who believes in the free enterprise system, we have never seen involuntary controls effectively contain inflation once they have been removed.●

SIMPLIFICATION OF TRUTH IN LENDING MUST BE APPROACHED WITH GREAT CARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, 10 years ago the following scene was a common occurrence: A consumer goes to a finance company to inquire about obtaining a $1,000 loan. He is told that a loan can be arranged at an 8-percent rate of interest over a 36-month period. The consumer has talked to his bank earlier and was offered a similar loan at a 10-percent interest rate. It sounded like the finance company had the best deal, so the consumer signs for a loan.

Eventually, he comes to realize that even though his outstanding balance is decreasing, his interest payments remain high. Some pointed questions to the finance company reveal that he is indeed paying 8 percent interest on the $1,000 loan—but an 8-percent interest on the full $1,000 for the full 3 years. There was no reduction in the interest charge as the loan is being paid off.

In reality, this borrower was paying an interest rate of 14.55 percent.

Fortunately, this is a scene from the past and what was once a common occurrence is now a rarity. Consumers now understand the mechanics of credit at levels they never have before. And the overwhelming reason for this rise in consumer awareness of credit terms is the far-reaching Truth in Lending Act of 1968.

The act required financial institutions to spell out credit terms in full and established stiff civil liability to creditors not complying with the act. The act standardized the method by which banks, credit card companies, and other credit enterprises state interest charges. The law requires that interest data, along with other lending terms, be disclosed to potential borrowers before they sign loan agreements.

The Truth in Lending Act passed Congress 10 years ago, in 1968. It has proved one of the most effective pieces of consumer legislation on the books and has raised consumer awareness of credit terms a remarkable degree. The law has reached people at all levels of income and education with substantial impact.

Next month, the Subcommittee on Consumer Affairs will hold informational hearings on proposed simplification of the Truth in Lending Act. The hearings will be September 6, 7, and 8 and the subcommittee will hear testimony from representatives of labor, Government, consumer groups, and the banking industry.

As you know, the Senate passed a truth in lending simplification bill last May. Since that time, there has been great pressure generated from the banking industry for House action on this bill. However, I must preface my remarks by saying it is very unlikely that any simplification of truth in lending will pass through the Consumer Affairs Subcommittee this session. But, I would like to comment on the original act, the need for simplification and how I feel this issue must be approached.

As I said, this law is the most comprehensive consumer credit legislation to emerge from Congress. Seven long years went into the careful shaping of the original act. The result was a thorough and extremely successful bill.

Prior to the act, consumers had little awareness of credit terms. In 1969, only 26 percent of consumers studied by the Federal Reserve Board were aware of the annual interest rates they paid on credit cards. In 1977, that figure had risen to 71 percent. The Board also found that in 1969, only 15 percent of consumers studied were aware of the prevailing annual percentage rates for common loans. This figure rose to nearly 55 percent by 1977. According to this poll, only 14.5 percent were aware of the cost of their closed end credit accounts—those accounts used to purchase automobiles for example. That figure now reads 54.6 percent. In the original 1969 study, only 8.6 percent of those with less than a high school education understood the stipulations of this kind of credit arrangement. Again, this figure has soared to 41 percent. And among blacks, there was a fourfold improvement in understanding credit terms between 1969 and 1977.

If Truth in Lending is working so well, why the frantic pleas for simplification? Simplification of Truth in Lending means many different things to many different groups. To some people, it means a reduction in the number of credit disclosures, or the combining of many items into a few. To others, it means a reduction in the creditors' liabilities under the act. To others, it means curtailing the number of court decisions and administrative interpretations of the act. And to still others, it means an easier to understand credit form for consumers.

To me, any simplification of Truth in Lending must accomplish two objectives—First, it must offer obvious benefits to consumers and further enhance their understanding of credit terms, and second, it must retain all of the important consumer safeguards found in the original act, particularly a strong liability section.

Mr. Speaker, I am proud of the Truth in Lending Act as it stands. Granted, there were some problems in the original bill as there invariably are in any piece of legislation with such a tremendous impact. But, in the 10 years since enactment of this legislation, most of these problems have been worked out through court decisions and administrative enforcement proceedings. This is only one reason we must be careful in amending Truth in Lending, for it would be redundant to have to go through this clarification process with a new act.

It is not very often that we can look back on legislation that has passed through this Congress and see such positive results as we see with the Truth in Lending Act. Any simplification of this act must be handled with extreme care.

I will not stand by and watch this act be weakened. However, I am open to simplification that can better aid consumers in shopping around for the best credit terms, while retaining strong consumer safeguards. But, again, I cannot overemphasize the level of caution we must maintain in approaching simplification of Truth in Lending.●

THE ARREST AND DETENTION OF F. J. CRAWFORD IN MOSCOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 10 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, on several occasions in recent weeks, I have expressed my deep concern over the ongoing difficulties facing Mr. F. "Jay" Crawford, an American citizen presently restricted under "house arrest" in the Soviet Union pending a trial on charges of currency violations. As I am sure you know, Mr. Crawford is a representative of the International Harvester Co. in Moscow. The lawless manner of his arrest, his 2-week detention in a KGB prison, and the uncertainty of his present position should now be familiar facts to all of us.

This week I have been in direct contact with three of the seven American attorneys who were able to arrange a secret meeting with Crawford during their stay in Moscow. I learned from them that, despite the fact that Crawford had been jailed, and is still required to report back to the KGB prison for interrogation at any time, he has not been permitted to consult an attorney. His meeting with the American lawyers was the first he had had with any member of the legal profession since his detention and subsequent release on the cognizance of our Ambassador.

This group recently held a press conference in New York, where they released a report of their meeting with Crawford. More vivid and illuminating than the newspaper coverage that this case has received, the report is disquieting to those of us who are accustomed to a different form of judicial procedure. The following report, together with the lawyers' statement, should remind us that more can and should be done to bring this case to a speedy and successful resolution.

F. J. CRAWFORD'S ARREST AND DETENTION IN MOSCOW, JUNE 12–27, 1978

Our interview with Mr. Crawford and his fiancee took place Friday evening, July 28 from 7:30 to 10:45 at the apartment of Jerry Hamilton of the U.S. Embassy. An Embassy counselor was also present. The American lawyers present were Sidney P. Howell, Stephen M. Hudspeth, Kurt W. Melchior, Charles H. Miller, Barrett Prettyman, Jr., Alan C. Swan, and Vernon Vig.

F. J. "Jay" Crawford came to Moscow more than two years ago as a sales representative for International Harvester after several foreign field assignments with Caterpillar. He is a bachelor, probably in his late 30's.

In Moscow he has always lived at the Intourist Hotel, where several other American commercial agents reside. He is passingly (Berlitz) adept in conversational Russian.

On June 12, the day of his arrest, Crawford received a call from a Soviet Ministry of Foreign Trade official with whom he had dealt asking if he had yet received and filed certain accrediting documents for the inbound IH man who was to replace Crawford's boss who had left some weeks before. When in answer to a second call, Crawford reported that the documents had not yet arrived, he was asked his plans and expected movements for the day. He explained that he had to drive out of the city to a plant which was buying an IH truck but expected to be back by 5:00.

Crawford did go to the plant, accompanied by his Soviet secretary-interpreter, obtained his signed contract but returned too late to go to his office. After dropping his secretary, he drove to the U.S. Embassy to meet his fiancee, Virginia Elbrick, a U.S. national in Moscow for a year or more with the Embassy's Economic Section. He arrived about 6:15 p.m. and left with Ginny about 20 minutes later, headed for dinner. As they proceeded under an overpass, their Volvo was intercepted by a marked Militia car in view of many pedestrians. A uniformed officer demanded Crawford's papers. He surrendered his international driver's license and vehicle registration but did not have his passport. Nothing was asked of Ginny. The officer returned to his car with the papers without any explanation.

Crawford, still in the car and turned toward Ginny, was seized from behind by 3 plainclothesmen, one on each arm and one by his hair, pulled bodily from the car and manhandled roughly into the back of an unmarked Soviet auto which was quickly surrounded by several men from two other cars. Crawford recognized the unmarked cars as

KGB vehicles. Crawford's head was cut on the drainpipe of the Soviet automobile, as a result of his being pushed into the backseat. He did see that Ginny was being forcibly restrained in the Volvo and heard her scream.

Ginny was also handled roughly as the policeman literally lay upon her and scuffled for the ignition key. Later he returned the key and Jay's papers and left with no further explanation. She was retrieved by Embassy people after she asked passing Danish and Dutch motorists to call for aid.

The three cars proceeded in convoy to Lefortovo Prison. On the way, Crawford was told only that he "had a big problem." After several minutes outside the prison where he was surrounded by seven or eight of his captors (and last saw his briefcase), he was taken to a KGB colonel who asked if he would submit to interrogation in Russia. Crawford requested an interpreter; his further request to call the Embassy was denied; he was told, "No phone calls."

A half hour or so later, an interpreter was brought in who proved to be a badly frightened Soviet teacher of English commandeered from the streets. Questioning began and continued twice daily thereafter (with a regular interpreter) in roughly 3-hour sessions, alternately handled by hard- and soft-line professionals, all presumably KGB.

Crawford stressed that he was never physically maltreated other than in the fact of his incarceration under internal prison conditions less than model by any standards. (The Embassy people asked him not to detail those conditions further.)

From the outset, Crawford was told that everything was known about him, his activities, his "personal businesses" and the "things" he had brought into Russia from outside. The emphasis on "things" held for several sessions, each of which opened with a reference to, or reading of, Soviet smuggling (black market) law. They purported to know about his "Soviet girl friend" and his "dealings" with Moscovites. He was frequently read another law which commands cooperation with an official investigation.

Crawford elected to tell all about his only extensive contact with Soviet citizenry. During his first summer in Moscow (1976), a Notre Dame graduate (now at Wisconsin Law School) had worked in the IH office in Moscow on a fellowship, intern or trainee basis. When he left, he asked Crawford to retrieve a jacket and some money from a Soviet girl he had befriended whom Crawford knew only by sight.

Two or three weeks after the trainee left, the girl did call on Crawford at Intourist and asked for news of her friend. In the conversation Crawford reminded her of the jacket and money which she acknowledged having and promised to bring by.

A week or two later she called again from the lobby and asked to come up. While she did not have the jacket, she brought and introduced a married couple (the "V"s). The man, an engineer, obviously wanted to exercise his workable English; the wife spoke very little. In the course of the conversation, V told Crawford his wife was a seamstress. On parting, V gave Crawford his telephone number and address.

Crawford never saw or heard from the girl again. However, some time later, confronted with some mis-made drapes purchased from Helsinki for installation in the IH office in Moscow, in lieu of returning them to Helsinki, Crawford remembered the seamstress-wife, found the number and called V. He asked V if his wife might help by rehemming and lining the drapes. V came by, took some home, brought them back in a week or so (nicely fixed) and took the balance. V refused payment or reward of any kind.

By appointment, Crawford himself picked up this second batch at V's apartment. V was not there but was expected momentarily. Crawford did not wait and stresses that this was the only occasion he was alone with Mrs. V. After giving her some extra drapery material and a small bottle of cologne or some such cosmetic (V having said that they would not accept payment and Crawford well aware of the Soviet interdiction against taking payment for menial service and the concommitant crime of "profiteering"), Crawford left.

Over the next few months there was intermittent contact. The V's took Crawford to the theatre, their only purely social encounter. Crawford on four or five occasions asked Mrs. V to repair or alter garments—a torn ski jacket, a new suit, some trousers. In return, he gave Mrs. V various insignificant items—perfumed soap, Prell shampoo, a pair of slacks which could not be enlarged, etc. However, there had been no such contact since before last March.

Crawford was questioned intensely about all this over the first 5 days and each morning was read and asked to sign, on each page, a precis of the previous session.*

On June 19, matters took a different turn. Crawford was shown and read a statement by Mrs. V dated *that day*, relating that Crawford had given her $8,500 for 15,000 rubles. He was then read a Code Article on Currency Regulation to the effect that the penalty for illicit currency exchanges could be 8 years imprisonment plus 3 years "internal exile." Crawford denied the accusation, citing all or some of the following points:

(a) the fact that rubles were useless to him as he regularly receives rubles as change for travel check payments;

(b) the exchange rate was ridiculous in view of the 3-to-1, 4-to-1 available and offered casually on the street for illicit rubles any time, any day;

(c) his business and personal accounts are subject to frequent and complete audit by Haskin & Sells;

(d) his extremely profitable job (he banks $50,000 a year) was flatly on the line.

At a later session, he was shown a written statement by V that either Mrs. V's transaction or another one had occurred in March (well after the last meeting with the V's to which he admits) and claiming that $8,500 had been exchanged for 25,000 rubles.

After two or three days on the currency matter, the interrogation switched to Crawford's knowledge of Americans in Moscow, particularly at the Embassy. He responded to the extent he believed the facts to be generally known, readily available elsewhere or out-dated.

On the morning of June 27, Crawford was advised of his immediate release until September 12 in custody of U.S. Ambassador Malcolm Toon and told that he could not leave Moscow and that they (KGB) expected to see him frequently in the interim. (In fact, Crawford prior to our interview with him had been ordered to report back to Lefortovo for questioning on Monday, July 31; the Herald-Tribune reported on Tuesday, August 1, that Crawford had returned on the 31st and been released again after 5 hours.)

On returning to the Intourist Hotel, Crawford found that his room had been searched and all personal records and correspondence taken. None has been returned; nor has the brief case taken from the Volvo on June 12.

Crawford has remained at the Intourist and visits his office daily. A Soviet defense counsel (Popov) has been appointed but, under Soviet practice, cannot function actively or even interview his "client" until formal charges are filed and a trial date set.

---

*On the second full day, June 14, Cliff Gross, chief Embassy counsellor, was permitted to see Crawford, there and always thereafter with at least two KGB agents present; in fact, Crawford was never out of some agent's sight. (By formal agreement, the Embassy is to be notified within 24 hours of the arrest of a U.S. national. Here, notice came in the 23rd hour.)

STATEMENT

The undersigned are five of the seven American business attorneys of diverse backgrounds who last month were chosen at random from a 32-lawyer working delegation, then visiting Moscow, to meet with International Harvester Corporation's Moscow representative, Francis "Jay" Crawford in a private apartment. This interview was arranged without advance knowledge of the Soviet authorities. We had the opportunity to hear the facts, as related by Mr. Crawford and his fiancee, Virginia Elbrick (an employee of the U.S. Embassy), concerning Mr. Crawford's arrest on June 12, and detention by KGB, the Soviet secret police, as well as the facts underlying the "case" against Mr. Crawford.

We examined Mr. Crawford and Ms. Elbrick closely as to all of the facts and circumstances of his arrest and interrogations. Mr. Crawford was originally detained for 15 days. Since our interview, he has been examined, and he fully expects further interrogation by the Soviet authorities. While no formal charges have been brought against him, clearly such charges may well be forthcoming; at any rate, he has been repeatedly told by KGB that his acts may result in up to eight years' imprisonment, plus three years' "exile". A Soviet lawyer was recently appointed for Mr. Crawford, though he had no access to counsel during his 15 days' detention, nor since. The Soviet lawyer is not allowed to assist Mr. Crawford until formal charges are filed.

We all believe that, on the facts we have discovered, Mr. Crawford is innocent of the customs or currency violations about which he was interrogated and which have been suggested to the press by the Soviet authorities. Our reasons follow. Here we wish to give this message to the American public, and particularly the American business community which we have all long represented: Although trade and business opportunities with the Soviet Union seem substantial and worth pursuing, such activities take place at present in a system which does not recognize the basic legal protections on which freedom of the individual person is founded. This necessarily means that the personal security and freedom of trade representatives in the Soviet Union, and ultimately freedom of trade in that country, are always subject to curtailment or abolition for political reasons.

One point deserves special emphasis: There is no known reason why either Mr. Crawford, or International Harvester, was singled out for this treatment. Any other of the American businesses or their representatives in the Soviet Union could, for all that appears, have served as well. The lesson can well be drawn that, within legal limits, a unified response is called for on the part of the American business community to arbitrary Soviet transgressions against any one of their trade representatives.

It should also be noted that the arrest of Mr. Crawford has occurred in a climate of growing repression within the Soviet Union.

The trial and imprisonment of dissidents and Jewish refusniks reflect a pattern of lawlessness which has now ensnared Mr. Crawford. It is a pattern that can, at any time, reach and catch any other member of the Western business community. There is, in short, no rule of law, no protection of individual rights, in the Soviet Union today.

A detailed statement of the facts of Mr. Crawford's case as we understand them is attached hereto.

AUGUST 9, 1978.

SIDNEY HOWELL,
KURT W. MELCHIOR,
CHARLES H. MILLER,
E. BARRETT PRETTYMAN, Jr.,
ALAN C. SWAN.●

THIS YEAR'S MAJOR ACCOMPLISHMENTS IN THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 30 minutes.

● Mr. ADDABBO. Mr. Speaker, each session as the House concludes its work, I place in the RECORD a summary of what I consider to be the major accomplishments of the preceeding year, achieved by myself and by the Congress. I do this so that my constituents may judge for themselves the value of what we have done here in this Chamber.

This year, however, I must submit this summary before the end of the session, not because I wish to do so, but because in our desire to reform the political process, we have ruled that a Member may not post a mass mailing to his district any time within 60 days of an election. Accordingly, should I not send this pertinent information to my constituents now—a month before the session ends—I cannot do so until mid-November, a month after the House has adjourned. Without intending to criticize the need for meaningful reform where it is necessitated, it seems to me that we might strive for more sensibility when we reform ourselves.

All that aside, Mr. Speaker, in a year of taxpayer revolt, though we have approved some cuts in the biggest Federal budget in history, we have ironically retained the single largest Defense Department budget of all time. I think it is fair to say that when we return to our districts for the November elections, we will take back with us a mixed record as we conclude the second session of the 95th Congress.

I have varied feelings about the accomplishments I can return home with. Nothing has seemed to come easy this year, no matter which issue area we discuss. Nevertheless, some of the issues I am most proud of as we end this year are national in scope, others are of distinctly local benefit.

I am proud and pleased that Congress saw fit to enact the Addabbo amendment which provided $200 million in emergency assistance as part of the special crisis intervention program, to help the poor and elderly pay their fuel bills during an unusually harsh winter. This matter passed the House by a single vote, yet I am convinced in my own mind that the program has not only made life more comfortable for persons who could not otherwise cope with exceedingly high fuel bills, but believe that we no doubt actually saved lives as well.

Likewise, with the strong cooperation of the Secretary of Defense and the White House, we were finally able to bring production of the B–1 bomber to an actual end. This was a satisfactory demise for the most expensive weapons procurement program in Air Force history.

It is a pity we cannot say the same for the nuclear carrier. By voting to keep it in the defense bill, the Congress very likely is wasting an additional $3 billion that is not necessary for the maintenance of an adequate national defense. It may be that the final chapter on this issue is not yet written, but it is certainly true that in a period of peacetime, this Nation is spending an extraordinarily large percentage of its available funds to build more exotic and expensive weapons systems.

I am particularly proud as well that an issue which I first conceived in early 1977 finally received top level consideration this year by the White House. Hearings I held in April 1977 pointed out conclusively that Federal agencies and departments were ill-prepared to deal with the growing needs of providing assistance to women in developing and operating small businesses.

A study ordered by the President a year ago was finally presented to him this spring by an intergovernmental task force, and Mr. Carter has now signed an executive order requiring Federal agencies to upgrade their programs in this area. This is a long overdue action that will hopefully make it easier for women to gain Federal help and guidance in organizing a small business concern.

Additionally, I authored a bill which to date has passed the House and is pending in the Senate, which emphasizes the need for additional Small Business Administration assistance for all small business in general, and especially for those persons who are economically or socially deprived.

I was pleased to see that my colleagues shared my concern for other legislative issues as well. Legislation I sponsored which is now in conference between the House and Senate provides that recipients of veterans' pensions would not have the amount of that compensation reduced because of increases in social security benefits. In a period of fast rising inflation, we found the Government helping with one hand and holding back with the other. It is high time that practice was brought to a halt.

Other legislation I sponsored which is also in conference between the House and the Senate will provide for the tagging and identification of explosives. This measure is designed to facilitate the apprehension of persons who would terrorize by bombing innocent people. Thankfully, we are making major strides in this area and I hope for the day when the potential terrorist is stayed from his violence by the certain knowledge that his deeds can be quickly and undeniably traced back to himself.

I cannot help but express disappointment, however, over the Senate's failure to reject President Carter's arms sale package to Saudi Arabia, Egypt, and Israel. As a strong opponent of the provisions which tied these sales together I truly believe that this and other such policies will not lead us down the road to real peace. At this crucial point in time, our patience, and encouragement of joint talks between Israel and Egypt, will do much more to sustain the hope for a peaceful and lasting settlement.

Closer to home, I am delighted to say that I, with others, was able to play a substantial role in extending fiscal assistance to New York City and thus avert another monetary crisis. The city has worked hard for the last 3 years to get its fiscal house in order, and I believe the Congress was justified in extending additional aid to it. New York remains our Nation's showcase city and I know that by keeping our commitments to help New York save itself, the country has helped itself enormously in the eyes of the world at large.

Turning to other matters which directly affect those of us who live in Queens, there were a number of local issues I could claim for my own as a member of the House Appropriations Committee. I worked hard for these projects, and am grateful that the Congress saw fit to give us a hand with these local problems. Among them I include the $4.5 million we received for improvements to the New York City subway system. Also, 1978 saw the completion of work done to enhance the light pattern approaches to John F. Kennedy International Airport in Queens. At LaGuardia Airport, also in Queens, we were able to obtain $2.5 million for other improvements.

Similarly, the Veterans' Administration was good enough to accept our urging to provide $820,000 to modernize the outpatient clinic at St. Albans VA hospital, a facility that we were able to secure several years ago when the Navy decided to close the naval hospital there. The Navy too has seen the light of day and is now concluding a modernization program of its own; I am pleased to see that all progress is going well.

We have not succeeded with everything we have tried this year. We never do. But we have had partial successes in several critical areas, and we look forward to improving our situation with the Federal agencies involved during the course of the coming Congress. I am personally very disappointed with HUD's rather weak position on reforming inequities in rent preemption matters, although at the same time I am pleased with the Department for moving forward strongly to help rebuild devastated areas of New York City.

I have worked closely, alone, and with others here in Congress, trying to resolve problems in home health care programs, but except for the continuing enthusiasm to succeed shown by civic groups, and State and city agencies, there is little to show for the crusade. We will keep trying, however, as long as it takes, and hopefully will secure the necessary

changes in the near future, along with a national health program and national welfare reform.

I am greatly distressed at the inability or refusal of Federal cultural agencies to earmark funds for Queens cultural groups, especially those groups that are struggling mightily to stay alive. A much greater participation must be forthcoming if we are to provide meaningful programs and opportunities in these areas.

I am equally concerned about the future of York College. This struggling institution deserves all the support we can give it. Proposals to curtail its programs or remove it from the city university system will be met with strong opposition. York, as an educational opportunity for many and a symbol of economic revitalization in the Jamaica area. must, and will, survive.

The addition of a new Federal office building in this same Jamaica area, an actuality we have been hoping and striving for for over 15 years, remains as one of my local priorities. Renewed efforts to obtain a commitment from the Federal Government, and the continuing support of local groups and officials, will hopefully produce fruitful results in the future. The prospects of jobs, transportation improvements, and economic rejuvenation for southeast Queens that such a scheme entails, makes our efforts all the more essential.

And lastly, though the summer is nearly gone, many of us are once again reminded that the water quality of our beaches is not what it should be. In fact, many, such as Jamaica Bay, are restricted for bathing purposes due to pollution and sludge deposits. The Environmental Protection Agency has stated that we need new stormwater and sewer overflow control and treatment facilities to cleanup this literal mess, and I am actively involved in attempting to bring together Federal, State, and local authorities to work out a program which will help us correct the problems with the maximum of outside guidance and assistance.

There have been so many controversial issues before the Congress this year that it would take far too much space to list them all. Anyway, I have found that persons who are interested in specific issues have long since learned how this Member voted and are in no need of additional confirmation from me. Nevertheless, any constituent is always encouraged to write to my congressional office if there is concern about any specific issue or legislation. They know that I will answer their questions.

Mr. Speaker, this has been a year of tumult and unending activity. Up to today, the House has had 1,400 recorded votes thus far, and we face a great many more before we end this session. That is an enormous number of votes and the issues upon which we voted were staggering in their numbers, complexity and time required to learn the subject. As a body, we may be good or we may be not so good, but we certainly cannot be accused of being lazy.

But in conclusion, we must note that above all else, this has been a year of peace for our people, and for that we are grateful. I pray that can also be said two years from now when the 96th Congress concludes its work. Thank you.●

H.R. 7308, FOREIGN INTELLIGENCE SURVEILLANCE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MURPHY) is recognized for 5 minutes.

● Mr. MURPHY of Illinois. Mr. Speaker, H.R. 7308, the Foreign Intelligence Surveillance Act, is now scheduled for floor consideration the week of September 4.

During the past 3 weeks there have been distributed many "Dear Colleagues", fact sheets, and other information and materials on the bill.

Most of these materials contain a roster of those supporting the bill and those opposing the bill. For example, the American Bar Association, the Director of the Intelligence agencies and the FBI, the ACLU, the Attorney General, the New York Times, the Chicago Tribune, the Washington Post, and Common Cause support H.R. 7308; the Association of Former Intelligence Officials, Air Force Magazine, Robert Bork, and Laurence Silberman oppose it.

Unfortunately, there is also a whispering campaign being carried on by some of the bill's opponents, suggesting that certain intelligence officials whose names cannot be divulged oppose the bill. Hopefully, this tactic will be recognized for the discredited practice that it is. In any case, no such unnamed official has contacted me.

In the midst of all of this, not too much is being said about what the bill actually does, or, to put it more accurately, much is being said about the bill that bears no resemblance to what it really does.

The misinformation being spread around is particularly deep in connection with the warrant requirement for surveilling official foreign premises, such as embassies; the criminal standard for surveilling U.S. persons; and the extent to which foreign visitors can be electronically surveilled. Particularly disconcerting is the suggestion that passage of H.R. 7308 will reduce our intelligence collection capabilities. As members of the intelligence community have stated repeatedly, passage of the bill, by removing the existing doubts and uncertainties, will actually result in a more efficient intelligence collection operation.

The warrant requirement for electronic surveillance of embassies and other foreign premises is not intended to protect foreign spies or diplomats. It is intended to protect Americans. Wherever there is a possibility that the communication of an American will be intercepted, a warrant must first be obtained. When there is no such possibility, a warrant is not required.

That such protection is necessary is readily evident if one looks at the abuses of embassy surveillances revealed by congressional committees in the past few years. Such surveillances were used to collect political and social information on Americans for reasons having nothing to do with foreign intelligence.

The warrant requirement will prevent such abuses from recurring—without hindering intelligence collection. All the judge is allowed to decide is whether the target is in fact a foreign embassy and whether the minimization procedures meet the statutory standards. The judge has no say at all as to the need for a particular surveillance. Nor does any showing of criminal activity have to be made.

The criminal standard applies only to the surveillance of American citizens and permanent resident aliens. What it says is that when such a person is suspected of spying or espionage activity the Government must show that such activity may involve a criminal violation before he can be subjected to electronic surveillance. If the American citizen or permanent resident alien is suspected of covert activities on behalf of a foreign power—not spying or espionage—the Government must show that such activities involve or are about to involve a criminal violation before such a person can be subjected to electronic surveillance. To repeat, these standards apply only to American citizens or permanent resident aliens.

Where foreign visitors are concerned, the bill is explicit. The judge has to find probable cause to believe that such a person is an agent of a foreign power. The statute says such a person is an agent of a foreign power if he is an "officer, member, or employee" of a foreign power and if he acts in such a capacity in the United States. That is all that a judge has to find. The bill also says a nonresident foreigner is an agent of a foreign power if he "acts for or on behalf of a foreign power which engages in clandestine intelligence activities in the United States, contrary to the interests of the United States" and circumstantial evidence can show that such person "may engage" in such activities in the United States. Thus, nothing has to be shown concerning any actual activity of such person in the United States.

In summary, Mr. Speaker, H.R. 7308 is a bill that recognizes the vital role that electronic surveillance plays in our intelligence effort. It is not a bill that will prevent needed intelligence collection, allow judges to intrude into the day-to-day operation of intelligence agencies, or protect spies or foreign diplomats. I urge any of my colleagues who have any questions about it to contact the intelligence agencies, or the members or the staff of the Intelligence and Judiciary Committees. I am confident that when it is understood exactly what the bill does, it will be passed, and passed without weakening amendments.●

PRESIDENT'S PRIVACY ACT REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from North Carolina (Mr. PREYER) is recognized for 5 minutes.

● Mr. PREYER. Mr. Speaker, I would like to call to the attention of my colleagues the just-released 1977 Annual Report of the President on agency activities under the Privacy Act of 1974. This report is especially important because 1977 is the first full year of regular operation under the act. Earlier reports covered periods that were heavily characterized by start-up efforts and initial implementation activities. Now, for the first time, we are able to get a fairly clear picture of the effects of the Privacy Act and, in general, those effects are quite positive.

In his transmittal letter to the President, James McIntyre, Director of OMB, states that the requirements of the act have been successfully integrated into the operations of most departments and agencies within the executive branch. He also indicates that a number of agencies have achieved significant reductions in the amount of personal data they collect and maintain. These are important accomplishments.

The report also shows that use of the Privacy Act by individuals to obtain records about themselves has grown. The President reports that agencies received over 1.4 million requests from individuals and that over 95 percent of these requests were granted in whole or in part. While reporting practices for Privacy Act statistics vary among agencies, this clearly reflects a tremendous interest on the part of citizens in the records maintained about them by the Government. I am convinced that the availability of these records helps to decrease feelings of mistrust of Government among the public.

This is also true for the provision that permits an individual to correct erroneous information that is maintained in agency files. It is significant that most requests for correction of mistaken personal data in Government records were granted by agencies. The Department of Defense, for example, made 14,939 corrections out of 15,048 requests. Agencies and individuals both benefit from the maintenance of accurate information.

Several agencies reported that adherence to Privacy Act standards for recordkeeping resulted in simplifying the design of forms they used and contributed to carrying out substantive tasks more effectively. Others reported that individuals seemed more willing to provide personal information as a result of being informed about agency information practices.

Another positive feature is the way in which agencies used the exemptions provided in the act. Rather than automatically invoking an exemption to deny access, which the Privacy Act permits, agencies tended to review records on a case-by-case basis to determine if there was a need to use an available exemption. This limited use of the exemptions is certainly consistent with the philosophy of the law.

A number of problem areas that have developed under the act are identified in the report, but none is major. It is not surprising that a new and major piece of legislation has some problems that only become clear after passage.

On the whole, I am pleased with the overall progress to date with the Privacy Act implementation process and with the smooth and effective way in which the act's requirements have been incorporated into agency operations. I am also pleased with the positive and constructive attitude toward the Privacy Act that is reflected in the President's report.

Noticeably absent from the President's report is a legislative program for implementing the recommendations of the Privacy Protection Study Commission. The commission's report is now over a year old. We have come a long way in the last few years to improve the protection of personal privacy, but we still have a long way to go.●

THE NATIONAL ECONOMY—WE'VE CUT TAXES, NOW LET'S CURB INFLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 5 minutes.

● Mr. BAUCUS. Mr. Speaker, a couple of days ago, as I was visiting a small town in Montana, I stopped at a store. I got into a conversation with the storekeeper during which he asked me, "Max, there's one thing I've been wondering about you; are you pro-industry or anti-industry?"

I said I was neither. There is a lot of interest groups in a State like Montana. All these interests need to be recognized in an evenhanded way.

We are all interdependent. Business needs labor, labor needs business, consumers need business, and so forth.

But I told that storekeeper that there is one thing each and every one of us in Washington can do for all people—help reduce the tax burden. That includes inflation, which is the cruelest tax of all.

We are facing some tough economic problems. The public demands that Congress rein in on Government spending and taxation.

At the same time, our economic expansion may be running out of steam. So, we also have a responsibility to keep the economy moving.

Last week we voted to cut taxes $16 billion. We are making a start toward our economic responsibilities.

I am glad that some of the refreshing breezes from California have finally reached Washington, D.C. And I hope that Congress will continue to heed the public demand for lower taxes and less government.

The Tax Reduction Act (H.R. 13511) provides significant cuts for middle-income taxpayers. Sixty-three percent of the bill's benefits go to individuals in the $15–$50,000 tax bracket.

The bill also reduces the maximum tax on capital gains from 49 percent to 35 percent. That should help increase national productivity.

I am concerned about the low rate of productivity growth in the country. During the prosperous years of the 60's, productivity increased an average of 3 percent a year. Lately, the average has dropped to 2 percent annually. Now Barry Bosworth of the Council on Wage and Price Stability predicts that there will be no productivity growth this year.

This is a serious problem. The only way to insure Americans a better standard of living is to increase productivity.

One way to encourage productivity is by cutting capital gains taxes. The cut we voted for should lead to increased capital formation—and that means new jobs and higher productivity.

I am pleased that the tax bill includes provisions I've been pushing for. I am especially happy about the new graduated income tax for small corporations.

Small businesses are the backbone of our economic system. Their toughest problem has been getting capital to expand.

They frequently depend on profits after taxes. But until now, a business making $50,000 a year paid the same tax rate as General Motors. The new legislation will graduate taxes up to $100,000 of annual income.

I am also pleased that tax brackets have been adjusted to account for inflation. Under the present system, many workers who get cost-of-living increases find themselves in higher tax brackets—even though their purchasing power stayed the same.

Businessmen are similarly affected. Even though a businessman sells the same amount of products, he may pay a higher percentage of his income in taxes.

This is taxflation. A 10-percent increase in inflation produces a 16-percent increase in Federal revenues. These automatic tax increases produce creeping increases in the size of the Federal Government.

Months ago I introduced legislation that would automatically adjust the tax brackets each year to end taxflation. The House tax cut package adjusts brackets upward 6 percent this year.

I intend to push for the same kind of adjustments in future years.

Speaking of inflation, it is important to keep in mind that inflation is a tax, too. It affects everybody—workers, businessmen, farmers. It is a cruel tax affecting the sick and elderly on fixed incomes who have the least ability to pay.

We in Congress have to commit ourselves to stopping inflation. We have got to vote for responsible spending and revenue measures. We have got to encourage growth of industrial productivity, and we have got to stop inflationary redtape.

Congress has run up some enormous budget deficits in the past several years. And the $60 billion deficit proposed by the President last January was just too much. Indeed, by congressional action today it looks as though we will get next year's deficit down more than $8 billion below that proposed by the President. That is a big improvement, but we have got to keep improving.

We cannot ignore the depressing effect that inflation has on business. It is a

vicious circle. Businessmen cannot figure their real return, so they postpone investments. Their costs rise, their real profits shrink, and stock values go down. Interest costs increase—and it costs more to borrow. And it goes on and on.

When businessmen postpone investments, productivity suffers. Prices have to rise to cover inefficient production.

In the end, if we cannot control inflation we will fall behind our trade competitors and lose international influence. That is exactly what happened to Great Britain when 200 years of monetary discipline collapsed after the First World War.

We have got to pay more attention to the inflationary impact of Government regulation. These costs can be staggering.

One example is housing. Many families cannot afford their own homes anymore. But recently a congressional panel found that Federal regulations added $5,000 to the average cost of an Oregon community.

The flood of Federal redtape has increased cost to the point where many businesses in my home State of Montana have had to close their doors. This has to be stopped.

I have cosponsored legislation to provide more opportunities for public participation in agency rulemaking. I also think we should require inflationary impact analysis on bills we pass.

Mr. Speaker and fellow colleagues, we have cut taxes. That is a step in the right direction. Now let us keep on reducing the size of Government. Let us stop inflation and let us restore the confidence of Americans in their Government.●

BALANCING THE FEDERAL BUDGET

(Mr. WHITE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. WHITE. Mr. Speaker, recently rampant inflation fueled primarily by deficit financing of the Federal Government has been headline news. Proposition 13 in California has brought the matter to the attention of the public and legislators alike. However, members of the Democratic Research Organization (DRO) have been aware of the adverse consequences of inflation for some time. It comes as no news to DRO Democrats that inflation causes high unemployment, erodes the purchasing power of consumers, reduces the real profits of business, and, in its harshest consequence, destroys the self-reliance of the aged and all who live on fixed incomes. Mr. Speaker, some time ago DRO initiated a comprehensive investigation of deficit financing, balancing the Federal budget and its effect on the economy. The record we amassed makes our conclusions with regard to these matters unassailable.

Mr. Speaker, specifically the Democratic Research Organization (DRO) authorized 18 of its Members of the House of Representatives to act as a committee to conduct hearings on balancing the Federal budget. It was established and during the last month of the 93d Congress and in the early months of the 94th Congress held a series of public hearings to conduct this investigation. The following 39 witnesses consisting of members of the President's Cabinet, Members of Congress, economists, academicians, businessmen, and Government officials testified on balancing the Federal budget before the committee: Honorable William E. Simon, Secretary of the Treasury; Dr. Arthur Burns, Chairman of the Board of Governors, Federal Reserve System; Henry Wallich, Member of the Board of Governors of the Federal Reserve System; Dr. Darryl R. Francis, President of the Federal Reserve Bank of St. Louis; Dr. Geoffrey H. Moore, National Bureau of Economic Research; Dr. Allan Meltzer, professor of economics, Carnegie Mellon University; Dr. James S. Duesenberry, chairman of the department of economics, Harvard University; Dr. Alan Greenspan, Chairman of President's Economic Advisers; Honorable Elliot Richardson, Secretary of Commerce; Congressman BROCK ADAMS, chairman, House Budget Committee; Congressman HENRY S. REUSS, chairman, House Banking, Currency and Housing Committee; Honorable Carla Hills, Secretary of Housing and Urban Development; Honorable Roderick M. Hills, Chairman of the Securities and Exchange Commission; James J. Needham, chairman, board of directors, New York Stock Exchange; Dimitri Balatsos, vice president of the Manufacturers Hanover Trust Co.; Dr. Henry Kaufman, senior financial analyst for Salomon Brothers; Elmer B. Staats, Comptroller General; Dr. Alice Rivlin, Director, Congressional Budget Office; Kenneth Thygerson, chief economist of the U.S. League of Savings & Loan Association; Dr. Leon W. Taub, vice president of Chase Econometric Associates, Inc.; Mitchell Robelinski, Administrator, Small Business Administration; Charles Bowsher, Arthur Andersen & Co.; Senator James Clark, Maryland General Assembly; William James, State Treasurer of Maryland; George Gross, executive director, House Budget Committee; Dr. Peter Clark, economist, Congressional Budget Office; Dr. Frank DeLeeuw, Assistant Director, Fiscal Analysis, Congressional Budget Office; Richard Maycock, General Accounting Office; Harry Havens, General Accounting Office; Phillip S. Hughes, Assistant Comptroller General; Robert Wilson, Arthur Andersen & Co.; James Pierce, chief economic consultant, House Banking, Currency and Housing Committee; Glenn Morrow, economist, Small Business Administration; George Grant, Jr., general counsel, Small Business Administration; Thomas Cole, Assistant Administrator of Congressional Relations, Small Business Administration; Sol Mosher, Assistant Secretary for Legislative Affairs, HUD; John Welcher, Deputy Assistant Secretary for Economic Affairs, HUD; Gene L. Finn, Directorate of Economic Policy, SEC; Maynard Comiez, Acting Chief Economist for the Department of Commerce.

The following other persons submitted statements on balancing the Federal budget in lieu of testifying before the committee: Senator HARRY F. BYRD, JR., U.S. Senator from Virginia, chairman, Taxation and Debt Management General Subcommittee of the Finance Committee; Paul W. McCracken, professor, University of Michigan, former chairman of Council of Economic Advisors; James T. Lynn, Director of the Office of Management and Budget; William A. Niskanen, Ford Motor Co.; James M. Buchanan, professor and general director, Center for Study of Public Choice, Virginia Polytechnic Institute and State University; James E. Smith, Comptroller of the Currency.

As chairman of the Democratic Research Organization (DRO), during the past month I returned the transcripts to each of the witnesses and other persons for their review, updating, and final concurrence. The replies have been received, the review and updating completed, and the report of the DRO Committee to Investigate a Balanced Federal Budget containing its findings, conclusions, and recommendations are as follows:

REPORT OF COMMITTEE TO INVESTIGATE A BALANCED FEDERAL BUDGET; DEMOCRATIC RESEARCH ORGANIZATION

AUGUST 1978

DEMOCRATIC RESEARCH ORGANIZATION (DRO)

Hon. RICHARD C. WHITE, Chairman

(Prepared under the direction of Paul Wohl, executive director, Democratic Research Organization (DRO), by Professor Timothy P. Roth, chairman, Department of Economics and Finance, University of Texas at El Paso.)

MEMBERS OF DRO COMMITTEE TO INVESTIGATE A BALANCED FEDERAL BUDGET

Hon. RICHARD H. ICHORD, 8th, Missouri, Chairman.
Hon. IKE F. ANDREWS, 4th, North Carolina.
Hon. CHARLES E. BENNETT, 3d, Florida.
Hon. JOHN BRECKENRIDGE, 6th, Kentucky.
Hon. GOODLOE E. BYRON, 6th, Maryland.
Hon. BILL CHAPPELL, JR., 4th, Florida.
Hon. E. DE LA GARZA, 6th, Texas.
Hon. L. H. FOUNTAIN, 2d, North Carolina.
Hon. JAMES R. MANN, 4th, South Carolina
Hon. DAWSON MATHIS, 2d, Georgia.
Hon. DALE MILFORD, 24th, Texas.
Hon. LARRY MCDONALD, 7th, Georgia.
Hon. STEPHEN L. NEAL, 5th, North Carolina.
Hon. HAROLD RUNNELS, 2d, New Mexico.
Hon. CHARLES ROSE, 7th, North Carolina.
Hon. DAVID E. SATTERFIELD, 3d, Virginia.
Hon. PAUL SIMON, 24th, Illinois.
Hon. RICHARD C. WHITE, 16th, Texas.

I. BACKGROUND, OBJECTIVES AND OVERALL POSITION

After careful consideration, the Democratic Research Organization (DRO) undertook to explore and to question the efficacy of balanced Federal budgets. DRO, acting through its Executive Committee, approved and established the Committee to Investigate a Balanced Federal Budget to secure the testimony and opinions of knowledgeable and interested parties and to report its findings, conclusions, and recommendations. The result of this effort was the emergence of some 1,593 pages of testimony. (All cited page numbers are keyed to this 1,593 page transcript of testimony and statements available for examination at the DRO office.)

The testimony was secured with a view to the development of a report that would address such questions as these: Are Federal deficits stabilizing or destabilizing, or what is effectively the same thing, are Federal deficits "good" or "bad"? If deficits are, in some sense, harmful, what might optimally be done about it? Should consideration be given, for example, to a constitutional

amendment which would prohibit Federal deficits?

The objective of this paper, simply stated, is to provide answers to these and other related questions; answers that are predicated upon a distillation of the views of many interested and knowledgeable witnesses. It is hoped that the report will be an effective catalyst to thought and to the ultimate emergency of a budget policy that will be beneficial to us all.

As will become clear, the position adopted herein is that Federal deficits are, in fact, "harmful", and that it is in the interest of the nation to eliminate discretionary deficits. Moreover, it is argued that the most efficient means by which a bias toward deficits can be eliminated is a constitutional amendment generally prohibiting them.

II. POINTS OF DEPARTURE

The case for a balanced Federal budget cannot be developed *in vacuo*; that is, without having taken account of the arguments that might plausibly be offered against such a fiscal strategy. With this in mind, explicit account will be taken of those arguments that have been tendered against a constitutionally mandated balanced Federal budget. The arguments, by and large, tend to center on the presumed efficacy of what might be termed "fiscal flexibility", and upon the presumed ability of the Congress to act "responsibly". While much can be said about both of these assumptions, the logical development of the argument for a constitutional restriction on budget deficits requires that we strike out in a somewhat different direction—at least momentarily. What is required is that the generative assumptions of the argument for constitutionally mandated balanced budgets be made explicit. To put the matter differently, the argument will proceed based upon two "points of departure". Simply stated, the argument is predicated upon the assumptions that: 1) Federal deficits are a major cause of inflation and that inflation, in turn, is a cause of unemployment, and 2) that the prevailing incentive structure is such that there exists in the Congress a bias towards deficits. Because neither proponents nor opponents of the proposed constitutional amendment are likely to be persuaded by this simple assertion, it is essential that the logic behind these statements be systematically developed. With this in mind, we proceed to item 1), the notion that Federal deficits are inflationary and that inflation is a cause—if not the major cause—of unemployment.

A. The relationship between deficits and inflation and between inflation and unemployment

1. Deficits and Inflation

Both in the interest of prudence and honesty, let us begin with recognition of one of those brute facts of life with which we all must live; namely, the fact that it is not possible unambiguously to determine cause and effect, either in the physical or in the social sciences. It follows that one should be circumspect in making statements about the relationship of anything to anything else. This much is clear, however: both *a priori* logic and a growing body of empirical evidence suggest that deficits are a cause of inflation. In the testimonial words of Dimitri Balatsos (p. 191):

"It is not coincidental that in the last ten years the budget was in deficit in all save one year and that the rate of inflation averaged twice the level of the previous ten years."

Ultimately, of course, the actual contribution of a given budget deficit to the future inflation rate depends upon the way in which the deficit is financed. Fortunately, the analysis is somewhat simplified by the fact that there are only two means by which a deficit can be financed:

"Whatever the deficit is, it has to be financed. We have two options. We can finance it by printing money. Sooner or later that addition to money is going to result in higher prices and more inflation than otherwise would have occurred. If we finance it with less money, we have less inflation. We run into the problem known as crowding out. We have to sell the securities to private individuals to finance the deficit . . . at the expense of some capital they could hold" (Meltzer, p. 977).

While the second portion of the statement relating to "crowding out" is somewhat cryptic, it is the first portion of the statement upon which our interest momentarily centers.[1]

The point to the emphasized is simply this (Francis, p. 619):

". . . it is quite evident that inflation is the result of excessive monetary growth . . . (and that) monetary growth in excess of resource growth has been the most dependable result of government deficits . . ."

Again and again, the theme that emerges is the notion that monetary growth is related to the size of Federal deficits and that, other things equal, the faster the rate of growth of the money supply via debt monetization, the faster the subsequent rate of increase of prices. In Professor Meltzer's testimonial words (p. 953):

"The greater the amount of money issued to finance the deficit, the higher the subsequent inflation. The principal reason deficits lead to inflation is that the deficits are often financed by printing money."

Former Treasury Secretary Simon's testimony is somewhat more expansive (p. 769):

"The deficits contribute to inflation: First, by being produced by too rapid a rise in spending which directly puts pressure on prices; and second, by bringing about a large increase in liquid asset holdings of the public; and third, by depriving the private sector of needed funds which lowers the economy's future growth potential and heightens inflationary pressures."[2]

The litany of those who accept the general proposition that deficits are, in general, inflationary runs the gamut of academics through those in government and in business. Moreover, the idea that deficits are inflationary is not the exclusive province of "conservatives". A sample of additional comments will serve to corroborate this statement: Professor James Duesenberry—"Deficits of the late '60s and the Korean War did contribute to inflation" (p. 333); Federal Reserve Governor Henry Wallich—"Federal deficits are an 'essential contributor' to inflation" (p. 410); Roderick Hills, Chairman of the Securities and Exchange Commission—"Federal deficits have contributed to inflation and therefore to higher interest rates" (p. 659), and "The extent to which deficits contribute to inflation depends on the extent to which the deficit is financed by the creation of new money" (p. 713); Henry Kaufman, Senior Financial Analyst for Salomon Brothers—"I believe that fiscal policy has contributed significantly to the inflation rate of the United States in the post-war period" (p. 1,290); James Pierce, Chief Economic Consultant, House Banking, Currency and Housing Committee—"The government deficits run during the late '60s caused what was going on in the '70s. Those are what caused the inflation" (p. 1,285).

An objective assessment of this testimony must, it would seem, conclude that, in fact, deficits cause inflation. Moreover, it is important to recognize that the notion that Federal deficits are the major cause of inflation seems broadly more defensible than any alternative "explanation" of inflation. In witness Geoffrey Moore's view (p. 281):

". . . you have got a clear trend in the rise of prices during recessions starting with the first recession in the (post-war) period, from 1948 to 1949. . . . To get a convincing explanation of that you have also got to find something that has a trend in the same way and I don't think the studies that I have seen of concentration in industry have shown that trend, and I don't think it has been shown with respect to labor unions either. The percentage of the working population that is unionized has not been increasing, and in that sense unions have not been getting any more powerful."

Given Moore's reluctance to ascribe the observed inflation to business or to unions, it is significant that he is unequivocal in saying that deficits are one of the "contributing factors" in inflation (p. 278).

In summary, based upon a priori logic, an emerging body of empirical evidence and the "weight of authority", we accept the following proposition: That Federal budget deficits are inflationary, and that the degree to which such deficits contribute to inflation is directly related to the extent to which the Treasury debt is monetized; that is, to the extent to which it is bought by the Federal Reserve with newly printed money. Granting this, the issue to which we now turn is the question of the relationship between inflation and unemployment.

2. Inflation and current unemployment

It has long been a part of the "received doctrine" in economics that the so-called Phillips curve has validity; that is, that there is a trade-off between inflation and unemployment. As the conventional wisdom would have it, a decrease in the unemployment rate will be accompanied by an increase in the inflation rate, an increase in the unemployment rate with a decrease in the inflation rate. The logic behind this general proposition is based upon the presumption that as the "capacity" of the economy to produce is approached—that is, as employment and the utilization rates of physical capital's services increase, "bottlenecks" will appear, costs of production will rise, and inflation will result. The chain of causation proceeds, in other words, from the surrogate for capacity utilization—namely, the amount of employment—to the inflation rate.

It is the purpose of this section to show that while this logic might at first appear compelling, it is fallacious. Indeed, appeal to and acceptance of this logic requires that the analyst ignore the effects of inflation on real disposable incomes, corporate profits and balance sheets and the composition of output. It is the purpose of this section to show, in other words, that the chain of causation is precisely opposite to that contemplated by the "conventional wisdom"; that, indeed, increases in the inflation rate cause unemployment.

Once again, this proposition should not be accepted on faith. With this in mind, let us proceed to a systematic exposition of the logic behind this assertion:

a. Inflation and profits

It is patently obvious that inflation affects the individual business enterprise. The effects are felt both on the revenue and the cost side. On the revenue side, the effect of inflation depends, in particular, on whether the firm produces goods whose demand is positively or inversely related to changes in real disposable income.[3] If the firm produces what economists call normal or superior goods, an increase (decrease) in real disposable income will cause an increase (decrease) in the demand for its product(s). If the firm produces so-called inferior goods, an increase (decrease) in real disposable income will cause a decrease (increase) in the demand for its product(s). Clearly, for those firms producing normal or superior goods, a decrease in real disposable income will, other things equal, mean that the demand for their product(s) will fall. In other words, the revenue gener-

Footnotes at end of article.

ated at any price decreases since less is sold at that price because of the decrease in real disposable income. And what causes a decrease in real disposable incomes? The answer is unambiguous: inflation. Moreover, inflation causes real disposable incomes to fall for two reasons: 1) The prices of goods and services generally rise during inflation at a faster rate than the rate of increase of nominal or money incomes: hence real incomes fall. 2) Because of inflation, nominal incomes do rise, but these higher money incomes are taxed at higher rates because of our progressive income tax system. The net result is obvious: inflation causes an erosion of real disposable incomes. This, in turn, causes the demand for normal and superior goods to fall, causing their producers revenues to fall.

The effects of inflation are not assymetric, however; inflation affects both revenues and costs. Let us focus for a moment on costs. Without question, one of the effects of inflation is an increase in the prices of the goods and services purchased or rented by producers. We have in mind here not only the wage rates paid to employees, but the purchase prices of ingredient inputs (the things that "go into" the final product), and of ancillary inputs like electricity. Given the firm's technology—that is, given the techniques by which it combines inputs to produce output—increases in these input prices have the effect of increasing the costs of production. This much, we should think, is so obvious as to appear platitudinous.

Yet it should be emphasized that inflation causes the costs of production to rise not only because of increases in input prices. Inflation also causes costs to rise because of its effect on the value of inventories and upon the replacement costs of capital equipment. In the case of inventories, phantom inventory "profits" appear as the nominal value of inventories bought in the past rises. The fact that these profits are not realizable since old inventory must be replaced at the prevailing higher prices is irrevelant from the point of view of the Treasury Department; inflation-induced inventory "profits" are taxed, and the increased taxes constitute an increase in the costs of production.[4]

In the case of the replacement costs of capital equipment, inflation has two effects. First, it pushes the prices of machinery and equipment up. Two, because it has the inevitable effect of pushing up interest rates—a matter that will be discussed below—it makes external financing of plant and equipment more expensive.[5] The net result is that even if new equipment is significantly more productive—in the sense of the output per man-hour that it is capable of producing—inflation-induced increases in the cost of acquisition may make the purchase or rental of the equipment prohibitively expensive.

Finally, it is clear that inflation causes the costs of production to rise for still another reason. Previously we suggested that increases in input prices (and, for that, increases in inventory "profit" taxes) will cause the costs of production to rise, given the firm's technology. The problem is that a business firm's technology—again, the means by which it combines inputs to produce output—is likely to be affected by inflation. One of the effects has already been discussed; namely, the possibility that more efficient equipment may not be brought on-line because of increases in the cost of acquisition. The corollary of this is that business firms tend, during an inflationary period, to rely more and more on incumbent equipment; equipment that is subject to the laws of friction—equipment that, in other words, deteriorates over time.[6] This, in turn, implies that the costs of production must rise over time. Yet this is not the end of the story because inflation has still another effect on the firm's technology: because inflation causes nominal incomes to rise, and because human income[7] is taxed so heavily in our society, employees have less incentive to be productive. The result is that as inflation proceeds, costs of production rise because employees become progressively less productive. Moreover, because of the prospect of increased tax liabilities, there is less incentive to acquire human capital. There is less incentive for the employee to acquire additional skills and knowledge because he knows that the acquisition of these skills will imply higher nominal incomes; incomes that will, in addition, be bloated by inflation and that will, as a result, be taxed more heavily. Granting this, he could conceivably be made worse off in terms of real disposable income because of an investment in human capital. To the extent that employees and/or their employers do not invest in human capital, future productivity will be lower and future costs of production will be higher than they otherwise would have been.

The message is clear: Inflation has a double-edged effect on business firms: 1) it causes revenues to fall—or, at minimum, to increase more slowly, at the same time that 2) it causes the costs of production to rise. The result is that cash-flows deteriorate, both in the present and in the future. *Insofar as cash flows deteriorate, business firms that seek to maximize profit*—and we know of no one that is prepared to accept an alternative desideratum—*will have no choice but to reduce both output and employment.*[8] It is worth re-emphasizing, however, that the effect of inflation on output and employment will not be confined to the present. To the extent that incentives to invest in human and non-human capital are eroded by inflation, future output and employment will also be affected. In any case, discussion of this aspect of the relationship of inflation to unemployment is momentarily deferred. Suffice it to say that we are led to conclude that present employment is affected by inflation. We conclude, based upon *a priori* logic, that increases in the inflation rate cause business firms' cash flows to deteriorate and that this, in turn, causes output and therefore employment to fall.

The question now would seem to be this: Can we secure any empirical or other support for the idea that rising inflation causes unemployment? The answer, of course, is yes. First, let us consider the matter of the relationship of inflation to profits.

Mr. Mitchell Kobelinski, former Administrator of the Small Business Administration, testified that (p. 1,207):

"Inflation erodes profits, which are a major source of equity financing; and requires injections of new capital merely to replace depleted inventories, depreciated properties and other forms of capital consumption."

Testimony by Mr. Roderick Hills, former Chairman of the Securities and Exchange Commission, echoes this view (pp. 698–699):

"The second reason for the tendency toward leveraged capital structures is the impact of inflation. As corporate operating costs rise more rapidly than prices, profits are squeezed. Even these reduced profits tend to be overstated in real terms since they must be reinvested in higher cost plant and inventory simply to maintain the real capital of the firm . . ."

Influential members of the business community agree. Mr. James Needham, Chairman, Board of Directors of the New York Stock Exchange, testifies simply that ". . . periods of escalating inflation are notoriously bad for corporate profits" (p. 465). And finally, to paraphrase witness Mr. Dimitri Balatsos, Vice President of Manufacturers Hanover, inflation causes decreases in retained earnings adjusted for inventory valuation and replacement cost depreciation. What this means, among other things, is that because of inflation, businesses cannot maintain earnings sufficient to meet both depreciation set-asides and other capital requirements (p. 203). It would appear, therefore, that there is a clear well-defined relationship between inflation and profits: increases in the former cause decreases in the latter; decreases in the former cause increases in the latter.

The next question is this: We have asserted not only that increases in the inflation rate cause cash-flow and therefore profits to erode. We have made the additional claim that this has the effect of reducing output and employment both in the present and in the future. Let us now focus on the question of the relationship of inflation to profits and to current unemployment. We shall, momentarily, address the question of inflation's impact on future unemployment.

b. Inflation, profits and current unemployment

The presumption that inflation-induced profit erosion is a cause of unemployment seems to be self-evident. But it is also obvious that this idea will gain wider acceptance and credibility according as it is espoused by knowledgeable parties from government, industry and acadamia.

As it happens, the notion that accelerating inflation causes an erosion of profits and, *pari passu*, an increase in unemployment is espoused by a widely disparate group of knowledgeable individuals. Consider, for example, the comments of witness Mr. James Smith, former Comptroller of the Currency (p. 1,579):

"Many knowledgeable observers have pointed out that inflation was itself a key factor in creating the set of conditions that led to this (1974–1975) recession. With double digit inflation, the confidence of consumers end, to a very considerable extent, the confidence of businesses was shaken. With inflation outpacing the growth in personal disposable income, real disposable income of many individuals actually fell. Coupled with the decline in real income was the adverse effect of the expectation that continuing inflation might lead to an even sharper decline. As a result, the effective demand for goods and services fell off. In this uncertain atmosphere, businesses were hesitant to carry out their plans for expansion of plant and equipment."

It would appear, therefore, that inflation-induced erosions in real incomes and in consumer and business confidence can have determinate effects. In the view of the former Comptroller of the Currency, these effects are summarized in terms of reductions in the effective demand for goods and services and the postponement of capital investment projects. All of this is, of course, consistent with our *a priori* assessment of the effects of inflation. The testimony of Mr. Elliot Richardson, former Secretary of Commerce, goes one step further, however; indeed, he affects the crucial link-up of inflation to unemployment (pp. 886–887):

"Now, perhaps as never before, we recognize the insidious nature of inflation. Basically, it undermines economic stability and curtails progress. . . . Confidence gives way to hesitation and uncertainty, causing consumers to become more cautious and to save a greater share of their incomes. As demand slackens, business inventories begin to build up rapidly. Eventually . . . workers are laid off in growing numbers and postponements and cancellations of long-range investment projects . . . occur with greater frequency."

Somewhat later in his testimony, Mr. Rich-

Footnotes at end of article.

ardson puts the matter even more straightforwardly (p. 907):

"I think we can see in all the industrial countries in the past recession . . . that inflation was the cause of unemployment."

Former Treasury Secretary Simon's testimony is sympathetic to this view. In his words (p. 838):

"Inflation actually causes recessions and related unemployment by eroding housing construction, personal consumption and business investment."

It is worth mentioning in passing a point that will be re-emphasized below; namely, that if one accepts the view that inflation causes unemployment certain corollaries follow. In response to a question put to him by a member of the Committee to Investigate a Balanced Federal Budget, Alan Greenspan, former Chairman of the President's Council of Economic Advisors, testified this way (p. 1054):

"I don't believe (there is a trade-off between inflation and unemployment). I think there is just no reason why we cannot have both a low level of unemployment and a low level of inflation. In fact, I'll go further. If we have an unstable and high rate of inflation, I don't see how we can keep the unemployment rate down. So, in that sense, I would say they are mutually reinforcing."

The point to be emphasized is therefore clear. There is no trade-off of inflation for unemployment.[9] The conventional wisdom is simply wrong. We have, in fact, a situation in which increases (decreases) in the inflation rate cause increases (decreases) in the unemployment rate. From the point of view of optimal public policy, it follows, therefore, that *anything that contributes to inflation contributes to unemployment. Insofar as Federal budget deficits contribute to inflation, they contribute not to "economic expansion" but to unemployment.* Professor Allan Meltzer puts it this way (p. 974):

". . . no reliable long-term tradeoff exists between inflation and unemployment. But I would make the same argument in the short-run. There is no reliable short-run tradeoff between inflation or unemployment, and we get ourselves into enormous difficulties by trying to run the economy on the basis of what used to be called 'fine tuning' . . . . For example, highly expansive policy will lead to inflation."

Finally, the testimony of Darryl Francis, President of the St. Louis Federal Reserve Bank provides a comprehensive, heuristic check list of the effects of inflation (p. 653):

"The long-run effects of inflation are primarily created by the inability to anticipate inflation correctly. All those that have contracts that are specified in a given number of dollars and cents are affected. Creditors lose and debtors gain. This leads to a redistribution of wealth which is not predicated on productivity. Incentives are undermined and productivity declines. The inability to anticipate the rate of inflation and thus the interest rate reduces the willingness to lend for a long term. As financial contracts become shorter, risks of financing long term investments increase and accumulation of capital declines. This also leads to a reduction in productivity. And, finally, inflation reduces the wealth of those who hold money. Since money is a productive resource, any decrease in its use decreases potential output of goods and services. The ultimate experience is hyperinflation where people resort to barter and where standard of living declines drastically."

It would appear, therefore, that the formulation of public policy must take account of the fact that any policy that has the effect of increasing the inflation rate will have the effect of increasing unemployment both in the present and in the future. We have addressed the question of the impact of inflation on current unemployment. It remains now to consider the question of the impact of inflation on future unemployment; a question to which Mr. Francis and others have alluded.

c. Inflation and future unemployment; Inflation's effect on investment

In Section III, below, we shall address the question of the efficacy of "flexibility" in fiscal policy; of the desirability, if you will, of having the option to run deliberate (or "active") Federal budget deficits. As it happens, the resolution of this question turns in part on matters to which we now turn; namely, the effect of inflation on investment.

We have already discussed the fact that as inflation proceeds it becomes increasingly difficult for business firms to finance the acquisition of new plant and equipment. That this is so follows from the fact that inflation causes an erosion of firms' cash flows making internal financing more difficult. Moreover, inflation causes interest rates to rise making external financing more expensive.[10] Add to this the fact that inflation makes future revenue and cost streams less secure and that capital equipment becomes more and more expensive and we have a recipe for declining investment. And, as has been emphasized, inflation-induced declines in investment will not be confined only to plant and equipment; to nonhuman capital, if you will. There is reason to believe that employers and employees alike will, because of inflation, have less incentive to invest in human capital.[11]

Now it is considerations such as these that have led Henry Wallich, among others, to suggest that inflation-induced reductions in capital investment may have dire consequences for future employment. To paraphrase Dr. Wallich, investment spending has been decreasing because of inflation, higher interest rates, and the "crowding out" phenomenon attributable to increased Federal government borrowing.[12] Yet this is happening at a time when the labor force is growing at an accelerating rate (pp. 387 and 395–396). Thus, in Dr. Wallich's words (p. 387): ". . . it would not surprise me if our total capital stock were insufficient to employ the labor force. . . ."

It should, of course, not be forgotten that the linchpin in the inflationary process is Federal budget deficits. It is precisely these deficits that contribute directly to inflation and, hence, to a reduction in the rate of capital accumulation; to a reduction, in other words, of the economy's future productive capacity.

It is clear, then, that deficits affect investment indirectly through the accelerated inflation they cause. But there is a more direct route by which Federal deficits act to the detriment of private investment.

The simple truth is that the composition of Federal spending is changing. There is, increasingly, less emphasis on investment related expenditures and more on consumption. The change in the composition of Federal spending is illustrated, at least in the view of another witness, Mr. Kenneth Thygerson, by the increased emphasis on income transfers. In his view, such income transfer (or security) programs:

"* * * stimulate the immediate consumption of basic commodities such as food, clothing and energy. This consumption-demand stimulus, although clearly beneficial to the economy in some periods, does not provide future benefits as in the case of investment oriented Federal expenditures.

"The increased tendency to finance this changing Federal outlay composition through the use of Federal deficits as opposed to taxes, has significant long-run impacts on the capital markets, inflation, interest rates, and capital formation. * * *" (pp. 155–58)

The corollary is that deficit financed consumption expenditures are going to mean a slower rate of capital formation (p. 170), a view that is shared by Professor Meltzer (p. 957):

"A third effect of large deficits is that the mix of goods and services produced by the society is altered. Many government programs encourage consumption and reduce investment. A shift in resources from investment to consumption lowers the capital stock and by lowering the capital stock lowers the growth rate."

So far as it goes, this view is in complete accord with Thygerson's position. Meltzer goes one step further, however. Indeed, his emphasis is on a qualitatively different, though related consideration; namely, that the dollars secured by the Federal government via the sale of Treasury debt are dollars that would have been used for investment purposes in the first place:

". . . the deficit is going to be financed out of private savings and people are going to be holding government bonds used to finance mainly consumption expenditures instead of holding some private securities used to finance the accumulation of capital" (p. 964).

The central idea is that deficits cause inflation. Insofar as they do, they tend indirectly to reduce the rate of capital accumulation. Unfortunately, however, this is not the end of the story because the deficits, by and large, are used to finance current consumption expenditures at the expense of investment. Yet, as Dr. Wallich has emphasized, the labor force is growing at an increasing rate. We have, therefore, the undesirable state of affairs that the labor force may very well grow at a faster rate than our capital stock. Granting this, it follows that deficits—indirectly as a cause of inflation and directly as a vehicle to finance current consumption—are a cause of future as well as present unemployment.

Based upon our understanding of the relationships among deficits, inflation and unemployment, we therefore conclude that: Federal budget deficits are to be avoided because they contribute not to economic expansion but to unemployment. This, then, is the first of this report's two points of departure.

Before proceeding to the development of the second point of departure, it would seem appropriate to take account of two other effects of deficit spending. We shall, in turn, consider the implications of Federal deficit spending for: 1) the role of the Federal government in the economy, and 2) economic concentration.

3. Some Additional Effects of Inflation

a. The increasing role of government in the economy

While the question of what is the "optimal" size of government is ultimately a matter of "taste" or philosophical predilection, one thing can be said without equivocation. Simply stated, it is that one of the effects of Federal deficits is a steady, irresistible encroachment of the public upon the private sector. In Dr. Arthur Burns' words (p. 50):

"This sorry record of deficit financing means, of course, that we as a people have been unwilling to tax ourselves sufficiently to finance the recent sharp increases of government spending. . . .

"One aspect of the sharply rising curve of expenditures is that the government has been assuming an ever larger role in the economic life of our people."

Footnotes at end of article.

The increased role of government is, in other words, partly tautological. That is, because the Federal government gets access through deficits to dollars that it would otherwise not have, it gets control of resources over which it would otherwise not have control. But the fact is that there is another dimension to the question at hand. This "dimension" has come, in recent years, to be referred to as the "crowding out" phenomenon. In Alan Greenspan's view, crowding out might appropriately be viewed in the following way (p. 1,048):

". . . as the government controls an ever increasing proportion of the national output, by definition, less is available in the private sector and one can use that term crowding out to refer to the process in which government increasingly squeezes out private activities and the like."

In effect, Greenspan adopts the tautological view of crowding out. But there is a sense in which the crowding out phenomenon is somewhat more than definitional. What we must not lose sight of is the fact that the Federal government has a comparative advantage over the private sector in securing funds:

"Anytime there are people competing in a market for scarce resources, there will be crowding out. The government, however, has an advantage in competing for scarce funds in that it can pay virtually any price to attract funds. Unlike private borrowers, the government has not been concerned either with the cost of funds or the expected rate of return on use of the funds." (Francis, p. 643)

Mr. Mitchell Kobelinski, former Administrator of the Small Business Administration, puts the comparative advantage of government in relatively stark terms (p. 1,162):

"As we well know, we have a lot of competition for capital in the market and we start, first of all, with the United States Government. With deficit spending, you have the U.S. Treasury having an enormous need for capital. Well, that is the first block and rates top priority. And then comes big business . . . Then comes of course, the state and municipal, the other public bodies which make demands on the financial markets. And then, last of all, comes the small business."

The implication is, of course, that by the time the Federal government and other lenders have gotten their share of the available loanable funds—with the Federal government receiving top priority—there may be nothing left for small businesses. That this is true is patently obvious. The corollary is, however, equally clear: Insofar as the Federal government's borrowing needs displace some small businesses, it has, by definition, increased its role in the economic life of the nation. But the fact is that it is not only small businesses that are effectively displaced by Federal borrowing; big business is affected as well, though in a somewhat different way:

". . . in the last several years, there has been kind of a two-tier lending market, prime lenders that get the dough and there is everybody else. And what has tended to happen is that one of the everybody else that hasn't been able to get the money . . . has looked for another way to get it. And so Congress has stood ready and said, 'All you mortgage people that get priced out . . . What do we do about it?' We create an agency that has a preferred borrowing position that can compete . . . such as the Government National Mortgage Association . . . And, of course, the consequence is that you have got more and more groups that say we need that preferred borrowing position." (Thygerson, pp. 233–234)

It would appear, therefore, that the Federal deficits have the effect of increasing the role of government in the economy for at least two reasons: 1) Federal debt displaces some private debt, and 2) those enterprises that are unable to compete successfully in the market for loanable funds sometimes ask for and get preferred borrowing status. In the first instance, some private investment that would otherwise have been undertaken is not undertaken; private investment is, in this event, frequently displaced by government debt floated for the purpose of financing current consumption expenditures. In the second case, the government's role is enhanced at the invitation of private enterprise; at the invitation of businesses unable to compete with the Federal government in the money and capital markets. In any case, the point is that the Federal government deficits, in addition to being inflationary, have ancillary effects. Notable among these is a tendency to increase the role of government in society. Whether this is "good" or "bad" is not at issue here. What is significant and relevant, at least for present purposes, is the purely objective fact that deficits tend to increase the government's share in national output at the expense of the private sector.

The increased role of government attributable to deficit spending is evident in still another way. Simply stated, deficit spending accelerates the growth of public relative to private employment. And, to paraphrase Professor Meltzer, public employment is less productive than private employment. It follows that deficits reduce productivity in the economy as a whole since society uses its resources less efficiently and output grows more slowly (p. 957). Thus, while spending is rising because of the Federal deficit, the rate of growth of output is reduced. The corollary of this is likely to be an acceleration of the inflation rate.

In a sense, then, we have come full circle. The purpose of this section was to show that deficit-induced inflation has an ancillary effect; namely, that of expanding the role of government at the expense of the private sector. We have, however, concluded the section by showing that deficits, in the process of enhancing the government's share in national output and employment, cause still more inflation.

b. Deficits, inflation, and economic concentration

We have already emphasized the "crowding out" effect of Federal deficits. What has not been emphasized is the effect on the "survivors"; that is, the effect on these firms that manage somehow to cope with the effects of deficit-induced inflation. Henry Kaufman puts it this way (p. 1,284):

". . . no matter how you 'crowd out', crowding out means that you hurt the marginal and you strengthen the powerful . . ."

The process by which marginal firms are hurt and powerful firms strengthened is outlined by Mr. James Pierce, Chief Economic Consultant to the House Banking, Currency and Housing Committee (p. 1,295):

"In 1974 (because of inflation), the less than prime firms ran into a great deal of difficulty. With large nominal financing needs, they had to borrow, extremely high interest rates or not . . . I think the key (to this problem) . . . is a decline in the inflation rate."

Implicit in all of this is the point at issue; namely, that deficit-induced inflation causes a deterioration of financial positions. In particular, inflation has the effect of increasing debt-equity ratios to a point at which mergers become increasingly attractive. As Henry Kaufman puts it, ". . . another high wave of inflation would, I think, produce another high wave of economic concentration" (p. 1,295).

Once again, a value judgement is not implicit. Presumably, some may regard increased economic concentration as "good", others may regard it as "bad". Whatever one's point of view, however, the fact remains that deficit-induced inflation tends to produce waves of economic concentration.

We conclude this section with an amended statement of the first general proposition—or point of departure—to emerge from this paper. The original statement was as follows: Federal budget deficits are to be avoided because they contribute not to economic expansion but to unemployment. We now know, however, that deficits have additional ancillary effects; namely, that of increasing the role of the Federal government in economic life, and of increasing economic concentration. The first general proposition or point of departure is therefore amended to read: Insofar as one regards unemployment, an increased role of government in economic life, and increased economic concentration as "bad", deficits cannot be justified.

B. Political incentives and the bias towards deficits

The case for a prohibition against Federal deficits can be developed further. All that is required is that explicit account be taken of what some might characterize as "political realities." We would prefer to say that account must be taken of the incentive structure that prevails within Congress; an incentive structure that, in effect, results in a bias towards deficits. It is this idea, an idea that will be developed below, that forms the core of the second point of departure upon which this paper is based. The proposition can be stated as follows: The incentive structure that prevails in the Congress provides a bias towards deficits, a bias to provide short-term benefits without regard to the long-term costs.

Congressman Ichord puts the central issue squarely in focus (p. 15): "We (the Congress) just can't resist the spending demands of our constituents." It is a rudimentary fact of life that Congress is under pressure to provide benefits regardless of their long-term costs. It follows that:

". . . to leave complete flexibility (in the matter of Federal budgets) opens up strong biases . . . toward very large deficits and adds to the tendency to create short-term benefits which eventually lead to very major problems down the road" (Greenspan, p. 1,036).

Even those outside government perceive the pressures. The following question was put to Geoffrey Moore of the National Bureau of Economic Research: "Are you saying that as soon as the move toward a surplus appears, the public requests more governmental services generally, and therefore more spending so that we never catch up?" His answer: "I guess that has been the trend, yes sir" (p. 299).

The net result of all of this is that there is an evident, growing need for a change either in the incentive structure and/or in the system of constraints that impinge on the behavior of Congress. Insofar as a modification of the incentive structure may carry with it a deterioration of the relationship of the Congress with its constituents, a change in the incentive structure may be both impractical and undesirable. On the other hand, a change in the system of constraints is relatively straightforward, manageable, and we submit, desirable.

William Niskanen, chief economist at Ford Motor Company, and no stranger to Washington, gives us an additional perspective (p. 1,573):

"Any effective change in the Federal budget process must involve a change in the incentives and constraints of Federal officials. As a rule, Congress receives much more data than it can use. Additional data will increase the quality of budget decisions only if it reduces the costs or increases the rewards to individual members of Congress. At present, unfortunately, the costs of effective budget review are borne by individual members of Congress but the rewards are shared by all members and, as a consequence, 'fiscal stewardship' is undersupplied."

The message is clear: not only does the incentive structure provide a bias toward ever larger spending, the benefits and costs associated with systematic, careful review of individual budget items are such that there is little incentive for individual members of the Congress to bear the cost of policing the budget. In such an environment, it would appear that a change in the system of constraints is not only efficacious, it is long overdue. It is this idea that leads James Buchanan to say that (p. 1,512):

"My thesis can be simply stated: The acceptance of Keynesian economics, with its policy thrust in support of budgetary management to control the national economy, necessarily introduces a deficit-creation bias in democratic fiscal choice. To offset this bias, it is necessary to introduce an explicit constitutional constraint on departures from budget balance."

Based upon our understanding of the effects of deficits upon inflation, unemployment, the role of government and economic concentration, and given the prevailing incentive structure in the Congress, we conclude that a constitutional amendment prohibiting such deficits is in the interest of all parties concerned. Such a prohibition will contribute to price stability, to increased consumption and investment spending by the private sector, to increased employment—again by the private sector—and hence to higher tax revenues in the future. These higher tax revenues will come about not because tax rates will have been increased. Rather, they will come about because the economy will grow more rapidly. At the same time that revenues are rising, expenditures on income transfers for unemployment compensation and so forth will be falling. This, in turn, will mean that balancing the budget will become relatively easier. A happier confluence of events is difficult to imagine.

III. ON THE NEED FOR FISCAL "FLEXIBILITY"

A. Fiscal flexibility and the proposed constitutional amendment

It is perhaps a curious anomaly that while no one of the witnesses suggested that a move toward the elimination of Federal deficits is undesirable, many are reluctant to endorse the idea of a constitutionally mandated balanced budget. It is fair to say, however, that the opposition to the proposed constitutional amendment springs, in each instance, from a desire to maintain what might be broadly characterized as "fiscal flexibility"; from a desire, in other words, to retain the option to run both passive and active budget deficits.[13]

Consider, for example, the view expressed by Henry Wallich. He is broadly in favor:

". . . of a technically viable way of limiting deficits that would not create such a degree of inflexibility as to tie our hands in a situation where they should not be tied. . . . " (p. 411)

The implication, in other words, is that some sort of restriction is appropriate, but that the restriction should not be "too rigid". Mr. Charles Bowsher is broadly in agreement with the spirit of Wallich's comment. While he supports the idea of a balanced budget "over the long-run", he does not believe that:

". . . we should establish too rigid a structure by law or constitutional amendment which would not allow the President and the Congress to successfully cope with the economy in difficult times such as major recessions, war, and so forth." (p. 1,323)

A careful examination of the testimony reveals that there is general agreement that there is a pressing need for some sort of imposed budgetary discipline, but that the discipline should not be so rigid as to "tie the hands" of the fiscal authorities.[14]

In view of the evident reluctance of many interested parties to impose "too much" fiscal discipline, it would seem appropriate to examine the question of the efficacy of a "flexible" fiscal policy. With this in mind, careful examination of the evidence will show that, in fact, fiscal flexibility is a "straw man" and that the current and potential costs of a "flexible" fiscal policy far exceed any potential benefits.

Before proceeding any further, it is worth recalling what has already been established; namely that: (1) Federal deficits are not, in fact, stimulative; that they result in more rather than less unemployment, and (2) that the prevailing incentive structure is such that there exists a virtually inexorable tendency toward ever larger budgetary deficits.

With all of this as background, let us proceed to an examination of the question at hand; namely, the efficacy of fiscal "flexibility".

B. Why fiscal flexibility is a "Straw Man"

It is safe to say that those who are in favor of the retention of the maximum feasible amout of fiscal flexibility base their argument upon the presumption that budget deficits are, in some sense, "stimulative". Of course, it has already been shown that this is fallacious; that, in other words, the real effect of deficits is to generate accelerating inflation and that this, in turn, results in more rather than less unemployment. Presumably, however, there are those who, for whatever reason, will be reluctant to accept this general proposition. For this reason, it would seem appropriate to consider some additional problems associated with "fiscal flexibility" that we have heretofore not made explicit:

1. Fiscal Policy as a Tool of Economic Stabilization

There is a growing perception that fiscal policy is not "what it's cracked up to be". Characteristically, Arthur Burns says it best (p. 89):

"We can adjust monetary policy not only by the month but, quite literally, by the hour. But fiscal policy is a clumsy, awkward instrument." [15]

Indeed, Dr. Burns' view is that the net effect of fiscal policy has, in recent years, been negative. In response to the question, "Might it be fair to say that in your opinion over the last sixteen years, at least, we would have been better off to have balanced budgets consecutively rather than what we have been doing?", his answer was, "It would seem to follow logically, yes. * * *" (p. 135) Darryl Francis of the St Louis Federal Reserve Bank puts it slightly differently (p. 635):

"I think the history of our recent past proves that these tools we call fiscal policy and monetary policy are not geared to fine tuning. I think, on the contrary, they have proven themselves beautifully geared to adding to the magnitude of the business cycle."

It would be misleading, however, to impute the growing perception of the inadequacy of discretionary fiscal policy only to professional economists. Indeed, members of Congress have reservations about the ability of fiscal policy and those that "manage" it to "fine tune" the economy. In the words of Congressman Brock Adams, as Chairman of the House Budget Committee, "Economics cannot define the precise amount of deficit spending which will produce a credit crunch or inflation."

At one level, therefore, it is clear that the perception is growing that we simply do not possess the requisite knowledge to administer discretionary fiscal policy in a manner consistent with the presumed objectives of what has come to be called "stabilization policy". The problem is more pronounced than this, however. The fact is that "passive" fiscal policy has asymmetric effects. In Geoffrey Moore's view (p. 269):

". . . relative to the changes in real GNP there are substantial increases in the deficit during recessions and the increases have been very much larger than the declines in the deficit during expansion "

The corollary is that (p. 269):

". . . the deficit has not acted as a stabilizer during expansions in the business cycle with nearly the same power that it has acted as a stabilizer during recessions, and this may have had its effect on the general price level in inducing increases in the price level during these expansion periods. . . ."

It follows, *pari passu*, that (p. 272):

". . . we really can't depend on automatic stabilizers in the deficit during expansion to have any appreciable effect in stabilizing prices. They simply have not in the past operated in a powerful enough way to do that."

The conclusions to be drawn from all of this are: 1) We do not know enough to conduct active or discretionary fiscal policy in anything like an "optimal" manner; given the intrinsic "awkwardness" of the fiscal instruments, and given the state of the economists' art, fine tuning is a panacea. 2) The so-called automatic stabilizers of "passive" fiscal policy have asymmetric effects. They simply cannot be relied upon to bring about the one thing that we have shown to be a *sine qua non* for full employment; namely, price stability.

On these grounds alone, it would appear that the case for flexible fiscal policy is not very compelling. There are, however, other considerations that have basic relevance to the question of the efficacy of budgetary flexibility. One of the most important of these is the relationship of fiscal policy to monetary expansion.

2. Fiscal policy and monetary expansion

It is well known that the intellectual fountain head of fiscal activism was John Maynard Keynes. It is, generally speaking, his disciples that have been most vocal in support of the notion that an activist fiscal policy is a *sine qua non* for economic stability. More particularly, it is part of the Keynesian or, more properly, the neo-Keynesian tradition that Federal deficits are, in some sense, stimulative. The presumption is, therefore, that deficit spending can and does have some impact on the level of real economic activity; on, in other words, output and employment.

It is the purpose of this section to look critically at this idea; to determine, if you will, whether this is, in fact, the case.

The question at issue is simply this: Does a deficit have the capability, in and of itself, to expand output and employment, or does it impact solely upon the price level?

It is hard to conceive of a better place to begin our inquiry than with the work of Keynes himself. On page 119 of his General Theory of Employment, Interest and Money, Keynes proffers this insight into the workings of deficit spending:

"The method of financing the (deficit) . . .

Footnotes at end of article.

may have the effect of increasing the rate of interest and so retarding investment in other directions, unless the monetary authority takes steps to the contrary. . . ."

What we have here is an admonition from the father of fiscal activism that deficits will not always have a stimulative effect; that, inded, unless monetary policy is accommodative, deficits may, among other things, so increase the rate of interest that investment spending may decline. Were this to happen, a deficit would not be automatically stimulative with respect to output and employment. Indeed, it is entirely conceivable that any increment to consumption spending caused by the deficit may be more than counterbalanced by a decrease in investment spending, so that the net effect of the deficit would be to decrease rather than increase output and employment.

Of course, this point has not been lost on the economics profession. Consider for example, the views of Professor Paul McCracken, former Chairman of the President's Council of Economic Advisors (pp. 1,565–1,566):

"There is growing skepticism regarding the conventional wisdom about fiscal policy, the deliberate use of the budget to stabilize the economy. For one thing an increment of spending or of tax reduction does not automatically have a net expansive effect on the economy. The added deficit has to be financed, and this added Treasury borrowing will simply leave less financing available for private borrowers unless monetary policy is thereby altered. Moreover, there is a growing feeling that the conventional wisdom of fiscal policy has had a bias toward more rapidly rising outlays."

In effect, McCracken has gone two steps further than Keynes: He has recognized the possibility already discussed; namely, that Federal deficits may effectively crowd out private borrowers. He has, moreover, corroborated another position adopted above; namely, that there is within the Congress a bias toward deficits, a bias toward ever-increasing Federal expenditures.

Once again, it is important to recognize that Keynes and McCracken are not alone in their reservations about the stimulative effects of Federal deficits. Professor Meltzer has this to say (p. 978):

"The reason the problem (of evaluating the effects of deficits) is complicated is that . . . we have two opposing forces. One raising saving, and one reducing investment at the level of income we reach. My evaluation of the combined effect is that there is a small negative effect per dollar of debt on investment as a result of crowding out. Therefore, we grow more slowly in the future than we would have grown if we didn't have that large deficit."

The implication is clear: Unless the monetary authorities accommodate the deficit by accelerating the rate of growth of the money supply—a policy that has historically been inflationary—the net effect of a budget deficit will be negative; it will not, in fact, "stimulate" the economy, it will reduce the rate of growth of the economy and will, *pari passu*, cause more rather than less unemployment.

Arthur Burns and Darryl Francis have similar circumspect views relative to the stimulative effects of deficits. In Francis' view (p. 609):

"Historically, government deficit spending has had no stimulative effects except insofar as it was accommodated by monetary expansion. Thus the stimulation desired could have been accomplished directly through monetary expansion without the government encroachment into the private sector that is inherent in fiscal policy."

Arthur Burns puts it slightly differently (p. 49):

"Recent experience in both our own and other industrial countries suggests that once inflation has become ingrained in the thinking of a nation's businessmen and consumers, highly expansionist monetary and fiscal policies do not have their intended effect. In particular, instead of fostering larger consumer spending, they may intensify inflationary expectations and lead to larger precautionary savings and sluggish consumer buying."

Two points of basic relevance have been raised. First, Darryl Francis alludes to an idea already emphasized; namely, that deficits have the ancillary effect of increasing the role of government in the economy. Two, Dr. Burns corroborates what we have suggested above; in particular, that deficits may cause consumption spending to decrease. In other words, to the point made by Keynes, McCracken and others—that deficits may cause investment spending to decrease—we must now add another consideration. We must recognize that deficit may cause consumer spending to decrease as well.

Having said all of this, one must conclude that deficits are not likely to be stimulative. We have already shown that deficits are inflationary, and that inflation causes unemployment. To this we must now add that deficits are likely to reduce not only investment spending, but consumption spending as well. On this basis, we conclude that the argument for "flexible fiscal policy" in the interest of conducting "stabilization policy" is a straw man. In point of fact, retention of the option to run discretionary deficits is simply retention of the option to systematically cause the unemployment rate to rise.

Finally, it is essential to end this section by taking note of an effect of Federal deficits which has heretofore been ignored. It is a fact that the composition of the Federa debt is changing. The Treasury, for a variety of reasons, is relying more heavily on short-term financing. It is also a fact that the shorter the term to maturity of a debt instrument, the higher its "liquidity"; in effect, the closer it is to money. It is this combination of facts that, presumably, led Dr. Burns to observe that (p. 96):

"If you have a 90-day Treasury bill, the face value will change, but it will change very little. Therefore, it is the virtual equivalent of currency. So our effective money supply really is a great deal larger than we realize, and we have here a source of potential spending power that could prove to be very disturbing to the economy."

There is no ambiguity here. Implicit in Dr. Burns' statement is the admonition that a Federal deficit, insofar as it is financed with relatively short-term securities, is potentially vastly more inflationary than has generally been realized.[16] Once again, we seem to have come full circle. Federal deficits are intrinsically inflationary. It is in this sense that they are intrinsically bad for the economy. There can be no doubt that deficits cause more rather than less unemployment.

Based upon what has been said, there is no compelling logic for the retention of "flexible fiscal policy". As it happens, however, a great deal more can be said about the difficulties associated with discretionary fiscal policy. Among these is the problem of "lags"; lags both in implementation and in effect.

3. Some thoughts on fiscal lags

It is tautological that if discretionary fiscal policy is to be an effective tool of stabilization policy, it must have the characteristics of relative ease and rapidity in implementation, and its effects must be felt at the appropriate time. Unfortunately, fiscal policy fails on both counts. In the words of former Treasury Secretary Simon (p. 854):

" . . . the fine-tuning efforts (associated with the Federal budget) of the past have proven to be generally counter-productive. In specific terms, the lagged impact of such anti-cyclical initiatives has resulted in unfortunate distortions which have contributed to exaggerated economic booms and recessions."

It is clear, in other words, that the *effects* of fiscal "initiatives" have not always been felt at the appropriate time. Carla Hills, former Secretary of Housing and Urban Development, has a different perspective; she focuses on the lags in the implementation of discretionary fiscal policy (pp. 593–594):

"The case for 'activist' policies—that is, new legislative tax and expenditure initiatives—is less clear. In the past, the time lag between political initiatives and implementation has raised serious questions about the timing and effectiveness of such programs on aggregate income . . ."

It would seem, then, that an objective assessment of the "flexibility" of discretionary fiscal policy would read something like this:

". . . it has not been a flexible tool of stabilization policy. It has lagged very often on the restraining side and even occasionally when stimulation was required. Very rarely have Treasury revenues been adjusted quickly enough and most Federal expenditures are often heavily embedded." (Kaufman, p. 1,225)

The following conclusions emerge from all of this: 1) Retention of the option to conduct discretionary fiscal policy in the interest of "flexibility" is equivalent to retention of the option to create unemployment. 2) Fiscal policy is not, in fact, flexible; it is inflexible both in implementation and in effect.

We conclude, therefore, that there is a sense in which the proponents of fiscal flexibility have raised a straw man issue; they want flexibility when they do not and cannot have it. And, finally, there is a sense in which the proponents of fiscal flexibility are simply misleading themselves: they retain a belief in the stabilizing potential of fiscal policy when both *a priori* logic and the empirical record simply do not support their faith.

Once again, we must conclude that there is no compelling logic in favor of the retention of fiscal "flexibility". Insofar as we do not have flexibility in the first place, and given that deficits have been shown to be destabilizing rather than stabilizing, we have nothing to lose and everything to gain by mandating budgetary balance.

IV. THE TRANSITION TO A BALANCED BUDGET AND THE STATUS OF THE NATIONAL DEBT

A. The transition period

Once it has been demonstrated that constitutionally mandated balanced budgets "make sense", the next question emerges: just how long should the transition period be? That is, how much time should elapse from the time at which the mandate becomes effective and the first balanced budget?

On balance, this is clearly a less important question than is the substantive issue of whether or not budgets should be balanced. Nevertheless, it is an eminently practical question. It is, moreover, a question for which we have some answers. In response to the question, ". . . if it were decided to end the Federal deficits, what would be a responsible transition period for returning to balanced budgets?" Dr. Burns answered: "I would hate to see us take more than two years to get there" (p. 116). In response to the same question, Geoffrey Moore of the National Bureau of Economic Research said this (p. 299): "I don't have any very firm

Footnotes at end of article.

conviction about that. I would imagine the period should be measured in years, two or three years, rather than anything very much shorter than that."

It would appear, then, that a two to three year passage to a balanced budget may be feasible. On the other hand, there is something to be said for prudence in all things. We therefore recommend that the passage to a balanced budget be effected in no more than three years after ratification of such constitutional amendment.

B. The status of the national debt

Consideration of the efficacy of a constitutional mandate to balance the Federal budget cannot be considered *in vacuo*. That is to say that some attention must focus on the question of the management of the outstanding public debt. It is to this question that we now turn.

It is safe to say that there is considerable support for the idea of "paying off" the national debt. Mr. James Needham's comments are perhaps illustrative of this feeling (p. 501): "What concerns me . . . is the amount of the outstanding Federal debt. I think it should be subjected to some type of retirement program."

It is possible, of course, to have considerable sympathy for the spirit in which such comments are made. It should be recognized, however, that certain very practical constraints are operative. In the first place, it is clear that "tailoring" a retirement program is, in the abstract, a very complicated problem. Beyond this, there is a real question as to whether it would be desirable to set out deliberately and systematically to "pay off" the Federal debt. To see this, consider the following:

It has been emphasized above that whereas fiscal policy is a cumbersome tool of stabilization policy—indeed, we have shown that it is not only cumbersome, it is destabilizing—monetary policy is, at minimum, very flexible. Yet one of the keys to its flexibility is open market operations. These open market operations involve the purchase and sale of Treasury debt by the Federal Reserve. In particular, open market operations provide a critical interface between the Federal Reserve and the nation's commercial banks. In conducting open market operations, the Federal Reserve either sells Treasury debt to its member banks or it buys debt from them. In the first instance, the result is a reduction in member banks' excess reserves. This reduction in reserves means that member banks have less Federal Reserve money with which to make loans. This, in turn, means that fewer demand deposits can be created and this, in turn, means that the rate of growth of the money supply may fall or, indeed, the money supply may actually decrease. On the other hand, Federal Reserve purchases of Treasury debt from its member banks have the opposite effect: Member banks find themselves in possession of fewer secondary reserves (that is, they hold less Treasury debt), but that their primary reserves (Federal Reserve money) have increased. The banks therefore have the wherewithal to make additional loans. Insofar as they do make additional loans, demand deposits grow and this, in turn, means that the money supply will increase.

With all of this as background, it is clear that open market operations are a critical tool of monetary policy; they are, in fact, the chief means by which the Federal Reserve affects changes in the money supply. Yet it is also clear that open market operations are conducted via the purchase and sale of Treasury debt—the purchase and sale of some portion of the national debt. And, finally, it is clear that with population, employment and incomes growing in the future, the money supply must also grow.

All of these considerations lead us to suggest the following: Rather than setting out deliberately and systematically to "pay off" the national debt with, for example, tax receipts, simply allow the Federal Reserve to monetize the outstanding debt. Debt monetization—that is, the purchase of outstanding debt by the Federal Reserve—will occur automatically as the Federal Reserve conducts open market purchases. These open market purchases, in turn, would be predicated on the need to increase the money supply so as to accommodate economic growth.

The singular advantage of this approach is that it is a simple, direct route to the ultimate "retirement" of the debt at some time in the future, without imposing the burden of debt retirement on the taxpayer. It is, moreover, a means by which the growth of currency demand predicated on stable economic growth can be accommodated.

We conclude that, insofar as some opposition to the idea of a constitutionally mandated Federal budget is predicated on the notion that the status of the national debt presents an insoluble problem, opposition is ill-founded. We can, in fact, have the best of both worlds: a responsible fiscal policy, and a debt monetization policy that will have the effect of "retiring" the national debt without directly burdening the taxpayer while at the same time accommodating economic growth.

V. FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS

A. Findings

1. Deficits cause inflation; the severity of the inflation varies directly with the degree to which the Treasury's debt is monetized by the Federal Reserve's open market operations.

2. There is no trade-off—either in the short-run or in the long-run—between inflation and unemployment. In point of fact, inflation causes unemployment. Inflation causes unemployment because it erodes real profits and, by increasing unrealizable inventory "profits", increasing tax liabilities. Profits are eroded because as real incomes decrease, product demand decreases. This occurs at the same time as costs of production increase. Costs of production increase because labor and materials and other input prices rise, and because employees have less incentive to be productive. Moreover, because of inflation's effect on risk evaluations, debt-equity ratios, anticipated tax liabilities, and incentives generally, both employers and employees have less incentive to invest. Add to this the fact that internal financing of investment is more difficult because of inflation-induced erosion of cash-flows, and that external financing is more expensive and harder to secure and we see that, because of inflation, investment in both human and non-human capital decreases. Given that the labor force is growing at an accelerating rate this raises the prospect that the capital stock will, in the future, be unable to accommodate all those seeking employment. In summary, we find that inflation causes both present and future unemployment to increase.

3. From 1., we know that deficits cause inflation. From 2., we know that inflation causes unemployment. We therefore conclude that deficits cause unemployment.

4. We find, in addition, that deficits have other, ancillary effects:

a. Deficits increase the role of government in the private sector via a displacement of private investment, and an increased tendency to rationalize government intervention in the money and capital markets; intervention that frequently involves granting preferential borrowing status to special interests.

b. Deficits, via their effect on profits and on debt-equity ratios, make internal financing more difficult. Moreover, external financing is made more difficult via the crowding out phenomenon; a phenomenon that means that credit is available only to the "best" credit risks. All of this increases the tendency toward economic concentration; toward, among other things, waves of corporate mergers.

5. The prevailing incentive structure is such that Congress is inclined to provide short-term benefits without taking explicit account of the long-term costs. There exists, in other words, a bias toward ever-larger deficits. Moreover, while the costs of effective budget review are borne by individual members of Congress, the rewards are shared. We therefore find that there is an historical and continuing shortage of "fiscal stewardship" in the Congress.

6. We find that while it would be difficult and even undesirable to attempt to modify the prevailing Congressional incentive structure it would be relatively easy to modify the system of constraints. We find, in other words, that the effects of the bias toward deficits can be minimized if deficits are in general constitutionally prohibited.

7. We find that there is no compelling case for so-called "fiscal flexibility". We find, in particular, that: 1) Discretionary fiscal policy is not flexible; that it is subject to lags both in implementation and in effect; 2) We find that the effects of discretionary fiscal policy are, in fact, destabilizing; that expansionary fiscal policies have the effect of increasing rather than reducing the unemployment rate.

We find, in summary, that the retention of "fiscal flexibility"—of the existing option to run discretionary Federal deficits—is really retention of the option to cause more unemployment than would otherwise have obtained.

8. We find that the transition to a constitutionally mandated balanced budget could be affected in three years, after ratification of such constitutional amendment.

9. We find that the outstanding national debt performs an important role in monetary policy. We find, moreover, that taxpayers need not be burdened by a systematic, deliberate effort to "pay off" the national debt. Rather, the national debt may be reduced over time by the Federal Reserve in the course of its normal operations. Purchase of outstanding Treasury debt by the Federal Reserve would, in this event, have the effect both of reducing the debt and of accommodating the increasing demand for currency as economic growth proceeds.

B. Conclusions

1. Discretionary deficits should be generally eliminated.

2. The most efficient way to accomplish this is to provide for a constitutional prohibition against discretionary deficits. Exceptions to this rule would be when war is declared by Congress, or when two thirds of those voting in both Houses of Congress specifically enact into law such deficits.

C. Recommendations

1. A constitutional amendment should be proffered which contemplates the following provisions:

a. That the Federal budget be balanced except under conditions deemed by two-thirds of those voting in both Houses of the Congress to justify expenditures in excess of tax receipts, and that an exception to the requirement for a balanced budget be made in time of war (declared by Congress).

b. That, in the event that passive or involuntary deficits develop, Congress must, con-

sistent with the general welfare of the people, incorporate such deficits into the next fiscal year's budget as an expenditure, and that if the carryover deficit exceeds two percent of the budget, Congress should be prohibited from voting on the next fiscal year's budget until it has provided for taxes to finance the carryover deficit.

c. That the outstanding debt, including any debt incurred as deficits resulting from wars declared by Congress, be reduced via the conduct of Federal Reserve monetary policy. While Federal Reserve purchases and sales of Treasury debt are contemplated, it is presumed that net additions to the supply of Federal Reserve currency will have to occur if economic growth is to be accommodated. These net additions to the supply of Federal Reserve currency could be used to purchase outstanding Treasury debt. The debt will, in this way, provide a vehicle for the accommodation of economic growth by the Federal Reserve, and the taxpayer will not bear the direct burden of "paying off" the debt.

FOOTNOTES

[1] Crowding out will be further discussed below.

[2] Once again, the last portion of the statement refers to the "crowding out" issue; a matter whose discussion is momentarily deferred.

[3] Real income, of course, is nominal or money income adjusted for changes in the prices of goods and services. Real disposable income is after tax nominal income adjusted for price changes.

[4] Of course, some business firms seek ways to reduce their tax liabilities in the face of inflation, but these efforts are not conducted without cost. Accountants and other tax advisors cost money, and these costs, by definition constitute increases in the costs of production.

[5] And, it should be noted that this occurs at the same time as internal financing becomes more difficult because of the erosion of revenues and the increases in costs caused by inflation. To put the matter differently, internal financing out of retained earnings becomes increasingly difficult during inflation because of inflation's effect on cashflow. We shall return to this point below.

[6] Actually, there is an additional reason why, during inflation, business firms are reluctant to replace their incumbent equipment. In other words, to the fact that the acquisition price of new equipment goes up during inflation must be added the fact that future revenues are less secure. In the view of many firms, therefore, investment in more productive capital equipment—and, for that matter, investment in human capital—becomes riskier during inflation. And the increased risk, more often than not, is sufficient to cause a business firm to defer investment in new equipment or in human capital. Inflation has the effect in these instances of providing business firms with an incentive to rely on increasingly less productive incumbent equipment. (Note: "Human capital" is nothing more or less than the stock of knowledge and skills possessed by a given individual or group of individuals. To the extent that business firms train employees or send them to school, they are investing in human capital.)

[7] Human income is the income generated by the rental of human services. It is to be distinguished from non-human income, or income generated by stocks, bonds, and the like. The simple truth is that the former is taxed relatively more heavily in our society than is the latter. Owners of human capital simply do not have access to the tax shelters available to owners of non-human capital.

[8] This proposition can be rigorously demonstrated, both for those firms that seek to maximize profits at a moment in time, and for those firms that seek to maximize profits over time. In any case, this is hardly the place for rigorous demonstrations. *A priori* logic and a little "horse sense" should, we think, serve to demonstrate the plausibility of the idea that an erosion of cash flows will have the effect of increasing unemployment.

[9] Dr. Arthur Burns, former Chairman of the Board of Governors of the Federal Reserve System, stated this position in unambiguous terms (p. 66):

"For a time our economy and those of other industrial countries seemed to work in a fashion to suggest that there was (a tradeoff between inflation and unemployment). But to whatever extent that may have been true in the past, it is no longer true in our own time. The tradeoff has vanished."

[10] It is generally agreed that inflation must ultimately push interest rates up. Professor James Duesenberry testified that (p. 333):

"Inflation has certainly led to interest rate problems. . . . I think that the very marked rise in interest rates which we began in the middle '60s has ultimately to be attributed to the inflation."

[11] Once again, there is general agreement that inflation is bad for investment. Indeed, Professor Duesenberry testified that inflation has disrupted investment patterns. Inflation has, in his view (p. 332) ". . . some very complicated, but on the whole, not very healthy effects on the structure of corporate balance sheets. It has caused some very severe problems in the relation of taxable profits and the whole reporting of profits. . . . All of this contributes to the present low level of capital formation. . . ."

[12] Simply stated, crowding out refers to the fact that at any cross-section of time there is only a finite supply of loanable funds. To the extent that the Federal government taps this pool of savings, someone else—notably, private enterprise—will not be able to secure some financing that otherwise would have been available.

[13] It should be pointed out that nothing in the proposed amendment contemplates a prohibition against "passive" Federal deficits. It is recognized that under certain conditions, tax revenues may not increase as fast as expenditures and that, therefore, an involuntary deficit will emerge. What the amendment does contemplate is a constitutional mandate to "pay off" such passive or involuntary deficits within a fixed time period.

As for "active" budget deficits—that is, deficits deliberately contrived to achieve some well-defined employment or other objective—the proposed amendment would require simply that the Congress state its purposes explicitly, and that two-thirds of its membership agree that prevailing conditions justify the implementation of a deliberate budgetary deficit. Once again, however, such "active" deficits would have to be "paid off" within a fixed time period.

[14] See, for example, Lyn (p. 1,547); Rivlin (p. 1,417); Adams (p. 1,497); Pierce and Kaufman (p. 1,303); Reuss (pp. 1,083 and 1,136); Richardson (p. 939); Simon (p. 774); Francis (p. 624); Taub (p. 523); and Carla Hills (pp. 544 and 593).

[15] Darryl Francis of the St. Louis Federal Reserve Bank agrees that monetary policy is, in fact, both flexible and manageable. In his view (p. 607):

"Despite many arguments to the contrary, it is clear that central banks can control the money supply within a very narrow range over a time period of a quarter or more."

[16] Actually, Dr. Burns is not alone in recognizing the inflationary potential of an increasingly liquid stock of Treasury debt. Former Secretary Simon observes that (p. 769):

"The deficits contribute to inflation . . . by bringing about a large increase in liquid asset holdings of the public. . . ."●

GENERAL LEAVE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and include extraneous matter on the subject of the Levitas amendment to House Concurrent Resolution 683, the second concurrent resolution on the budget, considered earlier today.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

CONFERENCE REPORT ON H.R. 13468

Mr. NATCHER submitted the following conference report and statement on the bill (H.R. 13468) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes.

CONFERENCE REPORT (H. REPT. NO. 95-1500)

The committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13468) "making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 10, 26, and 27.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 8, 9, 12, 14, 15, 16, 17, 22, 23, and 24, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$93,765,300"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert: "37,161"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 4, 5, 6, 11, 13, 18, 19, 20, 21, 25, 29, 30, 31, 32, and 33.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13468) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE II—DISTRICT OF COLUMBIA

Federal payment to the District of Columbia

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $235,000,000 instead of $264,000,000 as proposed by the House and $238,000,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $9,900,000 for the Federal share of the RFK Stadium bonds due on December 1, 1979.

General operating expenses

Amendment No. 3: Appropriates $93,765,300 instead of $93,718,500 as proposed by the House and $95,133,100 as proposed by the Senate.

Office of the Mayor.—The conference action provides $1,035,700 as proposed by the Senate instead of $1,040,700 as proposed by the House, reflecting a decrease of $5,000 for special police and chauffeur services as proposed by the Senate.

Council of the District of Columbia.—The conference action provides $2,578,300 as proposed by the Senate instead of $2,733,100 as proposed by the House, reflecting a decrease of $109,400 requested to supplement the salary of CETA personnel and a decrease of $45,400 and three positions associated with publication of the D.C. Code.

Office of Budget and Management Systems.—The conference action provides $9,991,900 instead of $9,707,200 as proposed by the House and $10,200,600 as proposed by the Senate, and includes $284,700 for 10 positions in the Resource Management Improvement Division as proposed by the Senate. The conference action deletes $208,700 and 10 positions proposed by the Senate for the Office of Municipal Audits and Inspections.

Municipal Planning Office.—The conference action provides $1,833,300 as proposed by the Senate instead of $1,727,500 as proposed by the House, and retains the Office of Criminal Justice Plans and Analysis Unit as proposed by the Senate.

Unemployment Compensation.—The conference action provides $5,637,600 as proposed by the Senate instead of $5,934,300 as proposed by the House.

Office of Consumer Protection.—The conference action provides $494,800 and 18 positions instead of $462,800 and 16 positions as proposed by the House and $566,600 and 21 positions as proposed by the Senate.

Department of Finance and Revenue.—The conference action provides $11,523,400 instead of $11,471,200 as proposed by the House and $11,778,300 as proposed by the Senate, reflecting denial of the 20 additional positions and related costs proposed by the Senate. The conference action approves the increase of $52,200 proposed by the Senate for within-grade pay increases.

In denying the city's request for 20 additional positions and related expenses for an increased effort in the area of tax administration, the conferees are aware of the city's concern that without these additional positions, $3,000,000 in local revenues could be lost and the financial plan for the city would need to be adjusted. The conferees, however, also note that the Department of Finance and Revenue already has 559 positions, of which 277 are in the area of tax administration. The conferees, therefore, direct the city to obtain greater productivity from the already existing large staff in order that all the anticipated revenues will be collected.

Office of the Corporation Counsel.—The conference action provides $4,026,300 as proposed by the Senate instead of $3,896,300 as proposed by the House, reflecting approval of the Senate's proposal to provide for the city's assumption of an expiring Federal grant for the child abuse prevention and enforcement program.

Department of Licenses, Inspections, and Investigations.—The conference action provides $3,173,200 as proposed by the Senate instead of $2,918,600 as proposed by the House, reflecting the transfer of three independent agencies into the Department as proposed by the Senate instead of creating new agencies as proposed by the House. The agencies transferred into the Department are the Boxing and Wrestling Commission, the Commission on Healing Arts Licensure, and the Educational Institution Licensure Commission.

Public Library.—The conference action provides $8,842,900 as proposed by the House instead of $9,550,300 as proposed by the Senate, reflecting denial of the funds added by the Senate for a computerized book circulation and inventory system.

Office of Youth Advocacy.—The conference action provides $61,000 as proposed by the Senate instead of $243,900 as proposed by the House, abolishing the Office after the first quarter of fiscal year 1979 as proposed by the Senate.

Minimum Wage and Industrial Safety Board.—The conference action provides $760,600 as proposed by the Senate instead of $798,300 as proposed by the House, reflecting the deletion of $37,700 for personal services as proposed by the Senate.

Advisory Neighborhood Commissions.—The conference action provides $625,000 instead of $500,000 as proposed by the House and $750,000 as proposed by the Senate. The conferees are agreed that total obligations for the Advisory Neighborhood Commissions for the fiscal year 1979 shall not exceed $625,000 from all sources of funds, including unobligated balances carried over from previous fiscal years.

Commission on the Arts and Humanities.—The conference action provides $159,100 as proposed by the Senate instead of $59,100 as proposed by the House and includes $100,000 in program grants as proposed by the Senate.

Board of Appeals and Review.—The conference action provides $207,500 as proposed by the Senate instead of $93,200 as proposed by the House, and reflects the transfer in of the Board of Equalization and Review as proposed by the Senate instead of creating a new agency as proposed by the House.

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $2,719,400 for fiscal year 1978 and providing language authorizing payments pursuant to the Water and Sewer Repair Compensation Act of 1976 (D.C. Law 1-98).

The conference action provides (1) $175,000 for cleanup of the Municipal Center as a result of the tear gas explosion, (2) $727,900 for additional leasing costs, (3) $424,100 for increased costs of steam and electricity due to rate increases, (4) $1,129,400 for operation of the new court building which was opened earlier than expected, (5) $150,000 for reimbursement to property owners, as required by D.C. Law 1-98, for expenses incurred at the direction of the District of Columbia government for the repair of water and sewer pipes, and (6) $113,000 for the increased cost of steam at the Public Library.

Public safety

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $265,190,200 instead of $266,473,800 as proposed by the House and $265,961,200 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action reflects (1) an increase of two positions and $35,000 for the Superior Court for the legal assistance project to prosecute child abuse cases as proposed by the Senate, (2) the transfer of 77 positions and $1,140,000 from the Superior Court to the Department of Transportation to implement the new parking enforcement and traffic adjudication program instead of 35 positions and $439,000 as proposed by the Senate, (3) denial of three positions and $70,000 for the Bail Agency proposed by the Senate, and (4) a reduction in food costs of $178,600 under the Department of Corrections as proposed by the Senate. The conference action denies the requested redirection of 42 positions and $701,000 in the Superior Court's traffic program to other programs within the Superior Court and instead has transferred those positions and funds to the Department of Transportation which will have the responsibility for the city's new parking enforcement and traffic adjudication program.

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $889,700 for fiscal year 1978. The conference action provides (1) an additional $66,300 for annuities of retired Superior Court judges as proposed by the Senate, and (2) an increase of $823,400 for the Department of Corrections as proposed by the Senate, including $278,400 for seven-day, 24-hour security coverage at the Ugast Psychiatric Center, $95,000 for phase-out costs at the Women's Detention Center, and $450,000 to cover the reduction in anticipated reimbursements from the Federal Bureau of Prisons.

Education

Amendments Nos. 7 and 8: Appropriate $283,605,400 of which $218,242,800 is for the District of Columbia Public Schools as proposed by the Senate instead of $282,201,200 of which $216,838,600 is for the District of Columbia Public Schools as proposed by the House.

The conference action reflects (1) a decrease of nine positions and $275,000 due to the delay in the scheduled opening date of the new addition to the Roosevelt Senior High School as proposed by the Senate, (2) a total of $7,257,800 for maintenance of school facilities as proposed by the Senate instead of $5,392,000 as proposed by the House, and (3) reductions of three posi-

tions and $71,700 under research staff improvements and six positions and $114,900 under planning staff improvements as proposed by the Senate.

Amendment No. 9: Provides that $7,257,800 shall be used exclusively for maintenance of the public schools as proposed by the Senate instead of $5,392,000 as proposed by the House.

Amendment No. 10: Deletes appropriation of $68,600 for fiscal year 1978 proposed by the Senate for relocation expenses to consolidate the academic program of the University of the District of Columbia.

Recreation

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $58,000 for fiscal year 1978 for maintenance of swimming pools.

Human resources

Amendment No. 12: Appropriates $283,321,300 as proposed by the Senate instead of $284,767,700 as proposed by the House.

The conference action provides (1) a total of $18,718,600 for Executive Direction and Support, reflecting a reduction of $985,200 in overhead costs as proposed by the Senate, instead of $19,703,800 as proposed by the House; (2) the sum of $107,017,300 for the Payments Assistance Administration as proposed by the Senate, reflecting denial of the amount requested to annualize an increase in the public assistance payment level, instead of $107,924,000 as proposed by the House; and (3) a total of $9,396,900 for D.C. Village as proposed by the Senate, reflecting an increase of $445,500 over the House allowance, to provide an additional 35,000 hours of contractual nursing services for geriatric care.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $8,086,000 for fiscal year 1978 for public assistance payments.

Transportation

Amendments Nos. 14, 15, 16 and 17: Appropriate $78,735,200 and authorize the purchase of 44 passenger-carrying vehicles of which two shall be for replacement only as proposed by the Senate instead of $71,380,900 and the authorization to purchase two passenger-carrying vehicles for replacement only as proposed by the House.

The conference action provides 125 positions and $7,794,800 for the new parking enforcement and traffic adjudication program. The conferees are agreed that 77 positions and $1,140,000 shall be transferred from the Superior Court's traffic program instead of 35 positions and $439,000 as proposed by the Senate. The conferees concur in the general base reduction of $440,500 as proposed by the Senate.

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $1,082,200 for fiscal year 1978 and providing language which authorizes funding of the additional cost of snow and ice removal out of funds previously appropriated for the Washington Metropolitan Area Transit Authority.

Environmental services

Amendment No. 19: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $72,069,800 instead of $72,962,500 as proposed by the House and $72,119,800 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The conference action deletes $50,000 proposed by the Senate for a study to develop a proposal to retrofit Solid Waste Reduction Center No. 1 so that steam can be produced for sale. The conferees concur in the reduction of $892,700 in staffing and maintenance proposed by the Senate due to the delay in completion of new sewage treatment facilities.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $1,030,400 for fiscal year 1978 instead of $1,550,400 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Department of Environmental Services.—The conference action provides $1,030,400 proposed by the Senate for additional costs of electrical energy due to rate increases and additional demands from new facilities. The conference action deletes $70,000 proposed by the Senate for rental of two landfill compactors.

Washington Aqueduct.—The conference action deletes $450,000 proposed by the Senate for increased costs of electricity for pumping and treatment of water.

Personal services

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $7,000,000 for 1978.

Settlement of claims and suits

Amendments Nos. 22 and 23: Appropriate $322,800 and provide language for payment of a claim pursuant to District of Columbia law as proposed by the Senate.

Repayment of loans and interest

Amendment No. 24: Appropriates $120,400,000 as proposed by the Senate, instead of $111,700,000 as proposed by the House.

The conference action reflects the deletion of $1,200,000 proposed by the House and stricken by the Senate for interest payments on short-term borrowings from the commercial market. The District of Columbia continues to have authority under Public Law 95–314 to borrow from the United States Treasury for short-term cash-flow needs. It is therefore unnecessary in the opinion of the conferees, for the city to incur the added interest expense required when it borrows from the private market. The conferees are agreed that the United States Treasury shall continue to loan funds to the city to help meet the city's short-term cash needs, and accordingly direct the United States Treasury to continue this activity.

The conference action includes $9,900,000 to cover the Federal share of the amount of principal due on December 1, 1979, for the repayment of RFK Stadium bonds as proposed by the Senate.

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $475,800 for fiscal year 1978 for interest due the United States Treasury for the transition quarter (July 1–September 30, 1976). Notice of the additional interest due was received too late for inclusion in the regular budget.

Capital outlay

Amendments Nos. 26 and 27: Appropriate $77,215,000 of which $2,855,400 shall be available for construction services as proposed by the House instead of $77,490,000 of which $2,880,400 shall be available for construction services as proposed by the Senate.

The conference action deletes $275,000, including $25,000 for construction services, proposed by the Senate for renovations and an addition to the dog pound.

General provisions—District of Columbia

Amendment No. 28: Provides an employment ceiling of 37,161 filled positions instead of 37,126 as proposed by the House and 37,239 as proposed by the Senate.

In the 1974–75 period the District of Columbia city government had an average of 730.4 employees to serve each 10,000 unit of population. The national average for the same period of time for all levels of State and local governments was 470.9 employees to serve each 10,000 unit of population. In other words, in the 1974–75 period the city had 45 percent more employees to serve each of its 10,000 citizens as compared to the national average.

The conferees are concerned that the city government has an unnecessarily large number of people on its payroll and direct the city to more carefully analyze the need to fill positions that become vacant and to redouble its efforts to scrutinize the need for additional positions. The conferees are agreed that an important focus for future Congressional reviews of the city budget requests will be the issue of the city's large payroll.

Amendment No. 29: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which (1) prohibits the use of funds in the bill to supplement the salary of employees hired by the District of Columbia under the Comprehensive Employment and Training Act (CETA) if the effect is to provide a salary in excess of the GS–9, step 1 level, and (2) provides a 90-day delay in the effective date.

Amendment No. 30: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which (1) prohibits the use of funds in the bill to supplement the salary of a CETA employee for more than 24 months, and (2) provides a 90-day delay in the effective date.

Amendment No. 31: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which (1) prohibits the use of funds in the bill to supplement the salary of a CETA employee who works for an elected official of the District of Columbia government or on a committee of the Council of the District of Columbia, and (2) provides a 90-day delay in the effective date.

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which (1) prohibits the use of funds in the bill to supplement the salary of a CETA employee if the employee is to be assigned to an agency that already has CETA employees in number in excess of ten percent of its appropriated employment base, with the exception of agencies with 10 or fewer employees, and (2) provides a 90-day delay in the effective date.

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Sec. 224. Notwithstanding any other provision of this Act, the provisions of sections 220, 221, 222, and 223 of this Act shall be deemed repealed upon the date of the enactment of the Act entitled "An Act to amend the Comprehensive Employment and Training Act of 1973, to provide improved employment and training services, to extend the

authorization, and for other purposes", or similar legislation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The effect of this amendment is to repeal the provisions included in amendments numbers 29, 30, 31, and 32 on the date of enactment of the Comprehensive Employment and Training Act Amendments of 1978 or similar legislation.

Conference total—With comparisons

The total new budget (obligational) authority for the fiscal years 1978 and 1979 recommended by the Committee of Conference, with comparisons to the fiscal year 1978 amount, the 1979 budget estimates, the 1978 supplemental requests, and the House and Senate bills follow:

Federal funds

New budget (obligational) authority, fiscal year 1978	$399,116,000
Budget estimates of new (obligational) authority, fiscal year 1979	460,090,000
House bill, fiscal year 1979	277,300,000
Senate bill, fiscal year 1979	261,200,000
Conference agreement	258,200,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1978	−140,916,000
Budget estimates of new (obligational) authority, fiscal year 1979	−201,890,000
House bill, fiscal year 1979	−19,100,000
Senate bill, fiscal year 1979	−3,000,000

District of Columbia funds

New budget (obligational) authority, fiscal year 1978	$1,368,623,200
Budget estimates of new (obligational) authority, fiscal year 1979	1,428,442,000
1978 supplemental	[1] 27,406,100
House bill, fiscal year 1979	1,348,185,100
1978 supplemental	----------
Senate bill, fiscal year 1979	1,364,781,500
1978 supplemental	21,930,100
Conference agreement	1,362,317,700
1978 supplemental	21,341,500
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1978	−6,305,500
Budget estimates of new (obligational) authority, fiscal year 1979	−66,124,300
1978 supplemental	−6,064,600
House bill, fiscal year 1979	+14,132,600
1978 supplemental	+21,341,500
Senate bill, fiscal year 1979	−2,463,800
1978 supplemental	−588,600

[1] 1978 budget estimates as contained in Senate Document 95–113 were not considered by the House.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. FOUNTAIN (at the request of Mr. WRIGHT), after 6 p.m. today, on account of a death in the family.

Mr. HAGEDORN (at the request of Mr. RHODES), for today after 3:30 p.m. and for tomorrow, August 17, 1978, on account of official committee business.

Mr. PEPPER (at the request of Mr. WRIGHT), until 1 p.m. today, on account of official business.

Mr. SCHULZE (at the request of Mr. RHODES), for today after 3:30 p.m. and for tomorrow, August 17, 1978, on account of official committee business.

Mr. STANGELAND (at the request of Mr. RHODES), for August 17, 1978, on account of official business.

Mr. THOMPSON, for the period beginning at noon August 16, through the close of business August 17, 1978, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. ASHBROOK, for 30 minutes, today, to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. CUNNINGHAM) and to revise and extend their remarks and include extraneous matter:)

Mr. SARASIN, for 5 minutes, today.

Mr. MCKINNEY, for 5 minutes, today.

(The following Members (at the request of Mr. RAHALL) to revise and extend their remarks and include extraneous material:)

Mr. DINGELL, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. PEPPER, for 5 minutes today.

Mr. ROSTENKOWSKI, for 10 minutes, today.

Mr. ADDABBO, for 30 minutes, today.

Mr. MURPHY of Illinois, for 5 minutes, today.

Mr. PREYER, for 5 minutes, today.

Mr. BAUCUS, for 5 minutes, today.

Mr. DANIELSON, for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WHITE, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,874.38.

Mr. BIAGGI, to revise and extend his remarks and include extraneous matter immediately following remarks of Mr. LEVITAS.

(The following Members (at the request of Mr. CUNNINGHAM) and to include extraneous matter:)

Mr. DERWINSKI in two instances.

Mr. PURSELL.

Mr. ANDERSON of Illinois.

Mr. MOORE.

Mr. TREEN.

Mr. FORSYTHE.

Mr. GARY A. MYERS.

Mr. EVANS of Delaware.

Mr. DORNAN.

Mr. LAGOMARSINO.

Mr. MCCLORY.

Mr. GILMAN.

(The following Members (at the request of Mr. RAHALL) and to include extraneous matter:)

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. CARNEY.

Mr. SIKES.

Mr. RUSSO in two instances.

Mr. WAXMAN.

Mr. LEHMAN in two instances.

Mr. UDALL.

Mr. FITHIAN.

Mr. HAMILTON.

Mr. ROSE.

Mr. LAFALCE.

Mr. RODINO.

Mr. BRADEMAS in six instances.

Mr. EDGAR.

Mr. BONIOR.

Mr. MURPHY of Illinois.

Mr. BRECKINRIDGE.

Mr. MOORHEAD of Pennsylvania.

Mr. BAUCUS in two instances.

Mr. HARKIN.

Mr. ROGERS in five instances.

Mr. EARLY.

Mr. EVANS of Indiana.

Mr. WRIGHT.

Mr. MIKVA in two instances.

Mr. ZABLOCKI in five instances.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 3382. An act to waive the statute of limitations with regard to the tort claim of Eazor Express, Inc. of Pittsburgh, Pa., against the United States; to the Committee on the Judiciary; and

S.J. Res. 148. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week"; to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 405. An act for the relief of Chong Cha Williams; and

S. 1335. An act for the relief of Shin Myong Yo Purdom, also known as Myong Yo Sin.

ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which were thereupon signed by the Speaker:

H.R. 11579. An act to designate the Veterans' Administration center located at 1901 South First Street, Temple, Tex., as the

"Olin E. Teague Veterans' Center"; and for other purposes.

BILL AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, a bill and joint resolutions of the House of the following title:

On August 15, 1978:

H.J. Res. 682. To provide for the designation of a week as "National Lupus Week";

H.J. Res. 946. To designate October 7, 1978, as "National Guard Day"; and

H.J. Res. 963 Designating July 18, 1979, as "National P.O.W.-M.I.A. Recognition Day."

On August 16, 1978:

H.R. 10732. To authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal year 1979, to provide for the regulation of foreign fish processing vessels in the fishery conservation zone, and for other purposes.

ADJOURNMENT

Mr. RAHALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 6 minutes p.m.), the House adjourned until Thursday, August 17, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4825. A letter from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend sections 3031(d) and 8031(d) of title 10, United States Code, to limit their application to general officers assigned or detailed to duty in the executive part of the Department of the Army and the Department of the Air Force, and for other purposes; to the Committee on Armed Services.

4826. A letter from the president and chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction exceeding $60 million with Fertilizers of Trinidad and Tobago Limited, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

4827. A letter from the president and chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving nuclear facilities with Iberduero, S.A., of Spain, pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

4828. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-254, "To provide for priorities of distribution of general assets and to provide for early access to the assets of an insolvent insurer for the benefit of the guaranty associations," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

4829. A letter from the Secretary of Health, Education, and Welfare and the Secretary of Commerce, transmitting, a report on the study of the feasibility of updating the number of children counted as living below the poverty line in school districts of local educational agencies in order to make adjustments in the amounts of grants for which the local educational agencies within a State are eligible under title I, pursuant to section 822(b) of Public Law 93-380; to the Committee on Education and Labor.

4830. A letter from the Acting Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed interim final regulations governing the supplemental educational opportunity grant program and the national direct student loan program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

4831. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of the Federal Republic of Germany for permission to transfer certain U.S.-origin military equipment to the Governments of the United Kingdom, Norway, and Italy, pursuant to section 3(a) of the Arms Export Control Act; to the Committee on International Relations.

4832. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Saudi Arabia for permission to transfer certain U.S.-origin military equipment and services to the Yemen Arab Republic, pursuant to section 3(a) of the Arms Export Control Act; to the Committee on International Relations.

4833. A letter from the vice president for Government affairs, National Railroad Passenger Corp., transmitting a report covering the month of May 1978, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

4834. A letter from the Secretary of the Army, transmitting a special Corps of Engineers report on the Theodore Ship Channel, Mobile Harbor, Ala. (H. Doc. No. 95-376); to the Committee on Public Works and Transportation and ordered to be printed.

4835. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting notice of several proposed transfers of funds between categories of agency appropriations for fiscal year 1978, pursuant to section 2(d) of Public Law 95-155; to the Committee on Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mrs. SPELLMAN: Committee on Post Office and Civil Service. S. 1626. An act to clarify the status of the Librarian of Congress under subchapter I of chapter 63 of title 5, United States Code, relating to annual and sick leave; with amendment (Rept. No. 95-1496). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 11168. A bill to provide that the sales of public lands in the town of Red Mountain, San Bernadino County, Calif., be conducted under the Townsite Act; with amendment (Rept. No. 95-1497). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 12344. A bill to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes; with amendment (Rept. No. 95-1498). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 13715. A bill to improve the operational weather programs of the National Oceanic and Atmospheric Administration. to affirm the Federal responsibility for the provision of effective weather and related services, to assure to the maximum extent that all available Federal resources possible extent that all available Federal resources are utilized in a coordinated manner for weather-related research, development, and technology, and for other purposes; (Rept. No. 95-1499). Referred to the Committee of the Whole House on the State of the Union.

Mr. NATCHER. Committee of conference. Conference report on H.R. 13468 (Rept. No. 95-1500). Ordered to be printed.

Mr. ZABLOCKI. Committee on International Relations. House Joint Resolution 923. Joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Okla., from September 10, 1979, through September 13, 1979 (Rept. No. 95-1501). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 1321. Resolution providing for the consideration of H.R. 10898. A bill to amend the Regional Rail Reorganization Act of 1973 to authorize appropriations for the U.S. Railway Association for fiscal year 1979 (Rept. No. 95-1502). Referred to the House Calendar.

Mr. DODD: Committee on Rules. House Resolution 1322. Resolution providing for the consideration of S. 1613. An act to improve access to the Federal courts by enlarging the civil and criminal jurisdiction of U.S. magistrates, and for other purposes (Rept. No. 95-1503). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEARD of Tennessee (for himself, Mr. APPLEGATE, and Mr. HEFTEL):

H.R. 13887. A bill to amend the Endangered Species Act of 1973 to establish an Endangered Species Interagency Committee to review certain actions to determine whether exemptions from certain requirements of that act should be granted for such actions; to the Committee on Merchant Marine and Fisheries.

By Mr. FLORIO:

H.R. 13888. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to increase financial assistance to units of general local government for the development and implementation of programs relating to the prosecution of repeat criminal offenders, and for other purposes; to the Committee on the Judiciary.

By Mr. GOLDWATER:

H.R. 13889. A bill to amend the Farm Labor Contractor Registration Act of 1963 to provide that labor organizations which provide employment referral services and other similar services to assist migrant workers in obtaining agricultural employment shall be considered to be farm labor contractors for purposes of such act; to the Committee on Education and Labor.

By Mr. HARRINGTON (for himself, Mr. BEDELL, Mr. D'AMOURS, Mr. EILBERG, Mr. FORD of Tennessee, Mr. GREEN, Mr. JEFFORDS, Mr. LAFALCE, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. NEDZI, Mr. OTTINGER, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. PRESSLER, Mr. SIMON, Mr. STARK, Mr. STUDDS, Mr. TSONGAS, Mr. WHITLEY, and Mr. CHARLES WILSON of Texas):

H.R. 13890. A bill to amend title IV of the Higher Education Act of 1965 to establish a system of student tuition advances to be repaid as an income tax imposed by the Internal Revenue Code of 1954, and for other purposes; jointly, to the Committees on Education and Labor, and Ways and Means.

By Mrs. HECKLER:

H.R. 13891. A bill relating to the independent contractor status of individuals for employment tax purposes; to the Committee on Ways and Means.

By Mr. KASTENMEIER:

H.R. 13892. A bill to amend title 28 of the United States Code to provide that the requirements that each U.S. attorney and U.S. marshal reside in the district for which he is appointed shall not apply to an individual appointed to such position for the Northern Mariana Islands if such individual is at the same time serving in the same capacity in another district; to the Committee on the Judiciary.

By Mr. MIKVA (for himself, Mr. BOWEN, Mr. BUCHANAN, Mr. CONTE, Mr. EILBERG, Mr. HYDE, Mr. JACOBS, Mr. LLOYD of California, Mr. LONG of Maryland, Mr. MCCLOSKEY, Mr. MITCHELL of New York, Mr. ROSE, Mr. WYDLER, and Mr. YOUNG of Missouri):

H.R. 13893. A bill to correct inequities in certain sales representatives practices, to provide protection for certain sales representatives terminated from their accounts without justification, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PRITCHARD (for himself and Mr. BLANCHARD):

H.R. 13894. A bill to authorize the Secretary of Housing and Urban Development to undertake, on an experimental basis, programs providing neighborhood self-help development funds; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RICHMOND (for himself, Mrs. COLLINS of Illinois, Mr. MAGUIRE, Mr. MILLER of California, Mr. SEIBERLING, and Mrs. SPELLMAN):

H.R. 13895. A bill to provide Federal assistance to screen those workers (and members of their families) exposed to asbestos who cannot otherwise receive the screening under a workman's compensation, health insurance, or other program; to the Committee on Education and Labor.

By Mr. SOLARZ:

H.R. 13896. A bill to amend the Internal Revenue Code of 1954 to provide individuals a credit against income tax for amounts paid or incurred for certain State and local individual income taxes and to repeal the deduction for such taxes, State and local general sales taxes, and State and local taxes on gasoline and other motor fuels; to the Committee on Ways and Means.

By Mr. STEIGER:

H.R. 13897. A bill to amend the Internal Revenue Code of 1954 to provide an excise tax exemption for experimental aircraft; to the Committee on Ways and Means.

By Mr. SYMMS (for himself, Mr. COLLINS of Texas, Mr. HAGEDORN, and Mr. HYDE):

H.R. 13898. A bill to eliminate any practice by the Federal Government which grants preferential treatment to, or discriminates against, any individual on the basis of the race, color, religion, sex, or national origin of such individual in comparison with the total number of individuals of such race, color, religion, sex, or national origin; to the Committee on Education and Labor.

By Mr. WAMPLER (for himself and Mr. MARTIN):

H.R. 13899. A bill to delay any action which may be taken by the Secretary of Agriculture respecting nitrites used as a food preservative on the basis of any carcinogenic effect nitrites may be represented to have; to the Committee on Agriculture.

By Mr. COLLINS of Texas:

H.R. 13900. A bill to reduce the number of individuals employed by the Federal Government in executive agencies in or near the District of Columbia; to the Committee on Post Office and Civil Service.

By Mr. MCCLORY (for himself, Mr. BOB WILSON, Mr. ASHBROOK, and Mr. ROBINSON):

H.R. 13901. A bill to protect the confidentiality of the identities of certain individuals engaged in foreign intelligence activities for the United States; jointly, to the Committees on the Judiciary, and the Select Committee on Intelligence.

By Mr. RAILSBACK:

H.R. 13902. A bill to amend the Internal Revenue Code of 1954 to provide that certain farm buildings shall be eligible for the investment tax credit; to the Committee on Ways and Means.

By Mr. STRATTON:

H.R. 13903. A bill to amend title 10, United States Code, to provide that a member of the Board of Regents of the Uniformed Services University of the Health Sciences whose term of office has expired shall continue to serve until a successor is appointed; to the Committee on Armed Services.

By Mr. WALGREN (for himself and Mr. MARKS):

H.R. 13904. A bill to establish a comprehensive disease prevention and health promotion program in the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. WEISS (for himself, Mr. RICHMOND, Mr. CONYERS, Mr. PATTISON of New York, Mr. EDWARDS of California, Mr. WEAVER, Mr. FISH, Mr. DELLUMS, Mr. JEFFORDS, Mrs. SCHROEDER, Mr. MIKVA, Mr. SEIBERLING, Mr. MAGUIRE, Ms. HOLTZMAN, Mr. BEDELL, and Ms. OAKAR):

H.R. 13905. A bill to amend the Atomic Energy Act of 1954 to modify certain statutory limitations on the amount of financial protection required with respect to nuclear incidents, to remove the statutory limitations on the aggregate liability for a single nuclear incident, to limit the financial obligations of the United States with respect to such incidents, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CARR:

H.R. 13906. A bill to amend the Employee Retirement Income Security Act of 1974 to provide that benefits paid by the Pension Benefit Guaranty Corporation under terminated emeployee benefit plan be adjusted annually by the percentage change in the Consumer Price Index; to the Committee on Education and Labor.

By Mr. FASCELL:

H.J. Res. 1117. Joint resolution to authorize and request the President to proclaim January 28, 1979, as Day of Marti, Apostle of Liberty; to the Committee on Post Office and Civil Service.

By Mr. GARCIA:

H.J. Res. 1118. Resolution authorizing the President to annually proclaim the week of Thanksgiving Day as National Farmworkers Week; to the Committee on Post Office and Civil Service.

By Mr. NOLAN (for himself, Mr. CEDERBERG, Mr. TRAXLER, Mr. HIGHTOWER, Mr. CARR, Mr. FRASER, Mr. PRESSLER, Mr. GLICKMAN, Mr. EVANS of Georgia, Mr. BROWN of Michigan, Mr. ABDNOR, Mr. BALDUS, Mr. PURSELL, Mr. KILDEE, Mr. JENRETTE, Mr. THONE, Mrs. SMITH of Nebraska, Mr. SEBELIUS, Mr. KASTENMEIER, Mr. STANGELAND, Mr. ROBINSON, Mr. FOUNTAIN, Mr. MARLENEE, and Mr. OBERSTAR):

H.J. Res. 1119. Joint resolution raising the price support levels for milk, wheat, corn, soybeans, and cotton to 90 percent of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture.

By Mr. VENTO (for himself, Mr. FRASER, Mr. BAUCUS, Mr. MARLENEE, Mr. DICKS, Mr. BRODHEAD, Mr. MIKVA, Mr. REUSS, Mr. LEHMAN, Mr. PATTERSON of California, Mr. RICHMOND, Mr. HARRINGTON, Mr. LAFALCE, Mr. EILBERG, Mr. MCCORMACK, Mr. EDGAR, Mr. STOKES, Mr. CHARLES WILSON of Texas, Mr. MITCHELL of Maryland, Mr. PHILLIP BURTON, Mr. ANNUNZIO, Mr. FORD of Michigan, Mr. RAHALL, and Mr. RYAN):

H.J. Res. 1120. Joint resolution to direct the Civil Aeronautics Board to disapprove any renewal and terminate any effect of the Airlines Mutual Aid Pact and to provide for a study and report on alleviating airline strikes; to the Committee on Public Works and Transportation.

By Mr. VENTO (for himself, Mr. FLORIO, Mr. AUCOIN, Mr. FOLEY, Mr. NOLAN, Ms. OAKAR, Mr. MINETA, Mr. STEED, Mr. WEISS, Mr. LLOYD of California, Mr. CONYERS, Mr. EDWARDS of California, Mr. PATTISON of New York, Mr. BEILENSON, Mr. BALDUS, Mr. YOUNG of Texas, Mr. OBERSTAR, Mr. BONIOR, Mr. THOMPSON, Mr. HANNAFORD, Mr. MEEDS, Mr. SIMON, Mr. BLANCHARD, and Mr. HOWARD):

H.J. Res. 1121. Joint resolution to direct the Civil Aeronautics Board to disapprove any renewal and terminate any effect of the Airlines Mutual Aid Pact and to provide for a study and report on alleviating airline strikes; to the Committee on Public Works and Transportation.

By Mr. VENTO (for himself, Ms. HOLTZMAN, Mr. CUNNINGHAM, Mr. DELLUMS, Mr. HOLLENBECK, Mr. FASCELL, Mrs. SCHROEDER, Mr. MILLER of California, Mr. PERKINS, and Mr. ASPIN):

H.J. Res. 1122. Joint resolution to direct the Civil Aeronautics Board to disapprove any renewal and terminate any effect of the Airlines Mutual Aid Pact and to provide for a study and report on alleviating airline strikes; to the Committee on Public Works and Transportation.

By Mr. CLEVELAND (for himself, Mr. D'AMOURS, Mr. ANNUNZIO, Mr. APPLEGATE, Mr. BARNARD, Mr. BAUCUS, Mr. BEARD of Rhode Island, Mr. BIAGGI, Mr. BURKE of Massachusetts, Mr. DICKS, Mr. FOLEY, Mr. GORE, Mr. HOLLAND, Mr. JENRETTE, Mr. MCFALL, Mr. MEEDS, Mr. MCKAY, Mr. MOTTL, Mr. MURPHY of Illinois, Mr. NEDZI, Mr. NOWAK, Mr. RUNNELS, Mr. SHARP, Mr. SHUSTER, and Mr. THONE):

H. Con. Res. 697. Concurrent resolution expressing the sense of Congress that all remaining proceedings with respect to the Seabrook Nuclear Station project should be expedited and that all licensing and permitting procedures for the construction and opera-

tion of nuclear generating stations should be reviewed and modified to improve the efficiency of such procedures; to the Committee on Interior and Insular Affairs.

By Mr. BEARD of Tennessee (for himself, Mr. EILBERG, Mr. CORNWELL, and Mr. ABDNOR):

H. Res. 1316. Resolution relative to absentia discharges for military deserters; to the Committee on Armed Services.

By Mr. BRECKINRIDGE:

H. Res. 1317. Resolution providing for the printing as a House document of a compilation of a series of articles appearing in the Congressional Record; to the Committee on House Administration.

By Mr. GONZALEZ (for himself, Mr. WON PAT, Mr. DELLUMS, Mrs. FENWICK, Mr. DERWINSKI, Mr. STEED, Mr. LAGOMARSINO, Mr. PANETTA, Mr. MITCHELL of Maryland, Mr. HALL, Mr. RICHMOND, Mr. HYDE, Mr. CHARLES WILSON of Texas, Mr. FARY, Mr. COLLINS of Texas, Mr. LLOYD of California, Mr. BURLESON of Texas, Mr. WAXMAN, Mr. BROOKS, Mr. MAHON, EILBERG, Mrs. BOGGS, Mr. RANGEL, Mr. PRICE, and Mr. NIX):

H. Res. 1318. Resolution to recognize the contribution of Bernardo de Galvez to the independence of the United States; to the Committee on Post Office and Civil Service.

By Mr. GONZALEZ (for himself, Mr. BAUCUS, Mr. MOORE, Mr. BENJAMIN, Mr. VAN DEERLIN, Mr. HUGHES, Mr. ROE, Mr. SIMON, and Mr. ROUSSELOT):

H. Res. 1319. Resolution to recognize the contribution of Bernardo de Galvez to the independence of the United States; to the Committee on Post Office and Civil Service.

By Mr. MARTIN (for himself and Mr. WAMPLER):

H. Res. 1320. Resolutior expressing the sense of the House of Representatives that any action respecting nitrites by the Secretary of Agriculture or the Secretary of Health, Education, and Welfare because of any carcinogenic effect that nitrites may be represented to have should be delayed until after the completion of the study required by the Saccharin Study and Labeling Act; jointly to the Committees on Agriculture, and Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. SOLARZ introduced a bill (H.R. 13907) for the relief of Laszlo Revesz, which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11280

By Mr. SOLARZ:

—Page 209, insert after line 12 the following new section:

COMPENSATORY TIME OFF FOR RELIGIOUS OBSERVANCES

SEC. 313. (a) Subchapter V of Chapter 55 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"5550a. Compensatory time off for religious observances.

"(a) Not later than 30 days after the date of the enactment of this section, the Office of Personnel Management shall prescribe regulations providing for work schedules under which an employee whose personal religious beliefs require the abstention from work during certain periods of time, may elect to engage in overtime work for time lost for meeting those religious requirements. Any employee who so elects such overtime work shall be granted equal compensatory time off from his scheduled tour of duty (in lieu of overtime pay) for such religious reasons, notwithstanding any other provision of law.

"(b) In the case of any agency described in subparagraphs (C) through (G) of section 5541(1) of this title, the head of such agency (in lieu of the Office) shall prescribe the regulations referred to in subsection (a) of this section.

"(c) Regulations under this section may provide for such exceptions as may be necessary to efficiently carry out the mission of the agency or agencies involved.".

(b) The analysis for chapter 55 of title 5, United States Code, is amended by adding after the item relating to section 5550 the following:

"5550a. Compensatory time off for religious observances.".

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Page 129, in the table of contents, strike out the item relating to section 313 and insert in lieu thereof the following:

Sec. 313. Compensatory time off for religious observances.

Sec. 314. Effective date.

—Page 223, line 23, strike the words "before appointment to such positions".

S.J. RES. 4

By Mr. DUNCAN of Oregon:

—On page 5, line 12, delete section (b)(1) and insert in lieu thereof the following:

"SEC. (b)(1) The Commission shall be composed of fifteen members appointed by the President, of whom five shall be from a list of twenty persons submitted to the President by the Governor of Hawaii. The list submitted by the Governor shall consist of no fewer than fifteen persons who are of the blood of Aboriginal Hawaiians who inhabited the Hawaiian Islands prior to 1778 (hereinafter "Aboriginal blood"), of whom no fewer than five shall be of one-half degree or more Aboriginal blood and no fewer than five shall be of one-quarter degree or more Aboriginal blood. Further, each of the four counties in the State of Hawaii shall be represented on the Governor's list by at least four persons who are inhabitants thereof.

(b)(2) No less than five of the members of the Commission shall be of Aboriginal blood, including no fewer than two who are of one-half degree or more Aboriginal blood, nor fewer than two who are one-quarter degree or more Aboriginal blood, and one who shall be of any degree of Aboriginal blood. Each of the four counties in the State of Hawaii shall be represented on the Commission by at least one member of Aboriginal blood who is an inhabitant thereof, and all persons of any degree of Aboriginal blood who are not residents of the State of Hawaii shall be represented by a member of any degree of Aboriginal blood who is not a resident of the State of Hawaii. The President, prior to appointing the members of the Commission, and the Governor prior to submitting recommendations for members, shall consult with Aboriginal Hawaiian organizations and with the Aboriginal Hawaiian community on each of the Islands in the State of Hawaii."

Renumber the succeeding subsections of section 2 of the bill accordingly.

EXTENSIONS OF REMARKS

BRONX—LANDSCAPE OF URBAN CANCER

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. WAXMAN. Mr. Speaker, it can be fairly said that all discussions about our cities and urban policy can begin and end with the South Bronx. It was the pride of generations of Americans, known for its fine communities and diverse neighborhoods. But in recent years, its heart has been ravaged and abandoned. Its citizens are overwhelmed with crises in housing, unemployment, education, crime, and addiction. In the South Bronx our greatest urban tragedy has emerged. It must be understood and confronted if we are ever to manage the rehabilitation and revitalization of our cities.

Robert Scheer of the Los Angeles Times has written a comprehensive and searching article on the South Bronx. In its troubles are lessons for every American city. I am pleased to insert this excellent article in the RECORD for the benefit of my colleagues:

[From the Los Angeles Times, August 6, 1978]

BRONX—LANDSCAPE OF URBAN CANCER

(By Robert Scheer)

The Good Humor truck circles aimlessly through silent blocks of burned-out buildings hunting the occasional waif still playing in the rubble who might yet desire a Popsicle. This time, there is no sign of life and the ice-cream truck departs with a last ring of its merry chimes, leaving a still life of the South Bronx warscape dotted by garbage lakes, dunes of litter and beached hulks of abandoned cars.

The streets are dead, as if locusts had descended and slurped up the ringoleavio and stickball games, the philosophers of the benches, the checker kings and loud music boys, the girls with fishnet stockings and stiletto heels and the young studs with bodies some said were good for nothing but dancing.

Gone the wild, chaotic, noisy cosmopolitan life of a borough that for decades belched up life continuously as its very mission. The bedroom borough where young hardworking couples returned in crammed cars of the D or the Lex from dark garment shops in Manhattan, exhausted but suddenly come to life as they emerged from their subway station to the babble of child play noises which was the incessant hum of The Bronx.

These were couples who had left Manhattan to spend an hour each way in the subway crunch, marking the first grand suburban exodus to make and raise babies. The Bronx had space—farms, even parks and plentiful empty lots on which to grow vegetables or build a hut.

But it also had the civilization of apartment-dwelling and universities, of botanical gardens, libraries and sufficient numbers of people so that one was not sentenced to the forced company of boring neighbors, as was assumed to be the case in the suburban

housing tracts of Long Islands, which was generally regarded as a cultural wasteland.

The Bronx—birthplace of Lauren Bacall, Herman Wouk, George Meany, Anne Bancroft, Jules Feiffer, Paddy Chayefsky, Burt Lancaster, Jonas Salk, Diahann Carroll and Carroll O'Connor. Where Edgar Allan Poe lived and worked in a little cottage on the Grand Concourse off Fordham Rd. And where Leon Trotsky, in exile, lived on the fifth floor of a tenement and composed tracts in Yiddish and Russian that helped inspire the Russian Revolution.

Because of its history, and despite the signs of rot that now appear as far north as the Yonkers line, it is still possible to love The Bronx and remain loyal to its heritage.

The endless benches that surround each park and playground are shorn of their wooden slats. And as one passes the concrete bench arms, there remain only memories of past endless arguments about revolution and God and Bertrand Russell and who is the most offensive yenta on the block.

To those who remember, the Bronx bench once represented a high point of American civilization. Now there are fat, loud transistor radios, blasting out music that numbs one's sensibilities, a fit accompaniment only for the daydreams of junkies and thieves. Or so it seems until a lone Anglo reporter squeezes into People's Park near St. Ann's Episcopal Church to hear Tito Puente play for thousands of kids, mothers, fathers—people—and suddenly the music, like the people, is mysterious, complex, poetic and, in all other ways, alive.

This is, of course, one of the better moments, but that's what we focus on in recalling the history of any ethnic group. Why not the same for the Puerto Ricans of the South Bronx?

When in this century did The Bronx not have poverty, uncollected garbage, street gangs and crime? Remember when the Irish gang, the Fordham Baldies and the Italian Guinea Dukes—1,000 strong—battled each other for borough supremacy? Yet it was never quite the way it is today, not even close. But what about the Lower East Side, Hell's Kitchen and East Harlem? The slums have moved north, the problems are the same.

That is why those who strive to save The Bronx are filled with a righteous indignation, for the problems of The Bronx did not germinate there.

The Bronx was forced to import the problems of the rural American South, Puerto Rico and East Harlem. The poor came to New York from all over, and The Bronx paid the price for the efforts to "save" Manhattan as the nation's commercial capital and playground for the rich.

The poor are being pushed out of the entire East Side of Manhattan from the East Village up through Yorkville, freeing the professional elite—the Bloomingdales/New York magazine crowd—from having to associate with the poverty class.

On the West Side, the Lincoln Center complex created another sanctuary for the upper classes. The poor, almost all black and Puerto Rican, were to be contained throughout The Bronx in the massive low-rent housing projects built for that purpose and in the tenements that remained.

The insertion of those high-rise housing projects has ripped apart the fabric of the tenement neighborhood life in The Bronx. The projects in the short run have turned out to be viable holding cells for the minority poor who barely are noticed by commuters on fast-track expressways from Westchester to Wall Street. But the high-rise tenements also have proved to be festering sores—centers of alienation, crime, joblessness.

We think now of these problems of The Bronx because President Carter stood in the midst of the desolation on Charlotte St. one day last October to underscore his commitment to solving America's urban problems.

No one seems to know for certain why he bothered to make this gesture of concern. Some say it was to get back at New York City's Democratic mayoral candidate, Edward Koch, who was giving Carter a hard time on his Mideast policy. Carter wanted to show Koch, according to one White House staffer, that he had "best tend to the problems in his own backyard."

Carter had been at the United Nations that day, and another account has it that he went to The Bronx in a whim inspired by Patricia Roberts Harris, secretary of housing and urban development, to demonstrate that the President is as much concerned with domestic problems as with international ones.

Well, he isn't—at least not as illustrated by the South Bronx case. Insiders agree that the President now regrets having gotten involved. The momentary exhilaration of live TV coverage has given way to the hard fact that at this moment, neither the Administration nor Congress seems willing to make the serious commitment needed to save The Bronx or any other blighted central city area.

When Carter got back to Washington, he ordered White House assistant Jack Watson to "do something" about the South Bronx. That ended in a limited commitment to a South Bronx revitalization plan hastily concocted by New York City authorities.

To date there is a federal commitment to spend $55 million this year, basically as loan money to encourage investment as well as to build 750 additional units of housing. In the nine months since Carter visited the South Bronx, the only concrete achievement has been the creation of one multiservice office for small business.

Meanwhile, the dry rot of the Bronx has continued to accelerate up the Grand Concourse, the once-proud central artery of the borough. It would now be most accurate to think of the entire borough of 1.5 million people as being part of the "South Bronx problem."

The Bronx is now a poisoned flower.

The parks—Van Courtland on the northern boundary, Crotona in the center, and of course Bronx Park with its fabled zoo—are now seedy affairs neglected by the city, stained indelibly by perverse graffiti artists and incessant violence.

They were once the perfect, green, refreshing counterpoint to urban life, a vacationland for hundreds of thousands of picknickers with their blankets, Sunday newspapers, mandolins, chess and kids.

Now they are empty, scary places. So, too, the miniparks and benches around the playgrounds that formerly functioned as neighborhood plazas—the heart of a free-wheeling childcare, communications, dating network.

There was a balance to the life of The Bronx. Now there is madness and the time of the bully.

As S. Robert Wilner, 72, a retired engineer who now teaches meditation techniques to seniors at the Young Men's Hebrew Assn., describes his tormentor:

"I walk on the Grand Concourse and this regal person—must be 7 feet tall—strides up. I didn't get out of his way fast enough and his elbow strikes me on the head."

Wilner's encounter with the giant of the Grand Concourse resulted in his hospitalization, as had two previous incidents, once when he and an 80-year-old companion were brutally beaten by teen-agers at a bus stop.

As Wilner attempts to complete his accounting, scores of elderly people crowd in to relate the details of multiple muggings that have marked the twilight of their lives.

Their complaints mostly are against the violent young, who make street corners near schools so inhospitable that bus drivers will not stop to pick up the seniors.

They live in apartments with two and three locks on the door, but burglaries occur regularly. Not one in the crowd would dare venture out at night.

These are sweet people who say they love The Bronx and don't want to leave it. Some can't and are there because rent control provides them with the only place they can afford. These are people who worked all of their lives and now must subsist on $300 or $400 a month.

Here with the Jewish senior citizens it is the same as it is elsewhere with the blacks, Puerto Ricans, Irish, Italians, in the tenants' meetings or on the street corners—a sense of being cut off from power.

Anyone who bears the marks of the outside—a camera, tape recorder, necktie—is seized upon as an antenna for messages of desperation. And the desperation cuts across all racial and ethnic lines.

The sense of abandonment is pervasive. These people feel cut off and isolated in a world that no longer abides by any recognizable rules. They are too weak to play by the new rules of the jungle yet feel that that is what the city has left them with.

There were harsh words for President Carter, who came around that once and who was the recipient of most of their votes.

"Carter hasn't helped at all," said Ruth Ballan, whose house has been burgled five times. "Have you driven around here and seen all of those burned-out buildings? It's *schrechlich*—you know what schrechlich means? It's terrible, it's horrible.

"People used to be able to sit in this park; it was a haven for the elderly. It was just magnificent. The plants are gone, the benches all broken up. There were statues. The kids cut off the heads. The filth is terrible."

Rep. Robert Garcia, a Democrat of Puerto Rican descent, has his arm wrapped around Mrs. Ballan, who owned the Snow White food store around the corner on Brook Ave. when "little Bobby (Garcia) used to come in."

Garcia, who represents the South Bronx, shared Mrs. Ballan's despair. He recalled campaigning in the park. "In the old days it was bumper to bumper on those benches. You could not get a spot there. Now the park is empty."

The kids in the area, mostly black and Puerto Rican, are not the way Mrs. Ballan recalls Bobby Garcia's group in the old days. The new breed, in her view, is wild beyond belief.

"These kids that pull old ladies' pocketbooks—some of those they see are infirm and can't fend for themselves, they go after them. Sometimes just for sheer nastiness. Even the buses are a danger to travel on. There are regular pickpockets there."

Two floors below the senior center at the YMHA, hundreds of kids, almost all black and brown, are lined up to apply for federally funded summer jobs. They don't look like muggers or rowdies and indeed must suffer considerable bureaucratic discipline to land these jobs.

The director of the program, a 27-year-old Puerto Rican, Miguel Montez, who grew up in the South Bronx, feels the lack of jobs is at the root of the problem.

In Montez's view, "We don't have enough jobs for the kids in the summer. It gets hot. And you're 17 or 18 and you don't have any money in your pocket, so you go out looking for some money. I'm not saying it is correct. We've got to get jobs for the kids, keep them occupied."

Welfare has been the alternative to jobs, and as Montez notes the shift, "I was born in the South Bronx, but it's changed. When I was a kid, I don't remember too many people being on welfare. We were poor, but I don't remember any of my friends being on welfare.

"When you don't have to go out and work and they just give it to you, it has to affect your attitude. You might try and go out to

two or three places to get a job and then you give up. First, strike one because you're black. In my desk I have resumes of 250 (minority) people with bachelor's (degrees), a couple of people with master's (degrees). And I can't get them jobs. Nobody wants them."

The South Bronx is a maintenance culture hooked on welfare and government-subsidized housing. It exists as apart from the mainstream economy as does the life of a methadone addict from straight society.

The maintenance economy of the South Bronx is obviously made necessary by the fact that it has been easier for the government to house and feed people minimally than to provide them with jobs.

It may be that when people are maintained too long, they are no longer fit for, or desirous of, gainful employment. But there is ample evidence of a large army of involuntarily unemployed people in The Bronx—and an overwhelming lack of jobs.

The unskilled jobs that were the entry point into the economy for past generations of immigrants were replaced by mechanization or are now located in the nonunionized American South and abroad.

Community organizers say the Puerto Ricans and blacks of the South Bronx are no less willing to work than were their predecessors, but the jobs are not there.

A recent notice of work to restore the Woolworth Building produced 5,000 applicants on short and limited notice. Thousands of young people went begging for the jobs provided this summer under the federal Comprehensive Employment and Training Act. The demand from the minority poor was so high that Koch, now the mayor, instituted a lottery.

The announcement of a few security jobs paying $3 to $4 an hour at a newly opened housing project attracted hundreds of serious and enthusiastic applicants from the immediate neighborhood.

But it is also true that it is less horrifying to be jobless in the welfare age than previously. With a bit of hustling, one need not go hungry often nor sleep on park benches. With a bit more hustling it is possible to score drugs or alcohol and forget temporarily that one is not doing anything with one's life except spacing out.

In the South Bronx, life is sustained by welfare—but just barely.

At one tenants' meeting, a couple of middle-aged women encircled by children burst in to drag Garcia across the street to witness the squalor in which they are forced to live.

These women, who live in a dilapidated five-story tenement, dream of being admitted to a municipal housing project which, despite its flaws, is blessed with concrete walls that neither burn nor leak. Their names are on a long waiting list.

Most of the apartments in their tenement have burned out, and the "lucky" tenants who had occupied them were permitted to move into the projects ahead of the others. At least in the projects, there is some semblance of police security and landlord services.

Here there is excrement, piles of it left by junkies who have turned the hallways of The Bronx tenements into public latrines. Here there are rats as big as cats that move boldly through the mounds of rubbish in the hallway in the daylight, even when a U.S. congressman is present.

Here, in the midst of broken glass, rotting fruit and the acrid and ever present stench of urine, little children play jacks in their hallway playground of filth that is yet cleaner and safer than the dreaded streets.

Garcia grew up in this neighborhood. His father headed a small evangelical church for 37 years around the corner from the once prestigious St. Ann's. And he remembers this as a stable and safe mixed neighborhood—Puerto Rican, Italian, Jewish, Irish—going back to the 1930's.

At times, Garcia seems like a Puerto Rican "Marty," who would rather attend a Yankee baseball game than lead a social crusade. But he moves easily on the streets of the South Bronx, and he obviously enjoys the close company of its people.

The playful Garcia becomes deadly serious and near tears as the middle-aged women take him on a tour of the "apartment," which has been turned into a rain forest due to the broken pipes in the abandoned apartments above. It is necessary to use umbrellas to pass through the hallway.

The congressman spies a school workbook in the midst of a clutter of fallen plaster and asks a 10-year-old girl if she has been doing her homework. Amazingly enough, she has. The congressman points out that he went to the same school. But things were better then.

Back on the streets, Garcia encounters teen-age pigeon fanciers guarding the front of a boarded-up, burned-out tenement. They are concerned that the congressman will tear down this building, thereby depriving them and their pigeons of a home.

These kids dropped out of school in the seventh grade and have tried to get into the Army since, but they have failed the test three times.

One of them, a genial, bright kid whose father died of a drug overdose on a nearby roof, has old hypodermic needle marks all over his arms. He tells the congressman he is now off the stuff, thanks to Dr. Mike Smith.

Garcia knows that means the acupuncture doctor at Lincoln Hospital detox, who uses pressure points and tiny needles as an alternative to methadone and big needles.

Smith, who does tenant organizing when he's not saving heroin addicts, insists that it's the landlords who hire the addicts to burn down the buildings in order to collect the insurance. There are few landlords left on the scene to dispute this. According to Smith:

"Cultural institutions don't burn down, libraries haven't burned down, the churches haven't burned down, the private little houses—have they burned down? No.—You know why all the other stuff burned down? For the profit motive. Let's face it, if you had that kind of investment and you saw that you couldn't come out of it any other way, you would buy the torch."

There is a consensus among community organizers like Smith that people of the South Bronx are not inclined to burn down their own homes, possessions and endanger their children.

Whether they are Maoists or Episcopalians, there is an apparent unity among those who would save the Bronx from the bottom up, as opposed to the outside missionaries from Washington, think tanks and developers. The people who work the streets love the life and the potential they find there in abundance, while the outside saviors feel it barely exists.

The Bronx is not dead. The situation is tragic precisely because there is so much potential, so much life despite the harsh realities. Buildings burn, track marks appear on 10-year-old arms, a 4-year-old kid falls out of a tenement window because the landlord neglected to put up a window grid.

But life goes on. The shopping hubs at 149th St. and Fordham Rd. are busier than ever. The Venice restaurant at 149th St. is still one of the best Italian restaurants in New York and Jahn's on Kingsbridge Rd., serves the finest homemade ice cream.

Pioneers are restoring row houses on Alexander St., and small and successful "sweat equity" ventures, in which tenants rebuild their houses, abound.

Senior citizens in the Mitchel Houses housing project staff their own 24-hour security patrol that has eliminated crime in their racially integrated and cheerful building plunked down in the roughest neighborhood in the South Bronx.

At the YMHA on the Concourse, 72-year-old cartoonist Sam Goldin, who has been mugged four times, says that people are basically good and that all groups have a few bad apples.

Up near 182nd St. in the Central Bronx where the Puerto Ricans have encroached on the outer limits of Little Italy, there have been the annual gang killing and threatened retaliations.

But a tenants' group—led by two products of local Catholic education, Fran Fucelli, who is half-Puerto Rican and half-Italian, and Josephine Perrella, along with the Rev. Edmund Parrakow, a Catholic priest—has organized the neighborhood against the landlords and banks whom they judge to be the central problem.

Fifty blocks south at St. Ann's Episcopal Church, where Gouverneur Morris, a signer of the Constitution, lies buried, the Rev. James Snodgrass, of proper WASP bearing, acts in concert with Milton (Karate) Morales, a tough but cheerful Puerto Rican off the streets, and Roy Howard, who speaks in the cadences of a black minister, organizing tenants.

These community organizers are particularly critical of the banks, which they charge with abandoning the economy of The Bronx. In their view, disinvestment by the banks has contributed to the creation of an economy based on welfare rather than jobs.

The big bank in The Bronx is the Dollar Savings Bank. For decades, Bronx children learned about saving, banking community ethics and responsibility from a savings program sponsored by the Dollar and The Bronx public schools. Children saved their dimes, and when $5 was accumulated, the teacher would assist in depositing the funds with the bank.

Officers from the bank would regularly visit the schools to provide homilies on the role of banking and saving in building for a better tomorrow by investing in the community.

Yet a report issued by The Bronx borough president's office last year found the Dollar Savings and the other four largest banks in The Bronx "unquestionally guilty of redlining the borough."

This report defined red-lining as "a policy under which lenders decide to refuse mortgage loan requests in certain communities regardless of the qualifications of individual mortgage applicants and the inherent value of the property in question."

In a study of the 1975 data, the latest available, the borough president's office reported that of each dollar deposited by Bronxites in their local banks, "only 12.6 cents was ploughed back into the borough in the form of residential mortgages."

In that year, Dollar Savings made nearly $60 million in mortgage loans, but only $4 million were in The Bronx. In general, the report found that while 80% of the deposits in the five largest Bronx banks came from Bronxites, only 10% of these banks' assets were invested in the borough.

The report concluded that one large bank, Eastern Savings, granted only 10 mortgages that year in The Bronx, for a total of $260,000, while it invested more than $3 million out of the state, "mostly in the Deep South."

Dollar Savings Board Chairman Henry Waltemade denied that his bank practices red-lining, and he cited his obligation to depositors to make sound investments.

But the borough president's office insisted that investment in The Bronx can be profitable, pointing to the example of a smaller bank, Yorkville Savings and Loan, with only 3% of the assets of the six largest Bronx banks, which invested more in The Bronx than the six largest banks combined.

The report noted. "Dollar Savings has over 25 times as much in assets as Yorkville, and yet Yorkville made 197 Bronx loans in 1975, while Dollar made only 32."

Community organizer Fran Fucelli, who refers to a file of hundreds of rejected mortgage and home improvement loan applications, charged that Dollar "has been the leader in red-lining this community out of existence. They won't even give mortgages in Central Bronx neighborhoods that are still considered good. It's become the self-fulfilling prophecy, with the bank saying the neighborhood is going downhill and therefore not worthy of investment, and that in fact becomes a reality."

Community organizers are critical of the President's plans to save The Bronx because, in their eyes, it does not come to grips with the issue of red-lining.

This was confirmed by one close adviser to the President who, when asked if Carter really is going to be able to save The Bronx, said, "Of course not. How's his plan going to save The Bronx when the insurance companies and the banks are red-lining the hell out of it?"

The community organizers were also critical of sensationalist reporting on The Bronx which fails to discuss such mundane matters as red-lining, insurance payments for burned-out buildings, lapses in landlord services, etc.

Members of one group, the Morris Heights Neighborhood Improvement Assn., claim that they spent dozens of hours with representatives of CBS Reports for its feature, "The Fire Next Door," which termed The Bronx the arson capital of the world.

They insist that they took crews from the network to tenants' meetings, outlined the economic problems and showed positive alternatives of tenants organizing to retain and maintain their own buildings.

They are disappointed that none of this material was used in the program. Tenants' organizer Debby Smith, mother of two, said she was told by one CBS vice president that "positive stuff doesn't sell" and that red-lining was too complicated to go into.

There is no doubt that a great deal of "positive stuff" does go on in The Bronx. But compared to the dimensions of the problems, it often seems forlorn.

The thousands of tenant organizations, neighborhood councils, dedicated church people, shopkeeper associations, community-run medical programs are real enough.

But they are, in the main, efforts to spit against the wind. Big power in The Bronx—the banks, developers, government programmers—has proved indifferent to such activities.

Those people, when interviewed, tended to look upon community organizers as rip-off artists who must have some sort of scam going, or else why would they do it?

While there are, no doubt, poverty pimps—hustlers making a fast buck off programs to aid the poor—it is absurd to deny the obvious depth of idealism that persists, perhaps undeservedly, in The Bronx.

There are endless tenants' meetings and subsequent agitation over such seemingly minor matters as obtaining a promised buzzer system, a locked front door and locks on all doors, mailboxes that close and lights in the hallway.

But for many of these tenants, such small improvements are perceived as representing the margin between life and death. And unhappily, the crime statistics back up those perceptions.

The community organizers hurl the rip-off artist charge right back at the developers and banks who they claim are acting in concert with government agencies to make profit off the poverty that abounds.

In a recent article in the New York Daily News, one such activist, the Rev. John J. Jenik of the Bronx Church Coalition, charged that the announcement of Carter's South Bronx plan had unleashed a modern day "gold rush" to mine the poverty of The Bronx.

Organizer Debby Smith said, "The only thing that will come out of this is another housing project that doesn't work and a campaign poster for Carter." Gilberto Gerena-Valentin, a New York City councilman who represents the South Bronx area, strongly denounced what he considers Carter's hypocrisy:

"The South Bronx plan is part of the whole situation where people are being used and misused and promises are made which are not fulfilled. . . . The plan doesn't mean anything. The plan is just a gimmick to get people riled up . . .

"The plan is one that is going to take seven years, and the first three years all they are going to do is build a little 100 units of housing over here and 200 over there. Imagine, you have almost 65% unemployed and you need at least 30,000 new apartments.

"So I guess poverty is the haven for those who are making the money.

. . . Those developers and the contractors and the banks—they're laughing."

But Carter did go to Charlotte St. He was there, for however brief a time, when most of us would rather not have known about the problems of the South Bronx. Carter is the first President to formulate an explicit urban program.

He cares, but at the same time, he is a consummate politician who believes he cannot afford to care too much. Because of that contradiction, it seems sadly ordained that he will once again raise expectations only to ultimately betray them.

Congressman Garcia has a wait-and-see attitude toward Carter's South Bronx plan. But time is running out. He points out that there are 1.5 million U.S. citizens living in the Bronx and they are entitled to the same rights to life, liberty and the pursuit of happiness as anyone.

But in The Bronx, civil rights are seriously in question.

There has been a breakdown of those ordinary social services that one would have thought were the birthright of any American citizen.

The right to have one's mail delivered, for instance. It is commonplace for tenants who expect a Social Security check to line up at the mailbox on the appropriate day to abort a highly likely theft.

Many mailboxes are inoperative, punched out by thieves and vandals and left unrepaired by landlords. It is assumed in many neighborhoods that the police will not enter, even if called. So people stop calling.

Normal housing code inspections have been suspended or half-heartedly enforced because the relevant bureaucracy is undermanned and totally cynical about the prospects for improvement.

Perhaps the most serious deprivation derives from the fact that many people in The Bronx no longer believe in the possibility of public education. Josephine Perrella, a welfare specialist in the central Bronx, reports that even non-Catholic welfare recipients manage to scrounge up the $300 a year necessary to send their children to parochial schools.

It is difficult to find a schoolteacher who believes that The Bronx public school system can accomplish much. Discipline is lax, academic standards are virtually nonexistent and teachers are cynical. One well-intentioned Puerto Rican teacher in the South Bronx referred to some classes at her school as being "headed straight for Sing Sing"—which is "tracking" with a vengeance.

The blame is cast everywhere—on unruly students, parents who don't care, teachers who live in the suburbs and flee at 3 o'clock, unions concerned only about higher wages, administrators who are incompetent and without hope.

The blame is so widespread and the cynicism so pervasive that it is easy to lose sight of the fact that a child in The Bronx, particularly south of Fordham Rd., no longer has the full right to a public education.

So what?

"They're defined by the elite as an underclass—more up-front racists would say spics, niggers, welfare cheats—any subhuman category will do that makes this desperate poverty seem naturally ordained," says Mike Smith, the physician.

He explains how the elite of Manhattan manages to drive from Westchester past this cross between Calcutta and bombed-out Dresden and yet live with it.

"They don't see it. That's why they built the freeways cutting through here, so you can go fast enough not to have to see the people stuck here. Minutes from here, they sit in posh offices and dine at elegant restaurants as if none of this has anything to do with the decisions they have made for this city.

"It's troublesome to notice it; it's best ignored."

Smith spends his days finding pressure points in the ears of heroin addicts, an acupuncture technique, to calm them down. Perhaps he sees too much at Lincoln Hospital. Perhaps he should be more reasonable, more circumspect in his indictment, put things in perspective.

But the perspective of the South Bronx obliterates any such sensibility. As Father Snodgrass of the Episcopal church put it, "These kids are sentenced before they are grown."

Around the corner from his St. Ann's Church, Snodgrass and Garcia wander through what was to have been a showcase housing project for the poor—the Jose de Diego-Beekman housing project. Next door stands the half-vacated, burned-out Mott Haven housing project that rivals Diego-Beekman as a disaster area.

There on 139th St., 12-year-old Alfred Dennis is talking about the knifing on that very spot the day before.

Young Dennis has been accepted at the elite Brooklyn Tech High School for the fall. He beat out thousands of other applicants from far more privileged backgrounds.

No street bum, Dennis is a sound and sensible kid who wants to get ahead. But the daily world that he must deal with is grotesque beyond description, and the chances are great it will drag him under before he graduates from Brooklyn Tech.

The knifing the day before was a routine affair as Dennis and his friends tell it. There was an older guy who had recently moved into one of the projects—despite managements' boast of tenant screening—who had a history of raping little girls.

He continued this practice once in the neighborhood, and a father of one of his victims took matters into his own hands, confornted the rapist and ordered him to get out. The rapist pulled a knife and slit the throat of the father.

This was too much—even for this neighborhood—and the other residents pummeled the rapist near to death. The blood from all

this stains the sidewalk, but it is only one stain.

Soon the rapist is forgotten, and dozens of sadder, more miserable escapades are related as if the murders, rapes, knifings have become a village rite for marking the passage of calendar time.

Life is cheap. Perhaps not. Dennis'—anyone who met him would want to hug him and save him. But life is cheap because we have never been properly introduced to the victims.●

WRITER POINTS TO HELSINKI ADVANTAGES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

Mr. SIMON. Mr. Speaker, Ray Moseley, a Chicago Tribune reporter who covered the 1975 Helsinki Conference as a European news editor out of United Press International, had some observations which I think are sound.

Unquestionably, the Helsinki accord opened the door of freedom slightly in the Warsaw pact countries, including the Soviet Union. There are a great many things that are still wrong, and they have a long way to go before they achieve anywhere near the freedoms that we have in our country; but Helsinki was a great victory for the forces of freedom, and I am pleased to insert this article from the Chicago Tribune.

The article follows:

THAT HELSINKI "SELLOUT" EMERGES AS REDS' BIGGEST BLUNDER

(By Ray Moseley)

Four years ago this month, then-President Gerald R. Ford and Secretary of State Henry Kissinger were under heavy attack in this country, accused by their critics of selling out to the Soviet Union.

The occasion was the European Conference on Security and Cooperation in Helsinki, Finland.

The years since then have demonstrated how wide of the mark the critics were. In retrospect, Helsinki stands as a victory for the West and a colossal blunder by the Kremlin.

For years the European Security Conference was a major foreign policy goal of Soviet President Leonid Brezhnev. He wanted it to ratify the postwar frontiers of Europe—particularly the alterations in the German, Polish, and Russian borders effected by the Red Army—and to set the seal on his detente policy with the West, allowing Russia to give more attention to its problems with China.

The critics of Ford and Kissinger seized on this aspect of the Helsinki agreements and contended that the West was supinely acquiescing in territorial changes brought about not by international agreement but by force of Soviet arms.

In fact, the West merely accepted what it had no power or intention of trying to change in any event.

But the critics ignored, or dismissed, the fact that Western negotiators made the Russians pay a heavy price for this agreement. The price was a whole series of agreements that pledged the Russians and other East European states to open their borders to free emigration; to allow separated families to be reunited; to permit Western newspapers and magazines to be sold on their newsstands; to encourage a freer exchange of ideas, and to ease the working restrictions on Western reporters based in their countries.

In retrospect, this was such an unfortunate quid pro quo for the Russians that it is astonishing the Kremlin agreed to it. Yet the failure of many in the West to perceive the significance of the human rights provisions of Helsinki may help explain this failure of perception on the part of the Soviet leadership.

The Russian paid some lip service to these agreements; for example, they eased travel restrictions on Western correspondents. But they evidently calculated that any clamor stirred up by their failure to observe the other articles of the agreement would be short-lived.

In this, they underestimated the ability of the small group of dissident intellectuals in the Soviet Union to use the Helsinki accords for their own benefit. The dissidents set up unofficial watchdog committees to monitor Soviet compliance, or noncompliance, with the agreements, and were spurred on by Jimmy Carter's accession to the Presidency.

The Russians then were faced with three choices: Honor the Helsinki agreement. Continue to ignore them and let the dissidents have their say, hoping they would run out of steam. Crack down hard on the dissident movement.

The first was not a choice the Kremlin would even consider; honoring the Helsinki agreements would mean dismantling the whole authoritarian structure of Soviet power and turning the country into a kind of Yugoslavia.

Condoning the dissidents would be a dangerous course. Even though the movement is small, its influenece far exceeds its numbers, and the germ of contagion could spread through Soviet society.

Cracking down on the dissidents, the course that was chosen, further exposes the hollowness of the Soviet action in signing the Helsinki accords and carries grave risks for Soviet relations with the West.

Thus, Helsinki presented the Soviets with a no-win situation. Or at least that will be true if the West does not simply forget about the dissidents once the current clamor dies down and does not go on doing business with the Russians as usual.

If the West continues to make the Soviets pay a price for their unwillingness to adopt the rules of civilized conduct, then the Helsinski accords may be viewed in the Kremlin leadership for years to come as one of Leonid Brezhnev's greatest blunders.●

SPENDING CEILINGS AND REVENUE FLOOR

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. MATTOX. Mr. Speaker, Mr. REGULA and I intend to introduce an amendment to the second budget resolution for fiscal year 1979 establishing spending ceilings and a revenue floor that would reduce budget authority by $423 million and outlays by $873 million.

The first part of the amendment reduces budget authority by $288 million and outlays by $538 million, leaving a total of $500 million in budget authority and $500 million in outlays for resumption of the countercyclical program.

The second part of our amendment reduces budget authority by $135 million and outlays by $335 million to reflect the House-passed amendment to the comprehensive employment and training bill.

We offer this amendment because both the countercyclical and the public service employment programs are overfunded in this resolution as reported and our intention is to bring the level of funding for these programs down to what we might realistically expect to be enacted.●

LOGGERS NEED FAIRER TREATMENT BY THE IRS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. JEFFORDS. Mr. Speaker, today I am introducing legislation to resolve a problem that is particularly vexing to workers in the wood harvesting industry. This bill amends the Internal Revenue Code of 1954 to clarify the treatment of certain individuals who are independent contractors in the wood harvesting industry for the purposes of employment taxes.

The conferees on the Tax Reform Act of 1976 were particularly concerned with the problem of clearly defining who constitutes an "employee" as opposed to an "independent contractor." They directed that a study be conducted by the staff of the Joint Committee on Taxation and urged the Internal Revenue Service not to apply any changed position or any newly stated position which would be inconsistent with a prior general audit position in this subject area until the study had been completed.

In November, 1977, the General Accounting Office submitted a report entitled "Tax Treatment of Employees and Self-Employed Persons by the Internal Revenue Service: Problems and Solutions." As evidenced in that report, the Service has continued to conduct retroactive employment tax audits and has shifted its positions in interpreting the so-called twenty common law test questions utilized to determine whether a person is an employer or an independent contractor. The Service has continued to use conflicting and inconsistent standards, variously interpreted by Service employees, and have applied these standards inequitably to loggers and associated workers in the wood harvesting industry. Indeed, Commissioner Kurtz, in a speech 1 year ago to the tax section of the American Bar Association, stated: "Applying the 20 common law factors does not produce consistent results or easy administration. No single fact is conclusive. The degree of importance of each factor varies."

In January, 1978, my Vermont colleagues, Senator Stafford and Senator Leahy, and I jointly wrote to Commissioner Kurtz requesting that, in the spirit of the informal agreement between the Internal Rvenue Service and the Joint Committee on Taxation, and in light of the November, 1977, GAO report, he consider placing an indefinite moratorium on field audits in the logging industry until appropriate legislation could be developed to clarify the definition of independent contractor. Four months later, in a letter dated May 10,

1978, Mr. Kurtz replied and declined to intervene in the employment tax examinations of the loggers in the Northeast, Mr. Kurtz stated: "However, especially in a context where the Service's position has been clear since 1940, I believe we have an obligation to make current audit determinations consistent with long-standing revenue rulings subject to taxpayers' rights to disagree on the merits, unless and until there is a change in the law." It is clear, however, that in specific instances loggers in Vermont had their individual returns audited in 1972 and 1973 for the tax years 1968 through 1971, and received written determinations from the Service that they were independent contractors for the purposes of taxation and withholding. However, these very same individuals, not having changed their practices, were again examined by the Internal Revenue Service field auditors in 1976 and 1977 for the tax years 1972 through 1975, and are now found to have been employers who improperly failed to withhold income and social security taxes. These loggers are now saddled with judgments by the Internal Revenue Service that approximate or exceed their net worth.

The measure which I am introducing today is being introduced in the Senate by my distinguished colleagues from Vermont, Robert T. Stafford and Patrick J. Leahy. This bipartisan effort demonstrates our mutual concern that individuals engaged in wood harvesting industry not be unfairly and differentially treated by the Internal Revenue Service This proposal will institute two changes.

First, there are established three simple tests to determine whether an individual in the wood harvesting industry is an independent contractor.

Second, a new reporting requirement, similar to an Internal Revenue Service 1099 form, is established to ensure that independent contractors annually report to the Internal Rvenue Service all cash and other contractual transactions, including the names of sub-contractors and the remuneration paid each in a year.

For the further information of my colleagues, I am pending hereto a transcript of a report recently written by Mary Beausoleil from Lyndonville, Vermont. Mary is the spouse of one of Vermont's beleaguered loggers, Robert Beausoleil. This report details how a logging operation works and why the contracting system is key to the success of logging.

The report follows:

WOODSMEN VS. THE IRS: OUR SIDE

(By Mary Beausoleil)

From colonial days lumbering has been an important industry in New England. Though many of our forests have given way to farms, factories, houses and highways, there are still areas in which lumbering continues to be an important part of the economy. The Northeast Kingdom of Vermont, that poor and proudly beautiful corner in which we live, is one of these areas. The woodsman, less visible than the farmer, has nevertheless been recognized for his own distinctive contributions to our region from early days, as E. A. Kendall, a visiting Englishman, wrote of him in 1809:

"The strength and execution of his arm almost exceeded belief; and he fells the forest with at least as much activity as others plough the soil. Meanwhile, it is often amid cold and wet that all his labour is performed. It is often in marshes that he employes his axe whole days together . . ."[1]

The modern woodsman travels a sometimes dangerous, often exhilarating, and always independent road from the depths of our forests to the limber yards of neighboring paper mills, furniture factories, and sawmills. Now he is being ambushed on that journey by the Internal Revenue Service and the attack finds him poorly supplied and trained, with his forces scattered, and on an unfamiliar battlefield. The purpose of this paper is to help those who will, and others in similar situations, understand his plight.

HOW A LOGGING OPERATION WORKS

The journey from the woods to the mill begins when a tree is cut down by the feller, sometimes also called a chopper, whose job it is to cut down, limb, and remove the top from the tree. There are numerous skills required for this job: the feller must be able to cut down a tree without splitting it, he must be able to place a tree for the most accessible skidding, and he must know how to operate, sharpen and repair a chainsaw. In order to do his job, a feller needs equipment: two or more chainsaws and tools, a pickup truck to carry his equipment and fuel, and safety equipment—steel toed boots, hard hats, ear protection, and safety glasses. His investment may be anywhere from about $800 to $10,000.

In addition to his skills and equipment, a feller must have judgment. He decides where to begin cutting on a woodlot. He uses judgment as well as skill in deciding where to place a tree as he fells it, where to limb it and where to cut the top off. The feller's job is finished when the tree has hit the ground and has been made ready for skidding, the next step. The feller is paid a fee based upon the number of cords or thousands of board feet that he fells.

The skidding (moving a tree from the woods to a landing where it is cut up) is done by a man called a skidder, who works with a machine also called a skidder (in the man's honor) or, less frequently, with a bulldozer or a horse. The skidder must know how to operate his machine (including how to start its diesel engine in the winter); how to maintain and do repairs on it; how to hook a skid chain to hold a "hitch", the trees chained together for the trip to the landing. The skidder also must know how to operate a chainsaw, because there wil be times when he will need one. The skidder plans the skid trails and must know how to build a log or culvert bridge.

The skidder must use his judgment to plan his trails and load size to harmonize with the terrain and soil conditions. And he must always be trying to get the most work out of the machine without going past the point of diminishing returns, after which the machine's repairs will cost more than it earns.

A skidder will need, besides his machine or horse, one or two chainsaws, tools, and a pickup truck to carry tools and fuel to his job. His investment could vary from about $1000 (with a horse) to $80,000 or more. A skidder, too, is paid by the cord and by the thousand, and his job is finished when he has delivered the trees to the landing where they are cut up by a cutter or bucker.

The cutter is the person who turns a tree into marketable wood; to do this he must know the wood and the markets. He must know the market conditions—what is selling now—and the mill specifications for grade, dimensions, and permissible defects. Cutting the tree to those specifications, called "fitting the timber", requires a good deal of experience and judgment. The cutter makes the cuts that determine whether a tree becomes a valuable log or less valuable pulpwood.

A cutter must know how to operate, file, maintain and repair a chainsaw. He cannot leave the woods for a garage—much less call a mechanic—whenever he has trouble with his saw. And a cutter must file his saw several times a day, not every few weeks. Filing, so mysterious to the hobbyist woodsman, must be second nature to a cutter. Like a doctor studying his patient's urine sample, a cutter can tell from his saw's chips what is wrong with the chain: fine dust indicates dullness; long skinny chips indicate improper angles on the teeth.

The cutter's equipment consists of two or more saws, tools, peavies, axes, wedges, safety equipment, and a pickup to carry all this and his fuel. His investment may vary from about $800 to $10,000. The cutter's fee is determined by the number of cords and thousands he cuts up, and for an additional fee he may also pile the wood—some do, some do not. If the cutter chooses not to pile the wood, the trucker will get this fee and use it either to compensate himself for extra time spent picking up loose wood or to pay an assistant to help him load.

The trucker, the last link between the woods and the mill, picks up wood at the landing and delivers it to the mill yard. He is a skilled driver and loader operator. In addition, he maintains his truck and does at least some of the repairs on it and on the hydraulic loader. He must be familiar with mill specifications and market conditions. He must be a skillful buyer of parts and equipment, because parts and repairs is the part of his business in which he will be most able to save money by finding the best quality at the lowest price.

A trucker plans his work week, trying to balance the needs of his customers (for, example, more space on the landing) with the market and road conditions. He must know the conditions of town and state roads and bridges in order to plan his route. The trucker must also plan his load size to satisfy the state, which sets a legal load limit; his customers, who want to send as much wood as they can; and the trucker himself, who must keep in mind that at some point a large load may cost him more in truck repairs than it brings him in income. The trucker also has considerable bookkeeping responsibilities in securing permits and licenses and paying road use taxes.

A trucker's equipment will consist of a truck and loader, a pickup truck for looking at jobs and carrying parts and fuel, and usually a garage in which to do maintenance and repairs. The trucks used to haul wood are among the heaviest on the road because they require so much heavy-duty safety equipment (rear ends, brakes, transmissions, frames, e.g.), and they are expensive. A trucker's investment will run between $50,000 and $150,000. The trucker, too, is paid a fee based upon the number of cords and thousands of feet handled.

HOW THE CONTRACT SYSTEM WORKS

The contract system is the glue that holds the woods industry together. With one exception, all the mills buying pulpwood from our area let out contracts to wood producers. (Log buyers, however, with their much smaller volume and more valuable wood, usually do not use contracts.) A wood producer with a contract from a paper company can get that wood in two ways: he can buy it "roadside" from farmers and other stumpage owners who either get it out themselves or contract with someone to get it out for them, or he can contract himself with people to cut it from land on which he owns the stumpage rights.

This contractor, if he does not work in the woods himself, will find contractors to fell, skid, cut and truck. If he does work in the woods, he will perform one of these functions

[1] E. A. Kendall, *Travels through the Northern Parts of the United States in the Years 1801 and 1808*, 1809, as quoted by Robert E. Pike, *Tall Trees, Tough Men* (New York: W. W. Norton & Co., 1967) p. 52.

himself and find people to contract for the others.

This system of contracting is not new in the logging industry. In northern Vermont this is the way wood has been harvested for as long as the oldest woodsmen and farmers can remember. It is not a system invented to evade taxes, but one which goes back at least to 1761 when, according to Robert E. Pike, "an enterprising Yankee named Jared Ingersoll, of Connecticut, persuaded the Navy Board to give him a contract to procure eighty 'Mast Pines' (that is, two ship-loads) on the Connecticut River . . ."[2] Working with contractors is a usual and customary way of doing business in the lumber industry.

There are several advantages to this system, but the chief one is that people are generally more productive when they are working for themselves than when they are working for someone else. This greater productivity benefits choppers, skidders, cutters, truckers, and the mills in the form of higher earnings; and it benefits consumers of paper and wood products through lower prices.

The woods is one place where, by dint of hard work, good judgment and luck a person can raise himself from the lowest class of society, if that be where he began, to the middle class or higher, and he can be independent while doing it. Most skidders, truckers, and wood dealers began their careers as choppers or cutters. Horatio Alger stories are still commonplace in the woods business.

Some woodsmen prize their independence and their free time more than they do the money they could make. Contracting enables them to work whenever they want to and to have as much free time as they want. No employer would tolerate as much independence in his employees as woodsmen have.

Now, after doing business this way for as long as we have done business at all, we find the IRS trying to call some contractors "employees" and attach them to some other contractor, whom the IRS designates "employer". Then the IRS imposes all of the duties of employer on the contractor and assesses him for the back taxes, penalties and interest on his newly-designated employee's newly-designated wages. The result is an assessment that often may exceed the net worth of the assessee. Many of these same woodsmen now being audited and assessed have had their tax returns audited in the past without any IRS comment on the contractor issue.

IRS Commissioner Jerome Kurtz, in a speech to the tax section of the American Bar Association on August 6, 1977, makes extravagant estimates of the rate of tax avoidance among self-employed people. This estimate is disputed by the findings of the General Accounting Office in a report to the Joint Committee on Taxation of November 21, 1977. The GAO report also shows that these IRS assessments often have the effect of collecting taxes twice, which Congress has not authorized the IRS to do. In short, it appears that the IRS is destroying the incentive and independence of this and other industries because the IRS finds it more convenient to collect taxes by withholding, and withholding is impossible without a withholder. Do the people serve the IRS, or does the IRS serve the people?●

AUGUST 15 PROCLAIMED "RESCUE SYRIAN JEWRY DAY"

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. WAXMAN. Mr. Speaker, Governor Hugh Carey of New York has officially proclaimed today, August 15, 1978, as "Rescue Syrian Jewry Day." In light of the emphasis that both the administration and Members of Congress have rightly placed on the issue of human rights, I would like to take this opportunity to share with my colleagues the text of the Governor's proclamation.

PROCLAMATION

The serious plight of the Jewish community in Syria has been tragically highlighted by the recent reports of three Syrian Jews who were shot to death while attempting to escape the country which has denied them their basic human rights.

The Committee for Rescue of Syrian Jewry asserts that members of the Jewish community have not been permitted to emigrate from Syria since August, 1977, when a small number of young women emigrated to the United States. The Syrian government has rejected many applications from parents wishing to attend their daughters' weddings in the United States.

It is fitting that all New Yorkers recognize the plight of Syrian Jews who are denied the right of free emigration and are subjected to religious persecution, harassment and discrimination.

Now, therefore, I, Hugh L. Carey, Governor of the State of New York, do hereby proclaim August 15, 1978, as Rescue Syrian Jewry Day in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this thirteenth day of July in the year of our Lord one thousand nine hundred and seventy-eight.●

VICTIMS OF HEW IMMUNIZATION PROGRAMS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

Mr. DINGELL. Mr. Speaker, on behalf of my colleagues, Hon. JOHN E. MOSS and Hon. HENRY A. WAXMAN, we wish to notify our colleagues that they can expect to vote on the conference report on H.R. 13467, the 1978 supplemental appropriations bill, sometime on Wednesday, August 16. Amendment 18 of that report concerns the vaccination program for the Russian flu.

On July 20, 1978, the Members voted overwhelmingly (268 to 127) to amend H.R. 13467 by deleting all moneys to be expended for the purchase of vaccine for the Russian flu or the actual innoculation. The amount of $3 million allowed to remain for the program was directed to the National Institute of Allergy and Infectious Diseases for research only. If you accept the motion by the House managers to recede and concur in the Senate amendment of $8.2 million, you will not only be allowing this program to proceed with unresolved issues of liability and informed consent but will also be authorizing the expenditure of funds "to remain available until expended." The House has not yet approved the fiscal year 1979 appropriation for the flu program. We should not then allocate funds which may be used for that period and indeed beyond it.

We believe that this program should not be allowed to go forward with these unresolved questions and ask for your support in defeating amendment 18's motion to recede and concur.

In addition, we would repeat our arguments against implementing this immunization program. Inadequate hearings were held due to the fact that the Department of Health, Education, and Welfare came to Congress late with its request when vaccine testing was still not completed. HEW can provide only bland assurances as to the safety and effectiveness of the vaccine. HEW cannot pinpoint the risks to participants who may become involved and cannot cite possible side effects on health. HEW cannot estimate the financial burden that may be placed on the States, or the Federal Government, regarding possible liability suits.

We cannot condone the expenditure of $8.2 million of the proposed conference report when so many questions remain unanswered. Our questions are shared by other concerned citizens whose letters follow as addressed to Dr. J. Anthony Morris, Ph. D., Department of Microbiology, University of Maryland. Their letters relate to the questions surrounding the HEW's infamous swine flu immunization program, its resultant side effects such as Guillain Barre Syndrome, impact on public health uncertainties as to immunization programs, the liability question, and their own personal experiences that they or their family had following a swine flu shot.

We urge you to vote to support our effort to defeat Amendment 18's motion to recede and concur and hope you review this correspondence.

LONG ISLAND, N.Y., *August 5, 1978.*

Dr. ANTHONY MORRIS, Ph. D.,
Department of Microbiology,
University of Maryland,
College Park, Md.

DEAR SIR: I saw you one the Donahue Show and I listened to you with great interest. I am presently suffering from the Barre syndrome. I received the Swine flu shot around the end of October '76, but I really didn't become fully aware of the disease till the end of January '77. My Barre syndrome began slowly with numbness of extremities and is leaving slowly. I was on 100 milligrams of prednizone, but now I am on 17 milligrams every other day.

When I was in the hospital my doctors gave my illness all sorts of names such as inflammatory poly neuropathy and idiopathic polynuerities or simply chronic nuerities. After investigating the matter further I found out that these were euphemisms for the famous Guillain Barre Syndrome.

I understand you are a busy man and your time is precious. If I don't hear from you this time I do hope I hear from you sometime in the future.

In regards to my personal data; I am 30 years old, married with one child and I work as a supervisor of bail recommendation interviewers in a N.Y.C. criminal court.

I noticed on the T.V. guide that you'll be appearing on the Tomorrow show on Wed. Aug. 9, I look forward to seeing you there.

Thank you,

CARLOS SIMONETTI.

MERIDIAN, MISS., *Aug. 8, 1978.*

Dear Dr. Morris: After feeling frustrated for answers for over 18 months, I felt compelled to write to you after seeing you on the Donahue program in the hopes that you can clarify a few facts for me.

My sister-in-law, who is 29 years old, developed loss of coordination, numbness,

[2] Robert E. Pike, "Tall Trees, Tough Men" (New York: W. W. Norton & Co., 1967) p. 46.

trembling and slurred speech three weeks after receiving the swine flu shot. The symptoms came and went until January 1977, when she was hospitalized and diagnosed as having M.S. By late January '77 or Feb. '77 the symptoms disappeared. She has led a normal life, has had a baby, and has felt fine until 4 weeks ago when she was hit with a severe attack. She is mostly paralyzed, has numbness and pain, slurred speech and difficulty swallowing.

From what I have read about M.S. it isn't known what caused the disease but it is believed that it could be caused by a virus or toxins. Is it possible, then, that the swine flu shot triggered the M.S.? Have you heard about any other cases of M.S. developing several weeks after the shot was given? Since the swine flu symptoms and M.S. symptoms are so similiar is there no link between the two that you have found? Or was all this just pure coincidence?

I know that you are a very busy man, but you are my last resort in obtaining some frank, honest opinions. Please respond!

Sincerely,

DAWNELL D. SANDS.

DALY CITY, CALIF.

DR. J. ANTHONY MORRIS: Since December of 1976, I have been trying to find some help. I had the Swine Flu shot November 12, 1976 and shortly after suffered from numbness and weakness of the left side and arm, and had to give up my business.

I am unable to do a day's work and feel that I have been given the runaround in trying to get information from the hospital, where I got the shot.

Wednesday July 26, 1978 I watched the Donahue Show on T.V. and copied the information given. Your address was given.

I have been to three doctors and have received various opinions and was advised by one to take Vitamin C. None could give me a definite answer as to the cause of my problem.

I feel that my weakness is the result of the Flu shot. I would appreciate any help you can give me.

Sincerely yours,

STELLA RESH.

ROCHESTER, N.Y., *August 9, 1978.*

J. ANTHONY MORRIS, M.D.
Dept. of Microbiology,
University of Maryland,
College Park, Md.

DR. MORRIS: I am writing to you pertaining to your guest appearance on the Donahue Show August 2, 1978.

I received a Swine Flu Shot in December 1976. 1977 became the worst year of flu-like illness I have ever had.

I have had a strange sensitive feeling on one side of my body for almost 8 months. It makes me feel weak & sick at times. It is not a paralysis, tho.

Is there any possibility that I could be having a side effect that relates somewhat to the Guillain-Barre Syndrome?

I have enclosed a 15c stamp and would appreciate a reply from you regarding the aftereffects of the shot.

Sincerely,

JEANNE HERDEMAN.●

VARIETY CLUBS TO HOLD FASHION SHOW AND LUNCHEON

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. LONG of Maryland. Mr. Speaker, on September 11, the Ladies' Auxiliary of Tent 19 (Baltimore) of Variety Clubs International will host a noteworthy fashion show and luncheon:

Fall designs by the award-winning couturier Oscar de la Renta will be shown, with Mr. de la Renta himself in attendance; Eric Morley, distinguished international president of Variety Clubs will fly in from England especially to be present at this event; and all proceeds from the luncheon and fashion show will be donated to the Pediatric Oncology Isolation Unit at Johns Hopkins Hospital.

The outstanding charity work of Variety Clubs International, focused on assistance to needy children, has yielded millions of dollars to benefit birth defects research, pediatric cancer care and research, physicaly and mentally handicapped children, and malnourished youngsters. Baltimore's Tent 19 has "adopted" the pediatric cancer isolation unit, used in the treatment of young children with leukemia and similar diseases, as its fundraising effort.

My best wishes go to the Ladies' Auxiliary of Tent 19 for a successful fundraiser for this most worthy cause, and my congratulations to Mr. de la Renta and Mr. Morley for their willingness to aid in this endeavor.●

MIT PROFESSOR POINTS TO NUCLEAR DANGERS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. SIMON. Mr. Speaker, a member of my staff called my attention to an article by Prof. Victor F. Weisskopf of Massachusetts Institute of Technology, that appeared in Physics Today. Professor Weisskopf is also president of the American Academy of Arts and Sciences.

His remarks are a frank discussion of where we stand in the nuclear area and suggest clear reasons for international restraint.

Two sentences in his article I especially call to the attention of my colleagues in the House and the Senate because they bear upon the decision by the administration and by Congress on whether we should promote the neutron bomb. In his article, Professor Weisskopf says:

As time passes the weapons multiply and become more efficient; they are adapted to all kinds of purposes, such as the neutron bomb. They are therefore more likely to be used.

In addition to its military liabilities, the neutron weapon increases the probability of the use of nuclear weapons and diminishes presidential control of nuclear weapons.

The neutron bomb is only referred to in the article and is not the primary thrust of the article, but I thought I would call that particular section to the attention of my colleagues.

What he does say clearly is that there has to be much more public attention to the issue. He says with accuracy:

In nuclear matters, the public is now interested only in the relatively unimportant issue of nuclear power. This must change. The issue of getting rid of nuclear armaments must receive more public attention, support and pressure than it receives today.

I urge my colleagues to read the article.

A PERIL AND A HOPE

WITH THE DISCOVERY OF FISSION MANKIND ENTRAINED COSMIC FORCES WITH HUMAN IRRATIONALITY; WE MUST FACE THE PROBLEM OF REDUCING THE TENS OF THOUSANDS OF NUCLEAR BOMBS READY TO BE RELEASED IN SECONDS

(Victor F. Weisskopf)

Forty years ago Otto Hahn and Fritz Strassmann discovered fission. The existence of this phenomenon could have been predicted before it was found if the theoretical physicists at that time had shown a little more inventiveness: It is a simple consequence of the facts that the Coulomb repulsion increases with the square of the number of protons and the nuclear attraction only with the first power. In 1938 enough was known about the nuclear force that it would not have been too hard to conclude that the nucleus must become unstable against a split in two parts around atomic number $Z = 90$.

Although the fission process itself was not foreseen, the possibility of a nuclear chain reaction was indeed thought of in the early 1930's by Leo Szilard. The implementation of such a recation with fission would depend upon the number of neutrons released in the process. This number was not easily predictable; even today it would be hard to determine it theoretically from our knowledge of the nuclear forces. That this number is considerably larger than unity does not appear to be based upon any fundamental property of the nuclear forces. There are no very deep reasons; it might have been less than one, but it was not.

COSMIC FIRE

The fact that the number of neutrons emitted per fission is around two seems to be very minor importance to Mother Nature. Apparently the only major roles of the fission process are to provide an upper limit to Z and to influence to some extent the abundance of fission products. Apart from this, we may forget about fission if we are interested only in the major features of our world. This is even more true about the chain reaction itself. Nature has not made must use of it; recently evidence was found that a natural chain reaction happened a billion years ago below the soil of Africa; but, to our knowledge, nuclear chain reactions have never played any role in the development of our Universe.

Do, we humans count in this Universe? If we do, my previous statement is totally wrong. For humankind the existence of this chain reaction is of decisive importance, probably greater than we can fathom today. We know that fission can be used destructively as an explosive and constructively as a source of useful energy. It is therefore a very effective instrument of power, both political power and physical power.

This, in itself, is nothing new in the history of the natural sciences. New discoveries have led to new weapons, to new energy sources, and to countless applications from which a lot of good has emerged—as well as some results that have not been so good. (In the last 20 years it has been fashionable to emphasize the "not so good," but let us be objective and fair.)

There is indeed something different in the latest developments of physics, which I will call "the leap into the cosmos." Previously we were dealing mostly with processes similar to those occurring in our terrestrial environment. In the last few decades, however, we have taken a decisive step: We now deal

with extraterrestrial phenomena. Nuclear physics and subnuclear physics deal with the excitation of quantum states that are beyond the reach of ordinary terrestrial energy exchanges: In general, nuclear reactions do not take place on Earth. Nuclear dynamics is dormant in our environment. It is of course true that natural radioactivity occurs on Earth, producing the heat in the depths of our planet, but these radioactive elements are the remnants of a very different age and of a different environment: They are the last embers of the cosmic explosion that produced terrestrial matter.

Today we physicists deal with cosmic processes in which many millions of electron volts per atom are exchanged rather than the few electron volts that are customary here on Earth. Of these cosmic processes, the fission chain reaction was one of the first to lead to major technological applications. Two hundred million electron volts per atom, twenty million times more than the most powerful chemical reaction. This is cosmic and not ordinary fire.

The first major application was a destructive one, which ended World War II by killing a quarter of a million people with two bombs. It is not surprising, therefore, that people are fearful and bewildered, and that they have misgivings even in regard to the more benign applications. The arm of technology grew by a factor of a million within the lifetime of one generation.

In 1940, however, we took little time to speculate on these questions. The discovery of fission came at a dark time in the history of mankind. Germany was in the grip of a collective mental disease of unparalleled virulence. The whole world was threatened by the expanding cancer of Nazism; the Germans discovered fission, and they might have used it if it had been usable at that time. Many of us physicists—those who were not yet too deeply involved in the development of radar, which saved England from being destroyed—worked hard to improve our understanding of fission. Many of us hoped that the number of neutrons per fission would be low enough to prevent the making of a bomb. But it was not.

HISTORY TAKES A TURN

A tremendous collective effort began. Within two years, the first nuclear chain reaction was produced under the leadership of Enrico Fermi, and within another three years, with the collaboration of many European physicists—in a truly international effort—a nuclear bomb was developed. On 16 July 1945 the first nuclear explosion was set off in a desert of southern New Mexico, at a place called Jornada del Muerte (a Spanish army perished there two hundred years ago). Human ingenuity had succeeded in the release of cosmic forces that were hidden and unknown 13 years earlier, when James Chadwick discovered the neutron.

Some of us saw this event, which, at our observation post, had the intensity of twenty midday suns: an expanding fire ball, white, and then yellow and orange, rising majestically into the sky, surrounded by a halo of blue light. The air was fluorescent with radioactive radiation.

Here it was: The laws of Nature did admit an explosive nuclear chain reaction. Because of some little detail in the equations of nuclear matter, the number of neutrons per fission was large enough. The history of mankind took a turn.

From then on, political developments, and no longer scientific ones, determined the course of events. Two bombs were exploded over Japanese cities; over 200,000 people lost their lives. Why two bombs? Why over populated areas? I am not sure I can answer these fateful questions. The bombs ended the war; they made an armed invasion unnecessary and thus perhaps saved more people than they killed. But Japan may have given up anyway under the pressure of a near defeat and a Soviet declaration of war. Whatever the answer, the stigma has remained upon the United States, as the first and only country to have used nuclear bombs. I can not tell you whether the decisions were right or wrong—I don't know.

The war ended, and it was physics that had helped to win it with radar and the atom bomb, as well as many other new gadgets. Physics and the physicists moved onto center stage in public life; the significance of basic physical science became generally recognized. New means of research, technical and financial, suddenly were available to physicists. The radar technology created sophisticated new methods for producing electromagnetic waves of all kinds. Maser and laser physics emerged from it, and with it a deeper understanding of the fundamental interactions of light and matter, leading to quantum electrodynamics, as well as of the structure of solids under various extreme conditions.

Nuclear and subnuclear research experienced an almost explosive development, with an ever growing array of cyclotrons, synchrotrons and linear accelerators. The cosmic scope of physical research widened and penetrated into new realms of phenomena:

On the microscopic side, into the GeV region—with its mesons, hyperons, antiparticles, heavy electrons and quarks, entering the innermost structure of matter;

On the macroscopic side, into plasma physics, space physics, a new cosmology and astrophysics—with its quasars and pulsars, and the observation of the optical reverberation of the birth of the Universe, the famous three-degree radiation in space.

The physicists experienced a tremendous surge of support for their activities. This in turn led to an unparalleled expansion of their fields of endeavor and to a large range of new technical applications, both destructive and constructive, such as fusion bombs, rocketry, transistors, space travel, computers and many more. The physicists now moved to the center of public attention. It was their enthusiasm and self-confidence, spurred by their successes during and after the war, that brought them into contact with the great social and political problems of the times.

Many tried, and some succeeded, to bridge the "communication gap" between politicians and scientists. Attracted by great, optimistic ideas of how to establish a new order in the world they had helped to engender, they embraced the idea of international control of nuclear explosives. They hoped this would stop all future wars, and direct the applications of fission and fusion away from destructive bombs and towards an unlimited benign source of energy for all mankind. Some of them, perhaps, also experienced a reaction against their feeling of guilt for having been involved in the creation of a device that could annihilate all mankind.

POWER—AND ANXIETY

The political realities, however, were not conducive to the ideals of those who tried to unite the nations. Stalinism in the Soviet Union, and nationalism all over the world, including our own country, led to a breakdown of attempts to lift nuclear matters beyond national sovereignty. Of course, neither the physicists nor the politicians had much experience in dealing with such complicated technical matters on an international scale. With the development of fusion bombs, the nuclear arms race began in earnest.

Among the benign implications of nuclear physics, there still remained the great promise of unlimited energy through the use of fission reactors and, perhaps later, through controlled fusion. But over the decades following World War II, doubts were raised even on that account. Because the yield per atom is so many million times higher than in any conventional way of producing power, the consequences of accidents caused by human error are much worse. A nuclear power station certainly can not explode like a bomb, but the possibility of accidents that could spread large amounts of radioactivity can not be completely excluded. Even if human ingenuity and care can keep the accident rate at an acceptable level, the public and some of the experts look with some anxiety at this "extraterrestrial way of producing energy in our terrestrial abode. The fact that the public is acquainted with this cosmic force only through the experience of nuclear bombs strengthens this anxiety. Furthermore, the use of fission for power constantly creates new raw material for bombs, which, in a nationally and politically divided world, adds to the danger of further spread of nuclear weapons.

The dangers and the promise of nuclear-power generators are today in the center of discussion; many studies have been undertaken and more are underway. Emotion and vested interest unfortunately have led to a sharp division of opinions, and the arguments used on both sides are too often beyond the limit of dignified scientific discourse.

APOTHEOSIS OF IRRATIONALITY

At the same time the nuclear arms race between the superpowers continues in an almost uncontrolled way. The Soviet Union and the United States assemble increasing numbers of bombs, and perfect their efficiency and their mode of delivery. More than 50,000 nuclear bombs are deployed and ready for use. Each country now has the capability of destroying the other many times over. Current science is totally unprepared to discuss intelligently, let alone to predict, the totality of horrors that would result from an all-out nuclear war. Consider only the effects of the vast amounts of radioactivity released upon our environment; these would be so devastating that the condition of life would be permanently and dangerously altered, without much hope of recovery. Even the detonation of a single weapon of modern design over a city would be a catastrophe unprecedented in human history. Yet two large countries keep building more and more of these horrendous means of annihilation, knowing well that any actual use of these devilish gadgets would mean certain destruction of a large part of the world—making it unfit for habitation, with little chance of a recovery of civilization. Why? Why? Why? Only because neither side knows where to stop, and both go on producing nuclear weapons intended for all sorts of imagined missions. Only because each party is under the grip of an unrealistic measure-countermeasure syndrome. It is the apotheosis of irrationality and antilogic; it is the triumph of craziness.

In comparison to this overwhelming threat the nuclear power controversy dwindles to picayune dimensions. What are the dangers of nuclear-power stations compared with the dangers of tens of thousands of bombs that can be released within seconds by a small group of human beings? What is the so-called "worst reactor accident" compared to nuclear war? The damages done by the former, which would come mainly from effects of radiation—serious as they are—are far less than the effects of a single bomb. Now think of the number of victims of a nuclear war and its irreparable effects on our environment, on our souls, alive or dead, and on our planet as a whole.

And the probabilities? Nobody really can estimate the probability of an all-out nuclear war, but one fact is clear: With all those bombs around, it is not zero. Nuclear power may be too risky, or it may not; I do not pretend to know the answer. But I know that tens of thousands of stored bombs are too risky.

Undoubtedly, it is extremely improbable that the US or the Soviet government will decide outright to set off a nuclear war, thereby annihilating both countries simultaneously. However, a nuclear clash may develop from local wars between smaller countries that have acquired, or will soon acquire, a few nuclear weapons, and may make use of them in desperation. Or it may develop from an escalation of the use of so-called "tactical" nuclear weapons, which are meant to be applied in defense against aggression by conventional weapons. The tens of thousands of nuclear bombs are a mighty tinderbox; they may explode whether it was directly intended or not.

IS THERE A WAY OUT?

I am only too well aware of the difficulties in the way of reducing that danger. I know also that the presence of these weapons is given credit for having prevented a world war for a longer period than ever before. But, as time passes, the weapons multiply and become more efficient; they are adapted to all kinds of purposes, such as the neutron bomb. They are therefore more likely to be used. The outbreak of a volcano becomes more violent after long pauses. Here we have a man-made volcano: It could be removed.

I used the phrase "almost uncontrolled" in referring to the nuclear arms race. There have indeed been a few hopeful attempts, albeit small and tentative, that slowed it down a bit. One was the cessation of bomb tests above ground; the other was the first SALT agreement six years ago, which will, I hope, be expanded in the near future. They are not much, but they are two small steps in the right direction, and we can be proud that some of our colleagues were active in bringing them about.

The difficulties of going further are enormous. Some raise the fear that the other side will gain more, or might even dare to take the tremendous risk of a first strike regardless of the consequences. There are those who say that a free society can not compete in terms of nuclear armaments with an authoritarian system in any other way but through an all-out technological arms race. Voices are heard that we should not be too confident of negotiated contracts with our opponents; that we should rather assure a reasonable survival rate by a large effort of organized civil defense in order to make the population as ready as one can be for the great holocaust. I honor the intentions of those who advocate such measures but, to make them effective, if this is at all possible, would thoroughly change our way of life. I can not help sympathizing with the majority of our population, who do not want to live under a constant awareness of mankind's ultimate self-destruction.

We can not go on forever living under a continuous threat of annihilation. There must be ways and means to decrease the number of nuclear bombs. Certainly this task can not be accomplished from today to tomorrow; it is bound to be an extremely difficult process.

THE FOREMOST PROBLEM

There is a hope and not only a peril in the nuclear development. The growing recognition of this awful threat may still change the attitudes of the sovereign states, to lead slowly to the recognition that ultimate military preparedness is much less safe than a reduction and eventual abolition of nuclear weapons. J. Robert Oppenheimer said in 1945, shortly after the end of the war:

"The point is that atomic weapons constitute a new field and new opportunities . . . when people talk of the fact that this is not only a great peril, but a great hope, this is what they should mean. I do not think they should mean the unknown, though sure, value, of industrial and scientific virtues of atomic energy, but rather the simple fact that, because it is a threat, because it is a peril and because it has special characteristics, there exists a possibility of realizing, or beginning to realize, those changes which are needed if there is to be any peace."

The task must be faced; it is the first and foremost problem of our time. Any one of us can and should play a role in this task, as a scientist and as a human being. The most important step is now setting of priorities. The reduction and eventual abolition of nuclear weapons must have absolute priority; everything else must be subordinated to this goal. The consequences of nuclear war are irreparable, whereas the consequences of other setbacks in world politics can be corrected.

This change of priority is essential and can be achieved only by constant pressure of public opinion. Remember how effective public opinion was during the Vietnam War. In nuclear matters, the public is now interested only in the relatively unimportant issue of nuclear power. This must change. The issue of getting rid of nuclear armaments must receive much more public attention, support and pressure than it receives today. There is much too little discussion of these essential questions: Do we not already have enough bombs for deterrence? How would the Soviet Union react to a restraint in development or to a cutback? We must find that right balance of risks most conducive to lowering the levels of nuclear armaments. What is needed is a combination of new technical ideas and common sense, based upon humane considerations.

Only when we see a chance of success in the abolition of nuclear armaments can we scientists be proud of the achievements we gained during the last decades: our leaps into the cosmos; our penetration into the intermost structure of matter; our achievements in getting at the basic processes of life, the workings of DNA and RNA, and the tremendous developments in our knowledge of organized matter.

It is not the first time in history that human greatness and human folly grew side by side in the same period. Think of the Gothic cathedrals, together with the senseless and murderous crusades 700 years ago. Think of the blossoming of art and philosophy during the Renaissance, along with the decimation of Europe's population during the religious wars, 500 years ago. Think of the music of Mozart and Beethoven, and of the slave ships plying the oceans, 150 years ago. Think of the greatest achievements of scientific thought, quantum mechanics and relativity theory, and the ascendancy of the murdeous periods of Nazism, Fascism and other authoritarian regimes, 50 years ago. Finally, think of the great achievements of science today, together with the folly of the nuclear arms race.

The last folly is more serious than all the previous ones. We are dealing with cosmic forces. Our epoch may be the end of what has been a great age of mankind, great in spite of all the strife and wanton destruction. Our age has been great in its achievements in art, architecture, literature, music; great in its numerous social innovations, in spite of the fact that in most parts of the world social organization and the quality of human life leaves much to be desired; great in its medical successes, which have resulted in the doubling of the average age of man; great in its means of food production, communication and transportation—which makes a united world without hunger and want a possibility, if not a reality. And, last but not least, ours has been a great civilization because of the constant growth of our insights into the mysteries of Nature, the continuous opening up, leaf by leaf, of the blossoms of truth and wonder.

THE AGE OF INSIGHT

If we do not succeed in abolishing the nuclear arms race and a nuclear war results, all these great steps will be brought to naught. The twentieth century will then be remembered as the time of preparation for the great catastrophe, and science would be seen as the main culprit and the main instrument of destruction. The twentieth century ought to be remembered as the age in which mankind acquired its widest and deepest insights into the Universe, and learned to control its martial impulses.

Let us hope, strive and act so that it will.

(This article is an adaptation of a talk given 24 April 1978 at the Washington, D.C. meeting of The American Physical Society, as part of a commemorative session marking the fortieth anniversary of the discovery of nuclear fission.) ●

INCOME DISREGARD ONE STEP IN THE DIRECTION OF WELFARE REFORM

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

Mr. KASTEN. Mr. Speaker, reforming our Nation's welfare system continues to escape the grasp of Congress. Yet, there are few Government programs which frustrate the American people more than a welfare system that consumes more and more of their tax dollars with little regard for how the money is being spent or whether it is accomplishing its desired objective.

The main goal of welfare in the United States, as perceived by most Americans, is to provide a decent, adequate level of support for those who truly cannot care for themselves. Over the years we have built an array of programs and services to aid these individuals.

The American taxpayers' support of this system has indeed been generous. By the end of 1977, the total amount of money spent cumulatively on public welfare by Federal, State, and local governments since the war on poverty began in 1964 was roughly $300 billion.

Yet, the American people's generosity has been stretched to the limit. They see a welfare system that is inefficient and ineffective. The rate of fraud is often high. Programs overlap and inequities abound throughout the system. The goal of moving people off welfare rolls and into the work force is elusive.

They look to their elected officials for solutions. And, it is we who must respond.

GAO LOOKS AT WISCONSIN

In late 1976 the Milwaukee Sentinel, one of the major newspapers in my State, began a series of articles on welfare abuse in Wisconsin. The newspaper quoted a case worker in the county welfare department: "There's no need to get into welfare fraud. You can rip off the system legally." That frank observation was followed by a strong journalistic effort to document incidents of welfare recipients who have learned to take advantage of the system and indeed "rip off" the taxpayers of Wisconsin.

Because of the concern generated in my State, I asked the General Accounting Office to conduct a major investigation of Wisconsin's aid to families with

dependent children (AFDC) program to pinpoint where abuses were occurring and to suggest possible areas of reform. The results of that 18-month investigation were recently released and confirm that Wisconsin has a costly, and in some cases, very inefficient welfare system that provides payments to a great number of people, some of whom earn higher incomes than families not on welfare.

GAO made these general observations about Wisconsin's welfare system:

Between 1966 and 1976, the State's AFDC caseload growth rate more than doubled the Nation's, jumping 473 percent, compared with the national average of 228 percent.

The caseload increase—from about 11,000 to 64,000 families per month—is fifth highest in the Nation.

The average monthly number of AFDC families jumped another 5,000 to 69,000 in the first 6 months of 1977.

The AFDC case error rate was cut in half from 1973 to 1977, and ranks 20th lowest in the Nation.

The AFDC program in many areas lacks efficient, effective and businesslike management.

The GAO report should serve as a catalyst for discussion to enable us to design a welfare system in Wisconsin that shows compassion for the poor who are most in need of concern for the taxpayers who are understandably upset over the waste, fraud, and inefficiency they see in the current system.

To accomplish that task will take the cooperation of Federal, State and local officials. Clearly, changes must be made at all levels of government. Just as it is easy to spread the blame for our problems with the current welfare system, so it is also necessary to accept the responsibility and challenge to bring about those changes.

FEDERAL INCENTIVES FAIL TO MOVE PEOPLE OFF WELFARE

One of the greatest inequities in our welfare system is that it allows people with high incomes to receive welfare while others who earn less are struggling on their own to make ends meet.

The Federal work incentive rule, or so-called "income disregard" provision, was designed to allow welfare recipients to work themselves off welfare by allowing them to disregard, for eligibility purposes, a certain portion of their earned income.

Under present law, States are required, when determining need for the AFDC program, to disregard the first $30 earned monthly by an adult plus one-third of additional earnings. Costs related to work are also deducted from earnings in calculating the amount of the welfare grant.

The basic intent of this rule is to provide a work incentive so that a person's welfare grant is not reduced $1 for every $1 earned on the theory that a recipient would be less likely to accept employment if that occurred.

GAO reviewed the results of five separate studies that have been made of the effects of the income disregard provisions. Their conclusion:

Despite some increases in employment, all the studies basically came to the same general conclusion that the income disregard provisions did not succeed in causing welfare recipients to become so self-sufficient and self-supporting that they were able to terminate from welfare. That is, the provisions did not result in reducing AFDC caseloads and costs, the major intent as envisioned by the Congress. There was an increase in the level of income which a recipient could earn and still maintain eligibility for AFDC. Therefore, it was more difficult and unlikely for an AFDC recipient to work his or her way off welfare.

The conclusions from these studies apply to Wisconsin as well. At my request, GAO further examined the effect of the income disregard provision on Wisconsin's AFDC program and the results were disturbing:

Based on a statewide projection of data from several counties, over 200 AFDC families in Wisconsin have incomes of over $12,000 a year and are still collecting welfare.

Of 16 specific cases studied, it was apparent that recipients were not working themselves off welfare. In half of the cases studied, recipients earned more than $835 a month or more than $10,000 a year.

In one case, a Wisconsin family had monthly earnings of $1,029. By using Federal work incentives rules, the family was able to disregard 87 percent of that income and receive a welfare grant of $379, for a potential yearly income of $16,890.

Through application of the work incentive rules, a family with monthly child care expenses of $400 can earn up to $21,253 a year and still receive welfare benefits.

CONGRESS SHOULD LIMIT AMOUNT OF INCOME ONE CAN EARN AND STILL COLLECT WELFARE

Few Americans begrudge a truly needy person the money and services that our welfare programs provide. Most, however, are enraged at the thought of someone who is able to care for himself continuing to be subsidized by the taxpayers.

Our welfare system should provide help only to those in need and once that need has ended, welfare payments should stop when a family is able to support itself.

Clearly the present system of income disregards and deductions for work-related expenses has not had the desired intent of moving people off welfare rolls. In the past we have been reluctant to set arbitrary income limits, but it has to be done. We just can't go on allowing families with high incomes to qualify for welfare. The payments must end when a family can reasonably support itself.

Whatever income limit we establish must occur at a wage level reasonably above a family's basic needs, so that there remains an incentive for a welfare recipient to work. However, that recipient should know in advance that at some point—when his earnings reach a certain level—his welfare benefits will end.

Therefore, I propose that the Department of Health, Education, and Welfare add to its regulations governing the administration of the AFDC program a requirement that each of the States establish a ceiling on the amount of earnings one can receive and still collect welfare.

The States—not the Federal Government—should make that decision.

Federal regulations now require that State AFDC plans specify in dollars the statewide standards to be used for determining the needs of applicants and recipients and the amount of the assistance payment. The need standard is the monthly amount, based on family size, which States consider necessary to cover the cost of essential items such as food, clothing, shelter, and utilities. An applicant's income is compared against this standard to determine financial eligibility for welfare.

These decisions are made by the States. I propose that the States also be required to determine when a recipient's income has reached a level where he no longer should be eligible for welfare. That determination should be linked to the standard of need, as defined by each of the States.

CONCLUSION

Mr. Speaker, the bill I am introducing today will hopefully spur congressional debate on the issue of establishing a limit on the amount one can earn and still collect welfare.

There no longer is a question that the current system of income disregards has failed its task of moving people off welfare. Various new formulas have been proposed to alter the "30 plus /3" rule, but none has received approval by Congress.

My approach will not penalize those families who must depend on their monthly welfare checks to meet their basic needs. Rather, it prevents those who can reasonably support themselves from taking advantage of a program designed to help the poor.●

FEDERAL HOUSING POLICY AND THE SOUTH BRONX

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. WAXMAN. Mr. Speaker, it is the awesome devastation of the housing in the south Bronx which overwhelms all who live there and walk its streets. Block after block of once proud structures have decayed into unspeakable shells hardly fit for anyone. But thousands are forced to endure these conditions.

The idea of rehabilitating dilapidated housing has grown enormously in recent years. Urban homesteading is one offshoot. Federal encouragement of private investment in public housing complexes is another. The Department of Housing and Urban Development sponsors these endeavors. But a recurring problem is that although sufficient incentives for private investment in public housing projects—as opposed to public ownership—has been provided, no guarantees have been secured that the housing will be properly maintained. More often than not, a new cycle of decay follows rehabilitation.

Robert Scheer of the Los Angeles Times has examined the implications of Federal housing policy in the south Bronx. His article is not only an indictment of current practices, but the point of departure for the critical reexamination of urban policy which is so desperately needed.

I commend Mr. Scheer's article to the attention of my colleagues:

REHABILITATED HOUSING A COSTLY FAILURE

(By Robert Scheer)

Four-year-old Carmen had fallen from the fifth-floor tenement window and the congressman walked up the stairs to pay his respects. He could have used the elevator, but its floor was covered with urine.

The light fixtures on each landing were ripped out, there were huge gaping holes in the sheet-rocked hallways, the walls were covered with the foulest graffiti, and it was necessary for Rep. Robert Garcia, who represents this South Bronx district, to sidestep the feces in the hallway.

The mother was not at home; she was with her child, who was in critical condition at the hospital. But kids "from somewhere" had already burglarized the apartment.

Welcome to Jose de Diego-Beekman housing project, where upwards of 6,000 people live in the largest government-subsidized effort at rehabilitated housing in the country.

The federal government has allocated $234 million this year for similar efforts at rehabilitating older buildings around the country. The case of Diego-Beekman illustrates some inherent weaknesses in this federal program to aid the poor and the cities.

Five short years ago, Diego-Beekman was billed as a showcase project, with fancy graphic numerals outside each of the renovated five- and six-story tenements. It was nationally celebrated as a model for urban renewal.

There is not much disagreement that the showcase has become a jungle. The hallways are dark, muggings and burglaries frequent. Small children found playing in the rubble of burned-out buildings that surrounds the project and provides its playing area tick off accounts of the latest rape, child molestation or knifing.

The promised recreational area—a community center—is shut down, a security problem, management says. The washers and dryers tenants say were promised for each unit never materialized. Instead, there is a private laundry owned by a management official who is in charge of tenant selection.

No great claims are made for tenant selection, which is said by management officials to have broken down after the city forced them to take in what they termed "300 hardcore welfare cases."

There seems to be a liberal sprinkling of hardened criminals among the families trying to raise children in Diego-Beekman. Heroin needle marks are a common sight on teenage arms, and one could find no trace of social services in the projects to deal with this or any of the other festering, noisy problems in this garbage-strewn Calcutta of The Bronx, which certainly looked different in the original proposal.

But it is shattering in the midst of this waste to discover that most of the apartments visited at random are spotlessly clean, despite pipes that leak water and ovens that leak gas. This contradiction occurs often in the South Bronx.

Management says that the problems in the halls have occurred because the tenants are Puerto Ricans and blacks from a rural environment who do not understand the etiquette of apartment house dwelling with its common hallways.

The tenants say it's because management does nothing to keep the halls clean, to keep junkies from sleeping and defecating there and to provide recreational space for the kids, who use the halls as their playground.

Most of the people in Diego-Beekman originally came with hope. The first 600 families were screened, prepped and enthusiastic. Tenant patrols were established and order maintained.

It went downhill rapidly after that, and the causes for that are open to debate. It was, management claims, rising operating costs and those 300 unscreened welfare cases foisted on them by the city. The tenants blame management for not providing effective security, janitorial supplies or the staff necessary to maintain the building.

Wherever the fault lies, the Department of Housing and Urban Development (HUD), which is forking over the taxpayers' dollars that make all this possible, apparently has neither the personnel nor the mechanism to assess culpability in the dispute or to improve conditions.

The top officials at the New York office of HUD conceded that until The Times requested the annual HUD inspection reports, they had not read them. For good reason. It is not possible from this cursory annual effort to know if the many serious failings cited in the inspectors' reports have been tended to.

People in HUD understandably are reluctant to undermine the concept of rehab housing. In theory, it is a great idea: You get to refurbish old, but architecturally interesting buildings, which should be less expensive than all-new construction, and there is the hope of neighborhood preservation.

But rehab housing, as is the case with all government-subsidized housing for the poor, almost seems designed to fail.

This system began in response to the riots of the '60s when it was felt that the government had to do something, however limited, about urban housing. The federal government hit upon the idea of using accelerated tax-depreciation allowances to encourage the rehabilitation of inner-city housing.

By making rehab housing attractive as a tax shelter, it was hoped that substantial private investment capital would be turned toward providing housing for the poor.

But while this shelter has turned out to be very useful to those in the 50% tax bracket and is at this point the last of the great tax shelters, most of the money in rehab housing has come from the taxpayers, who have assumed virtually all of the financial risks.

The problem is that the rewards are almost all gained in reconstructing the old tenements but not in operating them.

The system works like this: A developer buys up options on some old tenement buildings and hires architects to draw up plans to remodel them. These plans and their costs are presented to HUD for approval.

If HUD gives the magic sign, then the developer must come up with 10% of the mortgage and a bank with 90%. This commitment of private capital is somewhat fictional, however. The bank puts up its 90% at the prevailing market rate of interest. The developer gets the loan at a 1% interest rate and HUD makes up the difference. If payments are missed—default—then HUD must pay the full amount of the loan plus full interest due.

The bank carries no risk, but it earns a good return. The developer does not actually put up his appointed 10% because he is granted an allowance for his organizational efforts in the project. He can declare this with the stroke of a pen and reduce his financial involvement to 5% to 7% of the mortgage.

He raises this money and much more by selling the tax shelter rights to investors, most of whom will never see the housing in question. The actual money ponied up by investors is relatively small compared to the mortgage insured and actually paid off by HUD. It's a good deal for the investors.

In the case of Diego-Beekman, private investors put in approximately $6 million and received tax write-offs totaling around $24 million.

Under this system, there is no risk for the banks or developers and virtually none for the investors. The investors would have to pay back some of their tax write-off if HUD foreclosed the mortgage.

Since January, 1975, HUD has operated a rent subsidy program called the Section 8 Housing Assistance Payments Program, which effectively removes the risk for private investors in the projects covered by the program. HUD has been paying out $1 billion a year since that time in rent subsidies to the project managers.

As a result of that subsidy there have been no foreclosures of Section 8-subsidized housing and, therefore, no losses by investors.

Even if the owners of the buildings default on their monthly mortgage payments, they get to keep their rights of possession as well as the tax write-offs. Seventeen percent of such rehab housing has resulted in mortgage default (but not foreclosure) in which the federal government contnues to pick up the tab.

At Diego-Beekman, five of the eight sections of housing are in default, according to HUD. And while most of the units were rehabilitated less than five years ago, many are already in need of another round of rehabilitation.

One building, seven years old, is vacant and burned out. The project has experienced 29 major fires with total damage of more than $1 million.

Diego-Beekman has cost the taxpayers $20 million already and is now costing an additional $8,000 a day in rent subsidies alone.

It is heardly the showcase project of a showcase builder, Continental Wingate of Boston and New York, whose vice president, Carleton Dukess, heads the National Rehabilitated Housing Assn. He is Continental Wingate's top officer in New York.

He has an excellent reputation in federal housing circles, has good rapport with the Carter Administration and reports cheerfully that this Administration has made a major "tilt" toward rehab housing.

Dukess stated that he is aware that what happens to Diego-Beekman, the nation's largest effort at rehabilitated housing, could seriously affect the future of the program. He was aware that visits to the project by Rep. Garcia and a Times reporter have caused HUD to begin an inquiry into Diego-Beekman.

Alan Wiener, director of the New York HUD office, said that he had written to Dukess to say that the property was in an unsatisfactory state. Wiener stated that he would require bi-weekly progress reports from the HUD staff on improving conditions there.

Tenants organizers Milton (Karate) Morales, Roy Howard and Father James Snodgrass insist that there has been no improvement. Dukess responds by saying that he is working on it.

He said he has a direct line on his desk to the management office and "we talk every day, sometimes 10 times a day."

Unidos Management, the company that manages Diego-Beekman, is a subsidiary of Continental Wingate. With HUD's approval, Unidos recently imposed a fat increase in rent—with rentals now ranging from $273 to $454 a month—to cover rising operating costs. The same holds true for the suppliers of fuel and services. When they raise their rates, HUD pays the bill by increasing the rent subsidy.

The insurance companies likewise. With Diego-Beekman, according to Dukess, they raised the annual charge for fire and liability insurance from $84,000 in 1976 to $550,000 today, with a $125,000 deductible clause.

HUD, using taxpayers' dollars, paid this

amount through increased rent subsidies, without protest. Everyone makes out handsomely in taxpayer-subsidized housing for the poor—except the taxpayers and the poor.

Management has claimed that the cost of providing private security also has risen. Security at Diego-Beekman means guards who are paid close to the minimum wage of $2.75 an hour, and their morale is obviously low.

The head of security, a dedicated ex-New York cop, confesses that it is a hopeless situation. His boss, John C. Mandel, head of Mandel Security Bureau Inc., which supplies the guards, said that about 15 of the 36 guards quit each month.

Training barely leaves time for acquainting new guards with the addresses of the buildings. The project's head of security says he was promised a squad car more than a year ago, but he is still waiting.

Security, or rather the lack of it, is the main preoccupation of the tenants beyond that of leaking pipes, rodents and the vast accumulations of garbage.

There is immense fear in Diego-Beekman—fear of rapes, burglary and knifings or "cuttings," as the tenants call them, that seems bizarre in a federally funded housing development.

Think of the feds and one conjures up images of G-men, revenuers, postal inspectors—law and order. It used to be a given of tenement life that if you so much as pulled the letter to your parents from the school principal out through the slit of the mailbox, the postal inspectors would descend. Not now.

There are buildings in the Diego-Beekman project in which every single postal box has been punched out by vandals, leaving a box of pigeon holes as in some friendly old hotel. But Diego-Beekman is not a friendly old hotel any more than it is an efficient federal lock-up.

It is instead anarchy with a vengeance. It is a woman on welfare, whose husband has disappeared, standing in the doorway as a barrier to her three preschool children lest they enter into the dangers of the hall.

In the hall, one floor below, a hopelessly tough teen-ager boasts of his recent stint in the reformatory to the delight of two young girls half his age.

Does he live in the building? "Shove off." Is he worried about the project's police? "You kidding?" About the city police? "They never dare come in here." The congressman who had just passed by was judged "crazy man" in suggesting a return to school. Someone observes that the youth is "on something."

The question is not really one of the kid's right to be there in the project, but rather of his right to be setting the prevailing mood. And the mood of crime is omnipresent.

Soon after, one is handed a list of apartments where drug pushers have been known to operate. Asked about drugs, the security man says the addicts come to this neighborhood from all over New York.

"It's everywhere, every street corner. How are we gonna keep them out? The elevators don't work because the junkies rob the copper from the motors to sell for a fix. They steal anything. They live anywhere. The hallway is their living room and bathroom. We try, but it's a bigger job than I have men to deal with."

Mandel, in a telephone interview, elaborated on the problem:

"The security guard doesn't have a gun, he is not getting paid $20,000 a year. He is not a policeman, he is not there to risk his life and he's not going to."

"The insurance companies require guards, otherwise they probably wouldn't be there. We know that some of our men are sleeping on the job. But we have a standby reserve."

Wiener, the HUD official, concedes that security is inadequate and reports that HUD now has a man who travels about consulting on security. He is expected momentarily in The Bronx.

On a trip to the project Wiener hears the tenants complain of mundane matters of survival—doors that do not lock, buzzer systems that are inoperative, unlit hallways that provide perfect cover for assailants.

Wiener listens but does not listen. He looks at his watch. He has heard it all before in other projects. He says that it basically is not HUD's responsibility—HUD is not the manager of the buildings.

The building management reports to Continental-Wingate in Boston. Vice President Dukess, who heads the N.Y. office, said that he didn't know until informed by The Times that the guards were paid barely the minimum wage and that there was such a high turnover. He said that although he is not in the management chain of command, he and HUD security would begin an investigation into the matter.

Wiener said he had heard that there was good security in the form of a mobile patrol but, as he discovered upon visiting the project, it did not exist. He said he had relied on Continental-Wingate for his information.

Wiener is not responsible for this mess, having been on the job at HUD in New York since mid-June. But he confesses that even if he had been there for two years, his agency does not have the manpower to monitor the goings-on at the thousands of units built and subsidized in New York City with HUD money.

No one at HUD had heard of the child's five-story fall from Diego-Beekman or of any of the number of rapes, deaths and robberies said to have occurred at the project. It's just one project.

Tenants at the housing project claim that the child would not have fallen out of the windows if window grates—called child protectors—had been provided.

A recent New York City Health Department law—which is being challenged by landlords—provides that landlords must notify tenants with children by mail that the grates are available. But then it is up to the tenant to ask the landlord to install them. The tenants point out, however, that many of the mailboxes are ruined and that much mail never arrives.

HUD officials insist that they are not responsible for enforcing or even for being knowledgeable about New York law. One day recently, three department officials, visiting the project at Rep. Garcia's insistence, assembled in front of Diego-Beekman. They conceded that they did not know the specifics of the new window grate law, whether it applied to these buildings or its effective date.

The HUD officials took refuge in the fact that these were only HUD-subsidized projects, not HUD-owned ones. Although HUD had insured the mortgage, although the federal government provided very generous tax shelters for the original investors and despite the fact that HUD now was paying most of the rent tab, this was still considered private property.

Therefore the responsibility lies with the owners. Go talk to the owners.

Who are the owners? A month-long investigation by The Times as yet has failed to answer that question fully. HUD will provide information only on the general partners, and claims that it does not know who the limited partners are. Yet, it is they who often own most of the equity.

The on-site managers of Diego-Beekman, officials of the Unidos company, say they are charged only with maintaining the property for a fee. They were given the contract by Continental Wingate which owns Unidos. But Continental Wingate holds only a small fraction of the equity in the buildings.

Continental's Dukess conceded that his company would not be hurt much by foreclosure but he claimed an interest in the survival of the project for purposes of maintaining a good reputation.

He observed that there are some developers who would simply walk away from their project once the building is completed and the tax shelter sold.

If the building is foreclosed, the developer's reputation may suffer, but he is not hurt materially. Financial responsibility would fall on the investors who are not in any sense actively involved in maintaining the building and who most often are informed of a foreclosure after it has occurred.

In the case of Diego-Beekman, three of the eight units are owned by Laurence and Preston Tisch, who run the Loews hotel chain and other businesses. The rest are owned by dozens of doctors and lawyers and pilots and others from Santa Monica to Atlanta to Scarsdale.

They're in it for the tax shelter, and as A. Bruce Rozet of Santa Monica, who headed one of the investor groups, said, "It is one of the few tax shelters left, and it is one of the better ones."

Rozel's company, Income Equities Corp., formed an investors group for three of the eight Beekman units during the 1970s. Rozet conceded recently that if the project were foreclosed, his company already had earned its profit off the sale of the tax shelters to the limited partners and would not be affected adversely.

The disparate investors who had bought the tax shelters could be hurt in the event of foreclosure. But foreclosure is highly unlikely.

According to Wiener of HUD, two of the three units owned by the Tisches are in default and that the third soon will be. One insider estimates that the tax write-off on three units of Diego-Beekman buildings is in the range of $9 million for the first five years on an investment of around $2,250,000.

Whether the Tisches will realize the full tax write-off is determined by their particular income category.

The tax write-off would be in jeopardy only if HUD forecloses the Tisch-owned buildings. Even if there is a foreclosure, the Tisches would have had the use of that money, tax-free, for the past six years.

The Tisch brothers were not available for comment on the default of the mortgages. Dukess, the developer who sold the tax shelter to the Tisches, blamed the default on the deterioration of the neighborhood rather than on the practices of his management company.

But the failures of the Beekman redevelopment project are underscored by the occasional housing developments that work. Not far from the Beekman houses in a neighborhood every bit as deprived, there are rehabilitated houses which are in excellent condition.

Those buildings, developed and run by Herman Krause, have buzzers that work, the front door is locked and there is no graffiti on the wallpapered walls.

Krause, a smaller developer eager to establish a track record so that he may obtain other contracts, has a mobile service crew for his buildings on call for repairs. His buildings function—from the lights and the plumbing to cleanups.

Aureo Cardona, who is the head of the local planning council, and the developer of some of the most successful subsidized housing, claims that such housing will not succeed without community involvement in the ownership and management.

Cardona helps run the South Bronx Community Housing Corp., which built the Plaza Borinquen houses. These two-story townhouses, scattered throughout the South Bronx, are cited by most local observers as

the best way to do public-supported housing. They are neat and well maintained.

The Plaza Borinquen units are new, well-built houses with gardens in front, and—perhaps because of their small size and careful tenant screening process—are likely to survive.

Clearly, some housing programs succeed where others fail, and HUD does not seem to have the operative ability to sort out one from the other. Success is treated as an accident, and failure as the norm.

HUD's Wiener conceded that he was unaware of any major problems at Diego-Beekman until Rep. Garcia notified him of the inspection he had made with the Times reporter.

Wiener went to the project at Garcia's request and later said, "I was not satisfied with what I saw . . . the broken mailboxes, the front doors open . . . I mean I should be in a position—if this office was running properly and we had enough staff—to say go find out when they replaced the mailboxes at 582 East 140th St. Go find out how much they spent on the bells and buzzers and how many times they had to replace them. . .

"I was at Diego-Beekman about four months ago, but looking at it from a totally different perspective. I was just touring the South Bronx, you know, and walked in."

Asked if he had then been aware of the broken-down conditions, he replied, "No, I didn't see a lot of those things, no."

Wiener offers a solution which is that the banks which hold the mortgage should make sure that the building is properly maintained. But Henry Waltemade, president of Dollar Savings Bank, the largest bank in The Bronx, bluntly asserted that the banks have no incentive to do that.

There is no risk for the banks in this business, no matter how crummy the buildings, because HUD provides the subsidies to make the monthly mortgage payments and the banks are assured their interest. Waltemade says that HUD makes the banks an offer they can't refuse—profit without any responsibility.

Another solution might be a rewrite of the tax laws or the manner in which the government provides subsidized housing. But a HUD official who has been around for almost two decades said that the various building and banking lobbyists concerned would never permit either change.

"It would be cheaper in the long run for HUD to just go in and build housing for the poor and run it the way the New York Housing Authority does," he said. "But Congress wanted private industry to do it, and the only way private industry will build in the slums is as a tax shelter."

Dukess, the developer, can live with the tax laws just as they are written. As president of the National Housing Rehabilitation Assn., he seems effective in having his views known.

He recalls that when he noticed that President Carter's tax reform package had gone to Capitol Hill without renewing the 167K provision of the tax law—the one that provides tax shelter for rehab—he sent a note to Treasury Secretary W. Michael Blumbenthal and to the White House to make certain that it was just an oversight that could be corrected easily enough.

Dukess says it was corrected "immediately."

Dukess, who expects that an increasing percentage of money for federally subsidized housing will go for rehab construction, is not alone in influencing the Administration.

He observed that Charles Edson of Lane and Edson, a major housing-oriented law firm in Washington, headed the Carter transition team on housing. That group formulated housing policy alternatives for Carter before his inauguration. Edson's law firm represents the rehab association headed by Dukess.

There admittedly are many good reasons for the Administration's tilt towards rehab housing. It may be cheaper to rebuild existing stock than start anew, although the experience of Diego-Beekman does not necessarily confirm that.

It may be better to shore up existing neighborhoods in this way rather than level and start new ones. But again, the experience of Diego-Beekman provides troublesome counterevidence.

It may be that, in the long run, this provides, in the words of the HUD manual, ". . . adequate housing, a suitable living environment, and expanded economic opportunities."

Perhaps. Although many people would feel more assured on this if the President and HUD Secretary Patricia Roberts Harris would visit Diego-Beekman before tilting in the direction of rehab housing.

Today's high costs of new building make rehabilitated housing a necessity for saving the cities. The problem is not with the goal of rehabilitating housing, but rather that it must be done within the constraints of housing and tax laws written by Congress which virtually doom this and other ventures in subsidized public housing before they are much along the way.

Congress has been unwilling simply to have the government build and operate public housing for the poor on a mass scale. This would be the direct approach favored by some HUD officials.

They argue that costs to the taxpayers would be lower because of the elimination of tax shelters and the more efficient use of rent subsidies.

Congress disagrees and requires some sort of appearance of private ownership. But it is unwilling to go all the way and simply let private landlords come in without an accelerated tax depreciation shelter and make their profit, instead, through the ordinary operation of a building year in and out by collecting high, HUD-subsidized rent

The current practice is to allow the appearance of private investment through the tax shelter gimmick without any of the real risks and responsibilities of a normal business investment.

It is a shell game in which the taxpayer is left with the worst of both worlds, bearing virtually all of the risks and all of the costs.

Then as the buildings move into default and require yet another rehabilitation, the taxpayers turn in anger upon the tenants who finally are held responsible for this decay and waste.

In most instances, the taxpayer would have a hard time coming up with the names of the investors, developers, builders, lawyers, architects who really profited from all this. The welfare tenants are a more visible and vulnerable target.

There is another side. Dukess, reached at his Cape Cod vacation home, stated that the problem is that the tenants lack initiative and proper sanitary habits. The developer of Diego-Beekman suggested that better tenant organization might solve these problems in the future.

Rozet, who sold some of the tax shelters, suggested the same in a telephone call from his Hawaiian vacation retreat. He said he thought the government should hire people like himself and his new company—National Development—to teach tenants how to organize.

Meanwhile, back on 149th and Beekman, a bright, pudgy but sad-eyed 11-year-old boy plaintively asked Rep. Garcia if the Diego-Beekman community center would ever be opened before the buildings were burned down.

The day before, a kid had been seriously injured by a speeding car on the spot where the boy and his friends now were playing. The week before, two children had fallen to their deaths from the roof of an abandoned building 50 feet away.

As the boy talked, a river of garbage rushed by, powered by an open hydrant that the kids called "our beach." It was terribly hot, noisy, smelly. The long Bronx summer was settling in.

Garcia broke. He had grown up just a few blocks away, when this was a good neighborhood. He had told the child that he should stay in school and that if he worked hard, he could do anything in life, even be a congressman and help his people. Now he paused.

And then, his voice cracking, he said: "If I can't do a lot better than get the community center opened, then this system of ours makes no sense at all—and you'd better hold us to it."

As to the four-year-old girl who fell from the widow at Diego-Beekman. Father James Snodgrass of the local Episcopal church reports a month after the accident that she will be all right.

Little Carmen suffered a skull fracture and broken bones in her foot. She was unconscious for three weeks after her fall but did not sustain permanent damage.

Her mother told the priest that she had repeatedly asked for child protector grates on the windows before the accident occurred, and since. Still, she said, she has not received them.

ERA—A THREATENED WARP OF THE CONSTITUTION

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. HANSEN. Mr. Speaker, "This is * * * a Republic if we can keep it." These are the most fitting and profound closing words of an article in the August 18, 1978, National Review by New Orleans attorney, Grover Rees, III, former editor-in-chief of the Louisiana Law Review, entitled "When the Voting Should Have Stopped", concerning the proposed extension of time for consideration of ERA and the right to rescind.

The article is herewith included to provide new light on an already well-worn argument.

WHEN THE VOTING SHOULD HAVE STOPPED

When Congress proposed the Equal Rights Amendment in 1972, the proposing resolution stated the amendment would become part of the Constitution "when ratified by the legislatures of three-fourths of the several states within seven years from the date of its submission . . ." Those seven years will be over next March. However, Congress and several state legislatures are now considering actions that would create serious doubt, among legal scholars as well as the general public, about what is part of the Constitution and what is not.

Ratifications by 38 state legislatures are necessary for final passage. To date, 35 legislatures have ratified; of these, four have passed resolutions purporting to rescind their ratifications. Congress, meanwhile, is considering a resolution (already passed by the House Judiciary Committee) to extend for another 39 months the period in which states may ratify. In March, we will all—those of us who wish to know for sure what the Constitution says—find ourselves in one of the following situations:

1. Assuming that Congress does not attempt to extend the deadline, and that fewer than three additional states ratify the ERA, the legal situation will be clear. The ERA will be "dead," in the limited sense that the 1972 resolution with its 35 ratifications will be null. ERA supporters say they'll get Congress to re-propose the amendment; opponents say they're not worried.

2. If Congress declares the deadline extended, and if by March fewer than three more states have ratified, the effect of the congressional extension will be unclear. Some ERA supporters argue that all prior ratifications—even by states that later rescinded—will remain valid. Another view is that Congress cannot "carry forward" the prior ratifications, and that 38 *new* ratifications would be needed. Finally, a few legal scholars take the view that extension is valid, but only if states are permitted to rescind their ratifications. Under this view, the ERA would need six or seven more states. Prognosis: at least 39 more months of uncertainty.

3. If Congress passes no extension resolution, but at least four (but fewer than seven) more states ratify by the March deadline, then the ERA will become law only if the four rescissions are ineffective.

4. If exactly three additional states ratify (assuming, again, no congressional extension), then whether the ERA is part of the Constitution will depend on the rescission issue *and* on the delightfully arcane question whether Kentucky's lieutenant governor could legally veto a rescission resolution passed by the legislature (the governor was out of the state). Governors have never never exercised a role in the ratifying process, since the Constitution provides that state legislatures or conventions—not "states"—ratify amendments, and the Supreme Court has held that a state may not restrict its legislature's ratifying function.

There are other permutations, partaking of the juridical elements of one or more of the above. Don't worry about them. Instead, join me in a brief review of a few legal principles, gleaned from the debate over the adoption of the federal Constitution and from the few occasions on which the Supreme Court has construed the formula for constitutional amendment.

A caveat: Do not think in terms of the ERA. Instead, think of your very favorite proposed constitutional amendment. Then imagine the constitutional change you fear the most. Examine the several alternative constructions of the technical rules on the amendment process provided in the Constitution itself, keeping in mind that the same rules will apply to the good and the bad proposals. That's what the Framers did when they designed the process.

Speaking logically, not historically, the rescission controversy seems artificial. Article V of the Constitution, which provides for amendments, is silent on rescission. The general rule is that states are sovereign: a legislature can do anything not prohibited by the federal or state constitution. In particular, legislatures can undo what they have done. They regularly reconsider and repeal their own prior enactments.

If there is a genuine question about the validity of state rescissions, it is created by a sordid and better-forgotten bit of American history. In 1868, three-fourths of the legislatures had ratified the Fourteenth Amendment; Ohio and New Jersey, however, had rescinded before the last state had ratified. Nevertheless, both houses of Congress passed a resolution declaring the amendment to be part of the Constitution.

The Senate passed the resolution without debate and without a roll-call vote. The House debated only for a minute or two, rejecting a request that the Judiciary Committee consider the resolution. (It was almost referred to the Joint Committee on Reconstruction, but the House opted instead to pass it without any committee consideration whatever.) This was the Reconstruction Congress, and the members who voted—in a near-perfect party-line vote—that Ohio and New Jersey could not rescind were, virtually man for man, those who five months earlier had voted to impeach Andrew Johnson for refusing to obey unconstitutional orders.

A few thoughts on the 1868 resolution. First, it was not framed as a general statement on the right to rescind. Indeed, debate revealed more support for the proposition that these particular rescissions were invalid because the Democratic legislatures of Ohio and New Jersey did not truly represent the citizens of those states. Moreover, up to that moment in history nobody had suggested that Congress had any power over the amending process except to *propose* amendments and to designate the mode of ratification. The only prior controversy over the validity of an amendment—the Eleventh, in 1798—had been settled by the Supreme Court. The attempt by the Reconstruction Congress to *judge* whether its own proposal had been duly ratified can best be explained in light of the felt necessities of the time: this Congress not only impeached Johnson, it also proudly regarded several states as "conquered territory" and ruled them accordingly.

Most important, the Reconstruction resolution was never tested in court, not even implicitly. On the very day of its passage, Georgia ratified the Fourteenth Amendment, bringing the total to three-fourths *without* Ohio and New Jersey, and rendering the rescission issue irrelevant. In 1939, three members of the Supreme Court referred to the congressional action, with apparent approval; but the reference was unnecessary to the Court's decision, and was therefore a mere expression of personal opinion.

It should be stressed that the Reconstruction resolution is moot: if the Supreme Court should recognize the validity of the ERA rescissions, it will not be compelled, either logically or practically, to raise questions about the validity of the Fourteenth or any other existing amendment.

Except for the 1868 resolution, with its endorsement by three Justices in 1939, the history of the amending process tends to support the right to rescind. The Constitutional Convention debates reveal the attitude that amendment should be possible only when a broad consensus exists: that a substantial minority of states should be able to block changes favored by a majority, and that frequent amendment would be undesirable. In *The Federalist* #85, Hamilton argued that the amending process would ensure that "the will of the requisite number" should prevail; amendment would be possible only when three-fourths of the states "were united in the desire of a particular amendment." Obviously, no state that has rescinded is "united in the desire" with a state that later ratifies. No consensus is achieved.

The Supreme Court has recognized contemporaneous consensus, and not just the formality of a certain number of isolated legislative acts, as necessary for ratification. Consensus was the basis for the Court's holding that an amendment must be ratified within a "reasonable time" to become part of the Constitution: state ratifications must be "sufficiently contemporaneous . . . to reflect the will of the people in all sections at relatively the same period." The "reasonable time" doctrine is based on the mere possibility that a ratifying state would lose its enthusiasm for an amendment after a few years. With even more reason, a state that has positively indicated its lack of support for an amendment cannot be counted as part of a consensus.

Not only logic and history, but also fairness, requires a state's right to rescind. It is universally recognized that a state legislature, having rejected an amendment, can later ratify it. To allow such reconsideration of a negative judgment, but not of a positive one, would give those who want to change the Constitution an unlimited opportunity to bounce back from defeat, while denying the same right to those who prefer to keep the Constitution as it is. Does anybody think the Framers intended such a result?

Opponents of the right to rescind—aside from invoking with reverence the two shaky precedents mentioned above—advance two principal arguments:

First, we desperately need the ERA. The women of America have worked so hard and so long that a defeat on this issue would prove that The System Does Not Work.

Second, it is the *act* of ratification that counts. Once a state has ratified, it has no more power over an amendment. Under this view, if 37 states had ratified in a flurry of enthusiasm for a new proposal, and *every* ratifying state had later rescinded, any one state could still bind the nation by ratifying, consensus or no consensus. There are, then, two views of the amending process: the consensus theory and the sacramental act theory.

The mind's eye pictures Bella Abzug standing astride the nation with a great sack. Now she plucks up Connecticut, now Indiana, now little Delaware. Each time she bags a new state, a frisky Tennessee or Idaho scrambles out of the sack, only to be jammed back inside. Two views of the amending process: the consensus theory and the "Gotcha!" theory.

Since Congress can propose a new ERA whenever it chooses, identical to the old but with a new time limit, it could presumably achieve the same result by extending the 1972 resolution for 39 more months. But what effect will this have on states that have already ratified?

Advocates of extension insist that the time limit is a mere procedural matter, and that Congress has the implied power to change it at will, holding onto the prior ratifications. Opponents point to the fact that each ratifying state voted on a specific resolution, which contained the seven-year time limit. Approval of the ERA thus limited—in effect, a statement that "We're for it *if* 37 other states will ratify within seven years"—cannot be equated with unconditional approval.

Extension supporters place great weight on the *location* of the seven-year language in the ERA resolution. They generally admit that if the time limitation were in the text of the amendment itself, Congress could not extend without releasing the previously ratifying states. The seven-year limit on the ERA, however, is not in the body of the amendment, but in the preamble. Therefore, the argument goes, in changing the time limit Congress is not tampering with the amendment itself, which is all the states ever voted on.

This technical contention elevates form over substance, ignoring what really happened in the ratifying process. Each state received from Congress a copy of the entire resolution, including the preamble with the seven-year time limit. The whole package was on the bargaining table when the states agreed to ratify.

At a House subcommittee hearing on extension, ERA advocates ridiculed the notion that legislatures actually relied on the time limit and would have opposed the amendment had they thought the limit might be extended. Any doubt about legislative intent, however, has been resolved by the careful research of Professor Jules Gerard of Washington University Law School, who has examined the actual resolutions by which the states ratified the ERA. Professor Gerard reveals that of 35 such resolutions, 26 expressly mention the time limit.

To circumvent this argument, extension proponents invoke the sacramental act

theory, arguing that no matter what a legislature *thought* it was ratifying, it actually *did* ratify whatever it was that Congress proposed. Like Isaac, a legislature may have been tricked into giving its blessing to a resolution it never loved; but a blessing is a blessing. Gotcha.

Assuming for the sake of argument that state legislative intent is irrelevant, the key inquiry becomes whether the Congress that proposed the ERA intended for the time limit to be subject to change. It did not. The Senate hotly debated the question of a time limit, with several members indicating they could not support an amendment that might be "lingering in limbo for an indefinite number of years." The time limit was inserted on a roll-call vote, with the principal ERA sponsors on the losing side. But why was the limitation put into the preamble, rather than the text?

Several prior amendments did include the time limitation in the body of the amendment itself. Every amendment since the Twenty-Third, however, has had a time limit in the preamble, like the ERA. Extension supporters argue that the switch was intended to make the time limit a procedural detail, not a substantive part of the amendment immune to extension. But there is proof positive to the contrary.

Early proposed drafts of the Twenty-Third Amendment included the time limit in the text. At the request of its author, however, the amendment was rewritten by Professor Noel Dowling, perhaps the most respected constitutional scholar of his time. He had this to say:

"The seven-year limitation is put in the resolution rather than in the text of the amendment. There is no doubt about the power of Congress to put it there; and it will be *equally effective*. The usual way, to be sure, has been to write the limitation into the amendment; but we hope such an *unnecessary cluttering up of the Constitution* can be ended." [Emphasis added.]

In other words, the change was purely stylistic. A time limit has no business actually becoming part of the Constitution, since it has outlived its usefulness at the moment the last state ratifies. It was placed in the preamble as a step toward a more elegant Constitution, not a more powerful Congress. A time limit in the preamble was intended to have the same legal effect as a time limit in the text: to be reliable, predictable, tamper-proof.

Extension and rescission are technically unrelated issues. Several scholars have suggested, however, that if Congress extends the deadline, it will be necessary to allow states to rescind. This is more a fairness argument than a legal theory, but as a fairness argument it is compelling. A ten-year deadline would give amendment supporters at least ten chances in most states. Nine rejections followed by one acceptance would put the state squarely in the pro-ERA column. Meanwhile, state legislatures that ratified back in 1972 might be hating themselves for it, and passing annual resolutions rescinding and deploring the ERA, to no avail. Professor Charles Black of Yale Law School, a strong ERA supporter, calls it a "silly lobster-trap." But the House Judiciary Committee is not impressed: in considering the extension resolution, it rejected an amendment acknowledging the states' right to rescind.

The case for congressional power to extend the deadline and bind previously ratifying states, like the case against a state's right to rescind, is so weak that supporters seldom argue the merits. Rather, they assert that matters of constitutional amending procedure are "political questions," in which the Supreme Court will allow judgments of Congress to stand, right or wrong. By the same token, a few zealous ERA supporters are frankly urging Congress to forget the legal niceties and to treat votes on extension and rescission as votes for or against the ERA.

The "political-questions doctrine" originated as a view that the text of the Constitution forbade the courts to review certain actions of the Legislative and Executive branches. The best example is the provision that each house of Congress shall be "the sole judge" of its members' qualifications. In this matter, Congress is said to act as a *court*, and no other court can review its decisions. The political-questions doctrine gradually expanded to include a few areas (notably foreign policy) where there was no clear constitutional mandate for the courts to keep out, but where judicial intervention was regarded as impractical or dangerous.

In 1939 the Supreme Court held in *Coleman* v. *Miller* that some, but not all, matters of amendment procedure are political questions. Four judges stated flatly that the text of Article V commits adjudication of amendment questions to Congress; but they quoted no such language, and in fact there is none. Three others argued that, as a practical matter, Congress is the best judge of certain facts, and so the courts will not interfere. These three judges were the ones who approved the Reconstruction resolution. They did not indicate how courts should decide which congressional judgments to let stand and which to review; indeed, the decision was widely criticized as internally inconsistent.

Coleman would probably be decided differently by the Supreme Court today. The scope of the political-questions doctrine has narrowed considerably. In 1969, Representative Adam Clayton Powell sued the Speaker of the House, asserting that he had been illegally expelled from Congress. The Supreme Court took the case and declared Powell entitled to his seat, despite the explicit provision in the Constitution that Congress is "the sole judge." Since *Powell* v. *McCormack*, scholars have been asking whether there is really anything left of the political-questions doctrine.

Even those who disapprove of *Powell* should welcome its effect on those areas where there is *no* textual commitment of a judicial matter to Congress. Just as the courts ought to leave legislating up to the legislature, it is proper for Congress to leave adjudication to the courts.

John Marshall pointed out that the Supreme Court's first duty is "to say what the law is." The first step in observing that duty is to say what the Constitution contains.

It has been suggested that the Supreme Court has an institutional conflict of interest in matters of amending procedure, because some amendments might limit the Court's power. Congress, however, has a twofold conflict: first, amendments frequently limit or expand congressional power; second, Congress already has a role in the amending process, that of proponent. The ERA spectacle now unfolding is an illustration: Congress proposes the ERA, then votes to extend the time limit on its proposal, then passes a resolution "judging" ratifying states to be bound by the extension, and also "judges" the constitutionality of state rescissions. It's 1978: do you know where your Constitution is?

The impact of declaring amendment procedure to be a political question would extend far beyond the ERA controversy. A model in which the limited role of Congress is bootstrapped into that of general overseer of the amending process—sitting as a "court" in judgment of the success or failure of its own proposals, and free to disregard the clear intentions of the other protagonists—would do unique violence to federalism and to the separation of powers.

A political question, by definition, is one on which Congress can do anything it wishes, no matter how extreme, and be immune from judicial review. Congress could, for instance, propose an amendment on Monday, then pass a resolution on Tuesday "judging" its proposal to have been ratified by 38 states. Everyone could see the congressional resolution was a lie; but the Supreme Court, if it accepted this as a "political question" on which it was powerless to rule, would have to apply the Constitution thus rewritten.

Of course its unlikely that Congress would pursue the political questions doctrine to its logical extreme. Nevertheless, at every turn there will be voices urging Congress to disregard legal niceties, to regard procedural votes as expressions of support or opposition to the amendment of the hour. At its best, the Constitution protects the rights of racial religious, sectional, and other minorities. To entrust the ultimate power over its amendment to a single institution—a highly political, majoritarian, federal-level institution—would be to trust that institution with those rights.

Greasing the skids for the ERA will set a precedent for future amendments which, Professor Black reminds us, could "change the Presidency to a committee of three, hobble the treaty power, make the federal judiciary elective, repeal the Fourth Amendment, make Catholics ineligible for office, and move the national capital to Topeka."

No, thoughtful person, liberal or conservative, ERA supporter or opponent, will let his feelings about a particular amendment color his judgment about who shall wield, for all time, the power to rewrite the Constitution.

In response to ERA opponents' entreaties not to "change the rules in the middle of the game," Congressman Barbara Jordan recently replied, with righteous indignation, "This is no game!" She's right. It's a Republic, if we can keep it. ●

BALANCE(S) OF POWER SERIES BOOK IV(B)—MEANING OF SOVIET MILITARY DOCTRINE

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, today's article in the continuing Book IV of the Balance(s) of Power Series which sets forth Soviet intentions and doctrine is concerned with the rudimentary meaning of military doctrine as understood and defined by Soviet leaders. Entitled "Soviet Military Thought," and written by Joseph Douglass under Air Force auspices, this brief article summarizes brilliantly the basic meaning of military doctrine inside the Kremlin.

Introductory in nature, especially compared to later insertions that will be made in Book IV, Soviet Military Thought, nevertheless, illustrates—via reference to Soviet writings—how the Russians view this subject and, implicitly, how their interpretation differs from Western sources, including American.

The article follows:

SOVIET MILITARY THOUGHT

In ways that are particularly important to this analysis, the Soviets have certain concepts and words that are very different from their U.S. counterparts and that need to be recognized in reading the Soviet literature. Although largely taken for granted in the United States, the organization of military

thought into specific categories, such as military doctrine, science, art, and strategy, and the Marxist-Leninist interpretation of certain words and concepts, such as war, one-man control, and independence are very important to the Soviets and an appreciation of this and the definitions is essential and requisite to understand what the Soviets are saying. This is especially so for "doctrine," "strategy," and "war." This chapter will review how these very basic terms are used in the Soviet Union. Other definitional problems and idiosyncrasies will be discussed in the following chapters as the need arises.

A. SOVIET MILITARY DOCTRINE

In the United States, military doctrine is a very flexible word that means very different things to different people. In effect, everyone has his own meaning. There is national doctrine, allied doctrine, Army doctrine, Air Force doctrine, and tactical nuclear doctrine, to mention but a few. In contrast, in the Soviet Union, there is only one, and that is official Soviet military doctrine.

In the Soviet Union, military doctrine is very carefully defined and promulgated. It is worked out in conjunction with the political leadership, and it represents their guidance to the military in preparing for war. As stated in *Military Strategy*, military doctrine is

. . . the expression of the accepted views of a state regarding the problems of political evaluation of future war, the state attitude toward war, a determination of the nature of future war, preparation of the country for war in the economic and moral sense, and regarding the problems of organization and preparation of the armed forces, as well as of the methods of waging war. Consequently, by military doctrine one should understand the system of officially approved, scientifically based views on the basic fundamental problems of war.

As stated in *The Officer's Handbook* in 1971:

"Military doctrine is worked out and determined by the political leadership of the state.

"The Central Committee of the Party . . . works out Soviet military doctrine.

"*Military doctrine* is a system of guiding views and principles of a state on the character of war under given specific historical conditions, the determination of the military tasks of a state, the armed forces, and the principles of their construction, and also the methods and forms for the solution of all these tasks, including armed conflict, which issue from the goals of the war and the socio-economic and military-technical capabilities of a country."

In the Soviet Union, military doctrine is drawn up under the guidance of the Central Committee of the Party. In contrast, U.S. doctrine is developed by the military to guide their action and tends to equate more evenly with Soviet principles of operational art or tactics, which are more at the base of the hierarchal structure of Soviet military thought. In the Soviet Union, doctrine is at the apex, developed at the Kremlin; while in the U.S., doctrine is something developed at lower command levels in the Services. Thus, "doctrine" in the Soviet system is not even similar to "doctrine" in the U.S. system. Military doctrine in the Soviet Union is official and is to be used in preparing the country for war. It identifies the nature of the war, the preparations to be undertaken, and the priority tasks and problems.

The doctrine is promulgated in books such as *Marxism-Leninism on War and the Army* and publications such as *Communist of the Armed Forces*. The basic characteristics and some of its content are set forth in *Methodological Problems of Military Theory and Practice* and *The Officer's Handbook*. As an example of Soviet doctrine, consider the following excerpts from *The Officer's Handbook:*

"Soviet military doctrine has an offensive character. . . . The Soviet Union . . . will conduct the war which the enemies impose on them in the most offensive manner in order to attain the smashing of the enemy in short times.

Soviet military doctrine allocates the decisive role in contemporary war to nuclear missile weapons. At the same time it considers that along with the nuclear missile strikes of a strategic and operational-tactical character, the armed forces will employ conventional armament."

The basic ingredients that have consistently made up Soviet doctrine since at least the late fifties are its offensive character, the importance of nuclear weapons, and the belief that the war will be decisive in its early phase and, therefore, short. Soviet military doctrine has consistently held that surprise attack is the most probable method whereby "the imperialists will unleash war":

"As for the means the imperialists have of unleashing [sic] war, Soviet military doctrine considers most probable a surprise attack of the aggressor without a declaration of war. This precisely is the main thing the imperialists are counting on. They have repeatedly resorted to such means of unleashing war in the past. The aggressors resort to it under modern conditions, too, as was shown, for example, by the attack of Israel on the Arab countries."

Finally, should world war come about, the basic tenets of Soviet military doctrine are that it will be the conflict of two diametrically opposed social systems, a coalition war that is definitely nuclear, will result in destruction of the capitalist system, and the world-wide triumph of the socialist system.

The major change, introduced in the sixties, allows for the possibility of an opening conventional phase (phase, not war) that subsequently escalates to all-out intercontinental war.

"It is possible that war can begin by gradual escalation of a limited conflict into a world conflict. Imperialists can begin it and wage it for any time without using nuclear weapons with only conventional means."

More recently, the possibility of limited nuclear war is being investigated and may well emerge as doctrine in the near future.

B. MILITARY SCIENCE AND STRATEGY

Soviet military thought is divided into two major compartments; military doctrine and military science. Within military science, strategy is the most important element. Soviet military science is defined in *The Officers Handbook* as follows:

"Soviet military science is a united system of knowledge on the preparation and conduct of armed conflict in the interests of the defense of the Soviet Union and other socialist countries against imperialist aggression. In its functions include:

"—the discovery and investigation of the objective laws of armed conflict;

"—the development, on the basis of the knowledge of these laws, of the means and forms of armed conflict for the achievement of victory over the enemy;

"—the investigation of the problems and determination of the methods for the preparation of the territory of the country and the Armed Forces for war, and the comprehensive support of the armed struggle economically, politically, morally, materially and technically, scientifically, and in other ways;

"—the development of the bases for the organization and training and education of the troops in accordance with the requirements of contemporary war;

"—the development of the method of military science as a whole, its general theory, theory of military art, the military-technological sciences, and its other parts and branches."

The interaction and difference between military doctrine and military science are important. While military doctrine guides military science, military doctrine also is developed using the conclusions of military science. Military doctrine exploits the conclusions of various sciences. The doctrine rests upon the conclusions of military science particularly as regards determining the nature of a future war and the methods for conducting it, and for determining the structure and preparation of the armed forces.

As described in *Methodological Problems of Military Theory and Practice,*

"Military science studies a much wider circle of problems than necessary for realization of the practical problems of construction of the armed forces of the state during the given period. It considers all the probable means and conditions of waging armed struggle, including those which are not typical for the given country and do not entirely coincide with its means. But the conclusions of military science use doctrine, proceeding from the real conditions and means of the country. No contemporary military science can disregard the appearance of nuclear missiles and their determining effect on the means and form of armed struggle. However, for states without nuclear missiles military doctrine had to show ways of military construction different from those which countries having very modern means of armed struggle can go. And these ways are developed by military science.

"Military science studies the development of military affairs in many countries and evaluates the state of the armed forces and military means of states and coalitions and condition of waging armed struggle in various theaters of military actions. The doctrine considers only those factors which affect the construction of the armed forces in its country. In other words, of the entire variety of phenomena and trends studied by military science, of all its generalizations and recommendations, military doctrine takes only those which correspond to the political course of the state and to its strategic means."

Although military doctrine and military science have much in common, it should be clear that there are important differences. In addition to the above example, military science focuses on the past, present, and future, while doctrine is pointed to the present and immediate future; that is, to foresee the nature of war and probable enemy in order to provide guidance to military science regarding the course to follow. A further difference is that

". . . doctrine, being developed and accepted by the state, is a single system of views and a guide to action free from any particular subjective views and evaluations. Inherent to science, in its development, is the struggle of opinions. In the system of military theories which comprise military science there may be several different points of view, different scientific ideas, and original hypotheses which are not selected by doctrine for practical application and they thereby do not acquire the character of official state views on military questions."

Military science includes a number of different fields, such as history, administration and organization, training, and the military art. The most important of these components is military art, which is made up of strategy, operational art, and tactics. The most important of these, which is also critical to this study, is strategy.

"*Strategy* is the part of military art which studies the foundations of the preparation and conduct of war as a whole and its campaigns. In practice it is policy's direct weapon. With respect to strategy, policy plays the leading and directing role.

"Strategy is general and single for all the types of the armed forces of the country because war is conducted, not by some one type of armed forces or combat arm, but by their

combined efforts. The coordination of the actions of all the types of armed forces in war is possible only within the framework of a single military strategy.

"The most important problem of strategy is the determination of the character of modern war, and the possible means of its emergence and conduct, its stages (periods) and targets (problems), which are landmarks for its planning."

Strategy and doctrine are the areas of greatest interest in this study—with operational art and tactics examined to obtain greater detail, where important, regarding the organization and employment of various force elements. Probably the single study most representative of strategy is Sokolovskiy's *Military Strategy*, third edition. The Soviet officer is still referred to this important book for basic strategy.

Military strategy and doctrine, although very similar in coverage, are different in principle. For example,

"Military strategy occupies a subordinate position with regard to military doctrine. Military doctrine determines over-all policy in principle, while military strategy, starting from this over-all policy develops and investigates concrete problems touching upon the nature of future war, the preparation of a country for war, the organization of the armed forces, and the methods of warfare."

What is most important is the relationship between doctrine and strategy in time of war.

"During war, military doctrine withdraws somewhat into the background because in armed conflict they are guided primarily by military-political and military-strategic considerations and by the conclusions and generalizations which follow from the conditions of a specific situation. Consequently, war and armed conflict are guided not by doctrine, but by strategy."

In evaluating the Soviet threat to NATO and the prospects for controlling and terminating a NATO/Warsaw Pact war in Europe, the Soviet doctrine and strategy are coequal in importance and preeminent in the whole field of military thought.

C. WAR

A word that can introduce considerable definitional problems is the very simple word "war." In the Soviet doctrine, war is not just one word. There are two types of war—just war and unjust war—and which war is being discussed often has to be inferred from the context of the sentence. The distinction between just and unjust war is not trivial. It is particularly important because the interpretation can cast considerable influence on the meanings attached to various discussions in the Soviet literature and, in particular, to those discussions that are associated with limited nuclear war. It is esssential to understand *whose* war is being discussed in interpreting Soviet statements.

A war is just or unjust depending on the social content and goals of the war—not by who attacks first, where the war is fought, or whether the troops are attacking or defending themselves.

"Just wars are those which are liberating, directed at class or national liberation. Also wars defending the people from outside attack and attempts to enslave them, to free colonies and dependent countries from imperialist oppression, and civil wars. A special place is occupied by wars in defense of the socialist fatherland. These are the most just of all wars since they defend the system under which they live as well as their native land and national independence.

"Unjust wars are predatory wars organized by exploiting classes. Their goal is to seize the territory of others, defeat and enslave other peoples and working classes.

"Dividing wars into just and unjust is very important. It helps orient communists to each war. At the same time communists have never been pacifists, that is, against any war."

When one reads a statement regarding wars, he must ask whether the statement applies to just wars or to unjust wars—the context is most important. In brief, anyone challenging the Soviets is fighting an unjust war; and, any war in which the Soviets are involved is, from their position, a just war.

As stated in a 1975 *Communist of the Armed Forces* editorial:

"War still is explained by the Leninist principle of just and unjust wars. A war which might be unleashed by imperialism against the Soviet Union would be unjust and reactionary and a continuation of their predatory policies. From the socialist countries' side, it would be the most just and progressive war. It would be defending the most advanced social structure—socialism, for the benefit of all progressive mankind. Such wars might be those of the working classes against the bourgeoisie and wars of national liberation. Only wars in the interests of socialism can be just from the point of view of the working masses."

When the Soviets denounce warfare, call for declarations against weapons of mass destruction, and emphasize the need to work to make nuclear war impossible, the war they are talking about is the unjust war. Such statements do not mean that they are at all interested in having curtailed *their* capability to conduct just wars of similar scale and using similar weapons.

As stated most clearly by Colonel V. V. Larionov, a prominent Soviet authority on military affairs and composing editor of all three editions of Marshal Sokolovskiy's classic *Military Strategy:*

"As for the Soviet Union it has always resolutely opposed international agreements legalizing *unjust* wars. Our country is consistently struggling for general and complete disarmament. *That is, for the destruction of all material means for waging such wars.* [Emphasis added]"●

BOSWORTH MUZZLING FAULTED

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker I have previously commented on the Carter administration's improper if not illegal effort to prevent the Director of the Council on Wage and Price Stability, Mr. Barry Bosworth, from speaking out on pending wage contracts without clearance from a new wage inflation censorship committee to be headed by Labor Secretary Marshall. All this was done in an attempt to win favor with organized labor and stifle its criticism of the Administration. As I announced yesterday, the chairman of the House Banking Subcommittee on Economic Stabilization has agreed to my request to investigate the muzzling of Bosworth, and for this I am grateful.

Washington Post economic columnist Hobart Rowen commented at some length to his column last Sunday on this "clumsy effort to muzzle Barry Bosworth" and moreover on Marshall's stated views that wage restraints won't curb inflation. Bosworth, on the other hand, has warned that if strong unions don't moderate demands, higher unemployment, falling largely on minorities, will result.

The Sunday Washington Post also carried a news article to the effect that the Bosworth muzzling ploy has not succeeded in muzzling Meany, and that Labor Secretary Marshall has consequently unleased a harsh blast at Meany for his harsh criticism of the administration.

As the Washington Star editorial suggested last night, it's probably time for Meany "to go over to the White House and deliver another little lecture to the President. Who does Mr. Carter think is running the country, anyway?"

At this point in the RECORD, Mr. Speaker, I insert the articles I have referred to in my remarks:

[From the Washington Post, April 13, 1978]

ANTI-INFLATION PLAN CHANCES ARE ABOUT NIL

(By Hobart Rowen)

At a time when public concern with inflation is mounting, President Carter's latest contribution to dealing with the problem has been a clumsy effort to muzzle Barry Bosworth, his outspoken director of the Council on Wage and Price Stability.

It already has backfired, bringing in its wake a break between George Meany and Carter, and between Meany and Labor Secretary Ray Marshall, who used to be considered labor's best friend in Washington. And it is doubtful in any event that either Bosworth or anti-inflation chief Robert Strauss will be silenced.

Bosworth has been saying frankly that the administration has gotten little cooperation so far from labor, and that if the nation is required by organized unions next year to go through another round of 10 percent wage increases, "Forget about moderating inflation in the near future."

The wage-cost push generated by the big unions must be faced squarely by inflation fighters. Union labor has been getting for its workers at least one percent more per year in wages than unorganized workers.

Now Bosworth, who is 35, has run afoul of AFL-CIO President George Meany, who at 84 is just as feisty as he was 20 or 30 years ago. Meany told Carter about a month ago at the White House that Bosworth had been too one-sided in his criticism of the unions, and Carter agreed to do something to rein him in.

He sent Secretary of Labor Ray Marshall out to last week's AFL-CIO executive meeting in Chicago. And to Meany's delight, Marshall served up Bosworth's head.

"It will no longer be Mr. Bosworth acting by himself" on collective bargaining matters, Marshall said, explaining that he would be only one of five on a committee headed by himself "to coordinate our statements."

The other committee members include the powerful Robert Strauss, who supposedly is in charge of Carter's anti-inflation program; Economic Council Chairman Charles Schultze; and a relative unknown, Landon Butler, an assistant to Hamilton Jordan, who as far as anybody knows never has said anything publicly on these issues. And, oh yes, Bosworth. Marshall at first forgot to list him.

If Marshall's view prevails, as he emphasized in Chicago, the one voice coming through would be his own. Given Marshall's well-known distaste for government efforts to curb wage-price excesses, Bosworth's ability to speak out boldly, as he has on a number of occasions, would be ended.

In June, for example, he pointed out that if the strong unions don't moderate demands, their refusal will translate "into higher unemployment, and that will fall largely on minorities."

That's plain language, pretty accurate and pretty blunt, enough to have brought Bosworth earlier private warnings from Strauss that he may have been a bit indiscreet. Bos-

worth had shown with simple numbers how well Meany & Co. have been doing their job, getting bigger wage increases than unorganized labor.

"The value of a union card is higher than at any time in the post-war era," says a private economist. "The unions have found a way of protecting their members against inflation. They're saying, 'I'm all right, Jack—so leave me alone.' "

But in his remarks at Chicago, Marshall lined up with labor's classic position, asserting that, "As a general proposition, you're more likely to be able to restrain wages by restraining prices than the reverse."

There are very few economists—outside of the unions—who would agree with that, any more than they would with Marshall's incredible Chicago claim that, by keeping out low-cost steel imports, the administration is helping to contain inflation in steel prices. What it is doing is protecting American jobs at the cost of higher steel prices for consumers.

Already there are whispers around the White House that Marshall went too far in cozying up to Meany and laying a heavy hand on Bosworth. "Marshall screwed it up," says an authoritative voice.

Despite the effort to accommodate Meany, the labor leader turned on Carter and Marshall, slamming the administration's tentative settlement in the postal dispute. When Carter was reported to be "absolutely livid," Marshall held a press conference to deliver a first-ever statement criticizing Meany.

So everyone is mad at everyone else, and in this unstable situation I doubt that Marshall's "speak with one voice" committee, intended to force a lower profile on Bosworth, has any meaning. I can't visualize, in any event, that Bob Strauss would, let Marshall or anyone else be his spokesman. Taken as a whole, these events cast further doubt on the ability of the administration to cope with complex economic events. Chances that it can come up with a strong anti-inflation program seem about nil.

[From the Washington Post, Aug. 13, 1978]

LABOR SECRETARY REBUKES MEANY FOR CRITICISMS

(By Helen Dewar)

AFL-CIO President George Meany got a public rebuke from his closest ally in the Carter administration yesterday as relations between the White House and the veteran labor chief continued to deteriorate.

Meany's chilly response, tempered only slightly by a conciliatory gesture toward cooperating with the administration on economic problems, vowed: "I don't intend to change."

The rebuke came from Labor Secretary Ray Marshall, who confirmed that President Carter is angry at Meany's continual criticism of the administration and went on to say that he too considers the criticism "unacceptable."

Marshall's stand was significant. He has never before publicly criticized the 83-year-old labor leader, and has been designated by Meany as the only administration official he wants to deal with.

Meany did not back off his criticism. But he did announce formation of a top-level AFL-CIO committee to work with Marshall "from time to time" on economic problems, including inflation—one of the flashpoints in the long-smoldering hostility between Meany and the Democratic administration he helped elect.

Meany made clear that this did not signal any change in AFL-CIO opposition to wage restraints as an inflation remedy. "The AFL-CIO is not an agency of government," he said, "It cannot be used to hold down wages or control workers."

The administration should be trying to "solve the nation's economic problems," rather than "issuing statements and press releases or leaking views from anonymous sources," Meany asserted.

This was a reference to a high-level White House official quoted in yesterday's Washington Post as saying Carter was "absolutely livid" at Meany's repeated criticisms in the face of White House fence-mending efforts.

Marshall said both he and Carter were "personally disturbed" by Meany's criticism this week of a postal workers contract that includes only modest wage increases. Also, he said, it was "simply unacceptable" to say, as Meany did, that administration ineffectiveness contributed to defeat of the labor law revision bill.

"I don't want to have a public quarrel with George Meany," Marshall told reporters. "He is a good friend and a man with whom I usually find myself in agreement. But on this occasion I feel that his remarks were very unfortunate."

Marshall said it was a "mistake" for Meany to intervene in the postal contract ratification process, an act for which Meany has also been denounced by leaders of the AFL-CIO postal unions. The intervention, said Marshall, "could lead to a rejection of the contracts, more inflationary demands and increased labor tensions."

At the same time, however, Marshall tried to play down the seriousness of the rift, saying the administration and organized labor share common objectives in most areas.

There is no "break" between the administration and the AFL-CIO, said Marshall. An AFL-CIO official agreed, but other sources said the "chemistry" between Carter and Meany is so bad that poor relations are likely to continue—"probably to the mutual detriment," said one labor leader.

Administration aides said Marshall acted independently of the White House in calling yesterday's press conference but cleared his opening statement with presidential assistants, including media adviser Gerald Rafshoon, who reportedly urged Marshall to avoid any temptation to tone down the language. The words were uncharacteristically strong for the usually genial Marshall.

While Marshall often downplays the contribution of wages to inflation, he emphasized it yesterday, saying it would be a "serious misconception for anyone to believe that the administration can ignore the inflationary aspects of collective bargaining agreements." He said the government will stay out of the bargaining but will continue to push for constraints before the negotiations start.

[From the Washington Star, August 14, 1978]

MR. MEANY AND THE PRESIDENT

If there's a way to get on the good side of George Meany—and there may not be—the White House hasn't found it. Its latest conciliation of the labor chief probably invited the latest kick in the teeth administered by Mr. Meany.

Mr. Meany, who seems to think that organized labor bears little if any responsibility in the fight against inflation, persuaded President Carter the other day to muzzle Barry Bosworth, head of the Council on Wage and Price Stability, and give Labor Secretary Ray Marshall a larger role in White House anti-inflation policy.

Mr. Meany is down on Mr. Bosworth for having the temerity to suggest that unions ought to hold down wage demands. Mr. Meany's notion of inflation fighting is to keep the screws on business to hold down prices but to lay off unions and wage demands.

The AFL-CIO president visited the White House the other day and made his distaste for Mr. Bosworth known to President Carter—you may recall that a few weeks earlier Mr. Meany lectured the president on the advisability of the White House staying out of wage negotiations—and suggested that any further comments from Mr. Bosworth be funneled through a five-member committee headed by Labor Secretary Marshall. Mr. Meany likes Mr. Marshall because the labor secretary rarely, if ever, takes a position that union leaders could take issue with.

Having recently been subjected to a public tongue-lashing from United Auto Workers president Douglas Fraser, President Carter apparently didn't want more of the same from Mr. Meany and acceded to Mr. Meany's wish.

The pair had barely finished shaking hands on the agreement to create the new committee and muzzle Mr. Bosworth when Mr. Meany showed up at a union meeting in Chicago and began sniping at President Carter for alleged weakness and ineffectiveness in dealing with Congress.

Not only that, Mr. Meany denounced the new postal contract and suggested that postal workers ought to reject it. That set off sparks among several postal union chiefs who said that Mr. Meany didn't know what he was talking about and suggested that he butt out of their affairs.

Sources at the White House, where the postal contract was being held up as a model of union moderation and responsibility, reported that President Carter was "absolutely livid" over Mr. Meany's comments on the postal contract and his rebuke of the president, especially since the president had just caved in to Mr. Meany on the Bosworth-Marshall matter.

It's probably time for Mr. Meany to go over to the White House and deliver another little lecture to the president. Who does Mr. Carter think is running the country, anyway?

HUMAN RIGHTS

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 16, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I wish to comment on human rights. More than two centuries ago this country was founded on the proposition that all persons are equal before the law. While theory and practice may not have always converged in the implementation of this ideal, I believe that it is more than fair to say that the United States has made steady progress through the years in seeing this ideal turned into reality.

The Soviet Union does not have a similar tradition. The rights of Soviet citizens seem significantly more a function of who is in power and what they want than a function of objective, just laws. Theirs seems to be a government of men, not laws.

This disregard for the rule of law inherent in the Soviet system has been recently and dramatically demonstrated in the treatment given Anatoly Shcharansky, Viktoras Petkus, Aleksandr Ginzberg, Vladimir Slepak, Ida Nudel, Josef Begun, Craig Whitney of the New York Times, Harold Piper of the Baltimore Sun, and U.S. second secretary to the Soviet Embassy Raymond Smith. Be it on questions of emigration, of actively monitoring whether the Helsinki Agree-

ment is being enforced, of free speech, and/or of whether American diplomats are safe on American Embassy grounds, the Soviets have a means-ends mentality. The law presents no obstacles to desired goals as the law can be skewed to meet whatever demands the situation requires. Their law is not law, really—its a rubberband to be stretched or broken when the Soviet hierarchy wills.

The recent acts by the Soviets are particularly disturbing. These acts not only reemphasize the Soviets negative attitudes toward basic human rights but also seriously jeopardize what has popularly come to be known as "détente." To my mind, détente has never been and will never be a magic solution to the manifest problems separating the Soviets and ourselves. However, it does strike me that détente does mean the existence of a political atmosphere conducive to discussing and possibly resolving subjects of mutual interest.

Mr. Speaker, in the name of fundamental human rights, in the name of the rule of law, and in the name of mutual nuclear disarmament, I call upon the Soviets to rethink and revise their policies which led to their recent actions. It would be best for them, their citizens, and the world.●

RHODESIA'S PERIL

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Wednesday, August 16, 1978

● Mr. HARRY F. BYRD, JR. Mr. President, for an excellent analysis of the Rhodesian problem as it concerns the Congress, I commend to my colleagues an editorial from the Norfolk, Va., Ledger-Star written by its editor, George J. Hebert.

I ask that Mr. Hebert's editorial, "Rhodesia's Peril," be printed in Extensions of Remarks.

The article follows:

[From the Ledger-Star, August 11, 1978]

RHODESIA'S PERIL

(By George Hebert)

The House of Representatives appears to be the only Western body, possessing any real power in the situation, with a grasp of what's at stake in Rhodesia.

In contrast with the Senate and the version agreed upon yesterday by Senate-House conferees, the House proposal for eventual lifting of sanctions against Rhodesia omitted any requirement that the interim bi-racial government negotiate with "all parties" for a peace settlement and for agreement on Rhodesia's future.

The House simply called for removal of the sanctions by the end of the year if a freely elected government is installed by then, as prescribed in Salisbury's plan. This makes sense, though it would be better of course to end the sanctions now, as a gesture of encouragement to the orderly process of change which responsible Rhodesians have already set in motion. The black-white council now ruling the country, though suffering from internal strain and external siege, clearly holds the best hope of achieving a durable government under black-majority control.

To play the Senate game, the Carter game, the British game, the Third World game, is to insist on deals containing the seeds of Rhodesia's destruction as a democracy. For the faction Salisbury doesn't want to bring into negotiations consists of terrorist guerrillas, conducting their grisly operations under Soviet auspices. Their leaders are aiming for nothing short of total power in the turmoil created by the impending end of white rule.

It is bad enough that a supposedly humane group like the World Council of Churches should ally itself with these cutthroats, as the council did this week with an $85,000 grant. But for the American government to abet any such bloody-handed force as this, helping to erase all hopes of a free, viable Rhodesia, stuns the civilized mind.

Yet this is Washington's posture. And this is the policy which will remain the shame of the U.S. government, unless the breakthrough achieved in the House somehow becomes part of a larger return to sanity.●

STATEMENT OF PERSONAL EXPLANATION

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 16, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, I regret that I was not able to attend the House votes of Friday, August 11, 1978. I missed roll call No. 686, roll call No. 687, roll call No. 688, roll call No. 689, and roll call No. 690. Last Friday I was in Lexington, Ky., attending a Consortium Preliminary Planning Conference with the Congressional Rural Caucus and the American Association of Small Cities.

On rollcall No. 686, I would have voted "aye" on the motion to accept the Journal of Thursday, August 10. On rollcall No. 687, House Resolution 1307, the rule under which the civil service reform bill was considered, I would have voted "aye."

On rollcall No. 688, I would have voted "aye" on the move to resolve the House into the Committee on the Whole. Following this, I would have voted "aye" on the motion to table a motion to reconsider the previous vote—roll call No. 689.

On rollcall No. 690, I would have voted "aye" on H.R. 13007, an amendment to the Consumer Credit Protection Act, which would establish rights, remedies, and responsibilties for all participants in the utilization of electronic fund transfer services.●

A PRIEST FOREVER

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 16, 1978

● Mr. DORNAN. Mr. Speaker, at age 83, Maryknoll Father Francis J. Caffrey could be enjoying a life of leisure. However, being of the old school, he believes literally in the biblical exhortation, "Thou art a priest forever."

After ordination in 1924, Father Caffrey was assigned to missionary duties for many years. He later served as pastor of a large parish in northern California and was always involved in various civic activities. At the time of World War II, Father Caffrey represented the Maryknoll fathers as intermediary between the Army and the Department of Justice, during the internment of Japanese after Pearl Harbor.

Father Caffrey became known nationally when he hosted a radio program, "Sunday in Hollywood," on which he interviewed many of the most famous names in Hollywood—including Bing Crosby, Loretta Young, Perry Como, Danny Thomas, and countless other stars. Each celebrity related personal experiences of how a priest or other religious person had influenced his or her life. To this day Father Caffrey maintains many friendships in the motion picture industry.

In 1969 Father Caffrey met Jill Jackson Miller, wife of the late songwriter, Sy Miller. Jill and her husband had collaborated on many hit songs—including the beautiful, "Let There Be Peace On Earth—And Let It Begin With Me." In the 1960's Jill Jackson authored the beautiful and poignant poem, "Open Letter To Man", which Father Caffrey fell in love with. This dedicated priest began to distribute the Jill Miller poem and to date has spread 300 million—million—copies around the globe.

Father Francis J. Caffrey was recently recognized by the California State Assembly, for his many years of service to his church and to his community. May I second the accolades of the California legislators and top them off by having reprinted in our CONGRESSIONAL RECORD—where I am sure it will inspire additional millions of Americans—the beloved "Open Letter to Man":

I am woman.
I am your wife, your sweetheart, your mother, your daughter, your sister . . . your friend.
I need your help.
I was created to give to the world—gentleness, understanding, serenity, beauty and love.
I am finding it increasingly difficult to fulfill my purpose.
Many people in advertising, motion pictures, television and radio have ignored my inner qualities and have repeatedly used me only as a symbol of sex.
This humiliates me; it destroys my dignity; it prevents me from being what you want me to be . . . an example of beauty, inspiration and love . . . love for my children, love for my husband, love for my God and my country.
I need your help to restore me to my true position . . . to allow me to fulfill the purpose for which I was created.
I know you will find a way.

Thank Jill for writing this little treasure and thank you Father Caffrey for taking it to the world. God bless you both.●

TIME FOR REALISM ON CLEAN AIR ACT AMENDMENTS

HON. ROBERT L. F. SIKES
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 16, 1978

● Mr. SIKES. Mr. Speaker, a year ago, on August 4, 1977, both Houses of Congress passed the Clean Air Act Amendments of 1977, and they were signed 3 days later by President Carter to become Public Law 95–95. Without doubt, this was complex and controversial legislation. It had been several years in the making, and there were many stormy sessions in subcommittees, committees, and on the floor of this House as well as the other body.

Many people with diverse interests feared that the Clean Air Act amendments, having the single purpose of promoting clean air, might lead to sacrifice or frustration of other equally important national objectives, such as reducing inflation, unemployment and energy imports. Indeed, if such fears had not been expressed, Congress well might have written a law with the goal of clean air as the overriding imperative to the deterioment of our national welfare and our citizen's standard of living.

There is no denying that, if improperly interpreted, the Clean Air Act amendments could have such a drastic consequence. But, clearly, such was not the intent of Congress. Great pains were taken to assure that environmental, energy, economic, and other important aspects will be considered and balanced by the Administrator of the Environmental Protection Agency when implementing the act.

For example, in revising standards of performance for new or modified fossil-fuel-fired stationary sources, the Administrator is specifically directed to determine the best technology that has been adequately demonstrated—and cost, energy requirements, and environmental impacts on media other than air expressly must be considered in making that determination. In other words, despite expressed fears while the amendments were being debated, the Administrator's decision may not be made in a "clean-air vacuum"; it must reflect balanced consideration of the other important national objectives delineated in the law.

Such careful statutory wording gave me assurance, and I am sure it did most of my colleagues who, as I, voted for the House bill and agreed to the conference report. We were satisfied that jobs, consumer costs, our balance of payments and standard of living would not be sacrificed on the altar of unnecessarily ultraclean air.

It appears, however, that we may have been too sanguine in our belief that EPA would follow the congressional intent and clear mandate. The Agency's draft proposal of revised new source performance standards for coal-burning electric utility boilers does not reflect consideration of the relevant facts nor take advantage of the statutory flexibility that was provided in the legislative history so that careful balance among the competing national objectives can be struck.

The Department of Energy commented extensively on the EPA proposal, made a counterproposal that more nearly follows Congressional intent, and carefully documented the different impacts of each proposal. DOE makes a compelling case that available data on currently operating flue-gas desulfurization systems do not show that the EPA proposal can be complied with in practice. Hence, despite the most determined operation and maintenance efforts, utility managements would be subject to drastic sanctions.

The EPA proposal would result in 0.3 to 1 million tons per year less sulfur dioxide emission than DOE's proposal—but at an increase cost of $13 to $24 billion through 1990. The cost to consumers under either proposal will be considerable, but it appears that EPA gave little, if any, consideration to cost-effectiveness.

EPA's proposal would increase utility oil consumption 300,000 to 600,000 barrels per day more than DOE's, while coal consumption under EPA's proposal would be 44 to 83 million tons per year less than under DOE's. It is difficult for me to reconcile EPA's proposal with the national effort to reduce oil consumption and increase coal use, or to comprehend how they resolved the legal mandate to consider energy requirements.

I have written President Carter to express my concerns about the EPA proposal, and to urge that all competing important national objectives be weighed and balanced, as Congress intended, before final rules are promulgated.

For my colleagues who may want to read a carefully written, objective presentation of the several viewpoints on this matter, I commend the article, "Billions at Stake as U.S. Weighs Clean-Air Rules," by Charles Mohr in the August 2, 1978, New York Times, in the RECORD:

BILLIONS AT STAKE AS U.S. WEIGHS CLEAN-AIR RULES

(By Charles Mohr)

WASHINGTON, August 1.—The question of how much cleansing to require of the sulfurous smoke that will be emitted by a new generation of electric power plants has become a subject of intense debate among Government agencies and special interest groups. Billions of dollars, as well as considerations of clean air, are at stake.

Douglas M. Costle, the administrator of the Environmental Protection Agency, must issue by Sept. 12 proposed "new source performance standards" for new or modified coal-fired power plants. One environmentalist calls it "perhaps the most significant rule-making action" ever taken to enforce the law restricting air pollution.

Industrial and utility spokesmen see the decision as a critical test of whether the Carter Administration is "serious" about controlling inflation through Government actions.

The E.P.A. is leaning toward stringent standards that would require the installation of highly efficient and highly expensive gas "scrubbers" even if a power plant uses relatively clean, low-sulfur Western coal.

The Department of Energy is vigorously arguing for lower standards, saying that its proposal would save as much as $24 billion for utilities from 1983 to 1990, would reduce oil imports and would ease the national transition from oil to coal.

The economic advisers who constitute President Carter's anti-inflation team are certain to subject the regulation to the detailed economic review that they are empowered to make, and business leaders have already gone to the White House to urge relaxation of standards.

WARNING ON LAWSUITS

On the other hand, the National Resources Defense Council, an environmental organization, has warned Mr. Costle that he may face "endless litigation" if standards are not stringent.

The decision will also affect the share of the market that Western coal mines will be able to capture from Eastern and Middle Western fields that produce dirtier, high sulfur fuel.

In the 1977 amendments to the Clean Air Act, Congress required that the new source performance standards be based on "the best technological system of continuous emission reduction" of pollution.

The amendments also required Mr. Costle to set standards for the percentage of sulfur oxides that must be removed from the smoke of the new plants and an "emissions standard" or limit on the amount of pollutants for each unit of heat generated.

An E.P.A. staff draft proposal, which has aroused the ire of critics, suggested; that single and fixed standards be set no matter what kind of coal is burned. The draft also called for reducing the sulfur dioxide pollution from plants by 85 percent average daily. This would, experts believe, result in an average annual reduction of 90 percent.

It would also require that a utility would have to remove the same percentage of pollutant from low-sulfur coal, by installing the same kind of gas scrubbers required for high sulfur coal, even though the Western fuel contains significantly less sulfur.

CONCESSION ON SCRUBBING

The Department of Energy and other critics concede that the language of the 1977 Clean Air Act amendments requires that some degree of scrubbing be done in new plants, even those using Western coal. But they are recommendations that a "sliding scale" be adopted that would permit as little as 40 percent of the sulfur dioxide from cleaner coal to be removed.

In its "alternative proposal," the Energy Department is also recommending that utilities be required only to achieve an 85 percent reduction for high-sulphur coal averaged on a monthly basis.

This is easier, and thus cheaper, to achieve than the daily average suggested by E.P.A. and would reduce utility company fears about "reliability" of the highly efficient scrubbers that the environmental agency draft would require.

In a letter to Mr. Costle on July 6, John F. O'Leary, the Deputy Secretary of Energy, said that his department was concerned about "the potentially inflationary impact" of the E.P.A. draft, the potential for increasing oil consumption and "the risk of widespread noncompliance" by the utilities.

MOVES FOR "BEST BALANCE"

"We recognize that competing objectives are at stake, and that a proper balancing of environmental, economic and energy objectives is a challenging task," Mr. O'Leary wrote. "Our concern," he said, is that the E.P.A. staff's proposed revision in new source performance standards, "does not strike the best balance."

The "proposed" rule, which Mr. Costle must issue next month under a court-imposed deadline, will be open to an extended period of public comment, and the "final" rule may not be published until next year.

Because of the long construction times for new power plants, the new units affected

by the performance-standards will not begin to go into production until 1983 or 1984. As many as 250 large generating units of about 600 megawatts each may be activated from 1983 to 1990.

The Department of Energy contended in its letter to Mr. Costle that the department alternatives to the E.P.A. plan would save from $11 billion to $24 billion in that period, with further savings after 1990.

The environmental agency economic analysis, however, is that the more stringent standards would raise the cost of pollution control by an average of $700 million a year.

THE MERITS OF THE COST

There is also argument about how much cleaner the air would be in either case and whether the more stringent controls are worth the cost. One estimate is that by 1990 the total national emissions of sulfur dioxide would be 20 million tons under the Energy Department plan, and 19 million tons under the environmental agency draft.

David G. Hawkins, the E.P.A. assistant administrator for air programs, said that the reduction in pollution was "masked" by the continuing pollution of existing power plants operating under the lower present standards.

Another major item of contention is the effect of varying proposals on oil consumption. Partly because utilities tend intensely to dislike scrubbers and to distrust their operational reliability they may go slowly in shutting down existing oil-fired plants, some experts believe.

The Energy Department analysts contended that the E.P.A. staff proposal "could increase utility oil consumption in 1990 by 400,000 to 700,000 barrels per day whereas our proposals would lead to an increase of only 100,000 barrels per day."

SIGNAL FROM ADMINISTRATION

In a July 28 letter to Stuart E. Eizenstat, President Carter's chief domestic policy assistant, George C. Freeman, attorney for the utility industry's Air Regulatory Group, said that the forthcoming decision on performance standards would be the first "signal to the American people, business and Congress, as well as to our allies, of the Administration's willingness to accept the hard tradeoffs necessary" to honor Mr. Carter's pledges made at the recent economic summit conference in Bonn.

In a telephone interview, Mr. Freeman, said, "This is the central issue that will show whether the Administration is serious about controlling inflation and oil imports."

Mr. Freeman said that spokesmen for the powerful Business Roundtable had also told Mr. Eizenstat that it was a test of whether Government would make the difficult "tradeoffs" being asked of business.

In a letter to Mr. Costle, however, Richard E. Ayres, the senior staff attorney of the Natural Resources Defense Council, strenuously urged that the strict standards be adopted, saying that the Energy Department proposals "are contrary to the language and intent" of Congress and would "degrade the nation's air quality," limit economic growth by using up air pollution "increments" and threaten public support for coal conversion, a key part of Mr. Carter's national energy plan.

Mr. Ayres also argued that the weaker standard would "restore once again a strong incentive" for Middle Western, Eastern and Southeastern utilities to buy Western coal rather than locally available high sulfur coal. This, he argued, would frustrate one intention of the 1977 Clean Air Act amendments.

Mr. Costle last Friday inspected some highly reliable and successfully operated scrubbers at the Cane River plant of the Louisville Gas and Electric Company. During his visit he said that the forthcoming decision would be "the most significant environmental judgment that I'll make this year."

It is a debate, he suggested, as to "what degree environmental costs add to utility costs," but he added that "I think environmental costs are acceptable." As for fighting inflation and cleansing the air, Mr. Costle said, "you can do both."

But his final decision—which he is careful to conceal—will come only after continued and strong pressure from within and without the Government.●

THE UDALL RECORD—1978

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 16, 1978

● Mr. UDALL. Mr. Speaker, I am once again printing here in the CONGRESSIONAL RECORD a list of my votes in the House of Representatives. The votes listed here cover the 95th Congress, 2d session, up to and including August 15, 1978.

The list is arranged as follows:

Official roll-call number;
Number of the bill or resolution;
Short description of the measure under consideration;
Date of the described action;
My vote on the motion (Y—Yes; N—No; NV—Not voting);
The overall vote of the Arizona delegation (in the order: Yeas-Nays-Not voting);
An indication whether the measure passed or failed; and
The total vote.

This is not an all-inclusive list. In the interests of time and space, I have left out purely procedural questions such as votes to approve the Journal of the House, adoption of noncontroversial rules, and motions to resolve into the Committee of the Whole House.

The descriptions of the measures being voted on are necessarily somewhat short, and I am quite sure that many of my constituents will have additional questions about the details of some of these measures. I invite them to either visit my district office, at 301 West Congress in Tucson, where I have more information, or to write me with specifics.

The list follows:

(2) H.R. 2329. Fish and Wildlife amendment to delete language allowing warrantless searches and to substitute language permitting such activities if the offense is committed in the officer's presence or view. January 19, 1978. Y(2–1–1–) Passed 215–131.

(3) H.R. 2329. Fish and Wildlife bills to improve the enforcement of fish and wildlife laws. January 19, 1978. Y(2–1–1) Passed 292–59.

(5) H.R. 9165. Motion to pass a bill authorizing $10,000 for a bust of George C. Marshall. January 23, 1978 Y(2–1–1) Passed 351–22.

(6) H.R. 8771. Bill to grant divorced or separated Civil Service spouses rights in Civil Service pensions. January 23, 1978. Y(3–0–1) Passed 369–7.

(7) H.R. 9471. Provides Civil Service retirement credit for certain federal employees that were interned in relocation camps during WWII. January 23, 1978. Y(3–0–1) Passed 366–12.

(8) H.R. 9169. Increase permissible federal loan guarantees in connection with fishing vessels. January 23, 1978. Y(2–1–1) Passed 309–68.

(10) H.R. 8811. Enables Tax Court judges to revoke their participation in the Tax Court retirement system. January 24, 1978. Y(3–0–1) Passed 399–1.

(11) H.R. 7662. Authorizes $6 million to study administrative practices and make recommendations to improve efficiency. January 24, 1978. Y(2–1–1) Passed 292–103.

(12) S. 1585. Prohibits use of children under 16 in explicit sexual conduct for use in material for interstate commerce, and prohibits the interstate transportation of children under 18 for use in live sex shows or prostitution. January 24, 1978. Y(3–0–1) Passed 401–0.

(13) H.R. 1614. Amends the Outer Continental Shelf Act of 1953 to provide alternative bidding systems, grants to coastal states and environmental controls. January 25, 1978. Y(2–2–0) Passed 247–158.

(15) H.R. 1614. Retains the existing bidding system for Outer Continental Shelf lands at least 50% of the time. Provides for sharing of offshore revenues with coastal states. January 26, 1978. N(3–1–0) Rejected 187–211.

(16) H.R. 1614. Limits use of alternative bidding system for offshore territories. January 26, 1978. N(3–1–0) Rejected 143–229.

(18) H.R. 5798. Authorizes $1 million for the office of Rail Public Counsel in the Interstate Commerce Commission. January 30, 1978. Y(2–2–0) Passed 318–44.

(19) H.R. 5646. Enables the U.S. Railway Association to loan funds to Consolidated Rail Corporation. January 30, 1978. Y(2–1) Passed 314–50.

(20) H.R. 9851. Permits charter airlines to provide all-cargo air service under the provisions of 1977 air-cargo deregulation law. January 31, 1978. Y(4–0–0) Passed 403–0.

(21) H.R. 1614. No federal agency may do exploratory drilling. January 31, 1978. Y(2–1–1) Passed 328–77.

(22) H.R. 1614. Amendment stating that cancellation of lease should not foreclose any claim for compensation as required by the Constitution or any law. January 31, 1978. N(3–1–0) Passed 208–194.

(23) H.R. 1614. Requires alternative bidding system at least 10 percent and not more than 30 percent of lease sales. January 31, 1978. N(3–1–0) Rejected 196–207.

(24) H.R. 1614. Requires alternatives bidding system at least 20 percent and not more than 50 percent of lease sales. January 31, 1978 N(3–1–0) Passed 219–188.

(26) H.R. 8200. Substitute amendment to H.R. 8200 to retain the existing court structure for dealing with bankruptcies and other measures. February 2, 1978. Y(1–3–0) Rejected 146–262.

(27) H.R. 1614. Authorizes Attorney General and the Federal Trade Commission to conduct antitrust investigations of offshore lease proposals. February 1, 1978. Y(1–3–0) Passed 241–162.

(28) H.R. 1614. Provides that tracts sold by the alternative bidding systems be randomly selected. February 1, 1978. Y(1–3–0) Passed 225–174.

(30) H.R. 1614. Deletes section requiring that U.S. nationals be hired for offshore oil jobs. February 2, 1978. N(0–3–1) Rejected 118–280.

(31) H.R. 1614. Requires that U.S.-built equipment and nationals be used in OCS jobs. February 2, 1978. N(0–4–0) Rejected 201–208.

(33) H.R. 1614. Provides that 20 percent of OCS Federal revenues, up to $200 million annually, be shared with the coastal States. February 2, 1978. N(1–2–1) Passed 279–120.

(34) H.R. 1614. Deletes requirement that coastal States must have a federally approved coastal zone management plan. February 2, 1978. N(1–1–2) Rejected 159–230.

(35) H.R. 1614. Bill to amend the 1953 law governing oil and gas exploration on the Outer Continental Shelf. February 2, 1978. Y(1–2–1) Passed 291–91.

(36) H.R. 9434. Bill to raise ceiling of 1978 Medicaid payments to Puerto Rico, the Vir-

gin Island, and Guam. February 6, 1978. Y(1–3–0) Passed 253–106.

(37) H.R. 8336. To establish a Chatahoochee River National Park. February 6, 1978. Y(3–1–0) Passed 323–41.

(39) H.R. 6362. Requires sealed bidding for timber sales. February 6, 1978. N(0–4–0) Rejected 136–239.

(40) H.R. 6362. Allows Agriculture Secretary to determine the method for sale of timber. February 6, 1978. Y(4–0–0) Passed 295–78.

(42) H.R. 7843. Creates 110 federal district court judgeships and 35 new appeals court judgeships. February 7, 1978. NV(3–0–1) Passed 319–80.

(43) H.R. 6805. Provides for the consideration of a bill to establish an Agency for Consumer Protection. February 7, 1978. Y(1–3–0) Passed 271–138.

(44) H.R. 6805. Creates office of Consumer Counsel within each of 23 major federal departments. February 7, 1978. N(1–3–0) Rejected 93–313.

(47) H.R. 6805. Requires the proposed Office of Consumer Representation to give the President 30 days' advance notice of its intent to seek judicial review. February 8, 1978. N(3–1–0) Rejected 195–219.

(48) H.R. 6805. Deletes from the bill (H.R. 6805) the exemption covering certain labor proceedings before the National Labor Relations Board. February 8, 1978. N(3–1–0) Rejected 138–274.

(49) H.R. 6805. Deletes from the bill (H.R. 6805) the exemption covering DOA proceedings concerning loans and other matters. February 8, 1978. N(0–4–0) Rejected 105–309.

(50) H.R. 6805. Bill to establish an independent office of Consumer Representation. Febraury 8, 1978. Y(1–30) Rejected 189–227.

(52) H.R. 3813. Motion to send H.R. 3813, the Redwood National Park bill back to the Committee on Interior and Insular Affairs with instructions. February 9, 1978. N(3–1–0) Rejected 116–247.

(53) H.R. 3813. Passage of the bill to establish a Redwood National Park. February 9, 1978. Y(1–3–0) Passed 328–60.

(54) H.R. 3454. Enlarges the National Wilderness Preservation System. February 9, 1978. Y(2–2–0) Passed 333–44.

(55) H.R. 2554. Enables the U.S. Court of Claims to reconsider Sioux claims against the U.S. February 9, 1978. Y(4–0–0) Passed 337–17.

(56) H.R. 7843. Provides for merit selection of federal court judgeships. February 9, 1978. Y(4–0–0) Passed 321–19.

(58) H.R. 8336. Requires the state take over of the Park in two years. February 14, 1978. N(2–1–1) Rejected 119–230.

(59) H.R. 8336. Establishes Chattahoochee River National Park. February 14, 1978. Y(1–2–1) Passed 273–79.

(60) H.R. 5503. Reduces the number of high-grade military officers. February 14, 1978. Y(3–0–1) Passed 351–7.

(62) H.R. 4544. Adoption of conference report to liberalize black lung benefits. February 15, 1978. NV(0–2–2) Passed 264–113.

(63) H.R. 9370. Authorizes $72 million for aquaculture development. February 15, 1978. NV(0–2–2) Passed 234–130.

(65) H.R. 10970. Emergency motion under suspension of the rules to pass the bill authorizing funds for the repair of weather damaged roadways and rails. February 21, 1978. N(3–1–0) Passed 274–137.

(66) H.J. Res. 649. Authorizes White House conferences on the Arts and Humanities. February 21, 1978. Y(2–2–0) Passed 341–65.

(67) H.R. 10569. Motion to amend the 1970 Alcohol & Drug Abuse Act. February 21, 1978. Y(4–0–0) Passed 409–0.

(68) H.R. 10606. Motion to suspend the rules and authorize funds for the Hubert Humphrey Institute of Public Affairs. February 21, 1978. Y(2–2–0) Passed 356–53.

(71) H.R. 9375. Motion to table the bill providing for rescinding funds for the production of the B–1 bomber. February 22, 1978. N(3–1–0) Rejected 172–244.

(72) H.R. 9375. Bill to rescind $462 million appropriated in 1977 for the production of the B–1 bomber. February 22, 1978. Y(1–3–0) Passed 234–182.

(76) H.R. 9214. Limits salary of director of IMF to $50,000. February 23, 1978. Y(1–2–1) Passed 253–141.

(77) H.R. 9214. Allows the U.S. to participate in a new $10 billion IMF. February 23, 1978 Y(1–2–1) Passed 267–125.

(78) H.R. 9179. Prohibits the Oversees Private Investment Corporation from making any loans to the National Finance Corporation of Panama. February 23, 1978. N(2–1–1) Rejected 166–199.

(79) H.R. 9179. Prohibits OPIC from providing loans to expand exportation of palm oil, sugar and citrus crops. February 23, 1978. N(2–1–1) Passed 191–167.

(80) H.R. 9179. Extends the operating authority of OPIC. February 23, 1978. Y(2–1–1) Passed 191–165.

(83) H.R. 9757. Bill to delay the increase of grazing fees. February 24, 1978. Y(3–0–1) Passed 257–47.

(84) H.R. 3377. Enables the Wichitas to file land claims. February 24, 1978. Y(2–0–2) Passed 293–1.

(85) H.R. 3377. Bill to enable the Wichita Tribe to file land claims. February 24, 1978. Y(1–2–1) Passed 226–68.

(87) H. Con. Res. 464. Allows D.C. voters to initiate laws. February 27, 1978. Y(3–0–1) Passed 321–24.

(88) H. Con. Res. 471 Allows D.C. voters to recall elected officials. February 27, 1978. Y(3–0–1) Passed 350–4.

(90) H.R. 9622. Abolishes "diversity of citizenship" as grounds for requesting federal jurisdiction. February 28, 1978. Y(3–0–1) Passed 266–133.

(91) H.R. 3816. Strengthens FTC's powers. February 28, 1978. Y(1–2–1) Rejected 146–255.

(92) H.R. 5981. Grants $3.1 million to the American Folklife Center. February 28, 1978. Y(2–1–1) Passed 306–80.

(97) H.J. Res. 554. Proposes an amendment to the Constitution that D.C. be given full voting rights in Congress. March 2, 1978. Y(1–3–0) Passed 289–127.

(100) H. Res. 957. Authorizes $400,000 for House Committee on Veterans Affairs. March 3, 1978. Y(1–0–3) Passed 336–1.

(101) H. Res. 953. Authorizes $275,000 for calendar year 1978 for the House Committee on the District of Columbia. March 3, 1978. Y(1–0–3) Passed 318–15.

(102) H. Res. 1012. Authorizes $49,500 for expenses of investigation and studies of the House Committee on Rules. March 3, 1978. Y(1–0–3) Passed 321–13.

(105) H.J. Res. 715. To designate May 3, 1978 as "Sun Day" to promote and call attention to solar energy. March 6, 1978. Y(3–0–1) Passed 348–7.

(107) H.R. 10551. Bill to continue fiscal 1978 funding and waive certain requirements of Title I of the 1974 Elementary and Secondary Education Act for some schools that participated in demonstration programs. March 7, 1978. NV(1–0–3) Passed 404–0.

(110) H.R. 11180. Amendment to delete title II, which would establish the debt limit through concurrent budget resolution in the future. March 7, 1978. NV (0–1–3). Passed 277–132.

(111) H.R. 11180. Passage of the bill to increase the debt limit to $824 billion through March 1, 1979. March 7, 1978. NV(0–1–3). Rejected 165–248.

(112) H.J. Res. 746. Appropriate $13.1 million for the operation of the Southwestern Power Administration for fiscal 1978. March 7, 1978. NV(0–2–2) Passed 353–50.

(113) H. Res. Authorizes $2 million for calendar year 1978 for the House Committee on Public Works and Transportation. March 7, 1978. NV(0–1–3) Passed 399–1.

(118) H.R. 50. Demand for yeas and nays on the motion to order the previous question on the adoption of the rule providing for House floor consideration of the Full Employment Act. March 8, 1978. Y(3–0–1) Passed 371–36.

(125) H.R. 50. Amendment to require the president to include in his economic report goals for reasonable price stability and to formulate policies to reduce inflation. March 9, 1978. NV(1–2–1) Passed 277–143.

(126) H.R. 50. Substitute amendment to require the President beginning with the third year after passage of the bill to include in his economic report goals for reasonable prices and to define that goal as reduction of inflation to 3 percent within five years of enactment. March 9, 1978. N(3–1–0) Rejected 198–223.

(127) H.R. 50. Amendment to require President's economic report to distinguish permanent and temporary employment. March 9, 1978. N(3–1–0) Passed 239–177.

(128) H.R. 50. Amendment to include maintenance of farm income at 100 percent of parity at market price among the goals of the President's economic report. March 9, 1978. Y(3–1–0) Passed 264–150.

(129) H.R. 10982. Bill to rescind $55,255,000 in fiscal 1978 appropriations. March 10, 1978. Y(3–1–0) Passed 318–0.

(131) H.R. 6635. Demand for a second on the motion to suspend the rules and pass the bill to allow the interest rates paid on U.S. retirement plan and individual retirement bonds to be increased to the rate paid on U.S. series E savings bonds. March 13, 1978. Y(4–0–0) Second ordered 372–1.

(132) H.R. 7814. Motion to suspend rules and pass the bill to allow federal agencies to experiment with flexible work schedules. March 13, 1978. Y(1–3–0) Rejected 242–141.

(133) H.R. 10126. Motion to suspend the rules and pass the bill to establish a program to increase part time career employment within the Civil Service. March 13, 1978. Y(1–3–0) Passed 294–84.

(134) H.R. 9146. Motion to suspend the rules and pass the bill to provide for a one-house veto within 60 days of proposed postal service changes. March 13, 1978 Y(4–0–0) Passed 371–6.

(135) H. Res. 1010. Motion to recommit the resolution to the House Administration Committee with instructions to require $300,000 of the $1,482,805 be earmarked for the committee's internal security functions. March 13, 1978. N(3–1–0) Rejected 161–216.

(136) H. Res. 956. Motion to recommit the resolution to the House Administration Committee with instructions to cut funding for the committee from $2.5 million to $600,000. March 13, 1978. N(3–1–0) Rejected 182–198.

(137) H. Res. 956. Resolution providing $2.5 million for activities of the House Select Committee on Assassinations for the remainder of the 96th Congress. March 13, 1978. Y(1–3–0) Passed 204–175.

(143) S. 1671. Demand for a second on the motion to suspend the rules and pass the bill to designate the Custer and Gallatin National Forests in Montana as the Absaroka-Beartooth Wilderness. March 14, 1978. Y(4–0–0) Passed 380–20.

(144) H.R. 810. Demand for a second on the motion to suspend the rules and pass the bill to permit private foundations to pay foreign travel expenses of government officials. March 14, 1978. Y(4–0–0) Passed 387–2.

(145) H.R. 2028. Demand for a second on the motion to suspend the rules and pass the bill to permit individuals aged 18 and older to produce beer and wine for personal use. March 14, 1978. Y(4–0–0) Passed 388–3.

(146) S. 1671. Motion to suspend the rules and pass the bill to include 904,500 acres of national forest lands in the National Wilderness System and call it the Absaroka-Beartooth Wilderness. March 14, 1978. Y(3–1–0) Passed 405–7.
